#### TEACHERS' INSTITUTE

(Continued from Page One.)  
number of ablest relatives (heredity).  
"The greatest instinct in man is life. The instinct of deception was found in the remote past."  
Miss Freida Rose, Honesdale, read a splendid paper on "Feeling," "Sensation," "Fusion and Discrimination." Among other things she said: "As long as we assume a cool and calm appearance we are not angry or afraid. Indigestion produces a feeling of dissatisfaction with our work. Excessive novel-reading and excessive theatre-going are sources of morbid feeling."  
The morning session closed at twelve o'clock.  
Saturday Afternoon.  
The first subject at the afternoon session was presented by Walter Healy, Honesdale, in an interesting paper entitled "Provision for Specific Purposes," "The Supplementing of Thought," as two factors of study.  
The question of how rightly to influence pupils during their High school course evoked considerable discussion. Many are there, it was said, simply because they were sent. What to do to make them have a specific purpose, and something definite in life is a serious proposition. "In some cases," remarked Prof. Mark Creasy, Hawley, "we ought to give them different ancestors." Prof. Koehler thought "we ought to take the pupils aside and have a private conversation with them." "Ability, health and strength," he considered three fundamental qualifications for any young person who wanted to become a successful teacher.  
"The Organization of Ideas," "Judging the Soundness and General Worth of Statements," as two factors of study, was the subject of a well-prepared paper given by Miss Marie McDermott, Honesdale. Among other things she said: "The reading and judging of newspapers and magazines may be a profitable exercise. Read not to contradict and refute, but to weigh and consider."  
The High School Boy's Chorus sang "We are Jolly Blacksmiths" in a pleasing manner.  
A Farmer's Remarkable Memory. "Memorizing," "The Use of Ideas," as two factors of study," was the subject of a paper given by Miss Margaret Rose, Honesdale, who cited the instance of a "Pennsylvania farmer who could remember the day of the week on which any date fell for forty-two years back, and the kind of weather on that day." A list of unrelated words is hard to remember.  
According to Supt. Koehler, the State High School Inspector only recommends History three times a week. "We have a large number of country schools," said Mr. Koehler that have only fifteen pupils, and a lot of them have fewer. In the majority of the country schools, the little ones are neglected."  
Miss Orra Rollison, Hawley, and recently of Chicago, Ill., gave an instructive talk on "Primary Plans and Devices."  
"We ought to have several visiting days," she suggested, "so that we could go into other rooms and see how other teachers meet their problems."  
Among the "indispensable" things a primary teacher ought to have, she enumerated 1. Pencils [Dixon's Beginners No. 308] 2. Oak tags. 3. Letter "alphabet cards." 4. Manila envelopes [for seat work]. 5. A pair of scissors for every child. 6. Charcoal, etc. 7. Picture books [baby books, animal books, etc.]. "I couldn't teach school," she said, "without a pair of scissors."

"The primary teacher should develop the pupil's ability to attend. Hold him to the thing we have required him to do. Develop his ability to study. Teach him to acquire the habit of drawing a conclusion for himself from what he reads. In the first year there should be four periods a day for Reading. games. "We play a great many games. Children enjoy doing things in "play way." The "play" idea will help the children. I want them active. When they're doing something they're interested. Stop them in the height of their play. Action work is important."  
When the institute adjourned at 4:30 p. m., the general consensus of opinion was that it was the most profitable local institute ever held in Honesdale.  
The teachers who registered Saturday morning were:  
Honesdale: Miss Alma C. Schuller, Miss Bessie Bunnell, Miss Bessie Dudley, Miss Ida Coleman, Miss Mary Murphy, Miss Isabel Reilly, Miss Mary Higgins, Miss Marie McDermott, Miss Julia F. Schimmel, Miss Vera Murray, Miss Grace A. Jadin, Miss Eliza Burke, Mrs. Alma J. G. Dix, Miss Alice L. McKenna, Miss Mary Sluman, Miss Alice Gregory, Miss Rose Switzer, Miss Freida Rose, Miss Margaret Rose, Miss Nellie P. Gleason, Miss Caroline Stephens, Prof. H. A. Oday, R. T. Davis, Walter F. Healy, Miss Clara G. Eck, Miss Amy E. Clark, Miss Ida M. Hawley, Miss Emma Flora, Miss Elizabeth D. Baird, Miss Essie M. Kelly, Miss Theresa B. Soete, Miss Mame B. Downing, Miss Anna Seaman, Miss Jennie S. Lee.  
Waymart: Miss Flora L. Loomis, Waymart: Miss Irene A. Curtis, Cold Spring: Reed Gager, Raymond E. Smith.  
Prompton: Walter Pennell, Seelyville: Arthur A. Hopkins, White Mills: A. H. Howell, Hawley: Prof. Mark Creasy, Chas. E. Martz, Miss Eva Palmer, Miss Orra Rollison.

#### GAME INCREASE...

State Game Commissioner Says So—And He Ought To Know.  
State Game Commission Secretary Joseph Kalbfus in his report on game for 1910 reports a general increase of game, insect destroying and song birds in all sections of the state, the game birds hunted in the fall being especially abundant.  
The report also recommends that there be a codification of the game laws and a revision of the seasons, some of which suit one section of the state and some another while laws for the destruction of vermin are commended. The commissioner also strongly favors the hunters' license bill which is just now being widely discussed.  
The following letter from Prof. Surface, economic zoologist, of the State Department of Agriculture, Harrisburg, to an inquirer from the western part of the state, who writes for information on how to rid his cornfields of wireworms, may be found instructive to others troubled with this pest:  
"Concerning wireworms in your corn, I must say that I am satisfied that you can not put anything in the soil that is strong enough to kill the wireworm, or even drive it away without damage to the soil and the crop. The best thing to do is to get ready for these pests by plowing the land in the fall. Perhaps plowing in the early spring and cultivating several times with a spring-toothed harrow would help greatly to reduce them. If you can follow the sod with some crop like potatoes, which, as you have observed, they do not so severely injure, it might be well to do so. Then immediately after the potatoes sow rye, doing this as early as possible in the fall, and turn the rye down in the spring, and follow this with corn.  
"The treatment of the wireworms
