THE 7 MARVELOUS EDDYS IN THREE OF THE MOST THRILLING, DARING AND SENSATIONAL ACTS.

It Takes a Wise Man to Play the Fool in a Modern Circus.

"It takes brains to play the fool." So Jack Cousins, the equestrian director of Howe's Great London Show, said when asked concerning clowns and clowning. "I have been in the circus business all my life, and during that interesting period have, like an actor, played many parts. I have made a close study of the profession, and particularly the clown department, for there is nothing to a circus without a clown. "It has come under my observation that the brainiest performers always make the best clowns and produce fun that is not only wholesome, but makes the man, no matter how discontented with the world, forget his troubles temporarily and dissolve his hardened features into a grin. When you compare the actor with the clown the latter has a handicap regarding his methods and his facilities of bringing forth laughs. "The other has the author to thank nine times out of ten for some 'fat' part. Then, too, he is enabled to say things that produce fun and which are not his own. But take the man behind the whitened face and he has nothing to help him but his gestures, his nimble legs and his art of so contorting his face as to bring forth mirth. It's real work to make them laugh without any aid whatsoever excepting the few items I have mentioned. Furthermore, a clown must be born; he is not made or manufactured." The date the big show will exhibit here is June 28.
