THE PLATFORM.

Following is the platform adopted by the National Democratic convention:

Secrios 1—The representatives of the Democratic party of the United States, in National convention assembled, do reaffirm their allegiance to the principles of the purty as formulated by Jefferson and exemplified by that long and illustrious line of his successors in Democrat leadership from Madison to Cleveland. We believe the public welfare demands that these principles he applied to the conduct of the Federal Government through the accession to power of the party that votes them, and we solemnly dee are that the need of a return to these fundamental principles of free popular government, based on hone rule and individual liberty, was never more urgent than now, when the tendency to centralize all power at the Federal Capital has become a menace to the reserved rights of the States that strikes at the very roots of our Government and under the Constitution as framed by the lathers of the Republic.

Secrios 2—We warn the people of our common country, jealous for the preservation of their free institutions, that the polics of the Federal control of elections to which the Republican party has committed itself, is fraught with the gravest dangers, scarcely less momentuous than would result from a revolution practically establishing monarchy on the ruins of the Republic. It strikes at the North as well as the South, and injured the colored citizen even more than the white; it means a horde of deputy marshals at every polling place, armed with Federal power, returning boards appointed and controlled by Federal authority, the outrage of the electoral rights of the people in the several States, the subjugation of the colored people to the control of the party in power and the reviving of race antagonisms, new happily abated, of the utmost peril to the safety and happiness of all; a measure deliberately and justy described by a leading Republican Senator as "the most infamous bill that ever consed the threshold of the Senate," Such a policy, if sanctioned by law would mean the dominance of a self-perpetuating oligarch

Since the McKinley tariff went into opera-Since the McKinley tariff went into operation there have been 10 reductions of wages of laboring men to one increase. We deny that there has been any increase of prosperity to the country since that tariff went into operation, and we point to the dullness and distress, the wage reductions and strikes in the iron trade as the best possible evidently that no such prosperity has resulted from the McKinley act.

We call the attention of thoughtful Americans to the fact that after 30 years of restrictive taxes against the importation of foreign wealth in exchange for our agricultural surplus, the homes and farms of our country have become burdened with a real estate mortgage debt of over \$2,500,000,600,exclusive of other forms of indebtedness; that in one of the chief agricultural States of the

in one of the chief agricultural States of the West there appears a real—estate—mortgage debt averaging \$165—per capita of the population; and that similar conditions and tendencies are shown to exist in the other agricultural exporting States. We denounce a policy which forests activated by

lation; and that similar conditions and tendencies are shown to exist in the other agricultural exporting States. We denounce a policy which fosters no industry so much as it does that of the sheriff.

Sec. 4—Trade interchange on the basis of reciprocal advantages to the countries participating is a time-honored doctrine of the Democratic faith, but we denounce the sham reciprocity which juggles with the people's desire for enlarged foreign markets and freer exchanges by pretending to establish closer relations for a country whose articles of export are almost exclusively agricultural products with other countries that are also agricultural, while erecting a custom house barrier of prohibitive tariff taxes against the rich and the countries of the world that stand ready to take our entire surplus of product- and to exchange therefor commodities which are necessaries and comforts of life among our own people.

Sec. 5—We recognize in the trusts and combinations, which are designed to enable capital to secure more than its just share of the joint product of capital and labor, a natural consequence of the prohibitive taxes which prevent the free competition which is the life of houest trade, but we believe their worst evils can be abated by law, and we demand the rigid enforcement of the laws made to prevent and control them, together with such further legislation in restriant of their abuses as experience may show to be necessary.

Sec. 6. The Republican party, while

settle with such latther legislation in restriant of their abuses as experience may show to be necessary.

Sec. 6. The Republican party, while professing a policy of reserving the public land for small holdings by actual settlers, has given away the people's heritage till now a few rich and non-resident aliens, individual and corporate, possess a larger area than that of all our farms between the two seas. The last Democratic administration reversed the improvident and unwise policy of the Republican party touching the public domain, and reclaimed from corporations and syndicates, alien and domestic, and restored to the people nearly 100,000,000 acres of valuable land to be sacredly held as homesteads for our citizens, and we pledge durselves to continue this policy until every acre of land so unlawfully held shall be reclaimed and restored to the people.

Sec. 7. We denounce the Republican

claimed and restored to the people.

SEC. 7. We denounce the Republican legislation known as the Sherman act of 1890 as a cowardly make shift, fraught with possibilities of danger in the future, which should make all of its supporters, as well as its author, snaious for its speedy rereal. We hold to the use of both gold and silver as the standard money of the country, and to the coinage of both gold and silver without discriminating sgainst either metal, or charge for coinage, but the dollar unit of coinage of both metals must be of equal intrinsic and exchangeable value, or be adjusted through international agreement or by such safeguards of legislation as shall insure the maintenance of the purity of these metals, and the equal power of every dollar at all times in the markets and in the payments of debts. We demand that all paper

currency shall be kept at par with and re-deemable in such coin. We insist upon this policy as especially necessary for the pro-tection of the farmers and laboring classes, the first and most defenseless victims of un-stable money and a fluctuating currency. Src. 8—We recommend that the prohib-itory 10 per cent. tax on bank issues be re-pealed.

SEC. 8—We recommend that the probibitory 10 per cent. tax on bank issues be repealed.

SEC. 9—Public office is a public trust. We reaffirm the declaration of the Democratic convention of 1876 for the reform of the civil service, and we call for the honest enforcement of all laws regulating the same. The nomination of a president, as in the recent Republican convention, by delegations composed largely of his appointees, holding office at his pleasure, is a scandalous satire upon free popular institutions, and a startling illustration of the methods by which a president may gratify his ambition. We demand a policy under which federal office holders shall not usurp control of party conventions in the States, and we pledge the Democratic party to the reform of these and all other abuses which threaten individual liberty and local self-government.

SEC. 10—The Democratic party is the only party that has ever given the country a foreign policy consistent and vigorous, compelling respect abroad and inspiring confidence at home. While avoiding entangling alliances, it has aimed to cultivate friendly relations with other nations, and especially with our neighhors on the American continent, whose destiny is closely linked with our own, and we view with alarm the tendency to a polley of irratation and bluster which is liable at any time to confront us with the alternative of humiliation or war. We favor the maintenance of a navy strong enough for all purposes of national defense, and to properly maintain the honor and dignity of the country abroad.

Sec. 11—This country has always been the refuge of the oppressed of every land—exiles for conscience sake—and in the spirit of the the founders of our government we condemn the oppression practiced by the Russian government upon its Lutheran and Jewish subjects, and we call upon our national government upon its Lutheran and Jewish subjects, and we call upon our national government of our government we condemn the oppression of these cruel prosecutions in the dominions of the c

about a cessation of these cruel prosecutions in the dominions of the czar, and to secure to the oppressed equal rights.

We tender our profound and earnest sympathy to those lovers of freedom who are struggling for home rule and the great cause of local self government in Ireland.

Sec. 12—We heartily approve all legitimate efforts to prevent the United States from being used as a dumping ground for the known criminals and professional papers of Europe, and we demand the rigid enforcement of the laws against Chinese immigration or the importation of foreign workmen under contract to degrade American labor and lessen its wages, but we condemn and denounce any and all attemps to restrict the immigration of the industrious and worthy of foreign lands.

Sec. 13—The convention hereby renews the expression of appreciation of the patrictism of the soldiers and sailors of the Union in the war for its preservation, and we favor just and liberal pensions for all disabled Union soldiers, their widows and dependents, but we demand that the work of the pension office shall be done industriously, impartially and honestly. We denounce the present administration of that office as incompetent, corrupt, disgraceful and dishonest.

Sec. 14—The federal government should care for and improve the Mississippi river and other great waterways of the republic, so as to secure for the interior States easy and cheap transportation to the tidewater. When any waterway of the republic is of sufficient importance to demand the aid of the government, that such aid should be extended by a definite plan of continuous work until permanent improvement is secured.

Sec. 15—For the purposes of national defence and the promotion of commerce be-

work until permanent improvement is secured.

Sec. 15—For the purposes of national defence and the promotion of commerce between the States, we recognize the early construction of the Nicaragua canal and its protection against foreign control as of great importance to the United States.

Sec. 16.—Recognizing the World's Columbian Exposition as a national undertaking of vast importance, in which the general government has invited the co-operation of all the powers of the world, and appreciating the acceptance by many of such powers of the invitation extended and the broad, liberal efforts being made by them to contribute to the grandeur of the undertaking, we are of opinion that congress should make such necessary financial provision as shall be requisite to the maintenance of the national honor and public faith.

Sec. 17.—Popular education being the only safe basis of popular suffrage, we recommend the second of the production of the popular suffrage, we recommend the second of the production of the contribute to the second of the popular suffrage, we recommend the second of the production of

SEC. 17.—Popular education being the only safe basis of popular suffrage, we recommend to the several States most liberal appropriations for the public schools. Free common schools are the nursery of good government, and they have always received the fostering care of the Democratic party, which favors every means of increasing intilligence. Freedom of education being an essential of civil and religious liberty, as well as a necessity for the development of intelligence, must not be interfered with under any pretext whatever. We are opposed to State inteference with parental rights, and rights of conscience in the education of children is an infringement of the fundamental Democratic doctrine that the fundamental Democratic doctrine that the largest individual liberty consistent with the rights of others insures the highest type of American citizenship and the best govern-

SEC. 18—We approve the action of the present house of representatives in passing bills for the admission into the Union as States of the Territories of New Mexico and Arizona, and we favor the early admission of all the Territories having necessary population and resources to entitle them to statehood, and while they remain Territories we hold that the officials appointed to administer the government of any Territory, together with the Districts of Columbia and Alaska, should be bonatide residents of the Territory or district in which their duties are to de performed. The Democratic party believes in home rule, and the control of their own affairs by the people of the vicinage. SEC. 18-We approve the action of the

control of their own affairs by the people of the vicinage.

SEC 19—We favor legislation by congress and State legislatures to protect the lives and limbs of railway employes, and those of other hazardous transportation companies, and denounce the inactivity of the Republic-can party, and particularly the Republican senate, for causing the defeat of measures beneficial and protective to this class of wage workers.

workers.
SEC. 20—We are in favor of the enactment
by the States of laws for abolishing the no
torious sweating system, for abolishing con-

tract convict labor, and for prohibiting the employment in factories of children under 15 years of age.

SEC. 21—We are opposed to all sumptuary laws as an interferance with the individual rights of the citizens.

SEC. 22—Upon this statement of principles and policies the Democratic party asks the intelligent judgment of the American people. It asks a change of administration and a change of party, in order that there may be a change of system and a change of methods, thus assuring the maintenance unimpaired of institutions under which the republic has grown great and powerful.

British Law.

The protection which British juries afford to men who abuse their wives is extraordinary, and this is a strik-ing case: At Leeds a man named Knight, whose wife had deserted him on account of his violence and intemperance, went to see her to ask her to return home, and because she refused he fired three shots at her, hitting her each time, wounding her in the arm, back and ear. The jury found that the prisoner fired only with the intent to "frighten his wife," and the man had to be discharged.

THE OFFICIAL BALLOT,

Following is the detailed ballot cast at the Democratic National Convention at Chicago, nominating Grover Cleveland for

EXPRESS TRAIN WRECKED. Carelessness of an Operator Causes a Serious Disaster. 12 Killed and Many Injured.

flancishero, Pa., June 27.—The most disistrous wreck that has ever occurred in Harrisburg took place Saturday morning at 12:30 o'clock at Dock street. The second section of the western express ran into the first section, completely telescoping cars.

cars,
Following is a list of dead:
Richard Adams, Harrisburg; Miss Lizzie
Blair, Philadelphia; Robert S. Raymond.
Columbus, O.; E. M. Whitlock, Cleveland
Daniel Mason, Hagerstown, Md. Rev. De
Costa Fomerene, Philadelphia; Mrs. Uriah
Heebner, Norristown; Winfield Heebner,
her son, aged 17 years; John Black, Altoona;
Prof. L. G. Smith, Baltimore.

The first section of the train was stopped
at Dock street tower for orders and when it
was about to start the second section crash-

at Dock street tower for orders and when it was about to start the second section crash ed into it, wrecking five cars and the loco motive of the second section.

The operator at Steelton is alleged to have been responsible for the accident in having given Engineer Kelly of Philadelphia the wrong signal. The sharp curve at Dock street also made the disaster more scrious than it would atherwise have been. The than it would otherwise have been. The buggage car was the only one in the second section wrecked. None of the trainmen were hurt.

H. S. Hays, the telegraph operator, is in jail to await the action of the Coroner's jury in the inquest on the bodies of those killed. Hays was on duty at Steetton tower and it was his first night there. According to his own confession he allowed the second section of the express to enter the block between Steetton and Dock street towers, be fore the first section had left it, which is in violation of the rules of the railroad company. The operator at Dock street saw the danger and tried to stop the approaching train, but his signal was seen too late. Ferdinand Colberg, of Brooklyn, who was injured in the wreck, died at the Harrisburg hospital this morning at 8 o'clock. This makes the twelfth life lost by this railroad horror. He was in a dangerous cendition when removed to the hospital and his death was expected from the start. Colberg is ported to have had \$6.000 in his pockets, which was takin in charge by the hospital authorities. LATER.

authorities.

The fact that he was on the ill-fated train The fact that he was on the ill-fated train is said to have been due to a quarrel he had with his wife on Friday afternoon last. Mrs. Colberg says he left her in anger and declared his purpose t go far away from home, and as to returning would consult his own wishes. According to her story he had been drinking for days, to which habit she as cribed their domestie infelicities.

Brust Write Something This bit of dialogue from the New York Weekly may explain how so many uncharitable things get into

the newspapers:

Space Reporter—Can't you give me omething to write up to-day?" City Editor—"Haven't a thing."
Space Reporter—"Well, then, give
me some thing to write down."

Years ago, when it was known that the supply of copper in the Lake Su-perior region was very large, and the uses of that metal in the arts were confined to certain well-established limits, no doubt there were people who foresaw a glut of the copper market, and looked for the time, not far removed, when copper mining would scarcely pay expenses, for want of sufficient demand for the article. But in the period, say twenty years, which has since clapsed, many things have happened, one of which is the invention of the telephone. It is a remarkable device, and one of never-ceasing interest as well as utility; but it would not at first glance appear to have any special relation to the copper-mining industry. One of

its recent phases, however, has a very material bearing upon that in-terest. It is stated that the American Bell Telephone Company has fifty lines of long-distance telephone in process of construction from Chicago to New York, and that each will require two lines of wire, making 100 lines of single wire. The distance from New York to Chicago being but a trifle less than 1,000 miles, here is, approximately, a total of 100,000 miles of copper wire. Its weight is 774 pounds to the mile, giving an aggregate of more than 17,000,000 pounds, or over 8,500 tons. This is about 1,500 tons more, it is said, than the entire production of the Tamarack, one of the leading copper mines of the Lake Superior region, for the year 1890. Twenty years ago, or even ten years ago, the most far-see-ing observer could not have anticipated this demand upon the copperproducing resources of the country. And whether in electrical science or in any other department of human effort, it is just as impossible at this moment to make a forecast of the situation which will exist in 1900 or 1910 as it was in 1870 or 1880 to predict the advances which have been made between those dates and the present. It is difficult to realize, as regards the progress of invention, that the future is a sealed book pre-cisely as the past has been. But it is a reasonable belief that the wonders of the future will surpass those of the past; for the work of one decade only broadens the foundation for the next -Mechanical News.
