LATER NEWS WAIFS.

MINCELLAN ROUR For the first time this winter ice covered the East river at New York on Saturday. Ita was re r the in tery. It stretched from bank

DISCOVERS. ACCIDENTS AND PAPALITIES Peter Bell and W. J. Lenigh felt 40 feet from a scaffold at the world's fair grounds, Chicago. Pell was instantly killed, and Lehigh will probably die from his injuries.

CAPITAL, LABOR AND INDUSTRIAL. The mines at Rico, Col., have closed down as the re-ult of the depre-sion of silver and the high wages paid to miners. Thousands of men will be deprived of work.

BANITARY. A special from Joliet, Ill., says the black diphtheria is still raging in that country, it being worse in the village of Symerton. In the family of Nicholas Younker there were seven deaths in one week, there being a funeral every day for a week. Six were members of the family and the seventh a nurse. Death also reaped a rich barvest in the family of Albert Younker. He lost wite and three children. Schools, churches and all holiday gatherings were closed.

WEATHER, Not since the terrible fall of snow five ears ago has New York City experienced a storm that so nearly resembled a Dakota blizzard as that which occurred on Friday. Traffic on Broadway was almost suspended while on some of the less prominent thoroughfares the blockade was complete. In some places the snow drifted until it was from four to five feet deep.

A sezere storm prevailed along the Atlantic Coast on Friday and Saturday, doing much damage.

FORKIGN.

Three firen.en were crushed to death and many injured by falling walls at a fire in a Liverpool cotton warehouse. Loss, £150,-

The cold weather in Europe continues unshated. Two men have been frozen to death at Tonlouse and one at Bordeaux, France. anals and rivers are frozen over.

The application of the laws reducing the hours of labor in factories, mines, etc., aused a reduction of wages throughout France. Many strikes have resulted, notably in the Department of the Nord.

A frightful accident is reported from Eischisebek, in the province of Wilna, Rus sia. The boiler of the public baths at that place exploded and six persons were instant ly killed and fifteen mortally injured.

The fall in rentes at Paris since the beginning of the Panama canal exposure is estimated at over 35,000,000 tranes, and the f ll in other French securities at nearly 15,000,000 francs.

A boy in Nankin, China, was mobbed recently for wearing a glass eye. A United States warship restored peace.

The cold spell in Europe continues to ause many deaths by freezing in Germany Many river craft are ice-bound.

A Paris laundryman named Hericz, heartbroken on account of his wife's unfaithfulness, killed his four children and himself by burning charcoal.

During the month of December English imports decreased £5,380,000 and exports £540,000 as compared with those of the cor responding month of 1891.

Several persons have been frozen to death at Thorn and other places on the Vistula. In the Hartz mountain districts the soldiers are drilling in snow shows.

A TIP FOR WOOL GROWERS

A Valuable Government Publication Now Ready for Distribution.

One of the most valuable publications ever issued by the Government is a report upon the sheep industry of the United States, prepared under the direction of the Secretary of Agriculture. It treats of the history and conditions of the industry, from the early settlement of the country down to the present day. It bids fair to rival in popularity the work on the diseases of horses, published by the department some time ago. It is ready for distribution by the Secretary and through members of Congress.

CLEVELAND'S MAJORITY 108. He Would Have Been Elected Without New York and Indiana.

The New York Evening Post of Wednesday says: The settlement of the Oregon contest makes it possible to give an accurate table of the vote for President as it should be cast by the Electoral College and which will show: Total number of votes 444: necessary to a choice 223. Cleveland's majority 108. The total vote for the respective candidates is as follows: Cleveland, 276; Harrison 144, and Weaver 24.

New Theory About Chole: ...

Prof. Nensky has expounded a new theory of the origin of cholera before the Russian Medical society. Prof. Blostein, finding that he could not produce cholers by the injection of Kock's coma bacilli, sought for and found two new organisms peculiar to Asiatic cholera. The disease invariably follows an injection of the three varieties of organisms, and it is regarded as possible that linocculation with the three organisms will give immunity from the

Phenominal Weather in Berlin. The snow is so deep in the streets of Berlin that it has been found necessary to substitute sieighs for wheeled vehicles. The sufferings of the people are increasing by the growing scarcity of coal, due to the miner's strike in the Saar district. The mercury fell to six degrees below zero on Fri-

Wolves Devour School Children. Toe entire length and breadth of the German Fatherland is covered with ice and snow. Dispatches about the intense cold are coming in from each corner of the empire and in the Polish provinces. Along the Russian frontier wolves have again ap-peared to frighten the reasants and menace the cattle and lonely farm houses. A dis-patch from Aspoe Finland, says that hungry wolves devoured several cuildren on their way to school.

-Two little hunters of Dallas, Tex., sone of William Smith, were found Monday frozen to death, locked in each other a sems.

1895 OPENS BRIGHT.

The Old Year Closes in a Glow of Prosperity, but the New May

Eclipse It.
R. G. Dun & Ca.'s Weekly Review of Frade says: The business of the new year opens we'l, though there has hardly been ime as yet to get fairly under way. In some branches of manufacturing there is a rery conservative feeling, owing to a scantiness of satisfactory orders, but in the textile branches the extraordinary demand reates general confidence. It every part of he country, and apparently in almost every brauch of business, the traders are looking forward to a year of large transactions But in financial circles the year opens with considerable feeling of uncertainty, owng to the revival of gold exports, which will be about \$2,000,000 for the current week, and to the doubts about the action of Congress. The annual report of various branches of trade come in with fresh evidence of the unsurpassed prosperity and volume of business in 1892, but east no clear light upon the future, which depends in a large degree upon monetary influences,

The Government crop reports started a little stronger buying, but wheat soon reacted to 772 cents, a decline of nearry 15 cent for the week, western receipts in turee days being over 2 000,000 businets. In spite days being over 2 000,000 businels. In spite of large receipts corn gained over 1 cent for the week and oats also, while pork rose \$1, and lard 30 cents, and hogs 50 cents per 102 pounds. Coffee is unchanged, and oil 14 cents stronger, but coiton showed no change with sales of 589,000 bales. Specula ion in stocks is depre-sed by monetary anxiety, although reports of traffic and earnings continue more favorable. Government, and other large disbursements, make the money market easier, but bankers expect exports of gold to continue for some time.

Industrial reports are mainly confined to the unprecesiented transactions of last year, but in iron a weaker tone is manifest, with

the unprecesented transactions of last year, but in iron a weaker tone is manifest, with reports or reduced prices for pig iron by some southern concerns. Deliveries of rails for the past year were but 1.390,000 tons. The capacity out runs the demand for linished products, so that markets are irregular and weak, though in structural and sheet iron large business is in prospect.

The business failures occurring throughout the country during the last seven days number, for the United States 232, and for Canada 17, or a total of 340, as compared with a total of 435 for the corresponding week of last year, representing 393 failures in the United States and 42 in the Dominion of Canada.

The business year for the Eanks.

The banner year for oank, clearings has

in the United States and 42 in the Dominion of Canada.

THE BIOGEST YEAR FOR THE BANKS.
The banner year for oank clearings has just cosed. The aggresa e for di cities was \$2,084,348,379, an incr asy of 9.1 per cent on 1891. Only 12 cities show a decrease from last year most of these being in the Southwest and on the Pacific coast. New York clearings aggregated \$36,622,469,291, or 57.6 per cent of the total, a gain of 8.6 per cent of 1891, but a d crease of 2.1 from 1890. Chicago now holds second place in the volume of bank clearings.

BRADSTREET SECORIS A QUIET OFENING.

Bradstreef's says: Stock taking and spring trade preparations have imparted a tone of quiet to most lines of brusness. Exceptions to this, however are found in the distributive demand for coal, clothing and boots and shoes, stimulated by the present cold snap. New England mills were active in 1892. New mills, and increased production, large profits and low prices were the features. Cotton goods 1 roduction was the largest ever known, Wages advanced in cotton mills were also a feature. The outlook for 1883 is generally favorable 1 r a heavy production at low prices.

As was expected, the decrease of available wheat proves to have been only temporary. For the week ending December 31 the increase was 2,148,172 bushels. For the fortinght, however, the net gain is only 500,000 bushels, while the "official" visible has gained 2,073,000 bushels on very much smaller total stocks. Exports of wheat from both coasts the week (four included) equal 3,008,020 bushels in the week two years ago, 2,076,000 bushels in the week two years ago, and 2,310,000 bushels three years ago. years ago, and 2,310,000 bushels three years

Wolves Attack a Village.

A story comes from the North to the etfect that a pack of wolves, driven by the intense co'd and deep snow from the woods to seek food, attacked an Indian village, near the east shore of Lake Winnipeg, and several Indians, while attempting to drive them off were terribly bitten by the ferocious animals. A squaw and a child were also horribly lacerated and are not expect-

A FIRST WATER FAKE.

The West Virginia Liar Must Have Moved to North Carolina.

A special from Bakersville, N. C., says that the story of a horrible killing of people is a fake of the first water. No such occur rence has taken place and the people of that locality are at a loss to understand why the story was told.

Moore Pays \$11,000 for Mabel L. A. H. Moore, of Philadelphia, has purhased the famous brood mare, Mabel L, from the Malldon Stock Farm of Lyons, N. Y., paying \$11,000 for her. She is the dam of Reina, who made a record of 2.13 and skowed Budd Doble a mile in 2,09 last

-HARDIN, the Adams Express messenger, who was taken in custody by Wells Fargo Express detectives under suspicion of hav ing stolen the package containing \$35,000, has entered suit against the Adams and Wells Fargo Express Companies jointly for \$25,000 damages for false imprisonment.

Natural Gas Struck in New York. A large vein of natural gas was struck in weil No. 13 at Sandy Creek, near Oswego, N. Y. The tools were thrown high in the air and the noise of the escaping gas was heard

Oregon's Vote.

The official canvass of the vote of Oregon at the recent election shows the results: following Harrison, 35,002 Cleveland, 14,243; Weaver, 26,875; Bidwell, 2,261; Pierce, (Dem. Pop.) 35,813.

Mining a Sunken Forest.

Mining a Sunken Forest.

There is a sunken forest of white sedar on the coast of New Jersey which has been continuously "mined" for its valuable timber for more than eighty years. The curious industry of digging for these sunken logs is carried on by the people of Dennisville, a village which was brought into existence solely through the wealth of the buried timber in its vicinity. Over this sunken forest arces of large size are now growing, and in many instances the growing timber is sut away in order to get at the more raluable logs which lie only three or lour feet beneath the surface. It is believed that they were sunk by an earth-junke.

Northing makes a man a bit richer that does not make him more grate-ful.

How hot is the sun? That is a question that astronomers and physiists have been trying for years to solve, and they are not yet satisfied that they know the true answer. In fact, it may be said, they are certain they do not know it, although they are able to report progress, from time to time, in the direction of the truth.

The most recent trustworthy investigation is that of M. De Chatelier, who fixes the effective temperature of the sun at 12,600 degrees Fahrenheit. It may, he thinks, be either hotter or colder than that figure indicates, to the extent of 1,800 degrees either

Previous to this investigation of M. De Chatelier's the temperature of the sun had been fixed at 18,000 degrees Fahrenheit by Rosetti, and that result was looked upon by many leading astronomers as probably the nearest to the actual facts of any that had yet been obtained.

It will be noticed that the latter estimate takes off several thousand degrees, but this is a trifle compared with the falling off from the estimate of the temperature of the sun made by some of the earlier investigators. The celebrated Seachl at one time maintained that the solar tempera-ture was not less than eighteen million degrees Fahrenheit, but he himself afterward found reasons for drop ping down to 250,000 degrees. Such estimates of the sun's temperature as 100,000, and 50,000 degrees were favorably regarded a few years ago.

If M. De Chatelier's result is ap-

proximately correct, then we can. perhaps, begin to get something like a comprehension of the heat of the solar furnace, since it approaches comparison with temperatures that we can produce artificially. The highest artificial temperature has been estimated by Professor Young at about 4,000 degrees Fahrenheit.

But it must be remembered that there are certain arbitrary assumptions, which may or may not be cor rect, involved even in the most care ful investigations of this subject, and that, at any rate, the sun is undoubtedly much hotter underneath than it is at its glowing and visible surface.

Thunder Lore,

The natives of the Sandwich Islands considered thunder as being Mauna Loa's echo from the clouds. This curious not on has crystallized a weather proverb which is now current among many of the white residents of island, vis., "It will rain to-day: Mauna Loa shakes the clouds." In this connection it may be remarked that the early Scandinavian settlers of Iceiand believed that there was some mysterious and supernatural connections between the roarings of Hecla and the "angry mutterings of love." In England many of the peasantry still plant the house leek, Jupiter's Beard," on their house roofs as a preventive against thunder, lightning and evil spirits, a custom which reminds one of Charlemagne's ed.ct: "Et habeat quisque supra domain sam Jovis barbum." Another widespread superstition, and one that has been noted among the tribes and nations from China to England, and from Cape Hatteras to the Golden Gate, tells us that if the "claps," or reports of thunder come in even numbers the storm will be of short duraother hand, if they come in uneven numbers, especially if the reports be a series of five, nine or thirteen claps, much loss of life and property will result. For hundreds of years thunder accompanied by hail, or thunder In the north or west, was thought to portend evil to all British subjects. During the time when this superstition was rife the great bell at Maimesbury Abbey, England, the one known as St. Adelm's Bell, was always rung for the purpose of driving away

Exquisite warm.

Mr. Wilde says he is a journalist, and modestly observes: "I am told that my judgment as an art and dramatic critic is considered final." This is almost equal, says the Albany Times, to Oscar's remark to a London friend who visited him in Paris, "Did you drop in at my chambers before you left London?" inquired the as-thete. "I did," was the reply. "Did you observe whether my lily was in flower?" The friend answered that it was. "How good of it to bloom while I am away!" murmured Oscar, gently.

private ones.

France has 69,350 schools and 14,500

There are a large number of nyrenic physiciaus who claim that disease is always the result of a transgression of Nature's awa. The proprietors of Garfield Tea are both physicians and have devoted years to teaching the people how to avoid sickness by following Nature's laws. They give away with every package of Garfield Tea a little book, which they claim will enable all persons, it directions are followed, to avoid sickness of all kinds and to have no need for Garfield Tea or any other medicine.

Chowing a Husband,

Cheeing a Husband.

Husbands are not made to order they just grow. To get a good one you have to know him when you see him. He may not look like the man you fancy painted, yet you will recognize in him the qualities that go to make up the reliable, enterprising, amiable men. As a rule women are not possessed of acute business minds, and are not as observant as they might be. One after another they will fall into the same open trap, just as though they were blindfolded or were impelled by some uncontrollable force. The majority of them seem to think they must marry, and all that is necessary is to find a man that is good-looking or rich. The average girl first takes a fancy to a pretty man, and thinks and dreams of pretty man, and thinks and dreams of his lovely hair, charming eyes, ele-gant dress, divine mustache and dove-like voice. She declares that he is too sweet for anything. This fever passes off in time, but too often leaves a perverted taste. A dandy figure, swell manners, and clattering tongue are apt to even outweigh a good heart, industrious habits and moral worth. Even after marriage visions of the sarly ideal rise up to disturb the serenity and tranquility of the domestic scene. Better such an ideal had never been formed.—Piltsburg Chron-

Laura Jones, the Georgia girl who has invented a new plow and corn-planter, is said to be a consin of Lulu riurst, the famous electric girl. Georgia girls seem to be determined to surprise the world.

Most great works are accomplished

The Most Pleasant Way

Of preventing the grippe, colds, headaches and fevers is to use the liquid larative remedy, Syrup of Figs, whenever the system needs gentle, yet effective cleanating. To be benefited one must get the true remedy manufactured by the California Fig Syrup Co. only. For sale by all druggists in 50c. and \$1 bottles.

The first iron wire was drawn at Nuremberg in 1851.

Deafness Can't be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous immg of the Eustachian Tube. When this tube gets inflamed you have a rambing sound or imperfect hearing, and when it is entirely copied, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition hearing will be destroyed forever: him cases out of ren are caused by relaterly, which is nothing but an inflamed condition of the mucous surfaces. We will, give One Hundred Dollars for any case of deafness, caused by calarrh that we cannot cure by taking Hall's Calarrh Cure. Send for circulars, free.
