

WIDOW GIVES SCHLEY RELICS

Valuable Collection of More Than One Hundred Articles.

IN THE NATIONAL MUSEUM.

Presents From His Admirers In All Parts of the Country—Handsome Gifts From the State of Maryland to Its Honored Son.

Mrs. Winfield Scott Schley, widow of the famous sea fighter whose death occurred a short time ago, has deposited at the National museum, Washington, one of the largest and most valuable collections of naval memorials now on exhibition at that institution. The memorials were gathered by Admiral Schley and include more than 100 words, medals, trophies, silver plate, uniforms and personal mementoes pertaining to his naval career, as well as his affiliation with the Masonic and other orders.

Among them is a gold medal from the Humane Society of Massachusetts presented in recognition of his rescue of General Greely. There is also a handsome gold watch which his native state of Maryland presented to him in commemoration of the same gallant deed. Another medal, profusely studded with diamonds, was presented by the state of Maryland at the close of the war with Spain.

Several handsome swords are included in the collection, one from the state of Maryland and another, finished in gold, with a gem incrustated scabbard and hilt, presented by the Knights Templars.

Probably of most interest is the sword worn by Admiral Schley through his entire naval career of forty-one years. Two admirals' naval uniforms, one dress and one service, are among the mementoes.

The commodore's flag, a blue pennant bearing the single white star, which flew on the Brooklyn, Admiral Schley's flagship, during the battle of Santiago, is an object of interest.

Several loving cups and silver services are in the collection. One was presented by the state of Maryland in 1899. Part of another service was made of the silver hulled taken from the safe of the Spanish battleship Cristóbal Colon and made into a service of sixty-nine pieces and presented to Admiral Schley by his admirers.

Other objects of interest are two statuettes of bronze, one designed by Millie Laporte, presented by the citizens of Binghamton, N. Y.; the other designed by the French artist Dubois and presented to Admiral Schley by a French steamship company in 1900 in appreciation of his having saved one of the vessels of that line from disaster.

A large silver centerpiece and accessories form a contribution from Memphis, Tenn., in 1902. A particularly beautiful loving cup was presented by the citizens of Dallas, Tex. It is embellished with emblematic figures representing the Lone Star State.

Among the fraternal order mementoes is a gold badge of the Masonic thirty-third degree, presented by his fellow Masons of South Dakota in 1908.

TO FIGHT HOBBLE SKIRT.

Massachusetts W. C. T. U. Also Against High Heels.

In the campaign against the hobble skirt, high heels, exaggerated collars and similar feminine follies the latter force brought to bear in the interests of reform and simplicity is the Massachusetts Women's Christian temperance union, whose membership 10,000.

That the Massachusetts organization a unit in the campaign is stated by Mrs. Mary E. Cheney of Boston, assistant secretary and member of several important committees. Mrs. Cheney says:

"When one encounters the monstrosities of today the subject of dress becomes sad. The hobble skirt is ridiculous, and it is, with the high, narrow heel, ruining the walk of women. The harem skirt is something of which I know little, except that it impresses me as being immodest and an ample of the foolish catering to the fancies of fashion. The scant skirt, which fairly imprisons a young woman and makes it impossible for her to sit without her skirt ascending almost to her knees, is a monstrosity."

ON TOP OF MOUNT CORATUNA.

Members of a Yale Expedition Accomplish a Notable Feat in Peru.

Professor Hiram Bingham, the Yale tutor on Latin American history, went out at the head of a Yale expedition last summer for exploration Peru, has ascended the highest peak Mount Coratuna, according to a dispatch received at the university. This is the first time that this peak, which 22,000 feet high, has ever been ascended so far as known.

Professor Bingham has made several expeditions to Peru and other parts of South America. That the Yale expedition is meeting with the co-operation of the Peruvian government is apparent from a message which was received by Yale from the subprefect of a council of Cetahuasi, Peru, which reads:

"Greetings. Appreciate expedition."

TURKS PLAN ATTACK.

Re-enforced by a Thousand Arabs, They Seek to Regain Bengazi.

Rome, Nov. 16.—It is reported that the Turks are massing in front of Bengazi and Derna. It is evident that they intend to attack. The Turks have been re-enforced by a thousand Arabs from distant tribes.

The Italians captured ten of fourteen guns the Turks removed from Bengazi. The remaining four have since been strengthened by several others that came to the Turks by way of the desert. Large supplies of ammunition, food and uniforms have arrived at the Turkish camp from the same source. The artillery duel continues intermittently.

Sleighting in Adirondacks.

Syracuse, N. Y., Nov. 16.—Sleigh bells jingled throughout northern New York after the first heavy snowstorm of the fall. On the foothills of the Adirondacks the snow is ten inches deep.

GENERAL ALLEN.

Who Deplores Lack of Enthusiasm For Army Aviation.

Copyright by Clinedinst.

WANTS MORE ARMY AVIATORS

Brigadier General Deplores Lack of Men For Aeronautics.

Washington, Nov. 16.—In his annual report just made public Brigadier General James Allen, chief signal officer of the army, recommends that additional officers and enlisted men be provided for training in aeronautical and other work of the signal corps.

General Allen said the army has the money, but not sufficient number of officers for aviation.

General Allen says: "The progress and development of this auxiliary to the military establishment during this period is believed to be without precedent. Although the United States was the first nation to recognize the aeroplane for military purposes and carried out the first official government tests of an aeroplane in 1908 and 1909 at Fort Myer, Va., yet such has been the phenomenal progress in this science and art that this country has been left far behind in scouring practical equipment and organization for the use of this recognized indispensable adjunct to war."

LOCKS A PROBLEM.

The locks have been a great problem. Designs for the approach walls at all locks, except one, have been prepared. Contracts in force at the beginning of the fiscal year were practically completed and new contracts entered into for a vast amount of frames, valves, gates and other paraphernalia needed to put the canal into operation. More than 854 tons of castings were made on the isthmus. Building of the great lock gates—each leaf of which is fifty-four feet eight inches high—was expedited. At each lock entrance strong fender chains attached to powerful springs will be installed to prevent ships from battering down the locks.

The Culebra cut is ten miles long and deep enough to receive the United States capitol, dome and all. From this cut, despite the enormous excavation during the year, on July 1 last there remained 23,924,140 cubic yards to be removed. Estimates of excavation necessary in this cut have been largely increased to allow for the great earth slides. Last year these slides that had to be removed from the canal cutting after it had been practically completed was 4,879,378 yards, or over 30 per cent of all the material removed from the cut.

These slides have occurred where the material excavated was left on a slope steeper than the permanent incline will be, and the trouble is expected to cease when the natural slope of the canal banks is restored.

Breaks have occurred on both sides of the cut where the underlying rock is of poor quality and is broken up and squeezed upward by the pressure from beneath and from the slides, interrupting the drainage and covering up the railroad tracks. To meet this condition intermediate benches have been cut along the slope to distribute the top weight and reduce the amount of material to be removed. It is declared that when the bottom grade of the canal is reached no further trouble need be anticipated, as greater stability will be given by the water.

SLIDES DIDN'T INCREASE COST.

The slides have caused no increase in the total estimated cost of the Culebra cut. The Cucaracha slide covered 47.1 acres and the Culebra slide 46.3 acres.

The total appropriations made by congress leave \$81,639,531 of the estimated cost of canal yet to be appropriated.

The temperature for the calendar year 1910 was about normal for all the stations. The highest recorded was 94 degrees F. at Ancon on March 13, 1910, and the lowest, 61 degrees F., at Culebra on March 21, 1910.

The average rainfall over the canal zone for the calendar year 1910 was well above normal, being unusually heavy in July and December, but below that of the previous year.

Slight seismic disturbances were of frequent occurrence during the year, very few of which, however, were physically observed in the zone.

Sanitary Work.

The work performed for the sanitary department has increased, the grass cutting area having been further extended to include more territory. The amount expended by the quartermaster's department on orders from the sanitary department for zone sanitation was \$210,403.29 and for hospitals, quarantine, etc., \$77,254.48.

At the end of the fiscal year this department was operating the Tivoli hotel, nineteen line hotels, three night restaurants, sixteen European laborers' messes and fourteen common laborers' kitchens, an increase of one hotel and a decrease of three messes and four kitchens. The total number of men served by the hotels was 2,216,740, which was an increase of 40,289 over the previous fiscal year. The cost of supplies per meal was 25.44 cents, or 0.57 cent more than during the previous fiscal year, and the expense in preparing and serving meals was 0.62 cent less, or 5.61 cents, resulting in a decrease in the total cost per meal of 0.05 cent.

CHANGE OF VENUE FOR PASTOR

Counsel For Richeson Say Prejudice Will Affect a Jury.

Boston, Nov. 16.—It has become known that counsel for the Rev. Clarence V. T. Richeson are likely to make a motion for a change of venue for the trial of the murder charge. The attorneys who are to battle for the life of the minister are understood to have decided that public feeling in Suffolk county is such that an unprejudiced jury cannot be drawn, even from a long list of talesmen.

District Attorney Pelletier will make a fight in opposition to the proposed motion. It is expected that the motion by the defense will be made within a week.

DO YOU WANT YOUR BOY TO SUCCEED?

One of the most important things you can teach your children is the value of money, and one of the best ways to do it is to encourage them to save money systematically and to deposit it regularly in a Household Bank furnished free.

The boy who early becomes familiar with banks and the earning power of money will have a distinct advantage when he starts on his business career.

Honesdale Dime Bank

accepts savings accounts of minors subject to withdrawal under parental authority. One dollar is enough to begin with and three per cent compound interest is paid.

This Bank solicits both Savings and Business Accounts and loans back its money to Wayne county people furnishing good security.

\$293,561,486 SPENT ON CANAL.

Estimates Call For \$81,639,531 More to Complete Work.

EARTHQUAKES LITTLE FELT.

Commission's Report Tells of Year's Work, Including Lighting Plants, Culebra Cut, Completion of Locks and Checking Landslides.

The great mechanical problems connected with the construction of the Panama canal, which is to be opened to the government in January, 1915, pass in review in the annual report of the isthmian canal commission just made public. The record of the year's achievements in the gigantic task that is being worked out by the Washington government, under congressional appropriations that so far aggregate \$293,561,486, includes:

Completion of almost three-quarters of Culebra cut. Total excavation of material from Culebra during year, 15,221,672 cubic yards at average cost of 68.8 cents per yard.

Big plans laid for canal terminals, including storage of fuel, fresh water and other supplies, repair facilities, etc. Pacific terminal to have drydock, storehouse and coaling stations.

Practical completion of plans of all locks.

Elaborate scheme for lighting the canal. Safeguarding of the canal against big landslides.

Locks a Problem.

The locks have been a great problem. Designs for the approach walls at all locks, except one, have been prepared. Contracts in force at the beginning of the fiscal year were practically completed and new contracts entered into for a vast amount of frames, valves, gates and other paraphernalia needed to put the canal into operation. More than 854 tons of castings were made on the isthmus. Building of the great lock gates—each leaf of which is fifty-four feet eight inches high—was expedited. At each lock entrance strong fender chains attached to powerful springs will be installed to prevent ships from battering down the locks.

The Culebra cut is ten miles long and deep enough to receive the United States capitol, dome and all. From this cut, despite the enormous excavation during the year, on July 1 last there remained 23,924,140 cubic yards to be removed. Estimates of excavation necessary in this cut have been largely increased to allow for the great earth slides. Last year these slides that had to be removed from the canal cutting after it had been practically completed was 4,879,378 yards, or over 30 per cent of all the material removed from the cut.

These slides have occurred where the material excavated was left on a slope steeper than the permanent incline will be, and the trouble is expected to cease when the natural slope of the canal banks is restored.

Breaks have occurred on both sides of the cut where the underlying rock is of poor quality and is broken up and squeezed upward by the pressure from beneath and from the slides, interrupting the drainage and covering up the railroad tracks. To meet this condition intermediate benches have been cut along the slope to distribute the top weight and reduce the amount of material to be removed. It is declared that when the bottom grade of the canal is reached no further trouble need be anticipated, as greater stability will be given by the water.

SLIDES DIDN'T INCREASE COST.

The slides have caused no increase in the total estimated cost of the Culebra cut. The Cucaracha slide covered 47.1 acres and the Culebra slide 46.3 acres.

The total appropriations made by congress leave \$81,639,531 of the estimated cost of canal yet to be appropriated.

The temperature for the calendar year 1910 was about normal for all the stations. The highest recorded was 94 degrees F. at Ancon on March 13, 1910, and the lowest, 61 degrees F., at Culebra on March 21, 1910.

GETS THE WRONG BOTTLE.

While Clerk is Gone Customer Drinks Carbohic Acid.

Wilkesbarre, Pa., Nov. 16.—When Michael Makowski entered a drug store at Nanticoke he informed the clerk that he was feeling none too well. He asked for a drink of whisky and was invited to the rear of the store. The clerk pulled a large bottle of liquor from the shelf, and Makowski took a healthy drink. The bottle was placed back in its proper place, and the clerk went about his business.

While he was waiting on a customer Makowski decided to take another drink and when alone pulled a large bottle from the shelf. He placed it to his lips, took a big swig and then cried aloud. When the clerk came to see what had happened he found Makowski on the floor. He looked at the bottle and saw that it was carbohic acid. He may recover.

Rice.

Rice to be a useful article of food should be stewed with milk, butter or stock, which will supply the want of natural fat.

Twelve Corners.

What is known as Twelve Corners, between Solon and Madison, Me., is said to be the only place of the kind in the United States. Six roads meet at this place, making twelve distinct corners. On each corner there is a sign post.

Cheap Reading.

A Chinese newspaper only costs one-fiftieth of a cent.

Experts With the Dagger.

Among the wilder tribes of the Caucasus every child is taught to use the dagger almost as soon as he can walk. The children first learn to stab the water without making a splash and by incessant practice acquire an extraordinary command over the weapon.

Flippant Flings.

"The woman suffragists of New York are looking for an emblem." Man, of course, will not do. He is merely a mark. — Rochester Democrat and Chronicle.

By judicious advertising Missouri has induced 600 poets to try a state song, but will any one of them show us a rhyme for Missouri or the right way of pronouncing St. Louis? — New York World.

The gloomy prediction that by the year 2911 the women will have no little toes does not scare the women of this generation. Who would care to have five toes, anyway, if four toes were the fashion? — Chicago Tribune.
