Hawley Has a Visit From a Real Live Congressman-Accident at "The Rocks"-School Commencement Exercises the Uppermost Topic of the Week-A Big Bunch of "Stuff" About White Mills, Etc.

HS has been a record-breaking week in Hawley. People have been marrying and giving in marriage, we have had a real live Congressman in our midst, the sweet girl graduates have had their place in the lime light, and as Citizen read-

ers go through this department the affairs of the town will doubtless be settling down to a normal condition of quietness. A whole lot more might be written along this line, but we must make our introductory bow very brief this week.

What is Going on Up At the Proposed Dam.

After spending over \$900,000 on the big reservoir that will reach from Wilsonville to Ledgedale it is quite unnecessary for anybody in Hawley to worry over the question of the completion of the great enterprise. and new ones opened, the dam proper, a proper dam, or dam without any props under or about it, will be built, and then there will be power, and lights and heat on tap at prices, we trust, reasonable enough to suit everybody. ± ±

The Eddy People Are Enjoying a Bit of Rest.

Recently in this department we noticed at some length the troubles Eddy people were having over the location at the railroad crossing of an automatic electric signal bell which disturbed their slumbers deep in the silent hours of night and at other unseasonable hours. Last week some man with authority went to the crossing and fastened a notice that announced that the bell was out of order, and since then there has been peace and quietness in that vi-cinity. They were sure all along that the bell was out of order. People in Allison Thornton, o the vicinity of the crossing are now making up for last time, and "the seven sleepers" are not in the game even a little bit.

Slight Wreck at "The Rocks" On Saturday Last.

In the middle of Compton's switch, a mile west of Hawley, is a point known as "the rocks," and there was a wreck at that point on Saturday last. Conductor Quick was westward bound with a 95-car train in the rear of which were two pusher springs sensysted by a capoose. At engines separated by a caboose. At "the rocks" an air hose burst in the centre of the train which acted as a paralyzer from the point of break to the head engine. The result was that three cars were piled up, one of the engines got its nose scratched and just in the nick of time the conductor in the most danger jumped, struck the ground on his feet, stum-bled, then scrambled out of danger. It was declared to be a very narrow escape. Dunmore wreckers were called and the tracks were cleared after a two hours' stoppage.

Notwithstanding the fact that there are lots of people in Hawley who believe it is quite feasible to have a local base ball league, yet it seems to be quite impossible to get the boys together on the subject. Evidently they can't organize. The writer has been told that the finanmoney that makes the world go round, then there shouldn't be much ound, then there should be indeed trouble over a little matter like a local league of ball tossers. Why not the ship's crew. He is spending his summer in Wayne county at the White Mills grounds? Now, then, what say you, gentlemen?

Dangerous is the corner around which one sweeps into town from the depot. They are not content with any such word of warning as that. They like to be more explicit in White Mills, so a sign was painted and hung high in the centre of the street, so that all who read or scorched might see it which reads

The one who was instrumental in producing that sign undoubtedly is a believer in advertising, especially in the old advertising saying which runs like this: "Whosoever bloweth not his own horn, for him shall not his horn be blowed."

HOTEL REIFLER, Hawley A. BASCHON, Prop'r.

What works Hali F.P. Woodward Says about **Potato Bugs** and Pyrox:

Say "potato bugs" to a farmer and watch the expression on his face. you could turn a cinematograph on it and catch the expression in its varying shades of impatience and disgust you would surely make the hit of the age, and in all human probability add a good-sized lump to your bank ac-

But the expressions on the farmers' faces are changing all over Wayne county since the Murray Company introduced Pyrox, the one insecticide that kills ALL the potato bug tribeyes, the old striped shell-backs as well as the shiny slugs. The writer of this knows, for he has seen it done on his own little farm the past two seasons. He doesn't have to take sombeody else's word for it.

But that isn't all: As Pyrox is a compound of arsenate of lead, Bordeaux and copper salts, the mixture helps the plants and prevents blight. Put it right on when the sun shines hot. It will cling like paint. You will find traces of it when you dig your "spuds" in the fall.

Neither is that all about Pyrox: If you mix a pint of Pyrox with six gallons of water and spray your fruit trees, current and gooseberry bushes with it it will not only kill the tent caterpillars and current worms, but it will prevent all fungus disease on the fruit.

Nor is even that all that Pyrox will do: If you dip your seed corn in the mixture, the crows will not touch it. If they don't know any better than to eat it, why, it will be mighty bad for the crows. That's what it will. Pyrox costs 25 cents for a single

pound; 5 pounds in stone crock, \$1; 10 pounds in crock \$1,75, and so on up to a 500 pound cask for \$60, if you want to buy it that way. If you want arsenate of lead, the

Murray Company sell it at 25 cents a pound; and, if you actually haven't got away from Paris green they will sell that to you for 30 cents a pound. Say, use a GOOD sprayer. The

Murray Company will sell cheap devices for from 40 to 50 cents; but why don't you go a little higher and get a Knapsack Sprayer? It will hold 2 gallons of spray compound and does its own work. All you have to do is walk right along with it and hold the nozzle where it will do the most good. It will only cost you \$4.50, and with it you can also spray your fruit trees, and by simply changing the nozzle you can wash up that \$71.25 buggy you recently bought of the Murray Co.
