Butterflies and Roses.

"How do you keep that butterfly futtering around that rose?" "Very easily, when you know how," was the reply made to the inquiry "You see this is an imitation rose and an imitation butterfly. The rose is made of paper and the stem is a metallic tube. This tube extends slightly beyond the rota sof the force. The other and of peta s of the flower. The other end of it is flattened like the mouthpiece of a pipe, so that it can easily be held in the mouth. Two small butterfles are fastened to a small elder-pitch ball by means of a very fine wire. By placing the ball directly over the tube and gently blowing through the tube the ball is suspended in the air and the butterflies have the appearance of fluttering round the rose. The effect produced is very surprising. Of course, the air must be blown through very regularly. This is the same principle that makes an egg-shell or a light cork tall remain in equilitrium at the top of a jet of water."—New York Mail and Express.

THERE is a man in Hartford who has worked at forty-six different trades. He forms a sort of a trade union all by himself.

The Testimonials

We purish are not pu chased, nor are they written up in our office, nor are they from our employes. They are facts, proving that MERIT, and that Hood's Cures

"August Flower"

"What is August Flower for?" As easily answered as asked. It is for Dyspepsia. It is a special remedy for the Stomach and Liver.-Nothing more than this. We believe August Flower cures Dyspepsia. We know it will. We have reasons for knowing it. To-day it has an honored place in every town and country store, possesses one of the largest manufacturing plants in the country, and se severywhere. The reason is simple. It does one thing, reason is simple. It does one thing, and does it right. It cures dyspepsia.

FACTS ABOUT THE FAIR.

Provision has been made for the transpor-ation of 60,000 persons an hour to and trom he grounds.

First Nations and thirty-seven colonies are represented. Added to these are the United States Government and the various States and Persitories of the Union. ROUGHLY speaking, the grounds contain 600 acres. They are a mile long and about a mile broad at the widest part. The distance from the middle of Chicago is seven miles.

The collection of exhibits in the British section is the largest and most important that has even been brought together in any international exhibition outside of the United Kingdom.

A raise that will impress itself upon the thoughtful observer is the fact that every tranch of selens and industry has been split up into minor departments. This is the age of the specialist.

Is the exhibits are to be considered from the standpoint of numbers the French are stronges. If they are to be judged by the average excellence in art Hofland, without doubt, takes the lead among foreign Nations.

Is the department of natural history New York State takes the lead. The Ward's Nat-ural Science Museum of Ro-bester has an ex-bibit which Professor Putning says is perfect. It shows every form of animal life "room sponges to man."

Ir must be understood that the Exposition is a city with a complete government. There are over 50,000 exhibitors, and two persons for each interest represented would give a fixed population of 100,000. There are well organized and equipped police and fixe de-

Is the artiliery exhibit is a 12-inch usvai rifle, thirty-six feet long and weighing fifty tons a 13-inch naval gun jacket, seventeen feet long and weighing (6.50) pounds, the 13-inch tube that will be in-seed by the jacket, is thirty-eight feet five inches long and weighs 12-000 pounds.

There is a building where babies can be checked just like a hat or coat or umbrella. The charge is moderate and the nurses are good. There was a similar institution at the Paris Exposition, bur, unfortunately, several hundred babies were on hand without claimants when the exposition closed.

ants when the exposition closed.

From the roof of the large building of Manufactures and Liberal Arts will beamthe biggest electric search light ever constructed. It has reflectors six feet in diameter and will give a light of 194,000,000 eandle power. It is asserted by those in charge of this light that to people sixty miles away the light will be nearly as bright as a full moon.

Most interesting in a historical sousy are the trophies from the Hohemzollern Museum, leaned to the State Department with United States Government for exhibition in this sec-tion. They have been sent over in the custody of Captain Rogers of the United States Navy, and the State Department assumes the re-sponsibility for their safe keeping and safe

On the steambort pier are moving side walks. The outer sidewalk moves at the rate of three miles an bour, so that passengers can then step to an inner sidewalk which has a speed three miles faster, so that they are carried along the pier at the rate of six miles about any day are to be of any will without an hour and can get on er off at will without

Tun golden nail, which marks the comple The golden mail, which marks the completion of the Woman's Building at the Exposition, required several weeks of constant work to make. It is composed of gold, silver and copper, and a Montana supplifier is set in the upper portion of the shield which is attached to the mail near the head. Mrz. Potter Palmer, President of the Board of Lady Managers, drove the nail of gold home with a silver hammer

DELAYS in the collection of material caused Driays in the collection of material caused the postponement of the ceremony of easting the souvenir bell to be made of historical netal collected by the Daughters of the American Revolution for the purpose of commemorating the opening of the World's Fair. The ceremony was set for the opening day, and Mrs. Cleveland was to have touched a button at the White House connected with the nationatic arrangement which would have turned the molten metal into the mould.

In the center of the Electrical Building.

turned the molten metal into the mould.

Is the center of the Electrical Building, which is 345 by 690 feet, stands the Edison tower. This is a giant column, painted white and thickly studded with incandescent lights. It is 103 feet high. The effect is splendid, but is fully appreciated only at night. The General Electric Company of New York has grouped its exhibit around the Edison column to a depth of 100 feet. The Bell Telephone Company has a handsome house just inside the south main door, the Westinghouse and other prominent companies being ranged along the main alsie.

WEATHER AND CROPS.

The Agricultural Bureau Sets Forth the General Conditions of Both.

Washington, D. C.—This is the third consecutive cold [and unfavorable week throughout the principal wheat fand producing states. The week was unusually cold in the States of the Upper Mississippi and Missouri valleys, where the daily temperature ranged from 5° to 15° below the normal and closed with freezing weather, but the indications are for more favorable conditions during the coming week in the Northwest. It has been slightly cooler

conditions during the coming week in the Northwest. It has been slightly cooler than usual on the Pacific coast.

The temperature was slightly below the average from the lake region eastward, while it was warmer than usual generally throughout the southern states east of the Mississippi. Excessive rains occurred during the week over the central vaileys, including the entire winter-wheat region, the northern portion of the guif states and in the southern portion of the guif states and in the southern portion of the spring wheat region. The rain-fall was unusually heavy in central Missi-sippi and Ohio valleys, interfering materially with farm work in the principal agricultural states. Considerable injury has resulted from floods and severe local storms throughout the west. There was also excessive moisture in the not-hern portion of the cotton region, where the land is too wee to work and fears are expressed of an overflow in lower Mississippi.

Considerable acreage of oats and wheat is reported under water in kilmois, and the indications are that considerable injury to farming interests from high water will result in the lower Mississippi and lower Ohio vaileys and in the towlands near the river.

In Pennsylvania grain and grass have good colors, but have made little growth. Large acreage of potatoes and some corn have been planted, but there are fears of both rotting.

In West Virginia wet weather has retarded plowing and planting. Wheat, oats and grass are in fine condition, tobacco is progressing favorably and stock is in fair condition.

In Ohio continued rains have overflooded streams and damaged crops badly on low lands. Wheat, clover, barley, rge and to-bacco plants have improved, but oats and potatoes are rotting in some localities.

FIVE LIVES LOST.

Little Red River, Swollen by Rains, Carries Boatmen to Their Death. Carries Boatmen to Their Death.
Five men lost their lives in the raging current of the Little Red river near Searcy, Ark. The river is very high as a result of the recent heavy rains, and the current is very swift. Allen Brown, Robinson Caruth, Joe Scott, Eandy Cooksey, and Allen Booth were employed at the Government rock quarry. They got in a small boat and attempted to creas the river to go to their dinner. When they reached the middle of the river the raging torrent overcome their strength and their boat was thrown violently against a rock, weeking it. The men were thrown into the river and soon carried down with the current. Their bodies have not been recovered. THE GERMAN SITUATION.

The Reichstag is Dissolved and Caprivi Has Resigned. Great Political Excitement Follows the Army Bill

Has Resigned. Great Political Excitement Follows the Army Bill

Defeat.

The army bill was rejected in the Reich stag at Berlin by a vote of 210 to 162 and immediately after the rescript signed by the Kaiser, was promulgated, dissolving the Reichstag. The Social-Democratic members of the Reichstag displayed the wildest enthusiasm over the result. They hurraned rejeatedly, following cheer with cheer. Great confusion and uprear prevailed in the House, and the public excitement is at the highest pitch in Berlin.

Chancellor Caprivi left soon after the dissolution of the reichsiag for lotsdam to offer his resignation to the Kaiser, and the Kaiser summoned Count Botho von Eulenberg, the Prussian Premier, to Pottsdam. Count von Eulenberg took the place of Chancellor von Caprivi as Prussian Premier about a year ago when Chancellor Caprivi resigned that office, owing to the decision of the Kaiser to withdraw the Education bill from the Frussian Landfag.

In the mudst of all the confusion caused by the dissolution of the Reichstag and Caprivi's resignation, a passage from the Chancellor's speech of Friday, is attracting wide attention. Caprivi said: "Germany must get used to it, she cannot have always a man like Bismarck at the head of affairs, a man such as is born only once in centuries and whise diplomatic art nobody will attempt to deny."

All the papers contain long leading articles, in which they describe the situation as critical and say that the electoral contest will be extremely, severe and will lead to great changes and party relations.

BAD WEATHER FOR TRADE.

There is a General Complaint About Slow Collections.

Collections.

R. G. Dun & Co.'s "Weekly Review of Trade" says: Had business in Wall street been unsound or unhealthy the collapse of prices during the past week might have caused a panic. Several fatures occurred but without disturbance and the appointment of receivers of the Cordinac Company was in some sense a relief. Outside of the industrials the speculative markets are tather stronger than a week aga, and the business of the country, though by no means equal to expectations, is not as yet greatly disturbed by the condition of the money markets. money markets.

greatly disturbed by the condition of the money markets.

At nearly all points the backward scason and bad weather, with slow collections, give cause for complaint.

At Pittsburg iron trade is still more depressed, but business in glass is fairly good. Chicago reports shrinkage in trade, collections slow, money comparatively tight, a decrease of 15 per cent in eastward shipments, but increase in real estate and building. Receipts of dressed beef gain, compared with last year, 29 per cent, of shiep 00, of barley 119 and of wheat 250 per cent.

The iron trade shows no improvement. There is pressure to sell from the West, Southern No. 2 is sold at \$8.50. Birmingham and Bessemer has fathen to \$13.40, at Pitts burg bar is cut again, and structural iron is slow.

The business failures occurring during the last seven days, number for the United States.

last seven days, number for the United States 216, for Canada 27, or a total of 243, as compared with totals of 258 last week and compared with totals of 238 hast week and 208 the week previous to the last. For the corresponding week of last year the figures were 209, representing 186 failures for Unit-ed States and 23 in Canada. THE BUSINESS BAROMETER. Bank clearings totals for the week ending May 4, as telegraphed to *Bioadstreets*, are as follows:

150, an increase of 7.3 per cent. The totals exclusive of New York City amount to \$551,484,884, and shows an increase of 4.5 per cent.

IMPORTANT TO BOROUGHS. The Court Says a Burgess is Not a Coun-

cilman. At Pittsburg Judge Stowe handed down a

decision in the case of A. M. Carline, Joseph Price and R. M. Hol'and, of Braddock, against H. C. Shallenberger and L.F. Holtzman. The plaintiffs are members of the berough councils of Braddock, Pa. H. C. Shallenberger is the burgess of Braddock.

Shallenberger is the burgess of Braddock.

Judge Stowe states that it is cear under a decision of the supreme court that Shallenberger has no right to act as a member of the council. He has no right to preside, vote or participate in proceedings in any manner A burgess, he says, is only a member of councils when it is so provided in the charter or decree of court. The injunction restraining Shallenberger from acting as a councilman is therefore continued until further order of court.

As to Holtzman, who was elected to councils to fill a vacancy by the deciding vote of Shallenberger, it is stated that he is an active member of councils and has at least a color of title. He and a prima lacin title to the office and a proceeding to test his right should be by quo warranto not injunction. The injunction as to him was dissolved.

Asson Daywas appropriately celebrated by the employes of the Agricultural Depart-ment at Washington. A majority of them as-sembled in a retired part of the grounds, where, after a section had been made by As-satant Secretary Willets, a white oak tree vices planted in honor of the Secretary of Agriculture. Secretary Morton made a speech.

HE STRUCK BILLY PATTERSON.

And, Owing to Billy's Size, He Did Not Say

Anything About His Deed. Who struck Billy Patterson? About fifty years ago this was a question asked very frequently to illustrate the unexpected defeat of a candidate or a doubtful or unknown matter. But who struck the blow was never found out. An exchange professes to have found out, and says it was George W. Tillerton of Georgia. This is the story:

Last evening we published an exhaustive review of a famous casethat of William Patterson of Georgia, the same Billy that was "struck." This week we publish what is believed to be an authentic answer to the well-known conundrum. Mrs. Jennie G. Conely of Athol, N. Y., says that her father, George W. Tillerton, who lived at Franklin, Ga., at that time, and who has long since died, struck that historic blow. As related in "Notes for the Curious, last week, Patterson was a Baltimore merchant, who had retired to his estate near Carnsville, Ga., where be became entangled in the famous broil and received the blow which caused him to repeat the question, "Who struck Billy Patterson?" Being a powerful man, with a fist like a sledge-hammer, Patterson searched long and patiently for the man with audacity enough to strike him, but his search availed nothing. Tillerton kept the secret from his own family until the old man became so persistent in his efforts to discover the perpetrator of the deed, even going so far as to leave the country when he feared the \$1,000 reward would cause tome one to reveal his identity to the enraged Filly. After the death of Patterson, Tillerton retused to mention the affair, which was the best course to pursue, as his friends would doubtless have twitted him with playing the "live sheep racket over the dead lion." It is only recently that Mrs. Conely has heard of the reward waiting a claimant in the Franklin County (Georgia) Court of Record. The writer has not been informed whether or not she will make an effort to secure the \$1,000 offered as a reward for her father's rashness. Future developments will add a third and last chapter to this interesting bit of history.

Was There an age a capper?

M. Berthelot, the well-known French technicist, in a recent communication to the Academie des Sciences, states his belief in the some-time existence of an age of copper in addition to the three recognized archælogical cons of stone, bronze (copper and tin) and iron. He bases his opinion chiefly upon an an alysis of a piece of copper which had been found by M. de Sarzec in the course of antiquarian investigations in Mesopotamia, or Al Jezira, as the Arabs designate the famous stretch of country between the Euphrates and the Tigris. The fragment thus chemically determined proves to have neither tin nor zinz entering into it, composition, there being simply traces of lead and arsenic. Water and the atmosphere had made ravages into the specimen, which was practically a suboxide or a compound of protoxide and metallic copper. As the ruins from which the piece of metal was taken are authoritively considered to be more ancient than these of Babylon, M. Berthelot does not he state to promulgate the theory that an age of copper preceded the bronze and iron periods, especenent parts of a portion of a metalhe scepter which, it is alleged, be-Egypt some 3,500 years before Christ showed no sign of the presence of tin. -London Iron.

Relic of Colonial Times

The old Pohick Episcopal Church in Fairfax County, Virginia, for the re-building of which George Washington drew plans in 1773, is still standing. The exterior presents the same appearance it did when Washington drove up to it regularly on Sundays to his famous coach. The interior suffered severely during the late war.

KNOWLEDGE

Brings comfort and improvement and tends to personal enjoyment when rightly used. The many, who live bet-ter than others and enjoy life more, with less expenditure, by more promptly adapting the world's best products to the needs of physical being, will attest the value to health of the pure liquid laxative principles embraced in the remedy, Syrup of Figs. Its excellence is due to its presenting

in the form most acceptable and pleasant to the taste, the refreshing and truly ant to the taste, the refreshing and truly beneficial properties of a perfect lax-ative; effectually cleansing the system, dispelling colds, headaches and fevers and permanently curing constipation. It has given satisfaction to millions and met with the approval of the medical profession, because it acts on the Kid-neys, Liver and Bowels without weak-ening them and it is perfectly free from

neys, Liver and Bowels without weak-ening them and it is perfectly free from every objectionable substance.

Syrup of Figs is for sale by all drug-gists in 50c and \$1 bottles, but it is man-ufactured by the Californic Fig Syrup Co. only, whose name is printed on every package, also the name, Syrsp of Figs, and being well informed, you will not accept any substitute if offered.

Pemining Pres to Parti.

One humerous incident connected with the lire is told by a member of Engine 25. He was with a few memters of that company attempting to save a screaming young lady who was hanging from the third story of the Ames building. At the risk of their own lives they finally placed her safely on the ground. Instead of running as fast as she could for her life she carefully took hold of her skirts and lifted them so as not to wet them, and sowly picked her way among the debris, and on the opposite sidewalk, where she disappered -Boston Evening Record.
