A REVIEW OF TRADE.

CROP REPORTS NOT FLATTERING.

Business Generally Reported in Good Condition.

H. G. Dun & Co.'s weekly review of trade says: Crop reports are not quite up to expectations, and are construed as indicating a deficient supply of corn and oats, while any possible deficiency in wheat and cotton will se more than met by surplus stocks. But prices have advanced quite sharply and exports of domestic products fall below last The creat industries are all doing year's. remarkably well excepting the iron manufacture.

The iron output August 1st was 155,136 tons weekly, against 169,151 July 1st, and 109,576 a year ago, but the stocks unsold nevertheless increased 16,000 tons during the month of July, and on the first of August exceeded a million tons. Southern pig iron is pressed for sale, and some quotations are lower than ever. But the resumption of manufacture by Western iron works, which have sattled their controversies with the men, will make a great change in the situation at once, increasing the output of pig iron, but probably the demand will be greater. Manufactured iron and steel have been in very active demand, nearly all the works in operation being crowded with orders. But steel rais are dull as ever and while only 700,000 tons have been sold for the vear thus far, the orders on hand will hardly carry eastern mills beyond Septem-ber 15. Copper is weak at like and lead at the but speculation advanced tin to 21.16e and depressed it to 20.45. There is no market worth mentioning for coal, but in the textile industries the utmost activity prevails. Manufacturers.are buying wool reely. Boot and shee factories are still pressed to the utmost. The particular feature of the week has been the rise in breadstuffs, 2e in corn and is in oats, while wheat decimed is with sales of only 13,000,000 bushels. Western receipts were 4,050,000 bushels. Fork advanced 75c per barrel, but lard declined to be the larger burger burger burger. have settled their controversies with the men,

and Atlantic exports 2,309,000 bushels. Fork advanced 75c per barrel, but hard declined

KEPT THE THREAT.

Murder of a Young Mau and Wounding of His Mother.

RIVERSIDE, CAL., Aug. 13 .- While Mrs. Wall, the wife of Peter Wall, a prominent business man of Elsimere, was driving through the Temescal canon, accompanied by her son, Ira, a young man named Elmer Walters stepped from the roadside, and raising a gun he was carrying, fired at the occupants of the buggy, killing Ira Wall instantly, and badly wounding Mrs. Wail.

THE MABLEHEAD LAUNCHED. The Speed to Be 15 Knots an Hour. It is a Twin Screw Vessel of the Pro-tected Type.

Boston, Aug. 12-Before 1 o'clock, the hour set for the launching of United States cruiser No. 11, the immense ship-yard of Harrison Loring, South Boston, was a lively place, with its busy shipwrights hurry ing to and fro under the towering mass of steel, putting on the final touches of lubricator to insure a perfect launch.

Assistant Secretary of the Navy James Russell Soley represented the government at Washington and Gov. Russell and a number of members of the legislature were present for Massachusetts. The city of Boston was also well represented by members of the board of aldermen and common coun-cil.

the board of addenice, have the signal was at the appointed hour the signal was given to knock away the shores, and amid the cheers of the spectators, cruiser No. 11 slipped slowly down the ways into the water, christened the Marblehead. Mrs. C. F. Allen broke the customary bottle of wine over the ship's bows as the vessel plunged into the same

Writer, chirached the customary bottle of wine over the ship's bows as the vessel pluuged into the sea.
Her principal dimensions are: Length on mean load water line, 257 feet; estreme breadth, 37 feet; depth of hold to under side spar deck plank amidblips, 19 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of water, mean normal, 14 feet 6 inches; draft of the septem; with poop and forecastic decks, and an open gun deck between, fit ed with a water-tight deck of 12 pounds in the center, and extending; the entire length of the vessel.
The torpedo outfit will consist of six torpedo guns for launching torpedoes. There will be an electric light plant on board. The battery will consist of two six-inch breech-loading rifles, cight five-linch breech-loading rifles, cight five-linch breech-loading rifles, cight five-linch breech-loading rifles, cight five-linch breech-loading rifles, draft deck of 30 inches, four on each side of the verseel. 5,400-horse power, with the point site a stroke of 30 inches, the streng will be furnished by two triple expansion engines of the verseel. 5,400-horse power, with vertical inverted for the vessel and two of a linches diameter, and a stroke of 30 inches,

MURDERED BY ARABS. The Congo Free State Threatened With

Grave Dangers From Slave Traders.

BRUSSELS, Aug. 13 -The Arab tribes on the Upper Congo river are in revolt, owing to the evident determination of the whites to suppress the African slave trade and 20 agents of the Katanga Company have been killed or captured by the Arabs on the Up per Congo river. The steamer Berneert, which was taking goods up the river, was seized, and the factories were raided.

seized, and the factories were raided. Whole tribes on the western bank of the river are in insurrection. The Arabs northwest of Nyangwe have gone down the Lualaba tiver and captured, the sta-tion at Ribara, killing the whites employed there. The stations on the Upper Lomassi have also been destroyed. The Arabs at Stanley Falls and Isangi who have hitherto been loyal are showi g hostility. The Con-go State authorities are sending reinforce-ments to various points threatened by the Arabs. Arab

Fort Johnson was attacked, two Europe Fort Johnson was attacked, two Europe-ans wounded and a 7-pound cannon cap-tured. The Arabs are well armed with European rifles, and the greatest alarm is felt for the safety of the expedition sent out unner Captains Jacques and Joubert to sup-press the slave trade.

LOST IN ALASKA.

Two Man Probably Drowned While Sacking For Succor.

WASHINGTON, Aug. 13 .- Captain Healy, comman ling the revenue steamer Bear, has made a long report to the treasury department in regard to the cruise of that vessel in Alaskan waters. The Bear touched at St. Matthew's Is'and June 3, and took off a man named Peter Viani, who was in dire distress in an lack of provisions. He said two other men named Fred Burns and J. B. Pulsford, who had been left on the island with him, had started in a dory May 4 for Hail's island, since which time he had heard nothing. The Bear visited Hall's island but did not find the men. Traces were found of their camp, which appeared

THE IRON SCALE SETTLED. Manufacturers and Men At Last Come

to Terms The Western iron scale of the Amalgama-

ted Association of Iron and Steel Workers was agreed upon, and fixed for the coming year by the action of the Conference Committees of the Amalgamated Association and the Pittsburg iron manufauturers. The base of the new scale-that is the rate of puddling-is the same as it has been for some years, \$5.50 a ton. But in the finishing department, a reduction of 10 per cent. was agreed upon by the two sides.

The settlement was arrived at after 16 conferences, by concessions on both sides. The manufacturers conceeded the \$5.50 rate for puddling. Their demand was for a \$4.50 rate. The Amalgamated Association conceeded to the manufacturers the reduction asked in the finishing departments. The mills that have already signed the scale, except the sheet and wire rod mills will be affected by the agreement arrived at. They will all get the benefit of the 10 per cent, cut for finishing, as they signed the scale with the stipulation that they would be governed by any changes made.

In Pittsburgh about 20,000 fron workers are affected by the agreement, while outside of the city about 15,000 men are affected. The iron scale for the entire country is now settled, with exception of that in the Mahoning and Shenango valleys, and this will probably be signed shortly. The settlement occurs after an idleness of 41 days, and in some cases this time will probably stretch into two months before the mills are started.

An Extensive Swindler Arrested.

NEW YORS, Aug. 13 .- Henry Gottlieb, s lawyer with an office on Park Row, was anraigned on a charge of forgery. The police say they have as many as 50 cases against him of swindling and forgery. Gottlieb once practiced law in Chicago, and it is asserted that he is a fugitive from justice in that city.

ROAD DRAINAGE.

It Is Absolutely Indispensable to the Best of Results.

The one thing necessary to a good road—earth, gravel, macadam, or paved—is thorough drainage of the foundation. Money has been misapplied in road-making because of neg-lect of thorough drainage, even when the money has been used to build roads of a material that should give them a permanent character. On the Western prairies, where the natural drainage is poor, undrained gravel roads have suddenly become mud roads when put to the severe test of a long rainy spell in winter and early spring. Not the least un-fortunate result of this has been a prejudice against gravel roads in particular, and a scarcely less pronounced distrust of permanent roads in general. Lack of drainage was the real cause of the failure. Whether the road is to be of earth,

gravel, or macadam, the earth road-bed should be graded, crowning it twelve to fourteen feet wide, and twelve to eighteen inches higher in the middle than at the edges. Along each edge should be cut a shallow ditch. This is a correct general statement, which, of course, should be modified to suit peculiar circumstances. Thus, in a very hilly country, especially if the soil washes easily, the ditches should not be cut at the sides, as they are not necessary, and will become serious gullies. In a hilly country it is not necessary to crown the roadbed so high, but the

crowning must always be sufficient to insure ready surface drainage. Twelve to fourteen feet in width is sufficient. Making the road wider has been found a needless expense.

With those soils and subsoils specially well adapted to drainage, crowning the roadbed and cutting the ditches at the sides will secure the necessary drainage, but where the soll and subsoll are not favorable to drainage, additional measures must be taken. In the country in which I reside, a gravel road has been made for twenty miles, near the Mississippi river bluffs. This road is on a soil and a subsoil decidedly gravelly, giving splendid drainage. gravel road is now eighteen years old, and has proved satisfactory. The only means taken to secure drainage was to crown the roadbed a little in low places. To make a gravel road in this way over the greater part of the same country would be a waste of money, for in most places the soil is a black prairie loam, and the subsoil a tenacious clay.

It has been found quite satisfactory in most localities, having a black sur-face soil and clay subsoil, to lay a drain of tile along each side, near the edge of the roadbed. This has been found a better location than near the middle of the roadway. The office of the tile is to carry off water brought up from below rather than water sinking in from above. In some localities it is necessary to use three drains-one line of tile beneath the center of the roadway, and one under each ditch at the side. It seems unnatural to put the tile under the side ditches, but this location has been proved best.

When the roadbed is to be graveled or macadamized, the crowning earth foundation should be nicely smoothed and then rolled until quite solid. is well, also, in this case to put the clay subsoll from the ditches on to the surface. When rolled, it makes a hard, smooth surface, almost imper-When rolled, it makes vious to water, and over which will flow, off to the ditches at the sides, the rainwater that may sink through the gravel or macadam. When the surface is to be of earth only, the clay subsoil should be kept underneath, and the natural soil be placed on top. The surface soil will usually afford much better drainage than the subsoils, and make a better road surface.—American Agriculturist.

IF the harsh criticism or unfavorable opinion of your act that comes to you, awakens quick resentment and a desire to retallate, it is an evidence that conscience joins in the ac-cusation. He who is innocent can always afford to be calm.

THEORETICALLY, it is hard to be poor; but practically, many people find it only too easy.

The news of the shooting caused much ex-citement in town and a posse was immedi-ately formed to go in pursuit of the mur-derer. He was overtaken near South River-ide, and was turned over to Sheriff Sey-

mour. There has been considerable trouble be-tween the Wall and Walters families over disputed water rights, and the court pro-ceedings resulted in a decision favorable to Wall. About a week ago Mr. Wall was ac-costed by two masked men while driving through the canon and warned to leave the country. He thought lightly of the matter at the time, but now believes the murder country. He thought lightly of the matter at the time, but now believes the murder had been deliberately planned.

BURNED WITH SULPHURIC ACID.

A Pipe Bursts and Scatters the Awful Fluid Over Four Men.

Woncesten, Mass., August 10 .-- Four employees of the Washburn & Moen wire mill, at Quinsigamond village, were horribly burned by sulphuric acid yesterday. The acid is used for cleaning copper wire, and is forced into the annealing room through lead pipes. Only a small amount of acid had been pumped from the tank, when suddenly one side of the iron receptacle burst outward, throwing the awful fluid over the four men who were standing near. All were severely burned. Their clothing was eaten off and the screams uttered were heartrendering. Two of the men tore off their clothing and jumpad into the river. Alkalis were administered, and latter the wounded men were taken to the city hospital. At the hospital the men uttered awful while their wounds were being dressed, and their condition is very precarious.

TATE NOT ELIGIBLE.

He Has Not Been a Citizen of the Country Long Enough.

It has been discovered the Rev. G. Tate. the Republican nominee for lieutenant Governor of Nebraska, is ineligible. Tate is an Englishman, and he failed to take out his maturalization papers until a year ago. The Constitution requires that the governor and Hentenant governor shall have been citiz-ns of the United States two years prior to their The State Central committee will be called upon to fill the vacancy. Tate's case is similar to Gov. Boyd's, the difference being that Tate's father was never natural-ised, and he was not a resident of Nebrasks when it was admitted into the union.

to have been abandoned three weeks before Captain Healy says he thinks the men must have been drowned at sea by the capsizing of their boat.

UNFORTUNATE YOUTH.

A Guileless Baltimore Lad Entrapped Into Marrying a Variety Actress.

At Washington, D. C., the mother of Charles J. King, of Baltimore, and to whom a marriage license was issued last Friday in which was the name of Sarah R. Beltzer, was here to make inquiries as to whether they were really married. The court-house records showed that the license had been issued, but there had been no returns made, nor could it be found who married them. King gave his residence as Baltimore and that of the lady at Columbus, O., and it appears from the statements of Mrs. King that her son is but 19 years of age and Sarah is a variety actress under the name of Belvoir. engaged at the National hall, Baltimore, and she alleges that the boy was entrapped into marrying the girl.

Harvest Hands Needed.

The \$5 rate of harvest hands from St. Paul to any point in Minnesota and the Dakotas has been extended and the Milwaukee road especially is making great effort to supply the demand for help in gathering their harvests. Several thousand men are still needed.

Northwestern Wheat Report.

Figures complied by the Northwestern Miller shows the stock of wheat in private elevators in Minneapolis to be 983,000 bushels, a gain of 12,000 since Monday last. The total stock at Minneapolis and Duluth is 9,158,650 bushels, against 9,405,963 a week ago. The Market R cord reports the stock of wheat in country elevators of Minnesota and the two Dakotas to be 965,800 bushels, a decrease of 233,000 bushels.

Shot by His Son.

CLEVELAND, Aug. 9 .- At Waldo, O., today, Harvey Kenyon, a wealthy farmer. was shot four times by his son George, and will die. The old man was intoxicated and he began abusing his wife, finally striking her with a club. Young Kenyon interfered and his father turned on him, when the young man fired. Kenyon's wife is old and feable, and it is thought she will dis also.
