### REPUBLICAN TICKET.

Congressman, W. D. B. AINEY.
President Judge, HON. ALONZO T. SEARLE.
District Attorney, M. E. SIMONS.
Prothonotary, WALLACE J. BARNES. Register and Recorder, W. B. LESHER. Commissioners, JOHN MALE, EARL ROCKWELL.

Commissioners, JOHN MALE, EARL ROCKWELL, Sheriff, THOMAS Y. BOYD. Treasurer, W. W. WOOD. For Auditors, W. O. AVERY and LEROY GILPIN. For Coroner, P. B. PETERSON.

### AN OVERSIGHT.

Owing to the pressure of going to press with as complete election returns as possible in the last issue we inadvertently left out of the Republican ticket the names of the candidates for District Attorney, Auditors, Coroner and Congressman.

This mistake has since been rectified and at the top of this column appears the official Republican ballot which, we sincerely hope, will carry barrel. the county on November 7. Let us all work together for the success of the Republican party and elect the entire ticket it has nominated.

## WHAT THE PAPERS SAY.

According to the "Tribune-Republican,,' speaking of politics, the Wayne county Republicans are to be congratulated upon the selection of Hon. A. T. Searle as candidate for judge. During his term of service, Judge Searle has made an nviable reputation as a jurist, not only in his the Binghamton Fair this week.

Harold Raymond, Willie Perkins, the examination, all reports to the family being made directly from the department. own county but in the courts of Lackawanna and Susquehanna counties where he has frequently presided with satisfaction. As the Republican nomination in Wayne is equivalent to an election at this time, that county is certain of a presiding officer of unusual merit on the bench.

According to the "Truth": Hon. A. T. Searle's nomination in Wayne county, is pleasing news to the judge's host of friends here and throughout the state. The fine showing that he made at the primaries indicates his election by a substantial majority.

## DISASTERS THAT COULD BE AVERTED.

It is vastly easy after each terrible disaster and wholesale loss of human life to comment upon it and show how it might have been avoided. But the trouble is that people are apt to make a nine days' wonder of such things and then straightway forget all about them. And nothing is done to prevent their repetition.

And so it has come to pass that the Johnstown disaster of 1889 has been repeated in the same State and at no great distance from the ill-fated city which was destroyed twenty-two years ago. It is yet too early to say definitely whether or not the company that constructed the dam at Austin was in fault. One dispatch says that it was constructed as well as a dam could be constructed. Another dispatch says that the engineer who made he dam had warned the company that it needed strengthening. If made he dam had warned the company that it needs strategies by made, this warning was negected, or if the reinforcement was carelessly made, plant here this week.

David Sutherland, who has been Bayless Pulp and Paper Company.

Be that as it may, this and other similar tragedies raise the question whether it is ever permissible to have a great body of water above town only held in place by a dam, which experience has shown is liable to be broken by the enormous weight and pressure that is always pushing it out. When industrial or other conditions make it absolutely necessary to build a large dam above a village the village should be removed, if possible, to a place of safety.

### MEDICAL INSPECTION OF SCHOOL CHILDREN.

State Health Commissioner Dixon is preparing to make the medical in-spection of school children authorized by the new school code. The inspec-tions will be made in 785 school districts which means that 250,000 children will receive the direct benefits of this important work. The inspec-tors will also make a thorough inves-The inspectigation of the sanitary conditions existing at the schools.

The medical inspector will be instructed to note the age and sex of the pupil, the condition of sight, hearing, respiration, skin, teeth, cervical glands, contagious d pulmonary tuberculosis and diseases, mities. In recording the deformi-ities they will be classified as those of the spine, the chest and the ex-tremities. Those of the extremities will be further described as con-genital or acquired.

Each eye will be tested separate-ly, using Snellen's Chart at twenty feet, indicating the amount of vision as a fraction, the distance at which the child is standing, namely twenty feet, being used as the numerator and the denominator being the size of the type which the child is able to read at that distance. The presence of blepharitis, conjunctiviplications for membership were retis, iritis or trachoma or any affec-tion of the cornea will be observed. Care will be taken that the children do not memorize the letters.

Each ear will likewise be tested separately for accuracy of hearing by whispering at twenty feet, the distance at which the whisper is heard being used as the numerator and the distance at which it should be heard being given as the denomi-nator of the fraction. The presence of a discharge from either ear will be watched and its nature observ-

ed Defective teeth and nasal breathing will be noted. Enlargement of the cervical glands will be observed. With regard to nervous conditions the existence of chorea or epilepsy will be stated and the general con-

dition of nutrition. If indications of present or recent contagious diseases are found, note will be made of the fact and the exclusion of the child and its brothers and sisters at once ordered.

Gentleness and tact will be employed in the personal inspection so that its value may not be impaired by mental disturbance on the part of the child.

Under no circumstances will the medical inspector advise as to the selection of a physician or communicate with the family of a pupil per-sonally with regard to the results of

Teheran, Persia, Oct. 5.-A woman's suffrage bill was introduced in the Persian parliament by one Dowlah, a champion of woman's rights.

A free fight had begun when the president declared the bill was sacrilegious and against the teachings of the Koran, which distinctly says women have no souls and in every way are inferior to man and that a soulless animal cannot have the vote.

The house wildly applauded him, threw out the bill and passed on to other business.

The mere fact that such a bill was introduced into the Persian medillis at all shows a great change has come over the minds of some of the leaders

### MAY TALK OVER SEAS.

New Telephonic Invention Holds Great

Promise. Talking through the water from one

ship to another has become possible by means of an improved wireless telephone, which is expected to replace the ordinary submarine bell signals. Bells sounded under the sea are at

present in use on all large liners, the sounds being picked up on other vessels by means of a special form of telephone. The wireless telephone with which

people will talk through the sea is quite different from the ordinary wireless telegraph which transmits signals through the water. Far simpler and less costly and requiving no skill to operate, the tele-

phone can be fitted up in any vessel, however small at moderate cost and provides a means of conversation by wireless. In a fog a ship fitted with the wireess telephone could hear the approach of other vessels, as the sound given out

by a small electric bell or other signaling device on one ship would be detected in the telephone on the other. After flashing a signal back through the water conversation could at once

be established between the two vessels. A ship could speak with a port or lightship or lighthouse in just the same way, and submarines could keep up a continuous conversation with each other and the battleship to which

they were attached. With the aid of a new microphone for talking into it is hoped to be able to speak through the sea for twenty miles.
