It lies near the Reuscher farm formerly known as the "Courtright Place." "Woodside" will soon be a very popular summer resort as the host and hostess are both very hospitable and well-known for many miles around. This pretty place is surrounded by woods, hence its name. The Coolingwood tract being on the one side of it. It is about one-fourth mile from the main road to Hawley. The family moved into their house on Saturday and look quite cozy and comfortable there. Though Finland has been regarded up to the present time as being extremely poor in iron ores, recent research has proved the existence of ore fields in South Finland (Nyländ), and above all in the Ladoga lake district, which seem to be worth the expense of mining. For research purposes a company has been formed. Happiness. We should be as happy as possible and our happiness should last as long as possible; for those who can finally issue from self by the portal of happiness know infinitely wider freedom than those who pass through the gate of sadness.—Maeterlinck.

WATER BY PACK HORSES.

Problem for the People Who Live Back from the Rio Grande. Water is a precious article in the upper Rio Grande region of Texas, says the Kansas City Star. The Rio Grande itself contains an ample supply for the Mexicans and few Americans who live in this remote region, but it sometimes is a difficult matter to transport and distribute a supply. In the villages and goat ranches situated back from the river the water problem is one of the most difficult that the people have to contend with. Many months may pass without rain. The country becomes dry and parched. The hardy desert plants are the only species of vegetation that are able to go through these long droughts. Water frequently has to be transported long distances from the Rio Grande. Where the country is mountainous, and rough water carts cannot be used, the water is carried in water bags which fit over the back of a horse. These bags are evenly balanced upon the back of the horse and carry ten to twelve gallons when filled. The bags are made of stout canvas and are fitted with tin funnels. It is not uncommon to see a dozen or more of these water pack horses in a single train going to or from the river, all in charge of a Mexican driver.

Seek to Domesticate Yaks.

To the Canadian government the Duke of Bedford has presented a small herd of yaks. There are six individuals in the herd, and it is sought to ascertain their suitability for domestication in the northern parts of the dominion. They constitute the most important form of animal life to be found in Tibet being used for all purposes except tillage and draft, and may become a valuable economic factor in those chill and lofty regions of the far northwest where conditions correspond to a measure to those of Tibet. The World's Various Creeds. According to a French writer, Christianity has about 377,000,000 followers, with the Oriental creeds ranking next in the following order: Confucianism and ancestor worship, 256,000,000; Hinduism, 190,000,000; Mohammedanism, 177,000,000; Buddhism, 147,000,000. The Christian total includes 231,000,000 Roman Catholics, 143,000,000 Protestants, and 98,000,000 Orthodox Greeks. Grades of Meerschaum. To the casual observer all meerschaum looks alike, but there are 19 recognized grades of this material.

BEACH HOTELS DESTROYED.

Fires Drive Out Guests at Point of Woods and Edgemere, N. Y. New York, Sept. 14.—On the eve of closing for the season the Gerard hotel, on the beach front at Point of Woods, N. Y., was totally destroyed by fire. About a hundred guests still remained in the hotel. The flames spread so rapidly that few saved their personal effects. Some, with more presence of mind than others, bundled trunks out the windows, but many of these were also lost, as the heat quickly became so intense that their owners could not get near enough to drag them to safety. Another beach hotel, the Holmehurst Inn, at Edgemere, N. Y., was also destroyed by fire on the eve of closing for the season. The forty-two guests had a narrow escape, many jumping from windows to the lawn. The damage is estimated at \$100,000.
