SIR EDWARD GREY.

Foreign Secretary Approves Bryce's Reciprocity Work.

London, March 1 .- The Unionist at tack upon the part which Ambassador Bryce had in the United States-Canadian reciprocity negotiations was re newed in the house of commons.

The tariff reformers wished Sir Edward Grey to instruct the ambassadors of Great Britain at other capitals not to assist similar negotiations.

This the foreign secretary flatly re fused to promise. In the reciprocity proceedings at Washington, he said, the action of Mr. Bryce had been, he believed, beneficial both to Canada and the United States.

# **LEAVING HOME TO** SAVE (?) MONEY

It Doesn't Figure Out That Way When Everything's Said.

# DIALOGUE WITH A MORAL

Why Not Buy at Home and Help the Local Dealer Instead of Wasting Cash In Traveling to the City? Time and Comfort Saved.

Afternoon in home across the Hudson from New York city. Mrs. Ross and daughter Jennie, visiting Mrs. Jones, Mrs. Ross' married daughter. Mrs. Ross-I see you have on a pair of new shoes.

Mrs. Jones-Yes. I bought them yesterday at J.'s (mentions a local store), and they are a perfect fit.

Jennie-Why, they are just like mine. How much did you pay for them? Mrs. Jones-Three dollars.

Mrs. Ross and Jennie (together)-My! Oh, gracious!

Mrs. Ross-You never can get a bargain in Jersey. Jennie-That's so. Ma and I went over to New York to a sale and

bought my shoes, the same identical thing, for only \$2.98. Mrs, Ross-And we had lunch for

both for 50 cents. Jennie-The crowd at the sale was awful, and I came near fainting from the heat. Everybody must watch for those sales.

Here Mr. Jones, who was listening behind his newspaper, could hold himself no longer. He burst out with a "Ha, ha, ha!"

Mrs. Ross-What's the matter, Mr. Jones?

Mr. Jones-I was-ha, ha-just thinking how saving you women folks are sometimes.

Mrs. Ross-I don't see any joke about it. You should tell May (meaning Mrs. Jones) to look around and not spend all her money at home, as you are always preaching. See the same shoes on May and Jennie, and Jennie's cost only \$2.98.

Mr. Jones-Ha, ha! You went to New York with Jennie for a pair of shoes; 26 cents to get there, \$2.98 for a \$3 shoe. Ha, ha! Saved 2 cents, still out 24 cents, lunch 50, nearly overheated in crowd and 26 cents to get home, all tired and fretful; make the same identical shoe as May has for \$3 in Jersey cost you in New York \$4 instead of \$2.98, big saving. Ha, ha! And May didn't come home tired and fretful the day she paid \$3 for her shoes-ha, ha!

Mrs. Ross (getting ready to go home) -Oh, you men do always figure closer than a woman.

Moral.-Buy in the home market. Don't go out of town and pay 5 to 25 per cent more in expense when you think you are saving money.-Gap in Hudson Magazine.

# HELP ALONG OUR OWN.

Why Send to Other Communities For The steamer Chalmette, from Baltimore, carrying a solid cargo of canned goods, is discharging its freight at Galveston. The state of Texas is one of the largest markets Baltimore has for this kind of goods, as it is the piece de resistance on the ranches. The increase in shipment is due to the reduction in rates on canned goods from 20 to 31 cents .- Quanah Observer.

Commenting on the above, Farm and

Ranch of Dallas, Tex., says: There are no better canned goods than those of Texas, Arkansas and Louisiana. Yet it is found hard to sell products of our canneries, while trainloads and boatloads of goods are being shipped into the states which should support their own industries. In one case it was found that goods from a local cannery had been shipped away from home, then bought by a local merchant and shipped back to the

place where canned. The people who preach the doctrine of patronizing home industries should follow the advice they freely give to others. When they fail to do so then they preach for revenue only, and the revenue is for themselves only.

# 

The people read their home newspapers, but they don't read telephone poles or cows or barbed wire fences. You never yet saw a man seated by his fireside reading a board fence or the side of a barn to his children. Here's a hint for the local merchant.

**Light Attracts Customers** In the downtown section of a city the theater audiences come and go through two avenues leading to car lines. A haberdasher has a shop in a side street between these two channels of travel at a much more reasonable rent than he would have to pay en the avenues. Study of the conditions convinced him that theater goers took those avenues not because they were especially convenient nor as a matter of tabit, but simply because they were light. When he put up an electric sign big enough to light his section of the dark side street he diverted enough travel past his windows every night to increase materially the daily sales.-Saturday Evening Post.

#### SPECTACLES FOR HORSES.

Adopted When Horse is Young: Effect Remarkable.

At least one London firm makes spectacles for horses. The object of these is to promote high stepping. The frames are made of stiff leather entirely enclosing the eyes of the horse, and the glasses used are concave and large in size. The ground seems to the horse to be raised, and he accordingly steps high, thinking that he is going uphill or has to step over some obstacle.

This system of spectacle-wearing is generally adopted while the horse is young, and its effect on his step and action is said to be remarkable It has been ascertained that the cause of a horse's shying is, as a rule, short sight, and it is contended that the sight of all horses should be tested, as that of children.

It is maintained that by a little artificial assistance many valuable horses which have become optically unfit for work can be restored to usefulness.-Harper's Weekly.

#### Among the "Extras."

One of the things which help swell the traveller's expenses, both in this country and abroad, is the "extra." It may or may not be charged in the bill, but it is sure to be paid for. Probably even the most generous traveler, however, will have some sympathy for the gentleman in the following story, who was made to pay liberally for a certain annoying privilege.

During his stay at the hotel the weather had been very hot.

"Charles." said the landlord to the clerk who was making out the bill to be presented to the departing guest, "have you noticed that the gentleman in number seven has consulted the thermometer on the piazza at least ten times every morning during his stay here?"

Charles replied that he had. "Well," said the landlord, "charge him the price of one dinner a day for the use of the thermometer."-Youth's Companion.

#### The Story of a Cabinet.

The Swedish Consul at Marseilles has received a modest but interesting memento in the form of a cabinet for papers for transmission to King Gustav V. This history of the cabinet is interesting. It is made of juniper wood, and the tree was supposed to be a thousand years old when it was felled. It had grown on an estate near Marseilles which had belonged to the Clary family. One of the daughters married Bernadotte, the founder of the royal house of Sweden. Bonaparte, it is said, used to enjoy sitting under this tree. Some time before the death of Oscar II., the present King visited the home of his ancestress and expressed a desire to possess some souvenir of the place, and the capinet is the outcome of his wish .- London Globe.

# New Canals Dug.

Coincidently with the rise of Germany's sea power there is going on a remarkable development of the nation's waterways. Berlin is now ambitious to be a seaport and a project for a maritime canal from the Baltic sea is under way. The Kaiser Wilhelm canal, only a few years old, has already been found to be inadequate, and a project has been adopted to double the width and increase the depth to forty feet at a cost of \$1,-000,000 a mile. Germany's example is felt by her neighbors. Brussels, Ghent and Bruges are engaged in similar projects.

# A Painter's Legend.

Around Leonardo da Vinci's famous painting, "The Last Supper," there hangs an interesting legend. The painter, it is said, sought a model for his Christ for a long time in vain before he discovered a beautiful youth who answered to his conception. At a later stage he sought a model of Judas, and, having found him, discovered that the foul-looking man upon whom his choice had fallen was no other than the erstwhile beautiful youth who had sat to him a few years

## SHEFFIELD PLATE.

Collectors Place It Side by Side With Sterling Silver.

Late in the eighteenth century there was developed in Sheffield, England, a new method of fusing a thin piece of silver upon copper or brass which was christened with the name of the city. Attaching silver to baser metal by means of solder had been known from remote times. The gay caparisons of horse and rider in the tournaments made a demand for work of this sort, and Otley, a little town to the north of Sheffleld, was long a center of its trade, says Handicraft. It is related that as the call of such trappings went out its craftsman drifted toward Sheffield, and it is not unlikely that through their knowledge and skill the copperplating was perfected,

It was at once recognized and copied by the French, who had hitherto known only the joining by means of solder, and was used for fifty years or more, when the modern process of electroplating superseded it. For a time after the discovery of the latter methods, following a common law, the old plate was discredited and many a fine piece suffered in carcless hands Today collectors place a choice piece of Sheffield plate side by side with sterling silver.

The standard of silver in England, which is also our own, has remained practically unchanged for 500 years. Two hundred years ago it was raised for about twenty-five years, but the test of wear proved it too soft to be durable. This silver has the figure of Britannia stamped upon it and is known to the trade as Queen Anne silver. Its standard is still lawful, but seldom called for. With the date and sterling mark of all English silver are also the mark of the office in which it is assayed and the registered mark of the maker or the shop from which it is sold. There are now seven offices where silver may be assayed, some of the older ones, like York and Exeter, having been discontinued. London is the oldest among them, its leopard's head being so highly esteemed that it is not unusual for manufacturers in the other cities to send their work there for its mark, At the Goldsmiths' hall, in London, date letters are preserved from the time of Queen Elizabeth Edinburgh has date letters from the seventeenth century and Dublin from somewhat later, but for the most part the lists begin close upon the date of our independence, that of Sheffield

### Conkling and Thurman,

Senator Roscoe Conkling was once addressing the senate in an impassioned manner and seemed to direct his remarks to Senator Thurman, length the latter got irritated.

"Does the senator from New York," he roared, "expect me to answer him every time he turns to me?"

For a moment Mr. Conkling hesitat ed, and everybody expected a terrific explosion. Then, with an air of exquisite courtesy, he replied:

"When I speak of the law I turn to the senator from Ohio as the Mussulman turns toward Mecca, I turn to him as I do to the English common law as the world's most copious fountain of human jurisprudence."

The usually decorous senate broke into a storm of applause, and the Thurman eye moistened a little. The two statesmen were the best of friends and greatly enjoyed each other's society when "off duty."
