cessful Tests of an Invention That Outdoes Marconl's System, Chicago, Nov. 28.-Professor W. S. ohnson and C. L. Fortler, of Milwankee, yesterday made a successful test in this city of the wireless tele-They succeeded in telegraph graph. ing, without wires, through a suite of seven rooms with all the doors closed and through seven walls. Another test was made, when the signals were conveyed through three fireproof vauits and an ordinary telegraph switchboard, in which 30, wires were connected up and about 40 dead wires were located. Notwithstanding the fact that this switchboard contained live wires, the current passed through all of the vaults and through this board. This is one of the most severe tests that has ever been given wireless telegraphy. In a third successful test the sending instrument was placed inside of one of the steel vaults and both doors were closed and the combination lock turned. The signals were then transmitted clearly from the inside of the vault to an aujoir ing room.

The processor claims that his inven-tion is materially different from that of Marconi's, in that the instruments can be constructed to be carried on horseback and the ready for opera-tion within a few moments.

RUMORS OF A CLOSER UPRISING.

Our Officiais in Havana Discredit the Story of a Proposed Revolt. Havana, Nov. 28.—Nothing is known at headquarters in this division or in General Lee's to justify the report published in the United States and cabled back here that a thousand armed Cuban insurgents have taken to the woods in the province of Pinar del Rio and that a general uprising against the Americans has been planned for Thanksgiving day. The story is ab-solutely discredited by the American authorities, who say it is impossible that anything of the kind should have happened or should be in prospect without knowledge of it coming to

some army post. It is a fact, however, that many Americans here believe that if nothing is done toward giving the Cubans some definite assurances, if not a precise date, regarding the independence of the island, there will be a rising of some sort, although opinions differ widely with regard to what it will amount to. Some believe that the mal contents will be practically bandits, easily controlled by a few troops. Others hold that the rising would be formidable and would call for a large American force.

The members of the notification, withdraws her declara-tion that she is not carrying on war, cabinet have done likewise, and the but is merely subjugating rebels. The powers are now in a position to send administration will observe a period of mourning. not only Red Cross agents, but military agents as well.

#### Give the Children a Drink

Last November Mr. Joseph James, painter, of 325 W. Pearl St., Indianapo-lis, Ind., was at death's door with quick consumption. Wasted to a skeleton; his lungs a mass of ulceration; his death was hourly awaited by his doctor called Grain-O. It is a delicious, appetizing nourishing food drink to take the place or coffee. Sold by all grocers and liked by all who have used it because when properly prepared it tastes like the finest coffee but is free from all its injurious properties. Grain-O aids digestion and strengthens the nerves. It not a stimulant but a health builder, and chiltren, as well as adults, can drink it with great benefit. Costs about 34 as much as coffee

Jersey City, strikes another blow at the divorce industry. It holds that residence in the state must be bona fide and characterized by the intentiou COMMA BACILLUS.
