New York, Jan. 18.- The climax of impressiveness in the homecoming of Cardinal Farley was reached in serv lees at St. Patrick's cathedral.

Within the church walls were crowded 6,000 children from the parochiai schools of the city. Thousands of others were in Fifth avenue, unable to get into the great building. Each little one carried a papal flag, and all waved their white and yellow standards with royal good will as the open carriage containing the cardinal rolled up to the curb.

The Catholic Protectory boys' band was on hand to render a musical welcome, but its notes were drowned in the mighty shouts which rose from thousands of throats. "Welcome to our cardinal!" called the crowd again and again, and the police had a lively battle to keep back the surging ently slasts from overrunning his eminence

As the cardinal stepped from his car ringe the great front doors of the cathedral swung open to receive him. Guarded by the papal guards, he walk ed slowly within and the doors swung shut again. Within the doors Cardinal Farley halted and donned the red robe and the red bat. Then he knelt and said a brief prayer as he kissed the crucifix. As he was donning his robe the big front door was pushed open by the crowd surging against it from without, and for an instant it looked as if the throng outside would bent their way in, but the police in attendance drove them back. Then the car dinal walked slowly up the aisle to the

# CUBANS ACTIVE.

### Opposing Leaders Meet to Discuss Situation.

### ARMY OF 5,000 READY TO MOVE

Secretary Knox of State Department Feels That It Is Now Up to President Gomez to Straighten Out Difficulties That Caused Government to Issue Warning.

Washington, Jan. 18.-The state department stands pat on its note to Cuba warning President Gomez that be must maintain the law or expect a third intervention. Secretary Knox feels it is now up to Cuba and that the state department will have an auswer to its note in the steps taken to remedy the existing political situation.

Meantime all arrangements have been made by the war department, so that a force of 5,000 can be dispatched to Cuba on a few hours' notice. Troops along the Atlantic coast have been designated and will be sent to Cuba in case it becomes necessary to occupy the island.

Commanders have been notified that they must be prepared to move their forces according to plans drawn up long ago. There is no expectation at the war department, however, that such a move will be necessary.

This view also prevailed at the state department. Unofficial reports received from Havana were taken to indicate that the Cuban government and people understand the purpose of the note presented by Minister Beaupre. Word was received that President Gomez will meet the leaders of all the political factions for the purpose of discussing the situation. This step is taken to indicate that the note has already had a most salutory effect in that it has resulted in opposing leaders getting together for at least a discussion of the situation. The reasons for the presentation of the note were more fully explained at the state department. As was first suggested, it was felt at the department and at the White House that fairness to Cuba demanded that this government remind the Cuban government of its responsibilities before it was too late for any remedy but American inter-It was considered that it would be more fair to the Cubans to warn her of the seriousness of the sitnation from the American point of view in time to give President Gomez and his administration an opportunity to straighten matters out.

Unofficial advices received at the department indicated that at least a portion of the Cuban people appreciated this view of the situation and wel comed the action of the United States. President Gomez and members of his administration, together with the more substantial business element of the Cuban people, are understood to coin cide with this view

It is well known at the state department that there is a very stroment among the business men of Cuba in favor of the annexation of the island by the United States. It was made most clear at the state department that no such proposal is contemplated in that quarter and that intervention is, to say the least, far from being desired.

### ACCUSE COMMISSION.

Railroad Lawyers Attack Interstate Commerce Order.

Washington, Jan. 18.-Attorneys for the Southern Pacific Railway company, in a petition filed with the United States commerce court, in effect accuse the interstate commerce commission of violating and evading a decree of the United States supreme court. The interstate commerce commission

in 1908 fixed a rate of \$3.40 a ton for lumber transported from points on the east bank of the Willamette river, in Oregon, to San Francisco bay points and a rate of \$3.65 from points on the east bank of the river south of Corvailis to the same destination.

The railroad appealed to the United States circuit court of California on the ground that the commission had exceeded its authority. The circuit court, however, denied the rallroad's application, and the railroad carried the case to the United States supreme

In the meantime the commission's order reducing the rates had expired and the railroad again put in force its old

The railroad contends that this was done by the commission either under a misconception of the true meaning of the supreme court's decree or arbitrarily and asks that it be restrained from enforcing its order.

"What the government does with the president, "is of as much concern of obtaining this amount of money for the public use."

Probably the most radical proposal advanced by the president in his message was that all administrative officers of the government in the departments at Washington and in the field he put under the civil service, be removed from the influence of politics and that their terms of office be not limited, as at present, to four years. Such officers should not be appointed by the president with the necessity of senate confirmation, he said, but upon merit.
