ILLITERACY IN THE UNITED STATES.

Statistics Issued by Director Durand of the Census Bureau.

A preliminary statement of the results of the thirteenth census enumeraion regarding illiteracy in the United States has been made by Director Duwand of the bureau of the census, department of commerce and labor. hows that in 1910 there were 71,580,-270 persons ten years of age or over in the United States, of whom 5.517,608 were unable to read or write, constituting 7.7 per cent of the population.

The native whites, who constituted nearly 75 per cent of the entire population, had the smallest number of il-Mterates-1,535,530, or 3 per cent. The foreign born whites had 1,650,519 illiterates, or 12.8 per cent of their number. The colored had 2,331,559 illiter-

ates, or 30.5 per cent. Comparing 1910 with 1900, there was a gain of 13,640,456 in the population of ten years of age and over, but the number of illiterates fell off 663,-481. There was consequently a decline in the percentage of illiteracy from 10.7 to 7.7 per cent for the aggregate population.

Among native whites the number of militerates diminished 378,081, and as the population increased the percentage fell from 4.6 per cent in 1900 to 3 per cent in 1910. Among the colored there was a decrease of 647.364 illiterates and a diminution of the percentage of illiteracy from 44.5 per cent to 30.5 per cent.

Among the foreign whites there was the slight increase of 363,384 in the number of illiterate persons; but, as the whole number of foreign whites had targely increased, the percentage of illiteracy remains practically the same as ten years ago, being 12.8 per cent in 4910 and 12.9 per cent in 1900.

NEW STAR DISCOVERED.

Professor Errebo of Norway Reports It. Verified at Harvard,

Professor Errebo of the astronom ical observatory at Dombaas, Norway, has given the heavens a new star. His discovery was announced in a cablegram from Professor Kobold of the observatory at Kiel, Germany, to Professor Edward C. Pickering, director of the Harvard observatory. On the receipt of the news the photographing force at Harvard went over the negatives of the skies made and came apon two plates taken recently which confirmed the finding of Professor Er-

The plates show the star to be of the fifth magnitude, while its discoverer found it only of the fourth magnitude. The position of the star for 1855 is R. A. 6 hours 45.5 minutes and its declination 32 degrees 17 minutes. This position places it in the constellation Gemini, and it is about 1 degree 51 minutes south of the Theta Gemi-

In the last twenty years about fifeen new stars have been seen.

BROKEN AORTA TIED.

Surgeon Performs Rare Operation at New York Hospital.

the rarest operations in gery was performed at Bellevue hospi tal, New York, by Dr. William C. Lusk who inserted a twelve foot coil of platinum coated gold wire into the extended aorta of a conscious patient.

Henry Griffin, fifty-three years old, a stationary fireman, was suffering from aneurism of the aorta, the large artery close to the heart. Even the slightest mistake of the surgeon would have caused almost instant death of the pa tient. The operation was pronounced a success. A thin needle, several inches long, was employed. A spool of fine gold wire specially manufactured for the occasion was fed into the needle until it almost reached the point. Then a puncture was made in the wall of the north with the needle, barely sufficient to admit the gold wire. The puncture was true, the wall of the norta held, and no blood was lost. An end of the wire was coiled about the out side wall and made fast.

volved eighty or more defendants. Eight out of twelve defendants were convicted on one indictment after trial by jury and their conviction confirmed by the court of appeals, and thirteen criminal prosecutions are pending

A brief review of the cases brought under the anti-trust law during the administration demonstrates clearly its value to the American people in their protection of that equality of opportunity which is declared by the platform of the Republican party to be the right of every citizen.

Reference to a few of the anti-trust cases brought by the Taft administration gives an excellent idea of the hardships some of these illegal combinations entail upon consumers. In the prosecution of a case against a number of individuals who attempted to corner all the free cotton remaining of the crop of 1903 it resulted in a raise in the price of that commodity to the spinners, prevented some from making any purchases and was therefore restraining interstate commerce.

In like manner the government took cognizance of the pooling in the wire industry, with the result that nine indictments were found in New York against eighty-three persons engaged in that business. It was an illegal restraint of trade, and when the court proceedings and been finished the various defendants were fined in amounts averaging \$1,000 each, with the exception of the supervisor of the pool, who was fined \$45,000.

One of the most outrageous cases of ing extraordinary precautions to guard combination in restraint of trade and against theft at the Metropolitan muse- a notable violation of the Sherman law am, where the treasures are to be was that of the hand blown window glass industry. ********* Deserves Another Term.

Representative J. Hampton Moore, who is well known in many different sections of the country on account of his active interest in waterway improvements, in discussing the administration of President Taft has this to

"President Taft ought to be renominated and elected because he stands for stability. He rhould be nominated because it has been generally conceded by Republicans since the first day he entered the office that the same treatment would be accorded him with respect to a second term that is usually accorded to Republican presidents who have done well. There is no good party excuse for not nominating him. He should be elected because, while not a political president in the sense that he has played politics to the satisfaction of all elements of his party, he has in fact been a broad gauge president, conservative in all matters affecting the dignity of the office and the obligations assumed by him to sustain and uphold the constitution and the laws of this country."

Taft's Efforts For Peace.

Honesty of intention, stability of purpose and a firm faith in the principles of the party of Lincoln, Grant and McKinley are some of the characteristics of President Taft. Familiar with the horrors of war, as well as the enormous expense that it always entails, independent of the vast expenditures required to keep a great nation upon a constant war footing, the president has persistently sought to promote a worldwide peace of nations by international agreement. Any fallure of accomplishment in furthering this worthy cause cannot be charged to the president.

Heard Every Day.

"Beaten out of \$5." said the gold leaf dejectedly.

"I hope I make myself perfectly clear," said the water as it passed through the filter.

"Experiences like this tend to harden one," the egg said when it was drop ped into boiling water.

"I'll stay and see this thing out," said the man who was at the dentist's to have a tooth pulled.-Boston Transcript.

Political Pointers.

The man who would rather be right than be president is almost always right.-Washington Post.

Most of the candidates, however. are taking no chances on the office doing the leap year stunt. - Detroit

SNAPSHOTS AT **CELEBRITIES**

W. B. McKinley, Manager of the Taft Campaign.

Representative William Brown Mc Kinley of Illinois, manager of President Taft's campaign for renomination, is also chairman of the Republican congressional committee in charge of the general fight for the election of Republicans to both houses. From his headquarters at Washington Mr. Mc-Kinley will direct the preconvention contest. After the convention he will probably relinquish his temporary duties and again take up the work of the congressional committee, aithough there is a possibility that he may become national chairman to handle the fight against the Democratic nominee.

Four years ago Mr. McKinley was considered for the position of national chairman to conduct Mr. Taft's campaign for the presidency, but Mr. Hitchcock was finally agreed upon.

The new Taft manager is a politician of wide experience. Already he has handled two congressional campaigns. in one of which, four years ago, he was successful and in the other, two years ago, he was swamped, losing the house to the Democrats. Mr. McKinley besides being an aggressive politician is a business man of uncommon ability. He is a native of Illinois, tifty-six years old, and by occupation is a farmer and banker. In business he has been very successful and owns a network of trolley lines that gridiron the middle section of Illinois. He is serving his fourth term as a congressman.

New York's Health Officer. Dr. Joseph J. O'Connell, the new health officer of the port of New York, is a personal friend of Mayor Gaynor and was recommended by the latter for the post. The port of New York is that of the city of New York. and the health officer is an ex officio member of several city boards.

of activities.

Attorney General Wickersham is not an easy man to make answer a question that he does not wish to answer. Not long ago one of the newspaper correspondents said to him:

"Since you dissolved the oil trust the price of kerosene has advanced 4 cents a gallon. What have you got to say about that?"

"It may be true." remarked Wickersham. "But I haven't bought any kerosene for a week."-New York Press.

A Wayne (Penn.) We Guarantee It Man Writes This,

alentine & Co., New York Gentlemen—I wish to say a good word in refer-ice to Valspar. I have used this varnish in October, 907, on extreme outside work where it was not rotected from anything. This month we went back same job and gave it one coat, finding this was Il that was required as there was plenty of body still ift, only dead here and there.

I have tried all kinds of outside varnish here fore, but must say this is the best of all.

I know there cannot be too much said about such article, and I also know there are plenty of men king for such varnish, but don't know where to find I shall never buy another as long as it remains hat it is and hope many more will find out the good esults it gives. I remain yours very truly, R. S. LUCKENBILL.
