Representative Fuerth's bill specifies that no person, firm or corporation, shall sell wines, malt or brewed liquors within the state by sample, without first having obtained a license therefor. Such licenses are to be granted by the state treasurer and will be known as "Sample Liquor Merchants Licenses." Licenses will cost \$100. Convicted violators of the statute will be fined not less than \$100 nor more than \$1,000.

The building will be spacious in length and breadth, but economy will be observed in the matter of height, the plans providing for only one story. There will be no windows, light being admitted by a skylight roof. There has been considerable speculation as to where the new factory would be located. In an hour and twelve and a half minutes, Omar had won, having out-turned by several hundred evolutions, the greatest "dervish stunt" on record, in a given period of one hour, the time allotted for each. Southwestern Texas is largely the mountainous region of that immense State—nearly six times as great in territory as Pennsylvania—and has been altogether the slowest in development. **Maple Sugar.**  
The following suggestions are made to maple sugar producers by one who has had large experience in the sale of that product, and hence knows the requirements of the market and the style of goods most easily disposed of at the highest prices. He recommends that sugar be put up in the proportion of one-third crumb, and the balance in brick or tub. Any change in these proportions should be in favor of the tub and brick forms, as there is a strong tendency shown to give these kinds the preference over the crumb, and the producer has less labor and some gain in weight by putting his product up in solid form. The best of care should be taken to put out nothing but strictly first-class, absolutely pure sugar, in nice clean new packages of uniform quality as nearly as possible, and great care taken to prevent its being burned or scorched.
