THE BANDANA.

The bandana used to be the red rag with which snuff takers wiped their irritated noses.

Now it is the emblem of the Roosevelt Party.

Exceedingly consistent, too, for when Roosevelt takes snuff his personally-owned party sneezes.

AS TO STEAM ROLLERS.

Talk about steam rollers! Was there ever anything like the machine that was handled so deftly by the Provisional National Committee of the Roosevelt Party at Chicago?

That committee sat upon the claims of delegates who were not considered quite tame enough to feed out of the Colonel's hand and disposed of all such by the simple act of howling them out. True, there was something of a difference of opinion concerning what should be done when it came to considering the applications of negro delegates from Southern States to seats in the convention. In one or two instances the committee put the entire responsibility upon Roosevelt himself.

"Out they go," was Roosevelt's command, and out they went. The steam roller never hitched nor halted when the order was received to run over every colored man from the South who dared aspire to a seat. You see, Roosevelt had had large experience with steam rollers. He ran the roller at the Republican National Convention four years ago, and never permitted a contesting delegate to gain a seat. It was child's play, therefore, to run a steam roller in his very own hand-picked convention.

SAFE AND SANE RESULTS.

According to this year's returns from this year's celebration of the Fourth of July, obtained by the Chicago Tribune, comparatively few deaths or injuries have resulted. Of course the figures are not complete, but they are sufficiently so for comparison with similar figures for last year. It will require several weeks before the final results—especially in cases of tetanus—can be known and their outcome recorded.

The Journal of the American Medical Association is compiling the statistics this year as usual and, while its system of gathering these ensures fairly complete returns, it will be glad to receive reports from physicians of any deaths or injuries cared for by them or coming to their attention. Such co-operation will be appreciated and will make possible the publication of a more complete statement than would otherwise be the case. The publication of statistics showing the results of the old-time methods of celebration has doubtless done more than all other factors combined to arouse public sentiment against the wanton trifling with life and limb in this annual celebration. While it is true that the annual total of death and mutilation has been greatly reduced let us not rest until the annual recurrence of senseless noise and destruction has been entirely done away with.

THE HOME TOWN.

People seldom stop to consider how much their town means to them. They take it too much for granted, and in counting up their blessings make a superficial inventory that fails to credit the source from which many of their dearest benefits flow. It is easy to overlook the home town in summing up

the sources of one's happiness, because the town is such a large all-enveloping thing—so large, in fact, that it's hard to see—and the citizen blindly draws sustenance from it like an infant from its mother. Traced to their source most of life's blessings will be found to have their root in that aggregation of human beings and human interests known as a town. The town is the unit of modern civilization and is the channel through which civilization confers its benefits. There is scarcely a phase of civilization that does not find direct and specific expression in the life and organization of a town that is large enough to have a school, a court house, a library, a bank, a mill or factory, a church, a water-works, a band, a newspaper and railroad station. Representing education, jurisprudence, literature, finance, industry, religion, hygiene, art and the speedy distribution of intelligence and commodities, these institutions express all that is highest and best in human achievement. If civilization is good, then the home town is good, and the citizens should be proud and thankful of it. Instead of casting wandering and envious glances at other towns let us glow with pride for our own town, realizing that the difference is only one of degree and not of kind.

The haying for this season is about completed and some fields of oats are ready for the harvesting. From present appearances the supply of buckwheat this season will be limited in supply, as many of the fields of both early and late sowing give but a scant promise of any crop.

Recent rains have freshened the pasture and stubble fields, but the ground is lacking in moisture sufficient to keep up the water supply. The lucky potato farmer is likely to realize good prices for this season's crop.
