Valentine Sylvester is on the sick list. The Scott Chemical Co. are repairing their factory.

B. F. Tewksbury has been appointed census enumerator for Scott. Tibert Simons has moved to Gulf Summit.

POINTS REGARDING THE CENSUS.

The census begins Apr. 15 and must be completed in thirty days. The enumerators will wear a badge inscribed "United States Census, 1910."

The law requires every adult person to furnish the prescribed information, but also provides that it shall be treated confidentially, so that no injury can come to any person from answering the questions.

The Census Bureau, prior to April 15, will distribute to every farm owner and tenant in this state a blank or schedule containing the Census questions relative to farm operations and equipment. This should be filled up, if possible, not later than the morning of April 15, but if anyone has been unable to fill it up by that time, he should do it as soon afterwards as he can.

People who do not speak English or who do not understand the schedule completely should get help from others, if possible, in filling it up.

The President has issued a proclamation, calling on all citizens to co-operate with the Census and assuring them that it has nothing to do with taxation, army or jury service, compulsory school attendance, regulation of immigration, or enforcement of any law, and that no one can be injured by answering the inquiries.

It is of the utmost importance that the farm census of this state be complete and correct.

Therefore every farm owner and tenant should promptly and accurately fill up the "Advance Farm Schedule" and carefully preserve it for the enumerator when he calls.

TRAVELING A MILE-A-SECOND.

Lyman H. Howe's Travel Festival at the Lyric Theatre Soon.

Few people fully realize what an attraction like Lyman H. Howe's Travel Festival really means. Some regard it almost as a dream journey of childhood days when trips to legendary lands were made via the magic carpet. The more matter-of-fact regard it more for what it really is—a miracle of science more amazing than Aladdin could ever conjure up by rubbing his fairy lamp. It is an entertainment that is distinctly typical of this—the swiftest epoch of the world's progress.

With Mr. Howe one can travel a mile-a-second in a mile-a-minute age. This is literally true, for in his new programme at the Lyric on Thursday, April 14, Mr. Howe shows the impact on armor plate of a projectile weighing nearly a ton which actually travels a mile-a-second. It was photographed while the government was testing armor plate and is included in a series which shows our National defenses very comprehensively. All the scenes were photographed exclusively for Mr. Howe and could only be obtained through the permission and facilities extended him by the U. S. Government. Foreign lands also contribute many features that are equally interesting. The audience is taken to Italy to see how logging is carried on in the Alps; to India where a great religious ceremony by Mohammedans is witnessed in Delhi; to Java where a big volcano is seen in violent eruption, and to many other places that will prove very interesting.
