The additional distance is made possible by a recent patent acquired exclusively by the Bell Telephone company and will revolutionize long distance talking.

—The greatest interest in the Titanic disaster now centers in the arrival of the Carpathia in New York with the survivors, so that it may be known definitely by friends and relatives of people who sailed on the Titanic who were saved. —April 28, next, minimum freight charges on all railroads will be increased from twenty-five to thirty-five cents. This is in accordance with the interstate commerce commission's official classification orders. —The management of the ever popular Lake Lodore resort is making extensive improvements upon the buildings and grounds near that popular picnic ground. The roller coaster is undergoing repairs and the sensational dips along its rounding course are being made deeper, which will please the pleasure seeker. The refreshment stand is being enlarged in order to better accommodate the large crowds which are expected the coming season.

—J. B. Nelsen, a former seaman, in speaking of the recent fate of the steamship Titanic in mid-ocean, says that in his opinion it is early in the year for icebergs to float so far south. They very seldom begin to come south until the latter part of May or the first of June. An iceberg rests half under water and half above and is like a solid rock. The ship must have been going at a considerable rate of speed to have caused so complete a destruction of her bow. To give a clear idea of the size of the vessel imagine it on the main street of Honesdale. It would reach from Chambers' drug store to Katz Brothers' store. It was 175 feet in height, from keel to the top of the funnels, and about 94 feet in breadth.

—Speaking of the spelling contest Superintendent Koehler told a citizen representative that it has been the means of bringing up marks in that particular line of study. In former years the pupils dropped very low as a rule in spelling in common school examinations, but there seems to be a remarkable improvement in the results of this subject. Of eight school examination papers returned to the superintendent the average mark in spelling was 90 per cent. This goes to show what interest and intensive teaching in spelling will do, instead of lack of interest and extensive teaching. Superintendent Koehler to whom the pupils of Wayne county's schools are indebted for conceiving this plan of study of spelling, heartily approves of The Citizen's booklet and suggests that every pupil ought to avail himself of the opportunity of getting a booklet.

The Citizen invites from its friends accounts of social events with lists of guests, also personal notes. Write only on one side and give the address of the host or hostess. Supply your own name and address as evidence of good faith.

Choice pink carnations formed the artistic center piece for the dining table and represented in numbers the years from which the host has culled the forces which make the youth and vigor and happy outlook on life, in its best sense; and in which Mr. Holmes is ably seconded by his charming wife. Inviting refreshments were served in the dining room, by the following well known young ladies: Misses Eva Wilson, Gladys Weaver, Estelle Congdon and Ethel Lee.

Diamond Tests. Your true diamond is proof against the hardest file, but the instrument will easily scratch any imitation that has ever been made. Having scratched your pretty bit of glass till it is worthless, drop it and the diamond into hydrofluoric acid. Before long the glass will be dissolved, but the diamond will not suffer at all.

Confederate Battleflags. The battleflag of the Southern Confederacy indicated by its size the arm of the service to which it belonged—four feet square for infantry, three feet square for artillery and 2 1/2 by 2 1/2 for cavalry. Spotted Horses. Horses that are spotted like leopards are common in China.

Desecration Service. Though seldom used, there is a service of desecration in the Church of England when consecrated buildings cease to be employed for sacred purposes.

Gory Dew. In appearance gory dew is a dark red, slimy film, which is frequently seen on damp walls and in shady places. It is in reality one of the lowest forms of vegetable life and is closely allied to the plant to which the famous phenomenon of red snow is chiefly due. Its botanical name is Palmella cruenta. At times patches of it may become quite large, and it will develop into a tough, gelatinous mass.

Giant Goldfish. The Chinese produce goldfish two feet in length.

Catching Cold. There is no such thing as catching cold. Dr. Brady, who writes on the subject in the Medical Record, does not deny the existence of colds, but maintains that they come not from cold air and drafts, but from excessive heat, bad ventilation, unhygienic clothing and diet. The reader who is careful of his phraseology will no longer "catch cold."
