EMERSON W. GAMMELL.
Secretary.

May Have Been Asleep.

The man who cannot remember the text or sight of the sermon is hypnotized or has worked himself into a trance, and sleepiness and inability to tell what the preacher has said must be considered as an indication of a plecty that has passed beyond the control of its possessor or of attention so acute that it concentrates itself on the words and face of the speaker, to the disregard of thought expressed by words.—Christian Advocate.
