xamination For West Point and Annapolis Appointment.

Qualifications for West Point hysically sound. Age 17 to 23 ally sound. Age 17 to 22 High school education or its ruivalent.

Control father than cure of culosis is the idea behind the tuber-culosis hospital bill recently intro-duced to the Pennsylvania, Legisla-ture by Dr. W. A. Biair of Cambria county, and which is now in the hands of the Committee on Public Health and Sanitation.

The proposed law permits counties upon petition of five per cent. of the legally qualified voters to have placed upon the ballot at a regular election the question of the estab-lishment of a tuberculosis hospital together with the amount of the bond issue which may be necessary to pay for the erection of such a hospital. Adjoining counties may combine in establishing a hospital through a similar procedure.

If the voters decide that they want

hospital the Governor is empowered to appoint a board of five directors for the hospital. These directors must be residents of the county or counties concerned. One of them must be a woman and two must be physicians. Nominations may be

made by any resident of the county. The directors are not salaried. The expenditures for the maintenance of fixed by the State Board of Chari-

The law is not compulsory. It is merely permissive.

der that the spread of tuberculosis may be checked. The State Sena-toria, two of which are now in op-eration and one of which is in course construction furnish ample prowish to regain their health. It is essential, however, to the prevention of tuberculosis that the spread of this disease by patients in the terminal stages of consumption be stopped. This stage of tuberculosis usually hunt clubs, who will have a section lasts about three months. Often it of their own in the parade. The hunt may continue for a year. During club entry list is growing daily and this time the consumptive is more includes the names of prominent social or less confined to his bed. He grows weak in mind and body. He lacks strength and will to control and attend to the disposal of his sputum. Without trained nursing he can scarcely be prevented from making his home a focus of infec-Thus he gives his disease to his

"Patients in this stage of consumption are not able to travel far-no more able than a person suffering from typhoid fever. The comparatively low death rate at Mt. Altoin 1910 (Census Year) in Franklin which are to take part in the parade county there were only 204 deaths from tuberculosis of the lungs (Mt. Alto is in Franklin county)-is proof also of the fact that consumptives come home to die. On the other hand the Philadelphia hospital with less than one third the beds at Mt. Alto has more than three

times the number of deaths. 'Tuberculosis experts are therefore agreed that the best place to treat the bedridden consumptives is in hospitals near the larger centers of population, i. e., near the home of the patient. By handling the problem in this way it will be possible to segregate the greatest number of dying and bedridden consumptives with the consequent reduction of the death rate from tuberculosis.'

FEDERAL BUILDING FOR SAYRE. The bill introduced by Congressman Ainey to provide for a Federal Building to be erected at Sayre, the largest municipality in the Four-teenth Congressional District, received favorable consideration by the committee and passed the House of

ation of eighty thousand dollars.
