

WE SHALL SOON TALK WITH DEAD

Dr. Fallows of Reformed Episcopal Church Says Telepathy Is a Fact

SPIRITS WILL SOLVE PROBLEM

Physic Phenomena Will Be Taught in Colleges—Churchman Calls It "Immortality," Which, He Says, Will Soon Be Common.

Chicago.—"Telepathy is an established fact. In recent years great strides have been made in the explanation of psychic phenomena and in the years to come the science of communication with the dead will be made a part of the curriculum of great educational institutions. As its study becomes systematized and more widely spread greater advances will be made and as we now talk with material persons."

This statement was made to a correspondent by Bishop Samuel Fallows of the Reformed Episcopal Church.

Future advancement in the science of "immortality," which is spiritualism with the "fakes" left out, will some day bring it to the point where it will be studied by the masses just as they now delve into Latin, arithmetic, geography or grammar, according to Bishop Fallows, who spoke at St. Paul's "Why Am I an Immortalist and Not a Spiritualist?"

The Bishop made some startling statements in discussing his sermon with the World correspondent to-day. He frankly states that he formerly fought shy of spiritualism and that he is just beginning to learn.

In the enlightened days to come, says Dr. Fallows, we shall be able to converse with spirits of departed friends and relatives. Their state will be made known to us through these communications. They will be able to advise us on knotty problems, he adds.

In his sermon Sunday, Bishop Fallows quoted a speech of Dr. Adam Clarke, in which that celebrated commentator said:

"I believe that spirits may, according to the order of God, in the laws of their place of residence, have intercourse with this world and become possible to mortals."

"Did you ever see a spirit?" Bishop Fallows was asked.

"No, I never have," was the answer. "But I know persons who claimed to have seen and talked with spirits, intelligent members of my own congregation, whose words I have no reason to doubt."

"I discourage them in their belief. I now feel that their experiences were of great value, and that I sustained an incalculable loss by not going deeper into the matter with them."

"You really believe, then, that spirits may be visible to material persons, and that they may talk with and influence a material mind?" he was asked.

"I do firmly believe that. There are well authenticated cases on record where important actions of noted men have been influenced by some supernatural communication."

"In many cases they were unable to identify the mysterious agencies. They had merely an intangible feeling that they should change their course. But in other cases they were able to remember the spirit who talked to them, to repeat its exact words and to describe its appearance. These instances cannot be doubted, as they come from men high in their professions."

"There are great truths in spiritualism. Many spiritualistic phenomena we cannot understand, but we have to admit them. I have called the new science 'immortality' because it depends for its existence upon the immortality of the soul, in which we all believe, and the preservation of identity beyond the grave. Immortality is simply spiritualism with all the frauds and trickery eliminated. On account of these frauds spiritualism has been shunned by many right thinking people, but immortality will claim their most earnest attention."

In support of his belief Bishop Fallows quoted from many eminent men who have expressed similar views.

Blackbirds Become Pests.

Brazil, Ind.—A wholesale slaughter against blackbirds has begun in this town. The birds come from every direction in great flocks and thousands of them assemble nightly in the trees, their noise making the residents nearly frantic. Flocks of martins assemble in the same neighborhood and attack the blackbirds with great fury. The din has become unbearable, and the people have obtained permission from the officers to shoot the pests.

Landed 163 Pound Swordfish.

Avalon, Cal.—While fishing off San Clement's Island L. G. Murphy, of Converse, Ind., landed a swordfish nine feet seven inches long that weighed sixty-three pounds and was armed with a two and a half foot sword. These dimensions exceed those of any other fish of the species of which there is any record here.

Wants Women to Form "Rat Clubs."

Denver.—"Rat Clubs" will be proposed by Wilbur F. Cannon, State Pure Food Commissioner, as a means of eradicating rodent pests and thus prevent spread of disease, at the meeting of the State Federation of Women's Clubs in Leadville this week.

POULTRY

FOR YOUNG CHICKS.

Arkansas Station Bulletin on the Proper Feed.

In order to have good, early maturing birds it is necessary that they have a good start. The care given the first few weeks is largely responsible for success or failure later on. Regularity of feeding, cleanliness and plenty of grit and clean, fresh water are all important phases. Chicks should be protected from storms and sudden changes of weather, as these very often result in heavy mortality. Poultrymen differ as to when the chick should receive its first food. Good results have been secured when the chicks have been permitted to pick a little sand or fine grit from a clean board when from 36 to 48 hours old. In no case should they receive food of any kind before they are at least 36 hours old. When about 48 hours old they may be fed hard-boiled eggs, crushed with the shells and bread crumbs of equal parts, moistened in milk and squeezed dry. After that almost any of the prepared chick foods may be fed about five times a day till the chicks are from two to three weeks old, when coarser grains, such as wheat screenings and corn chop, may be substituted and not fed oftener than three times a day. It is advisable to let the chicks have access to green feed at all times. Fine clover hay cut with an ordinary straw cutter is excellent and also makes a good litter in which to scatter the feed. Feeding chicks and keeping them growing is an art which can only be learned by experience and for which no rules can be given. Keep the chicks hungry or at least sufficiently so to be eager to eat when fresh food is offered them.

Sanitary Poultry Nest.

The present day tendency to employ sanitary measures in the dairy, the stable, the doghouse, etc., has at last extended to the poultry yard. The industrious hen is to be provided with a sanitary nest, which can be readily washed and scrubbed as occasion demands. This recent development is shown in the accompanying illustration. The nest is made of wire and is supported in a suitable housing, both

Easily Cleaned.

of which can be removed from the chicken house when cleaning is necessary. When thus removed they can be conveniently placed in a suitable receptacle containing boiling water and thoroughly cleansed of all impurities and undesirable insects.

Softshell Eggs.

The production of softshelled eggs causes much annoyance and loss in many poultry-yards. Such eggs are valueless for any purpose save home use, as they cannot produce chickens and they cannot be sent to market, says the American Cultivator. There are three causes of softshelled eggs, the commonest of which is an insufficient supply of shell forming material. Laying hens require a generous proportion of lime in their food, as in 100 ordinary sized eggs there are more than 20 ounces of pure lime. Finely broken oyster shell is an excellent and a cheap form in which to supply the necessary lime. Fright sometimes causes a hen to lay an egg without a shell, but this is not so serious a matter, and is only temporary. The third cause is due to a derangement of the egg organs, and if the abundant supply of lime has not the desired effect more drastic measures are needed. All food of a stimulating nature should be stopped at once, and an aperient given, consisting of one grain of calomel and one-twelfth grain of tartar emetic. A little iron should be added to the drinking water as a tonic, and the food should mainly consist of boiled rice.

Packing Eggs for Market.

Instead of packing eggs in oats, saw dust or bran, for transportation to market, try placing a newspaper on the bottom of the box or basket. Put in a layer of eggs, laying them closely so as to prevent moving about. Over this lay two thicknesses of newspaper then another layer of eggs, and so on till the receptacle is filled. Cover the top layer with a blanket or shawl. This will be found more satisfactory than the old way.

Notes.

If your hens are not getting along in their moult as fast as they should, give them some kind of tonic and food that will help the growth of new feathers.

"Keep the house clean" is good advice for any season, especially valuable for the hot months when fith so quickly breeds disease.

FORGED TO BE BOY, TRIPS IN SKIRTS

Mother Forced Runaway Girl to Pose as Her Son for Nineteen Years

SHE FLEES TO WEAR DRESSES

Posthumous Child Named Frederick Visits Police and Emerges as Frederick—Tells Police Deception Was Practiced to Gain Inheritance.

Council Bluffs, Iowa.—Frederick Adams, 19 years old, of Sioux City, walked into Police Headquarters here and said he was a girl. The police sergeant behind the desk rubbed his eyes, took a steady look, signaled to two patrolmen and said: "Handle him gently; it's either sunstroke or plain lunacy." Adams became indignant; repeated that he was a girl, and imparted the additional information that he wanted the police to assist him in obtaining girl's clothing. At the insistent demand of the youth a matron was called and a remarkable story was developed.

It took short investigation to establish the fact that the caller's real name is Miss Frederick Adams. The young woman was christened Frederick in Plainfield, N. J., at the direction of her father, who died shortly before her birth. The man wished for a son, for the reason that a boy meant the winning of a large fortune. A relative stipulated in his will that if a boy was born to the Adamases the fortune would go to him when he reached his majority, but that if a girl was born the estate would be distributed among other relatives. The posthumous child was a girl, and with the object of gaining the inheritance deception was practiced. The baby girl was called Frederick and was raised as a boy.

Miss Adams appeared in Police Headquarters dressed in a blue serge suit, white shirt, turn down collar, bow tie, blue socks, patent leather shoes and jaunty straw hat. Her hair was cut short and parted at the side.

"After father died mother took me to a farm near Council Bluffs," said the girl. "We live there yet, and I ran away yesterday. I have never been permitted to be a girl. When I was a child I wanted dolls, but my mother made me play with tops and tin soldiers. I was turned out with boys and was forced to take part in their rough games. I had to fight with my fists and play marbles and baseball, and when I couldn't help crying the boys boomed me and called me 'Sissy' and told me to go home to my mother's apron strings."

"I stood it as long as I could. I had only to wait another two years, but if that fortune made me as rich as Rockefeller I don't want it unless I can get it as a girl. I've worked on the farm as a boy and I don't like that. I've fished, hunted and played hooky from school as a boy, but now I want to be my real self and wear girl's clothes and call myself Frederick."

The police were puzzled, but finally decided to take her before a magistrate. In court Miss Adams repeated her story and the magistrate remanded her in the care of the matron until her mother arrives from Council Bluffs. The matron dressed the girl in feminine attire and in her first attempt to walk she tripped in the skirt and went full length on the floor.

SQUARE MEAL FOR NEWSBOY.

Takes Place of Man Who Had to Hurry from Restaurant.

Minneapolis, Minn.—"Jimmie" Burns, a tiny newsboy, obtained a sumptuous feast in a strange manner and he is now known as "Lucky Jimmie."

A man waiting for a Minnetonka car went into a Hennepin avenue restaurant, and just as a big meal of steak, with side dishes and fruit, was placed in front of him he saw his car. Reluctantly he arose, paid the bill, and, on going outside, met little "Jimmie" to his place at the table and told him to "go to it."

While the youngster was devouring the meal his companions spied him and he was the envy of all the other newsies, who thought that he had made a big stake with his papers.

Maple Tree Has Iron Heart.

Darby, Pa.—A maple tree on the property in G. Roberts Powell, has imbedded in its trunk an old brake-bend about six inches wide which was placed in the crotch forty years ago by Powell's father. It is firmly imbedded in the heart of the trunk, with about a foot of it protruding on each side.

Gallery of the Dead.

Pittsburg, Pa.—"A Gallery for the Dead," in which is kept a thorough system of photographs and measurements of every unidentified person brought to the institution has been established at the County Morgue here. Bertillon operators are in charge of the gallery. It is said the gallery is the only one of its kind in the country.

Aristotle says: "The aim of labor is rest." He never knew New Yorkers, for they rest like the chicken hawk, upon the wing. The man who keeps up with the New York woman ought to have as many legs as a centipede and the temper of an angel.

ORNAMENT FOR THE TABLE.

Pretty Idea in Decoration Adapted from the Japanese.

Pretty ideas for table decorations are always welcome, and one sketch illustrates an easily-made ornament, that should be especially welcome just at this time of the year. It is constructed with slender sticks of wood arranged in tripod fashion, and tied together at the top with narrow ribbon. There are also three slender sticks at base, that help to hold the

longer pieces in position, and they are tied together with smart little ribbon bows where they cross. To finish off the ends of the sticks, little pins with colored glass heads are inserted.

Suspended in the center is a small Japanese pot (these little pots can be bought for a few cents, with holes in the rims already made, by which they may be hung up) and in which can be placed flowers or a small fern.

Round and round the stick may be twisted the leaves of a creeper, such as smilax or small ivy, making a very pleasing decoration for winter, and at other seasons there are always many pretty trailing plants available.

On the left-hand side of the sketch the leaves are shown twisted round one of the sticks, and all the rest of the woodwork is left bare to show the way in which it should be constructed.

A Knock at Fashion's Eye.

It is hard to see what gain will come to the eighteen young women who are off to Europe with all their extra clothing packed in eighteen satchels, with only eighteen hats among the party to last until the return to this country. Of course, traveling may be made slightly easier, but there will be no recompense in frequent changes. Even in Europe women take pride in their wardrobes, and incline to vanity in the problem of dress. Where is the feminine love of decoration in these eighteen American young women? One of the joys of a European trip for the average woman is the exploration of the shops of the various capitals, and what do these women intend to do by way of diversion? Are they to go poking around old cathedrals and tumble-down castles with guide books in their hands? They may gather much historic lore on this tour, but if they expect to get close to the people of the Old World they will be mistaken. They will be shunned by the servants, in railroad stations, hotels and elsewhere, who anticipate the size of the tip by the show of prosperity. Women will be interested in them only as curiosities, and men will waste no admiration on them. High-minded and practical as may be the plan of these young women to travel 3,000 miles away from home in one hat and with a single change of garments, it is likely they will meet nothing more curious on all their travels than themselves.

Making a Rare Lettuce.

Mrs. Francis G. Newlands, niece of Ward McAllister and wife of the Nevada Senator, has succeeded in growing a rare lettuce in the garden of her country home near Washington. The lettuce is very bitter, and as a salad it is a delicacy to the cultivated taste. Mrs. Newlands imported the seed from Italy, and she is one of the first to grow this variety in America. The Newlands occupy the estate which formerly was the home of John R. McLean, and later was owned by Admiral Dewey. Mrs. Newlands personally directs all work in the extensive garden. Here she grows a large variety of herbs. She has cut the garden in two with a low wall of loose stones, which now is covered with vines of wild roses, honeysuckle and ivy.

Poise Revealed in a Woman's Walk.

A woman who walks well is a more helpful member of society because she has better health. She is alert and alive, and finds all the world interesting. Then, too, the woman who has learned to walk gracefully finds a reaction on her nervous system. A new calmness and self-control show in her manner and face, and even more in her voice, for those delicate muscles which we call the vocal chords vibrate in harmony with the movement of the individual. And, free from self-consciousness, the graceful woman expresses her best self, for her every motion suggests dignity, kindness, reserve power, sympathy, and that most charming of all womanly attributes, graciousness.

To Prevent Gloves from Shrinking.

When you have a pair of washable chamois gloves, and they shrink, fill them with rice while they are wet and let it remain in them evenly.
