Supply of War Materials.

Washington, Aug. 7.—Hon. John Goodney, commi general of the United States at Shanghai, has rendered court which will be of far reaching importance during the continuance of the war in the Philippines. The case was in relation to the steamer Abbey, charged with taking arms from Can ton to Luzon. The owner of the vessel gave a bond that the ship should land the arms purchased at Singapore, but he did not do so. The bond was de-manded by the Chinese customs aupoint be paid.

The effect of the decision of Mr. Goodnow reaches much beyond the more fact of being judgment for the plaintiff, with the penalty of the bond and the costs of the suit. Hitherto the American forces at Manila have had to fight against FIIIpinos well armed with modern rifles and gons, and it is no secret that the majority of these arms have been landed in the Philippines from Chinese ports. Yester-day morning Snell went to his victim's house, and entering at the front door passed on through the middle room, where the girl was sleeping, to the dining room door. While standing at the door the mother ordered him out of the house. Snell started to go, passing again through the room where the child was. Cuba would mean a black republic in the near future and that the only means of preventing it will be the incorporation of the island as a possession of the United States, as a state territory or colony, leading to Amerijudgment Cuba is otherwise doomed to become another Hayti.

His assertions are based upon the fact that in a population not exceeding 1,250,000, with a voting capacity of 400,000, the Spaniards number only 50,000, the white Cubans 125,000, those claiming to be white 25,000, while the number 200,000 atrength. His theory is that more than half the Spaniards, under a system of universal suffrage, would not vote, and that the number who would vote must inevitably diminish each year. The Cubans, who will no longer ave the fresh blood of Spanish immigrants to draw upon, will gradually grow fewer, while on the other hand the blacks, who thrive in this climate and are big, strong and healthy, will increase at a rapid rate. The result will be, he believes, that in 50 years there will be more than 2,000,000 negroes in the island and less than 250,-000 others. "Even in the first elec-tion," he declares, "the blacks could carry everything their own way if they knew their strength."

STRENGTHENING THE DOMINION.

The British Government to Increase the Fighting Force at Victoria. Victoria, B. C., Aug. 7.—The im-perial government and the dominion authorities have decided to increase both the regular military and militia forces on this station, the Pacific coast depot of the British army and navy. Coming at a time when the relations between Canada and the United States are acknowledged by Premier Laurier to be rather strained over the Alaskan boundary question, it looks as if Britain and Canada were determined to assert their claim to those portions of Alaska demanded by Canada by force of arms

if necessary. Some of the additional garrison has already left England, and others will come out in big squads within the next few mouths. The cost of the new military post, half of which is to be borne by the dominion government and half by the British authorities, will be about \$125,000. It is also said the naval forces will be increased.
