

BEWARE! WARNS SPIRIT OF JAMES

Dr. Hyslop Told to Avoid Evil Shades.

SAYS THEY HURL INKSTANDS

Late Professor Talks Through Fifteen-year-old Boy—Tells of Poltergeist. Harvard University Accepts \$10,000 Fund to Study Psychological Phenomena. Spiritualists Highly Pleased.

There were much head nodding and exchanging of "I told you so's" among spiritualists and others devoted to psychical research recently over the announcement of Dr. James P. Hyslop of the American Society for Psychical Research that he had again been in communication with the spirit of William James, late professor of philosophy at Harvard.

In an article published in the journal of the society, just out, Dr. Hyslop gives details of his latest conversations with his friend in spirit land. He writes that the communication was conducted through the medium of a fifteen-year-old boy, the son of a clergyman, "well known on both sides of the Atlantic." While entranced this boy has been telling the Psychical Research society man that a "poltergeist" will leave razor blades and matches in places where they may do harm and that an evil shade which lurks in the dark and hurls inkstands and heavy stones at the heads of true believers should be watched out for. The authority for the warnings in every case has been the spirit of Professor James, according to the boy. Shortly after the death of the Harvard philosophy professor Dr. Hyslop announced that he had been communicating with him through the mediums Mrs. Chenoweth and Mrs. Piper.

Dr. Hyslop began his experiments with the boy on Nov. 20, 1911. He called at the home of the boy's father, whom he calls "the Rev. Dr. X.," and learned that Professor James had been endeavoring to speak through Dr. X.'s son. The next day the experiments were resumed, and there were some rather remarkable and alarming doings.

Spirits' Queer Actions.
There was violent table tipping and levitation in which the table rose two feet from the floor. Then an attempt was made for the "translation of objects"—that is, to see whether the spirits would move objects from one room to another.

"Doors were closed again and the lights turned out," Dr. Hyslop reported. "In a few moments something fell, sounding like two objects. Up went the lights and within a few feet of each other were two pairs of scissors which belonged in another room. The next were a nail cleaner and the boy's knife, both from the room upstairs."

"Then a drinking cup struck the boy on the head and seemed to have hurt him. Next a skate key from upstairs; then a dozen marbles from rooms two flights up. A pipe stem was thrown across the room from a table in the corner. Then a fountain pen from the library table where we were."

"Presently razor blades were thrown into the room, the electric light bulbs were smashed with a violently thrown stone and a book was hurled against the boy's head. At a similar seance later on a man complained that his pocket had been picked. A spirit had abstracted a 25 cent piece."

"Dr. X.," says Professor Hyslop, "asked Professor James to spell out the name of the man who had influenced both of them, and first Balzac was spelled out and then Goethe, both wrong, and then Fechner, which was correct. Then I questioned the communicator, asking him if he had ever communicated with me. Answer affirmative. In Boston? Affirmative. Elsewhere? Affirmative. Near —? Negative. North? Negative. West? Negative. South? Affirmative. All these replies were correct."

Harvard Accepts Study.
According to the journal of the society, Harvard university has accepted a \$10,000 endowment fund for psychical research. In the announcement it is stated that this is the first official recognition of such study accorded by any American university.

The fund, which was established by several individuals, is a memorial of the life and work of Dr. Richard Hodgson, secretary of the society from 1887 until his death in 1905.

The journal in the current issue by way of comment says: "The value of it lies chiefly in the fact of this recognition, as the fund is not large enough to do all the work that must be done in this field. Besides, no one can any longer question the respectability of the work. The objection which an uninformed public has always raised—namely, that the colleges and universities have not admitted the work into their purview point, cannot be presented any longer."

"The acceptance of the fund makes it impossible for any other institution in this country to disregard or to disrespect the work. It has won its place in so conservative a university as Harvard—conservative in all the problems that affect long despatched phenomena. It is in every way a most welcome situation, and we have to thank the contributors for the course which thus commits one of the first universities in this country to the respectability and importance of psychical research."

A BOY AND AN ACRE OF CORN.

A wide awake boy twelve years of age, Harvey Jordan, who lives nine miles from Shelby, in Shelby county, Mo., on rural route No. 3, won first prize of \$200 in gold in the boys' corn growing contest which was conducted last season by the Kansas City Star. The yield on this prize was ninety-six bushels and thirty-five pounds. But the yield was not the only determining factor in the awarding of the prize. The other considerations were the practicability of the methods employed and the boy's own story of how he grew the corn. The variety of corn grown was pure bred Reid's yellow dent, the seed having been saved the fall previous before there were any heavy frozes, stored in a dry attic and carefully tested before planting. The land on which this corn was grown was a bottom pasture land—a sandy loam with a clay subsoil. The corn was checked in with a two row planter on May 18, the hills being forty-two inches apart each way. On May 25 and 29 the acre was harrowed lightly and on June 3 cultivated about three inches deep. On June 11 and 20 the acre was also cultivated, and on June 29 it was cultivated lightly the last time with a disk cultivator. On July 10 and 25, owing to a severe drought, the lad hitched a single horse to an old planter wheel and dragged between rows with it. With the corn yield of the state of Missouri but 31.9 bushels per acre, the showing made is an admirable one. Besides the prize of \$200, Harvey has saved thirty bushels of seed corn, which should be worth \$2 per bushel. The remaining sixty-six and a half bushels are worth \$26.00 at 40 cents per bushel, making the boy's income from this acre \$286.00. He plans to use this money to pay his expenses at the State Agricultural college, and it is fair to assume that he will give an account of himself there.

MUSHROOM GROWING.

If any of our readers should chance to get inoculated with the mushroom growing microbe it would be a good idea for them to find out all about the business they can before going into it on a big scale. There are a good many risks and chances connected with it, while the returns even under the most favorable conditions are but little more than in the growing of the common garden crops. Especially should one beware of flaming advertisements telling of enormous profits to be made, coupled with offers to sell the spawn for starting the beds at exorbitant prices. This is nothing but sucker bait, and one should give such firms a wide berth. If you should want to start in the business on a modest scale write to the agricultural department at Washington or to your own experiment station for the address of reliable firms from which the spawn can be got. The government bulletin on mushroom growing may also be had for the asking.

WILL ENCOURAGE FRUIT GROWING.

The province of Vera Cruz, Mexico, proposes to encourage fruit culture by offering big cash prizes. Prizes of from \$100 to \$1,000 are to be awarded to those fruit growers who shall plant and first bring to market crops from tracts devoted to the raising of oranges, mangoes and pineapples. These orchards must have from 1,000 to 10,000 trees and from 10,000 to 100,000 pineapples. All those engaging in fruit culture under the conditions named are to be exempt from land taxes for a period of ten years and are to have the benefit of a refund in freight charges equal to 10 per cent for a similar period on all fruits which they ship to market. This is encouragement of a very definite kind, and under it the fruit raising business ought to prosper.

CHURNING HINTS.

Cream from cows far advanced in their periods of lactation often churns hard. This difficulty may be reduced considerably if care is taken to see that each batch of cream is cooled and then carefully mixed with the rest of the cream on being added to it. Cream of the night before and of the morning of the day of the churning should not be included in the churning. A further aid will be found to be the addition to the cream the day before it is churned of a half a cupful of sour or butter milk for each two and a half gallons of cream. This serves as a starter and tends to produce an even ripening. A thermometer suitable for the purpose should be at hand, and the cream should show a temperature of from 58 to 60 degrees F. when ready to churn.

SHOULD MAKE A DISTINCTION.

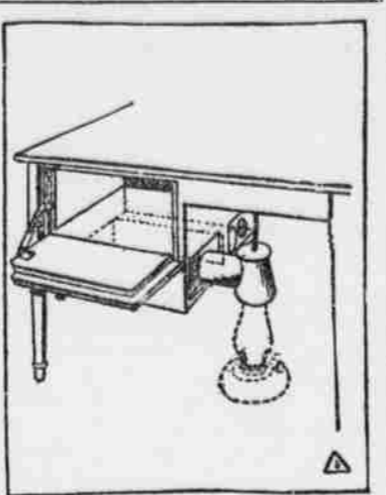

It is not only due to the poultry keeper who produces eggs in winter at heavy cost, but also to the consumer, that there should be a distinction recognized by law between strictly fresh eggs and the storage brand that are thrown on the market at advanced prices during the winter months and often palmed off for fresh. If the law provided that only strictly fresh eggs could be sold as such both the producer and the consumer would be safeguarded, the former receiving a price that would be commensurate with the cost of production, while the latter for the sake of getting strictly fresh eggs would be willing to pay the extra price. A good many states have passed laws covering this matter of fresh and storage eggs. Others ought to do so.

Chocolate Rice Pudding.

Two cupfuls of cold boiled rice, two eggs, a scant cupful of sugar, two tablespoonfuls of cocoa, a little salt, one teaspoonful of vanilla, one heaping teaspoonful of butter and one quart of milk. Bake in a hot oven.

HINTS FOR THE BUSY HOUSEWIFE

Simple and Effective Device For Raising Dough.

An effective dough raising device that a handy man can make for his wife has been patented by a North Dakota man. The heat required for the process is supplied by an old fashioned oil lamp. A box with a hinged lid in front is fastened beneath the kitchen table. The pan of dough sets in the bottom of this box. At one side a sort of small stovepipe with an inverted hood enters the box. This hood fits over the lamp chimney, and the heat that rises in the chimney is conveyed into the home made oven. To regulate the temperature in the box so that it shall not become too hot there is an expanding attachment that expands when the temperature gets too high and opens a valve which lets some heat escape.

Old Fashioned Raised Muffins.

One pint of milk, one tablespoonful of butter, one tablespoonful of sugar, one rounding teaspoonful of salt, four cupfuls of flour, one-half yeast cake, two eggs, one-half cupful of water. For breakfast mix the night before. For evening meal mix at noon, using a whole yeast cake. Have milk tepid and dissolve butter in it. Put the flour, sugar and salt in bowl. Dissolve yeast in water (lukewarm), add it to milk and butter and pour mixture on the flour. Beat well and add eggs, beaten. Cover and let rise in a warm place. When more than double its bulk put in muffin pans, let rise thirty or forty minutes and bake in a moderate oven about twenty-five minutes.

Clams au Gratin.

Chop finely two dozen clams and season with a dash each of salt and cayenne. Cook a tablespoonful of flour in a tablespoonful of butter. When bubbling add one-half cupful of clam juice and one-half cupful of rich milk in which one-eighth teaspoonful of soda has been dissolved and stir and cook until creamy. Add the chopped clams, then add a beaten egg and remove from the fire. Turn into buttered scallop shells, sprinkle with crumbs moistened with melted butter and bake in a hot oven until brown. Garnish with parsley and sliced lemon before serving.

Sandwich Butter.

Instead of putting all the seasoning with the meat or other filling for sandwiches, try combining it with the butter. It will be more evenly blended and more easily spread than when plain butter is used. Rub one cupful of butter to a cream, add two tablespoonfuls of prepared mustard, two tablespoonfuls olive oil, a little salt and pepper, yolk of one egg and a teaspoonful of lemon juice. Blend well and set away to cool, then spread on thinly sliced bread and add a small slice of ham or chicken. Press slightly.

Renovating White Cashmires.

Take two handfuls of flour, put it on a plate, then place another plate on top. Put these in the oven, letting them stay in till the flour is hot. Care should be taken not to brown the flour. When the flour is hot rub the article well with it, roll it up tight, then put in a pillowcase, leaving it in all night. The next morning shake the article and remove the flour by brushing. This is also useful for fur hats or bonnets.

Gingerbread With Jelly.

One cupful molasses, one-half cupful butter, one egg, one-half cupful warm water, one teaspoonful soda, one teaspoonful sugar, one teaspoonful cinnamon, two cupfuls flour, a little salt. Bake in Washington pie tins and spread jelly between, or you can bake in one sheet and split and serve the jelly.

Welsh Scones.

One quart of flour, one teaspoonful of baking soda, one teaspoonful of cream of tartar, one-half a teaspoonful of sugar, a pinch of salt and enough new milk to mix to a thick dough. Cut into rounds and bake on a griddle.

Cape Ann Brown Bread.

One cupful breadcrumbs, one and one-half cupfuls bolted Indian meal, one cupful rye flour, one-half cupful molasses, one-half teaspoonful salt, one teaspoonful baking soda, one cupful sour milk. Steam three hours.

Chocolate Rice Pudding.

Two cupfuls of cold boiled rice, two eggs, a scant cupful of sugar, two tablespoonfuls of cocoa, a little salt, one teaspoonful of vanilla, one heaping teaspoonful of butter and one quart of milk. Bake in a hot oven.

For Sale

Large Dairy and Hay Farm

GOOD SUMMER RESORT.

The Buy-U-A-Home Realty Company has just listed one of the finest and best-known farms in Wayne county. It is located in the heart of the summer boarding business, in Wayne's highlands. The property consists of 325 acres and is well watered both by creeks and springs. A most beautiful natural lake, consisting of 15 acres, is one of the attractive sheets of water in Preston township. Ideal for the location of summer cottages. The farm is 2 1/2 miles from the Lakewood station on the Ontario & Western railroad, three miles from Poyntelle on the same road and two miles from Como. Of the 325 acres 275 are under good state of cultivation, consisting of meadows, plow ground and well-watered pasture fields. The balance are in maple, beech and birch timber. This farm is especially adapted to raising hay and for dairying.

There are four dwellings and cottages upon the premises. Dwelling No. 1 will accommodate from 40 to 50 guests. Near this house is a never-failing spring for domestic use. The second cottage contains nine rooms. Good water. Small barn near house. Home No. 3 is a very good seven-room cottage furnished with water by one of the best springs in Wayne county. Cottage No. 4 is a near beautiful natural spring lake, which consists of about 15 acres. The above mentioned places are located in an ideal summer boarding district visited every year by boarders from Philadelphia, New York, Scranton and other cities. Other cottages could be built on the border of this lake.

Situated upon the premises is a laundry, coal and wood house combined, size 20x60 feet. The second floor is equipped for holding entertainments, etc.

The barns are as follows: Horse barn 26x56 feet, with running water; hay barn 26x36, with two cow sheds attached 20x50 feet. One building with scales and wagon house with underground stable for cows. One good blacksmith and carriage shop, with second story for storage. Chicken houses, capacity for 200. Barn No. 4 situated near House No. 3, size 30x40 feet, two sheds for cattle, with good spring water. Two other hay barns, size 26x36 feet, and 18x20 feet.

There are three apple orchards on the farm and a small fruit orchard. The property will be sold for a reasonable consideration and upon easy terms.

EXECUTOR'S NOTICE.

Estate of GEORGE HAYNES, Late of Preston, deceased.

All persons indebted to said estate are notified to make immediate payment to the undersigned; and those having claims against said estate are notified to present them, duly attested, for settlement.

MARGARET HAYNES, W. H. DAVIS, Executors.
Lakewood, Pa., Jan. 14, 1913. 12w6.

REGISTER'S NOTICE.—Notice is hereby given that the accounts herein named have settled their respective accounts in the office of the Register of Wills of Wayne County, Pa., and that the same will be presented at the Orphans' Court of said county for confirmation, at the Court House in Honesdale, on the third Monday of March next—viz:

First and partial account of Chas. A. Emery and Augusta K. Kubbach, executors of the estate of John Kubbach, Honesdale.

First and final account of W. M. Norton, executor of the estate of Mary R. Thomas, Waymart.

First and partial account of Friend A. Swingle, surviving executor of the estate of Emory Swingle, Lake.

First and final account of Albert T. Mitchell, administrator of the estate of Elias Mitchell, Callicoon, Sullivan county, N. Y.

First and final account of John H. Barnes, administrator of the estate of William J. Barnes, Mount Pleasant township.

First and final account of Maude M. Katz, administratrix of the estate of William Katz, Honesdale.

First and final account of Edward O. Kerr, executor of the estate of Mary Kerr, Hawley.

W. B. LESHER, Recorder.

Some Exceptional Bargains in Wayne County Farms

Recently Listed with BUY-U-A-HOME REALTY COMPANY HONESDALE, PA.

A fine dairy farm of 116 acres, 2 1/2 miles from Honesdale, convenient to Borden's milk station; also creamery; 8-room house, good buildings, orchard, plenty of water. Will sell with or without stock of 15 cows, horses and farm implements.

A 1 farm consisting of 155 acres, 25 timberland, 40 cleared, located in Berlin township near Mast Hope road. Place has been recently improved, the owner having spent several hundred dollars upon it. All machinery, including gasoline engine and farming utensils are new and of the very latest. Modern improvements are in the house, including hot and cold water. The building has ten rooms. There are two portable wardrobes in the house for clothing and a large meat closet in the cellar. New chicken house 14x110 feet, concrete floor; 300 chickens and incubator of 300 capacity; main barn 36x54 feet; horse barn, 18x24; cow barn 36 feet long; barn with basement. Good apple orchard; good spring water. Ideal place for dairy farm. An exceptional bargain.

Situated in Berlin township there is a farm consisting of 108 acres, 18 of which is cleared land and 25 acres first growth timber. There is an excellent orchard, good spring water and buildings. Upon premises is a seven-room house, barn 30x40 with concrete basement and numerous outbuildings. Stock included.

Good dairy farm 218 acres watered by brook and never-failing springs, located in Stalker, Wayne county, one and a half miles from creamery and on Erie railroad. Young orchard, pear, plum and cherry trees, sugar bush; 30 acres timber, some of which are pine and hemlock. Over 2,000 feet of cement floor on premises. Barn 40x44 feet.

Any of the above properties can be purchased at reasonable prices. Terms made easy to all purchasers. For prices and further description apply to office of
