

SELECT CULLINGS

Camels in Harness.

The Australians, who were prejudiced in favor of the horse for a long time, had only to be shown the camel's usefulness in opening up their great central desert when they took them into the country by thousands from Asia and Africa, and they have by scientific building within fifteen years won the proud distinction of producing the best draft camels in the world, says Captain Fritz Duquesne in Success Magazine. And, what is more, the great Australian desert is no longer an impassable waste. The camel trains, with their tinkling bells and red tassels and valuable loads of merchandise, travel from one side of the continent to the other, adding millions to the wealth of the country. From the mines in the interior where there is no water for milling purposes the camel comes laden with quartz. It can be seen pulling the plow, trotting to the farmer's buggy and it is used as a saddle animal. The camel requires very little care, it will carry from 600 to 800 pounds, requires no roads, lives on the country it travels through and will go seven days without water.

A Place Death Has Overlooked.

Eden on earth is to be found, it seems, not far from Madrid, a paradise where death and disease are unknown and where every one is good humored and loves his neighbor as himself. It is the village of Cobena, where figuratively the sword has been bent into the plowshare. The local chemist gave up the sale of drugs in despair two years ago and now presides over candles and ice creams. Half the cemetery has been turned into a pleasure garden—there has not been a single death for eight years—and the undertaker has fled from a spot where death refuses to provide him a living. There is only one discordant note in this home of harmony, and it is struck by the doctor. He has lived for years in the village on his capital, hoping against hope. Now his money is exhausted, and he has decided to emigrate. The inhabitants want to raise a subscription for him, but he refuses to accept charity from persons who have declined so persistently to contribute to his well being by their own ill health.

Dr. Wiley Is a Good Eater.

If the public does not know that Dr. Harvey W. Wiley, the pure food expert, is one of the most absentminded men in the world all doubt of the fact will vanish after this story has been read. The doctor takes his lunch in the cafe of the National Press club, and when he lunches he misses no bits, overlooks no food. He has a fine appetite—a remarkable appetite, considering all the unpleasant and terrifying things he knows about foodstuffs.

One afternoon he finished his meal, walked into the cloakroom and put on his hat. As he was going out he was accosted by a friend, who invited him to lunch with him.

Dr. Wiley hesitated. "To tell you the truth," he said whimsically, "I don't know whether I've just had lunch or not."

He thought deeply for several moments.

"Just to make sure," he concluded seriously, "I'll go in and have another." And he ate as much the second time as he had the first.—Popular Magazine.

The Sandbow.

The unusual optical phenomenon of a bow produced by the sun shining, not on raindrops, but on particles of sand suspended in the air by wind, has been witnessed over a part of the Great Salt lake.

The colors were very brilliant, and there was a secondary bow visible. The main bow was fully double the width of an ordinary rainbow. Only a segment of it was seen. The sand was oolitic, consisting of calcareous spherules of fairly uniform size ranging between the limits of No. 8 and No. 10 shot.

It has been claimed that the production of the bow must be due to reflection from the outer surfaces of the spherules and that it cannot be explained on the principle of refraction and total reflection, generally applied to the explanation of the rainbow.—Harper's Weekly.

Checks.

One of the chief concerns of the designers of our government was to provide plenty of checks, passive, active and reactive, so that everybody and everything would be duly and effectually checked by everybody and everything else. They builded better than they knew.

Our legislatures are checked by jobs.

Our people are checked by representatives.

Our lawyers are checked by technicalities.

Our savings are checked by the trusts.

Our expenditures are checked by our incomes.

Our incomes are checked by employers.

Our husbands are checked by our wives.—Life.

Talked Shop.

Senator La Follette of Wisconsin dropped in a short time ago for a chat with George M. Bowers, commissioner of fisheries in the department of commerce and labor.

"Well, Mr. Commissioner, how's everything with you?" asked the senator.

"Oh, with me," replied Bowers, "everything's swimming." — Popular Magazine.

DAMES AND DAUGHTERS.

Mrs. Mason Adams of Stowe, Vt. who will be eighty-seven years old in November, recently pieced in 15 weeks a quilt containing 320 pieces. Mrs. Sylvia Vandaveer, who is 84 years of age, is the fortunate possessor of a very valuable relic—the one with which Abraham Lincoln spun rails while working for William Smith in Gentry county, Ind.

Mother Jones, well known in mining localities for the interest she takes in the welfare of the miners, has recovered from a severe illness and will soon begin to write a book, for which she has been gathering data in the mining regions for some time.

Dr. Maud Glasgow is at the head of the movement to get women admitted as internes into the larger hospitals of New York. There are said to be at present only two small hospitals in Greater New York where women medical graduates are admitted as internes.

Betty Tanner is the name of a five-year-old girl in Los Angeles who is known as "the human orchid." Everything about her is sterilized, even the house having been built on sterilized ground. She is the heiress to \$25,000,000, so it is no doubt necessary that she live to grow up, as the money would otherwise go out of the family.

The Writers.

Paul West, the popular song writer, is the author of more than 300 published songs.

Justus Miles Forman, the author, is an American, though many have judged otherwise from the foreign atmosphere of some of his stories. He was born in Genesee county, N. Y., thirty-five years ago.

Maurice Maeterlinck, philosopher, aesthete, dramatist, mystic, was born in 1862. His home was in the ancient city of Ghent, "the soul of Flanders," but he has lived from time to time in Brussels and recently in France, where he has a winter and a summer residence.

Sir William Gilbert, now in his seventy-fourth year, is seriously considering an offer to come to America and direct in person the first authoritative production of the Gilbert and Sullivan operas in this country. Sir William has recently completed a modern drama.

Sporting Notes.

The Phillies have twenty-one pitchers for next season. The latest to be secured is Baxter of the Merion (O.) team.

Conch Brewer of the Michigan Athletic club will try the experiment of having his players wear numbers in their football games this fall.

E. B. Butler, the Toronto crack, who won the single sculls at the middle states regatta in Philadelphia, is going to the English Henley next year.

A world's record for stolen bases for the last nineteen years, it is believed, has been made by Bill Zimmerman, Utica right fielder, who stole 107 bases in 135 games off New York State league catchers this year. His batting average is .295.

The Cookbook.

Nothing made with sugar, eggs and milk should reach the boiling point.

A pleasant addition to peach and apricot tarts is chopped almonds, sprinkled over them before baking and followed by a sprinkling of sugar.

When next cooking prunes, just before removing them from the stove add a little arrowroot, wet with cold water. This will thicken the syrup ever so slightly, enhancing the flavor of the fruit.

Sliced ham is richer and tenderer when baked instead of fried and is also more wholesome. Slice as for frying and then bake in a shallow tin in a hot oven for half an hour. While cooking baste it with the fat that drips from it.

Short Stories.

The Portuguese navy has 5,000 men. There is a great area of oil in the gulf of Mexico, said to emanate from the Texas oil field.

Ten huge searchlights are to be installed on the fortifications at the entrance to Manila bay.

It costs about \$5,000 to construct one of the United States navy's newest torpedoes, which are fitted with turbine motors and have a range of about three miles.

Facts From France.

Crimes of violence have increased to such an extent in Paris that a new morgue is a necessity.

There are six voters in the village of Seuchey, France, and their votes are collected in a soup tureen.

Live trout are carried from French streams to Paris, sometimes more than 100 miles, in automobiles fitted with glass tanks in their tonneaus.

Train and Track.

Sept. 1, 1884, the first electric railway in the United States was opened in Kansas City.

In Birmingham, England, a bonus of nearly \$5 is given to every motor-man for every three months that he goes without an avoidable accident.

Any one of the twenty-six new Atlantic type locomotives recently ordered by the Baltimore and Ohio railroad will haul on a level a train of twenty-five passenger, ten baggage, seven Pullman and eight postal cars.

COSTLY LOOKING COAT.

An Imitation Wrap Hard to Tell From the Real Thing.

SMART NEW COAT OF ELECTRIC SEAL.

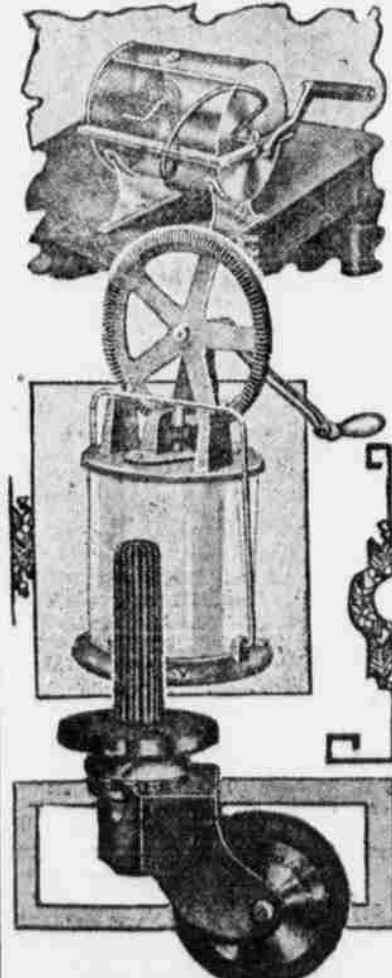

You don't like imitation fur coats? Well, no woman liked them until recently, when the makers have produced such wonderful imitations that they cheat even the trade with them.

Such a deception is to be seen in the long coat pictured of electric seal and imitation Persian lamb. This "lamb" is not the imitation cloth that has passed for fur with which we have been familiar for many seasons. No! It's a product of this season and cannot possibly be told from genuine fur unless closely inspected.

This coat would cost at least \$300 if of pelts, and as it stands the price is only \$39. Now what do you think of imitation fur coats?

To Reduce Household Toil.

Each season sees several new labor saving inventions for woman's work in the household, and this year is no exception to the rule. A new and very simple bread mixer is one of the labor saving devices. It is in only two parts

CLEVER NEW INVENTIONS.

and therefore easily kept clean; besides, it mixes the dough thoroughly and scientifically in a few minutes.

For the farmer's wife the latest butternut churn is a blessing, for it makes the butter "come" in a minute.

A small rest of perforated aluminum fitted with a clip is another fine thing. A clip is attached to a kettle or saucepan to be used for holding the spoon when the contents require frequent stirrings, saving both time and trouble. Ten cents will purchase this little convenience.

Where polished floors abound the new felt castor is something the housewife should have. It saves her floors from being scratched and herself the labor of removing the ravishes of the careless moving about of furniture.

A new kind of broom to be used for a hardwood kitchen floor is called the dry cord broom. It is shaped like the ordinary hair floor broom, but cords are used instead of bristles.

We wouldn't suspect how good some people are if they didn't tell us.

STANLEY KETCHEL.

Middleweight Champion of the World Who Was Shot and Killed by a Farm Hand Near Conway, Mo., on Saturday Last.

Tales of Cities.

More paper is made in Holyoke, Mass., than in any other city in the world.

Buenos Aires is the fourth city in the two Americas, and 20 per cent of all the people of Argentina live within a radius of twenty miles of the capital.

Nagoya is the fourth greatest city in Japan, with a population of 270,000. It has two gold statues, one of which is worth \$1,750,000. It is a busy commercial city, with a fine harbor in course of construction. Its prosperity dates from 1810.

APPRAISEMENTS.—Notice is given that appraisement of \$300 to the widows of the following named decedents have been filed in the Orphans' Court of Wayne county, and will be presented for approval on Monday, Oct. 24, 1910, viz: Enoch W. Gregory, Dyberry; Personal. Porter Kennedy, Mount Pleasant; Personal. William C. Ames, Hawley; Personal. Amasa C. Megargell, Sterling; Real. M. J. HANLAN, Clerk.

ACCOUNT OF M. J. HANLAN GUARDIAN OF EUGENE E. LESLIE, of Lake Township, Wayne county, Pa. Dibble, administrator of the estate of Hutchenson McMurray, Starvaca. First and final account of Jacob Gardiner, administrator of the estate of Mary C. Reynolds, Scott. First and final account of Johanna Hoff, executrix of the estate of Henry Hoff, Cherry Ridge. Second and final account of Nellie Woodward, administratrix of the estate of C. H. Woodward, Hawley. First and final account of E. C. Mumford, administrator of the estate of Sarah E. Newcomb. E. W. GAMMELL, Register. Register's office, Honesdale, Sept. 29, 1910.

BAD BILIOUS ATTACK!

There is nothing that will more completely knock out a man, or woman either, and entirely incapacitate them for work or pleasure, than a bad attack of biliousness. You get up with a headache which increases if you stoop over. You are dizzy when you stand up straight again. Your tongue is coated and your mouth tastes bad. You are irritable and out of sorts. That's biliousness. If you want to get right again remove the cause. Your bowels are clogged. The natural sewers of the body fail to carry off the poisonous matter. The bile is being absorbed by the blood, and your whole body is crying out against the imposition. Take three Smith's Pineapple and Butternut Pills at once. Don't wait till you go to bed. Then take two more when you retire. It is astonishing to see how quickly they will relieve. They restore the liver and stomach to normal activity and purify the blood. Physicians use and recommend. They form no habit. You should always keep these little Vegetable Pills on hand. They ward off many ills.

To Cure Constipation Bilioousness and Sick Headache in a Night, use

SMITH'S PINEAPPLE AND BUTTERNUT PILLS. 60 Pills in Glass Vial 25c.—All Dealers. SMITH'S For Sick Kidneys. Bladder Diseases, Rheumatism, the one best remedy. Reliable, endorsed by leading physicians; safe, effective. Results lasting. On the market 25 years. Have cured thousands. 100 pills in original glass package, 50 cents. Trial boxes, 50 pills, 25 cents. All druggists sell and recommend.

Roll of HONOR

Attention is called to the STRENGTH of the

Wayne County SAVINGS BANK

The FINANCIER of New York City has published a ROLL OF HONOR of the 11,470 State Banks and Trust Companies of United States. In this list the WAYNE COUNTY SAVINGS BANK

Stands 38th in the United States Stands 10th in Pennsylvania. Stands FIRST in Wayne County.

Capital, Surplus, \$455,000.00 Total ASSETS, \$2,733,000.00

The Era of New Mixed Paints!

This year opens with a deluge of new mixed paints. A condition brought about by our enterprising dealers to get some kind of a mixed paint that would supplant CHILTON'S MIXED PAINTS. Their compounds, being new and heavily advertised, may find a sale with the unwary.

THE ONLY PLACE IN HONESDALE AUTHORIZED TO HANDLE CHILTON'S MIXED PAINTS Is JADWIN'S PHARMACY.

There are reasons for the pre-minance of CHILTON PAINTS: 1st—No one can mix a better mixed paint. 2d—The painters declare that it works easily and has wonderful covering qualities. 3d—Chilton stands back of it, and will agree to repaint, at his own expense, every surface painted with Chilton Paint that proves defective. 4th—Those who have used it are perfectly satisfied with it and recommend its use to others.
