PIANO TALK!

We have added to our list of Piano Agencies that of Behr Bros. & Co., of New York. Their first instrument in town is now on exhibition at our warerooms, and we invite the public to come and inspect it. It is an upright instrument and is manufactured by the firm that introduced the "Muffler" which is also shown in this piano. They are sold by all the prominent dealers in the country as a "leader." These pianos have a deserved reputation for their full, pure and sweet tone, and their great re-Hability and artistic case work. To the purchaser of this instrument a great reduction in price will be made to introduce it.

The question of allowing foreigners to purchase and own land in Japan is causing considerable discussion in po-litical and newspaper circles of the mikado. Many of the leading news-papers favor the proposition, and argue that the future of Japan's commercial success depends upon the introduction of foreign capital and say that this capital will not come unless the title can be acquired on land on which their place of business is erected and with out which there would be no security for capital. The government has decided to sub-

mit the proposition to various cham-bers of commerce of the leading cities

The Seoul correspondent, writing to the Japan Mail under date of Oct. 6,

The Russian government considers that the Massampo incident is attributable to a fault on the part of the local officials. Should Corea desire to avert any demands from Russia for land she will do well to take care that no further sales of land are made to Japanese subjects. The Russian government will not retire in slightest degree from the position here assumed by it."
