WOMAN LAY FIGURE TO EXHIBIT WEALTH

University Professor Says Wives Are Used to Hang Out Signs of Prosperity

A FEMININE COMPETITIVE GAME

Natural Desire to Excel Causes a Great Deal of the Present Alarming Extravagance-Dressing not for Husbands but for Other Women.

Chicago, Ill.-Views expressed before two hundred women in a lecture "Women's Dress," by Professor William I. Thomas, of the University of Chicago, have created general interest here.

"Do you think it a just accusation to say that women dress only to please men?" was a query Professor Thomas was asked.

'No," was the reply, "I regard it as a sort of feminine compatitive game. It is the natural desire to excel in a thing in which they are vastly interested, which causes a great deal of the extravagance,"

a great deal more on clothes than they would otherwise do merely to please their husbands?" asked another. "I think very little dressing is done

"Don't you think that women spend

for the sake of husbands; it is chiefly for other women." was the reply. 'Why is it that while women's

dress has certainly grown no less attractive within the last two centuries, the dress of men has become more and more ugly?"

It is simply that in a life where activity counts the most, utility in dress and little else is taken into consideration. One advantage which men's clothes have over that of women is that they last longer and do not cost as much.'

Among other statements made by Professor Thomas was the following:

"As wealth became a more and more potent factor in social life, man began to use his wife as a lay figure upon which he could hang signs of his prosperity. Women of the upper classes were not expected to do any sort of work, and the route was a comfortable one to travel. That state of affairs is now becoming untrue. Women are awakening and taking part in the social activities."

PAINLESS ANIMAL TRAINING.

Paris Zoological Psychologists Start a New Circus Seminary.

Paris.-Paris will soon own a wild animal training institute which will lend additional significance to the showman's claim that it is "all done by kindness." It is the outcome of a project formed by the Society for Zoological Psychology, a body which receives a subsidy from the State.

Psychical persuasion, as it is called, without corporal punishment is the sole method that will be followed. Exactly how it is to be applied is as yet the secret of the trainers. The staff will include learned zoologists as well as a selected number of animal tamers who have had practical experience in circuses and menageries.

Those who aspire to a professional career in this direction may receive their tuition here. The first lot of animals to undergo the treatment comprises lions, tigers, leopards, hyenas and bears. These will be transported from the Zoological Gardens to the new institute, which is located in an adjoining building.

Curiousity is keen as regards results and cartoonists are sharpening their pencils in anticipation.

URGES SHORT SKIRTS

Anti-Tuberculosis League for Schoolroom Reform.

Pittsburg.-In an effort to stamp out tuberculosis in the public schools the Anti-Tuberculosis League decided here to request the Superintendent of Schools of all large cities to issue an order that teachers shall not wear skirts coming below their shoe tops. It is urged that if necessary ordinances be passed making the long skirt unlawful.

Miss Charlotte Miller, of the league, explained that the long skirts of teachers now cause the dust in the classroom to rise, later settling in the pupils' lungs and sowing the first seeds of consumption. Most teachers object to heavily oiled floors, she said, because they ruin skirts. The only other remedy, she asserted, was to shorten the skirts.

ANOTHER WOMAN VICTORY.

Husband Must Account to Wife for His Time, Judge Decides.

Pittsburg.-Judge Josiah Cohen in the divorce court here practically decided that a wife is entitled to know just where a husband spends his time when he is away from home for fortyeight hours, if he refuses to give a legitimate excuse for his absence.

Mrs. Rosini Pasetti had testified that her husband had remained from home two nights. She said he refused to tell her where he had been.

Voice Comes Back When at 'Phone. Marietta, Pa.-Forgetting for an instant that a severe attack of whooping cough seven years ago had left voiceless, Miss Emma Yetter, daughter of Farmer Yetter of Bachmanville, answering a telephone call, found she could talk again.

Canacians in this Country.

In the United States, according to the census, are \$19,264 Canadians 10 years of age and over. Forty per cent of these are engaged in manufacturing. 30 per cent in personal service, between 17 and 18 per cent in trade and transportation, about the same percentage in agriculture, and somewhat over 4 per cent in professions. The percentage in the professions is approximately the same as that of the native born white population in the United States. The large numbers, as compared with the number left behind following the same occupations throw light on conditions in Canada-for example, the number of expanated Canadian teachers and college professors, lawyers and clergymen.

Disinfecting Churches.

The Alcade of Madrid, who, at least in sanitary matters, is decidedly progressive, has issued an order for the disinfection of churches. This order, which is based on a report from the director of the municipal laboratory, prescribes that all the churches of the Spanish capital are to be swept out daily with sawdust moistened with a solution of copper sulphate. All the fittings and furniture of the churches, chairs, benches, confermont holy water fonts, etc., are to be disinfected every day,

For Surveying Great Depths.

A new instrument for surveying deep-bore holes contains a compass, plummet, small cameras and electric light, the whole connected with a small adjustable clock, so that the light may be turned on for a given period after the apparatus has been lowered into the hole. It has been used in surveying a number of holes in South Africa and has proved satisfactory. Both dip and deviation are recorded by means of photographs of the positions of both a plumb-bob and a magnetic needle of any desired plint in the bore hole. The photographs are taken by means of two small electric lamps lighted by a time contact.

Iron Works in Sweden.

Extensive projects for the establishment of iron works on the west coast of Sweden are now under consideration, but it is alleged that such works, in order to be successful, must be in a position to manufacture cheaply and compete with other produce in the market of the world. This, it is admitted, is of more importance to the new industry than either an export duty on iron or heavy customs duties on foreign produce introduced into Sweden.

The Russian Uniform.

The Russian military authorities are considering the adoption of the khaki uniforms, the czar having been especially interested in one recently worn by an American army representative at St. Petersburg. The military authorities are also considering American accourrements, including web cartridge belts and cavalry sadules, with a view to their adoption.

Tax on French Imports.

The Board of United States General Appraisers has decided that goods imported from France in order to have the benefit of the reduction in duties provided for in the reciprocity treaty with that country must be shipped direct from a French port to the United States. If shipped from a port in England or in any other country they cannot have the benefit of the reduced duty.

Money Spent in New York.

There is more money per capita spent in New York City every year for amusements than in any other place in the world. The people spent 12 per cent more than those in the metropolis of any other State or country, 18 per cent more than those in the next largest cities, 36 per cent more than those in smaller towns and 57 per cent more than those in the rural districts.

Habits of Animals.

There are some animals which rarely drink; for instance, the llamas of Patagonia and certain gazelles of the Far East. A number of snakes, lizards and other reptiles live in places devoid of water. A bat of Western America inhabits waterless plains. In parts of Lozere, France, there are herds of cows and goats which hardly ever drink and yet produce the milk for Roquefort cheese,

Strength of Grindstones. The strength of grindstones appears

from recent tests to vary widely with the degree of its wetness or dryness, stones that are dry showing tensile strengths of from 146 to 186 pounds a square inch, but after soaking over night breaking under stress of 80 to 116 pounds a square inch.

Governor of the Transvaal.

The newly appointed government tobacco expert for the Transvaal, in South Africa, has informed the Transvaal Agricultural Union that the colony can produce as good eigaret, cigar and pipe tobacco as America and Cuba, He regards the industrial prospects as very bright.

To Stamp Out Trachoma.

The authorities of several states of Brazil are reported by the consul general of Rio de Janiero as making determined efforts to stamp out trachoms, the eye disease that has been rapidly spreading in that country.

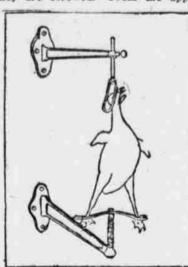

POULTRY-PICKING FRAME.

Holds Fowl Tightly and Feathers Are Plucked with Ease.

Game dealers will find part of their work, at least, greatly facilitated by the invention of a Massachusetts man. This invention is a poultry-picking frame and any poulterer will at once appreciate its advantages.

It consists in the first place of two arms extending from the wall, where they are screwed. From the upper

arm hangs a cross-piece, depending from a spring, while the lower arm has a member, adjustable to different lengths, adapted to hold the head of the fowl. The legs of the bird are held in the upper bracket and its head in the lower one. It is then in a position where its feathers may be plucked rapidly and easily, the spring in the upper bracket permitting the necessary elasticity. Only a poulterer who has picked thousands of chickens and other fowl under the disadvantages of the old method, where he either had to hold the bird with one hand or tie it up and have it flop around under his touch, can apreciate the full merits of this frame.

Work in the Poultry Yard.

Wet feed in wooden troughs nearly always produces bowel trouble.

If the young chicks show signs of gapes, change them to other grounds

Milk should always be fed in metal pans that can be washed and scalded afterward.

Better go without a garden than without chickens if you have no other range for them. More young chickens die from over-

crowding in brooders and coops at night than from any other cause. A very little artificial heat in the

brooder is sufficient, and this should not be turned on except in cold, damp It costs no more to raise thorough-

bred chicks than scrubs, and the aristocrats will bring four or five times as much money. Do not forget that the natural food

of chickens is grain and meat. They will get their meat in bugs and worms if they have the opportunity.

The lazy, good-natured hen does not make as good a mother as a cranky fighter, provided the latter is not so nervous as to keep running about all the time.

Whenever you see young chicks crowd around their keeper without fear, feeding from his hand and climbing upon his person, be sure they are well managed.

Left without proper shelter, we have seen as many as 100 young chicks piled on top of one another in a fence corner at night, with from 5 to 15 dead ones in the morning.

Doubtless your experience last spring has convinced you that the brooder beats the hen every time, both in the saving of temper and the production of chicks.

A Lean-to Poultry House. The above represents a very con-

venient and comfortable poultry house built against a stable or other outbuilding. The portion adjoining the other wall is eight feet high, and the lowest part of roof is six feet. The roosts and dropping boards are set parallel with the yards, and a partition separates the two houses, so that they may each have a yard, as shown in illustration.

The nest boxes are placed under the dropping boards and the straw

and litter are kept on the floors of the houses.

Of course we prefer the separate scratching shed, but when something cheap, designed for utility, is wanted then the above is most admirably suited. It may be built any size desired, and the mast will be much less than that of a separate house and yards.

It takes 31 days to hatch goose eggs, ten days longer than with those Against Daily Naps.

Prolonged "forty winks" during the day are severely condemned by many doctors on the ground that they affect one's regular sleep. Scientists have found that in the ordinary course in the human being there is the greatest vitality between 10 a. m. and 2 p. m., and the least between 2 o'clock and 6 o'clock in the evening. Long sleeps during the day interfere with this order of nature and sometimes affect various organs, causing headache. The map of forty winks, but only forty, proves refreshing to many because it is too short to have any injurious consequences.

Wireless Telegraphy in France. Sportsmen in France are becoming advocates of wireless telegraphy, aner carefully watching for three years a kilometer's length of telegraph wire in a district not overpopulated with birds an observer has proved that one and a half head of game, such as partridges, pheasants, quall and so on, are impaled yearly on every wire of this length in France, which means a total all over the country of 40,000 annually. Many of the victims, especially of the migratory kind, lose their lives through nocturnal flights.

Brains of Great Men.

Brains of great men vary very much. It is found that men of encyclopedic mind have large and heavy brains-Gladstone had to wear a very big hat-with an enormous bel of gray matter and numerous convolutions, on the other hand, men whose genius is concentrated upon one line of thought are of small brain and, consequently, have small heads. Newton, Byron and Cromwell were in this

Silk Production in Switzerland.

Silk Production in Switzerland.
Few people probably suspect the extent to which Switzerland figures among the silk-producing countries of the world, which, so far as Europe is concerned, have always been supposed concerned, have always been supposed to be France and Italy. But Switzerland exports annually silk to the value of about \$20,000,000, nearly all going to European countries.

Cable Service to Iceland.

Cable dispatches may now be sent to Iceland, the cost being In cents a word from England. Icelandic lines, which will connect Seydisford, the which will connect Seydisfjord, the cable point on the east coast, with all the pricipal towns, including the capi-Reykjavik, will soon be compieted.

Paying for a Scholarship,

For the last three years about 100,000 workingmen, members of the Amalgamated Society of Engineers, have made three levies of one penny each to help on the work of Ruskin College at Oxford. This levy produces over £300 a year, and by means of it six engineers are maintained for a year's course of study at the college.

Courtly Etiquette in Siam.

By a remarkable law of royal etiquette, which has existed for a number of years at the Court of Siam, no person is permitted to sleep in an apartment situated above that occupied by the king. A deliberate breach of this rule has on more than one occasion been punished by death.

American Capital.

The capital invested in American manufacturing establishments in 1904 amounted to \$12,686,265,673, according to recent figures of the Census Bureau, This shows an increase in five years of 41 per cent. The gain in the products of manufacture was 30 per cent, the 1904 aggregate being \$14.802,

Boring Tunnels Up-To-Date.

Pneumatic foundations and tunnels A M A M A M A M A M P M can be carried out to a depth of 210 feet below the water surface, accordin to Messrs. Leonard Hill and M. Greenwood. They experimented on the effect of air pressure up to 92 pounds by means of a large cylinder, in which they stayed under different pressures for various times.

Municipal Bakeries in Italy.

The failure of the municipal bakeries at Catania, Italy, is reported by Mr. Churchill, the British consul at Palermo. There was a \$30,000 deficit in the balance sheet, and the request governing a loan of \$80,000 was refused by a royal commission; in consequence the institution was closed.

Tax on Chinese. The \$500 Canadian head tax on Chi-

nese immigrants is causing a scarcity of unskilled labor at Victoria. The British Columbia salmon canners are petitioning for a reduced head tax, in order to permit Chinese to enter the province.

Defining the Russian. The Marquis de Custine once defined the Rusian government as "an absolute monarchy tempted by assassination." The present situation is

described by Constantin Waliszewski as "an anarchy tempered by a state of siege." Eleanor Duse's Refusal.

Eleanor Duse, the famous Italian

actress, has positively vetled a plan to celebrate her jubilee as was done in England and France for Ellen Terry and Bernhardt. When the subject was broached to the signora, she thanked her friends, but declined the honor.

TO FLY ACROSS THE OCEAN.

REVISION AND APPEALS.

Notice is hereby given, pursuant to

the provisions of the Act of Assem-

bly, entitled "An Act to provide for

the ordinary expenses of the govern-

ment, payment of the interest of the

state debt, receiving proposals for

the sale of public works and for

other purposes," approved the 27th

day of July, 1842, that the assessors

of the several townships and boro-

ughs of Wayne county have made

their returns of their assessments

for the year 1910, and that the fol-

lowing is a statement of the aggre-

gate values and assessments made

by said assessors of the several sub-

jects of taxation enumerated in the

11th section of said Act of July 27.

1842, and in the several Acts sup-

plementary thereto, and of the whole

amount of county taxes as assessed

Notice is also given pursuant to

Act of Assembly aforesaid, that the

following days and dates appointed

for the appeals from the assessments

for the several boroughs and town-

ships, have also been appointed by

the Commissioners of said county for

finally determining whether any of

the valuations of the assessors have

been made below a just rate accord-

ing-to the meaning and Intention of

The Commissioners of Wayne

county, sitting as a Board of Revis-

ion, have appointed the following

days and dates respectively for hear-

ing final appeals from the tri-ennial

assessment of 1910 at the Commis-

sioners' office, Honesdale, Pa., be-

ginning at 8 a. m., Monday, January

31st and closing at 2:30 p. m., Sat-

Tuesday, Feb. 1 .- Berlin, Damas-

us, Manchester, Buckingham, Scott,

Wednesday, Feb. 2 .- Preston, Mt.

Thursday, Feb. 2 .- Lehigh, Dre-

Friday, Feb. 4 .- Hawley, Palmyra,

Saturday, Feb. 5 .- Texas, Dyber-

Persons having a grievance should

try to adjust it with the assessor be-

fore the appeals: if this cannot be

done, and it is not convenient to at-

tend the appeal, write the grievance

and mail it to the Commissioners'

office and it will receive attention.

County levy for 1910 is 4 mills and

one-half mill for support of non-

Big Airship Being Built For Voyage From Berlin to Vancouver.

Berlin, Jan. 25.-It has been arranged that the dirigible balloon trip across the Atlantic projected by Joseph Brucke will start from here for Tenerife on May 15. The enterprise will be undertaken by S. L. Schwartz, a New York promoter, and the Ganz company of Mannheim,

The balloon, which will have Vancouver, B. C., as its objective point, is being constructed at Hamburg. It will be semicircular, will be of 5,000 cubic feet dimension and will have fifty horsepower motors. It will carry six persons, all of them engineers.

The first stage of the voyage is expected to take four days. The balloon will have the benefit of the trade wind most of the way. Two steamers will accompany the balloon, but they will sail two days ahead of the airship.

Hundred Killed In Religious Riots. St. Petersburg, Jan. 25.-Religious riots have broken out in the town of Bokhara, in Turkestan, between the Shiahs and Sumnis. It is reported that a hundred are dead. Russian troops have been sent to Bokhara.

Vardaman Again Fails of Election. Jackson, Miss., Jan. 25.-The twentyfourth and twenty-fifth ballots for United States senator brought no result. Governor Vardaman polled 74 on the first ballot and 69 on the last.

The Era of New Mixed Paints!

This year opens with a deluge of new mixed paints. A condition brought about by our enterprising dealers to get some kind of a mixed paint that would supplant CHILTON'S MIXED PAINTS. Their compounds, being new and heavily advertised. may find a sale with the unwary.

THE ONLY PLACE IN HONESDALE CHILTON'S MIXED PAINTS

IS JADWIN'S PHARMACY.

There are reasons for the pre-eminence of CHILTON PAINTS 1st-No one can mix a better mixed paint.

3d-Chilton stands back of it, and will agree to repaint, at his own expense, every surface painted with Chilton Paint that

2d-The painters declare that it works easily and has won

4th-Those who have used it are perfectly satisfied with it, and recommend its use to others.
