BOARD OF TRADE BULLETIN

No. 5. HONESDALE, PA., JULY 17, 1912. Vol. 1

[Published in the interest of Honesdale and vicinity.]

F. W. Kreitner, President. R. J. Murray, 1st Vice-President. S. T. Ham, 2nd Vice-President. Edward Deltzer, Treasurer. E. B. Callaway, Secretary. E. B. Callaway, Editor.

Honesdale is becoming widely advertised as recent communications received by the secretary will signify. One letter came from a former Wayne County-ite, who says he notices by the papers that Honesdale has a very progressive Board of Trade in action now, and that the Board is extremely interested in bringing new industries to Honesdale. The writer continues: "In fact it was quite an achievement for you to get the Gurney Electric Elevator company to locate with you, but I do not suppose you are going to stop there." No, the Board of Trade is not going to stop here. It is likened to the brook that goes on forever. There are other prospective industries that are looking Honesdaleward and it will be only a question of time before they, too, will be located in our midst.

The secretary of the Board of Trade received a letter last week, which if the questions asked are properly answered will put Honesdale on the map for time to come. Some of the questions: "Historic points of interest," "What is your city best known for," "Give short description of any noticeable scenic features," "Principal manufacturing interests, particularly those of national reputation," etc. The purpose is to create new routes for motorists who are paying more attention each year to the points of interest along the way. The citizens of Honesdale are confident that there

are many historical and other points of interest here. For instance it was at Honesdale that the first locomotive turned a wheel on the American continent. It occurred here August 8, 1829. It was the Stourbridge Lion and the initial trip was made on the Delaware and Hudson railroad. Another item—Honesdale, in the boating days, was the largest coal supply market in the world, although not an ounce of the dusky diamonds was mined in Honesdale. 11,000 tons was shipped daily. It has, however, the largest piece of coal mined in the anthracite region on exhibition here. Philip Hone, after whom Honesdale was named, might be mentioned. He was
