MEMORIAL TO **COLUMBUS READY**

Washington Expects 200,000 Visitors on June 8.

PLANS ARE BEING COMPLETED

The Program Will Include, Besides a Parade, Reception, Banquet, Concerts and Fireworks Display-Prominent Men of All Creeds Will Participate.

The Knights of Columbus throughout the United States, Canada, Mexico and the distant possessions of this country will participate in the Columbus memorial unveiling, to take place in Washington Saturday, June 8. There is every assurance that there will be at least 200,000 visitors in Washington the day of the unveiling.

Work on the statue, the side of which is directly in front of the Union station, has progressed to the point where its early completion is assured. The heroic figure of Columbus, covered with a mantle of cloth, is in position, and the great capstone, or globe, will be put in place shortly. Twenty-four hours in every day experts are at work.

The citizens of the national capital, through the board of trade and the chamber of commerce, are rapidly completing the arrangements for the enterminment of visitors. The public entertainment for the unveiling period is being arranged on an elaborate scale, The plans are being carried forward under the direction of a joint committee of both bodies, with Joseph Strasburger as chairman.

For Police Protection.

The commissioners have sent a bill to congress requesting an appropriation of \$6,000 to provide additional police protection.

The entertainment that has been planned by the citizens' committee consists in part of a big reception at the Pan-American Republics building, in which President Taft will probably participate. There will be public concerts, an auto and floral parade, a fireworks display on the Monument lot, fetes in the amusement parks, together with many private dinners and entertainments.

The parade that will precede the unveiling on June 8 will be reviewed by President Taft and notable men in offlcial life. There will be a big display by the naval and military forces of the government. A squadron of American vessels will ride at anchor at the mouth of the Potomac during the unveiling period to greet a squadron of German ships coming to return the call of an American squadron at Kiel. The navy department has planned to entertain the officers of the German vessels at Washington, when they will be the

guests at dinner of President Taft. Floats In Parade.

Knights of Columbus division, which resting place of their old commander. will be headed by Supreme Knight grand marshal. It is stated at the oftracted for a float showing the landing of Columbus, the cost of which will be \$1,000. Other jurisdictions of the Knights of Columbus also will have floats in the parade.

Other organizations of the nation interested in Christopher Columbus and proud of his exploits as a contributor in a very material sense to the welfare

President Will Review It.

President Taft will review the parade from the stand at the statue. There will also be public reviewing stands along the line of march.

A public banquet is being arranged for the evening of June 8. There will be accommodations at this feast for 1,800 persons. Men of all creeds and affiliations will gather about the banquet board, and at the guest table will be sented the president of the United States and distinguished representatives of official and diplomatic life in the nation's capital, as well as prominent officials from Canada and from the principal cities of the United

WEAR A SPRIG ON MAY 30.

Memorial Day Custom of the Northwest Indorsed by Taft.

President Taft, acting on the suggestion of J. W. Hamilton of St. Paul, has joined in a movement to make general the wearing of a sprig of evergreen or a knot of the national colors next Memorial day.

In a letter to Senator Clapp, who transmitted Mr. Hamilton's request. the president says in part:

"Mr. Hamilton proposes that the custom be established among school children. I think it might well be extended to include all those whose reverence for brave deeds and lives sacrificed for country creates in them the desire to pay some tribute to the honor of the dead and the gallantry of those who still live. I earnestly hope that the suggestion will become a custom. It is but a small recognition of a great sacποποφοφοφοφοφοφοφοφοφοφο

OLD GLORY ON

F all the many questions that are constantly being asked the war department at Washington to answer, the one most frequently put before it is as to the correct position of flying Old Giory on Memorial day at army posts and stations.

To those who have no relation to the military service it is almost the universal belief that the flag should be displayed at half staff all of May 30, but this is not so, for paragraph 444 of the army regulations prescribes as follows:

"444. On Memorial day, May 30, at all army posts and stations the national flag will be displayed at half staff from sunrise till midday, and immediately before noon the band, or field music, will play some appropriate air, and the national salute of twenty-one guns will be fired at 12 m. at all posts and stations provided with artillery. At the conclusion of this memorial tribute at noon the flag will be hoisted to the top of the staff and will remain there until sunset. When holsted to the top of the staff the flag will be saluted by playing one or more appropriate patriotic airs. In this way fitting testimonial of respect for the heroic dead and honor to their patriotic devotion will be appropriately rendered." μομομοκοφοφοφοφοφοφοφοφοφοφ

LOGAN'S GRAVE DECORATED.

Annual Services at Tomb of Founder of Memorial Day.

One of the graves most elaborately decked with flowers each Memorial day is that of General John A. Logan, founder of the day. General Logan had the unparalleled honor of being thrice elected commander in chief of the Grand Army of the Republic, and it was while serving in this capacity in 1868 that he designated May 30 as a day to be observed by all Grand Army posts throughout the nation, on which they were to scatter flowers over the graves of the soldiers.

General Logan's tomb is found near one of the gates of the cemetery of the Soldiers' home, Washington. Many of the inmates of the home fought un-

The Escape MEMORIAL DAY.

OUT OF THE JAWS OF DEATH

By FRANK A. HUBBELL, Late Pivate 1st Penn, Vol. and Capt. Co. D 67th Penn. Portage, Wash.

..........

(Copyrighted 1912 by Frank A. Hub-ble, Yakima, Wash.) throw up one arm from his position on hands and knees, beckoning some CHAPTER XIII.

Morning found us near a forsaken amp-a plateau on the mountain side, smoke ascending from a dying camp fire, but farther down some burning embers gave an occasional flare. Rounding some bushes we discovered a person with his feet toward the fire, his gun in his arms, sound asleep. As the panther hunts its prey, Meany and Robinson sprang upon the man, while Durbrow grasped the gun. The fellow said he belonged to Champ Ferguson's band. While we were under the impression this guerrilla chief operated mostly in Kentucky, we well knew the character of this set. He would give us no satisfaction as to the way. Sul-len, morose, independent. We do len, morose, independent. We do not wonder at this when we observe the bushy eyebrows that grow down the side of his face—a good indication of a mean skunk.

We did not want this white ele-phant on our hands. His gun and the six cartridges were certainly a great boon to us, but not his carcass. He had a fair opportunity to answer our interrogations, but he gave vague answers and voluble. We are now suspicious. If we loose him, no telling how soon he will have his gang onto us. To take him along,

impossible. Up the mountain we climb again on our plain trail; we hurry away. Three days and nights have we wandered along. This wearisome wind-ing path, not a sign of friend or foe, not a shot left to kill another fowl. One, then the other drops by the wayside. Ceaselessly we go back and push and pull each other along. First one, then another at times would plead to be left to die, to be relieved of this gnawing hunger, to rest their worn and torn limbs for all eternity. It was preferable to suffering longer. The mind was becoming weak and flighty,

A few more hours of this misery and we were done; the last thought of a hope was fast leaving. It was beyond the endurance of man. Three days now without a morsel of food had so preyed upon our system and strength that we could not even stand erect. It was the end.
As we rounded up our little band

that night, seeing that every comrade was present or accounted for, each in his own way, according to his teachings and belief, asked the Supreme Being of the Universe to take them away from their sufferings. Two became violent—and the stronger in mind would keep them from their intentions.

The first to awake from that last sleep on the mountain was Lytell, who, out away from us on a projecting rock, was gesticulating in a frenzied way with hands toward For fear he would high heaven. jump off that high rock to destrucion, Hagenbach crawled out to induce him to return and die together, not suicide. Hagenbach could only

Days and nights of ceaseless march-Through the heart of the enemy's

land. With burning tears of deep emotion, I can see that shoeless band Hurrying through the forest path

In the dead of the silent night, With a hush of a deep death spell Hovering around us in our flight Yet we turned not from our reckon-

ing, But onward pressed among rocks and briers. With bleeding feet and limbs uncov-

ered. Trying to evade their picket fires. Fed by friends, the man in bondage,

Fleeing from the white door; From their rebel masters' leader. They, our famishing forms did re-

store. And we told them of the Northland, And the hope they might retain; And their songs of Halleluiah Echoed o'er the Southern plain. When at last we reached the moun-

Far above the forest depths, Worn and faint and lacking raiment.

There we saw the golden drifts

Of a land we knew was freedom,
By its brilliancy at night.
By the sun shining on its glaciers
We beheld the beautiful sight.
But, oh, when by golden light, The sun lit up the valley below and chased away the mists from the

Where the French Broad waters flow, We beheld our flag in its splendor,

As it kissed the breeze of the morn. And our sweethearts sang a sweet reprieve

While they kissed her from whom they were born. [THE END.1

To Sell at Wholesale. So far as can be gathered, the pro moters of the idea figure on selling the power that such a plant would make to companies in the towns and cities in the territory served, rather than to the individual,

prepared to stay awhile

In the localities where the options have been gotten people have been impressed for several months that the project is a big one. Because of the secrecy which has veiled the doings of the promoters, some have inclined to the thought that it is mere speculation on the part of daring romoters who want to be in a position to take advantage of the movement embodying conservation of natural resources, theorizing that the possibilities of the Delaware for ested have been in and around Port water power may be appreciated in Jervis for some time. They reprete the near future to the event of in-Because give those who hold options on the of the magnitude of the proposition land a chance to make a lot of plans have been guarded, but enough money. food, and carried into the blood from a portion of the intestines. It tissue changes take place, and as the poisons go throughout the body they are certain to find some weak point for destruction. Just where this will be depends upon the condi-tion and inheritance of the individ-

As the course of the fever prounl. gresses toward a favorable outcome nutrition regulates itself and we say that the patient is recovering. And with our present knowledge of the disease and its causes recovery is usual. But don't forget that the body is not in the same condition it was before the attack.

When one reflects how in all parts of the body large portions of important organs are destroyed during the typhoid process, one can readily understand the reason for the long period of convalescence; why weakness continues and why it is not always possible for every organ to regain its former perfect condition.

A tremendous lot of new materhas to be manufactured in the body to replace lost material. human machine has been fearfully racked and torn. The extent of all this racking and injury depends, of course upon the age, condition and habits of the patient and the virulence of the disease.

Man's recreative powers are wonderful; if it were not so, long ago would the world have been depopu-lated; but there are some delicate organs, such as the nerve centres and the brain, which never fully re-cover their full strength. Such conditions do not mean that there will be any mental disturbance or pronounced nervous instability, that the sustaining power is weak-

One should, after an attack of tyshold or any similar germ disease, remember all this and keep ever in mind that no matter how well they really feel, the human machine must be started again on its daily work, slowly, carefully, until all its different parts have been tested and it is

known just where there is any weakness or retarded new growth. On account of the general well feeling after recovery from a germ disease, the individual is apt to overstrain and overwork some organ. Then comes a breakdown from which it is often impossible to re-cover. This is the real reason why we see those who have apparently recovered again ill from nervous troubles, perhaps bone disease, or some form of malnutrition, Ignorance, carelessness and (es-

pecially in the country) stupid ad-herence to grandfather's ideas are the causes of typhoid and other water and food-born diseases. Typhoid fever can be totally eradicated; there is no excuse for its prevalence. the cities it is under fair control. It is in the country, up in the hills that ignorance enables it to thrive Do not take your family to a farm

rule, taken into the body with house until you know all about the water and milk, and especially about the sanitary conditions on the place. Make sure there have been no cases is at the point of greatest absorption Make sure there have been no cases that the poisons remain. Just as of typhoid fever or other germ dissoon as this absorption commences eases among the residents of the farm. This precaution holds good in other any place where you are thinking of sending your family, as well as on a farm.

Have The Citizen sent to you,

WHEN THERE IS ILLNESS

in your family you of course call a reliable physician. Don't stop at that; have his prescriptions put up at a reliable pharmacy, even if it is a little farther from your home than some other store.

You can find no more reliable store than ours. It would be imstore than ours. It would be impossible for more care to be taken in the selection of drugs, etc., or in the compounding. Prescriptions brought here, either night or day, will be promptly and accurately compounded by a competent registered pharmacist and the prices will be most reasonable. sonable.
