and gnats. They touch the chains, and that instant is fatal to them. They are neatly "short-circuited,"

and they buzz no more. They even buzzing, or what occult reason they had for seeking the luminary. They are dead and done for. This apparatus can be placed in a room and the proper owner of the chamber be insured a comfortable night.-The Reader.

COST OF AN EDUCATION.

Public Schools of the Country Spend an Average of \$28.25 a Pupil.

The average yearly expenditure a pupil in the public schools of this country, is given as \$28.25 in the recently published report of the Commissioner of Education. In 1870 It was only \$15.55.

Nevada has the highest yearly expenditure, \$72.15 a pupil, followed by New York with \$51.50, Montana with \$49.40 and California with \$49.29. In the South the expenditures a pupil range from \$6.37 for South Carolina to \$20.36 for West Virginia. The new State of Oklahoma spends \$15.79. New Mexico \$19.46, while Arizona with \$40.41 spends \$5.16 a pupil a year box either." more than Oklahoma and New Mexico combined.

little barred window. One-third of the States spend from One-third of the States spend from \$25 to \$40 a pupil. The fact that one-fourth spend less these and one the country post offices never get fourth spend less than \$15 and one new boxes, but we have those left fourth spend more than \$35 is an indication, says the Commissioner, "of the great variety in support of public boxes. So you see lots of country education, and, I believe, in the opportunity afforded for school training ber boxes. in our various Commonwealths."

Gigantic Sign Board.

Arrangements are being made for the celebration of the anniversary of the discovery of San Francisco bay in 1769 by Portola, and for the purpose little city.' of advertising this event there has been constructed on Yerba Buena is land, San Francisco bay, what is prob ably the largest sign ever erected. The sign, which has been cut on the sloping hills of the island, is 1,300 feet long by 1,335 feet high. The words "Portola Festival, October 19 23," are arranged in two lines, each letter of which occupies a space 45 feet by 45 feet, the outline of the letters being eight feet in width. The work was done by digging trenches light inches in depth and filling them with lime, which shows up clear and white against the green of the hillside.

Bravest of Living Things.

The mongoose is very brave, but the most courageous of all living uralists, the mole. Seemingly with out any sense of fear whatever, the mole will fight anything that crosses flag. Neither giving nor asking quarter, it tears away at its adversary until it kills it or is killed itself. The mole appetite is in keeping with its courage, and it thinks nothing of eat ing its own weight. In appetite the spider is a close second to the mole, but when it comes to fighting the mole carries the palm.

Prehistoric Incubators.

The use of incubators in the hatching of eggs is not a new process. On the contrary, it dates back to the ancient Egyptians who often hatched eggs of various fowls in

With the dying out of the Egyptians, the science of incubation, like been spending a few days with his so many of their other arts, went father, Hon. T. J. Ham, who suffer- with them, and it was thought that it was one of the lost arts until Walter Schiessler left Wednesday Reaumur regained it in the last cen-
