Character in Backs.

If your back is straight and upright you are correspondingly straight in your conduct. You will hold your head up, for you are not afraid to look the whole world in the face.

Even when you're sitting you keep your back straight. There is an air of real strength about you-both physplenty of backbone. You are determined, energetic and to be relied upon. If your back is stooping and rounded

you are a creature as weak as you look you are prone to folling about and too lazy or too feeble to take a timber, and have from one to ten front rank in the battle of life. The tramp is an excellent example. If you are a criminal your back is

stooped or round, but the scholarly

being emphasized by special trimming. The charming gown of embroidered blue linen illustrated has the new set in sleeve.

Evening Frocks.

Authorities are divided on one important item-the length of evening frocks. In spite of the fact that most of the new models this year are made with a ten or twelve inch pointed train. one of the greatest Paris houses shows a majority of its new evening gowns with the short skirt just instep length.

Since there is this division of opinion among the great originators of fashion it would seem that each young woman may choose for herself as to whether she will cling to the youthful round length skirt or will prefer the more formal trained effects worn by the older women. Some wonderful new black jet trimmings are used this season, and white and colored spangles. bugles and brilliants are strongly in evidence. A black veivet evening frock cut en surprise has the deep V yoke of cream white maline lace. This corsage is outlined with a narrow row of brilliants and trimmed with a cut jet motif which extends down into the skirt to the lower odge.
