Washington News. The treasury department has served the

required six months' notice on the United States express companies of its intention of terminating the contract now in force for the transportation of public moneys. Proposals have been invited for new bids for doing the work.

B. T. Rhodes, a well known detective of the city police force, has been detailed as a bodyguard for the President ever since the tragic death of Carter Harrison. Mr. Rhodes goes out every cabinet day to escore his charge to the city. The detective wears plain citizen's clothing and there is nothing in his appearance to indicate the nature of

John W Hogg, chief clerk of the navy department, dropped dead at his home Rockville, Maryland.

Financial and Commercial.

F. B. Thurber, of the great wholesale grocery house, and the Thurber-Wyland company, New York, have made a personal assignment to Brudinot Keith.

The coal and Iron bank of Middlesboro, Ky., has closed its doors. It has lost through depreciation of land values \$250,000. Fires
The large brick warehouse of George M.

Steinman & Co., bardware dealers of Lancaster, Pa., was burned by firebugs. Loss \$10,000.

Disasters, Accidents and Fatalities Three men werk killed and six injured by a boiler explosion at Hooks Switch, near

Galveston, Tex.

Miscellaneous. In New York, Mrs. Anna E. Swinerton,of Chicago obtained a verdict of \$10,000 against Geogre Le Boutillier. While in his store a cashboy snapped a pin, hitting her in the eye and destroying the sight.

In the Nebraska election Harrison (Rep.) has a plurality of 7,450 for Secretary of State. The Populists gained slightly in almost every county.

Joseph Osterhout, a retired farmer, near Monticello, N. Y., dropped dead in a Methodist revival meeting while engaged in

At Greenville, S. C., the grand jury has so far thrown out every indictment under the new dispensary law, although some of the cases were very strongly supported by evidence.

BEYOND OUR BORDERS.

Three thousand miners in the Lehigh district of Lancaster, England, resumed work at the wages paid before the strike:

A powder mill at Muiden, Holland, was blown up. Two bodies have already been recovered and seven persons are still miss-

The striking English miners and mine owners will have a conference with Lord Rosebery at the foreign office Friday.

At a cabin-t council held in Paris it was decided to prosecute the anarchist paper Le Pere Peinard" for extolling the Barcelona dynamite bomb outrage.

Advices from Cuba reach New York of two uprisings of twenty men in each of two small towns. Government troops dispersed one uprising after killing five men. The other uprising killed a dealer in firearms who wouldn't surrender his store, and then stole thirty horses.

The condition of the Service Minister at Paris, who was stabbed by an anarchist, is growing worse.

Russia is negotiating with Greece for a naval station for the Czar's Mediterranean

NEGROESLYNCH A NEGRO. The Victim Had Murdered One of His

Own Race. A negro named D. T. Nelson was lynched at Varner, Ark., Wednesday night by a mob of negroes. Last week Nelson murdered Benjamin Betts, a negro, and since then he has been confined in the small jail. The friends of the murdered man gathered at the jail and, breaking down the doors, drag ged him to a tree, where he was quickly swung up. As soon as his body was fast-ened to the tree the mob fired a volley of bullets into the slowly revolving figure. They then placed a lot of wood under the body and set fire to it. The flames quickly reached the suspended figure and his clothing ignited and his flesh began to burn The rain which was pouring down quenched the flames and saved the body from in-

cineration

Mormons Going to Mexico. According to an official of the state of Chilomhua, Mex., sormon leaders from the United States have made arrangements for the purchase of 3,00,000 acres of land in the state. A contract for the purchase as already been entered into between representatives of the Mormons and the owners of the land, it is said, which has been daily approved by the hands of the church. The Mormon colonists are regarded favorably in Mexico.

Treasury Balances Down Again The last treasury statement issued at Washington, showed a loss of \$1,389 092 in the currency balance, and as the gold reserve gained but little the total svallable balance is again below the \$10°, '000,000' mark standing at \$08,876,170. The receipts of the government for the month have been \$12,-164,000 and the expenditures \$15,954,000.

THE SPANISH REDS.

Two More Bold Attempts of the Dynamiters.

The activity of the police of Barcelona spain, in hunting down all anarchists has emboldened instead of frightened the errorists. Thursday night a terrific explosion shook the town of Villanueva, on the Mediterranean 25 miles south of Barcelons An unknown person, who, the police claim is an anarchist, since put under errest, under lover of darkness placed a dynamice bomb, with a lighted fuse attached, under the zates of the barrack of the civic guard.

rates of the barrack of the civic guard.

The force of the explosion was terrific. The gates of the barracks were blown off and the debris hurled a great distance. The walls of the barracks were cracked and broken in many places, while the doors and windows were blown in.

The barracks was filled with soldiers, who were knocked down or thrown sgainst the walls by the shock. The soldiers rushed ant of the wrecked building, which they feared would collapse at any moment. The police and military at once began a search of the town for the perpetrators. Several arrests of well known snarchiers against whom there is some evidence of guilt were made.

made.
Although the city is filled with detectives and spies, who are endeavoring to locate the conspirators who planned the recent dynamite outrage, a dynamite bomb was placed upon the lower balcony of a house on a crowded street and lighted before it was discovered. At the time a number of troops were marching through the Plaza Real to the quay to embark for Melian to reinforce the Spanish garrison there. The plaza was jammed with enthusiastic ditizens, who were cheering the soldiers and The plaza was jammed with enthusiastic citizens, who were cheering the soldlers and wishing them Godspe d. A number of men it work upon one of the buildings discovered smoke rising from the lower balcony and bastening thither to extinguish the supposition free found a huge bomb with the Tuse utached hissing and burning. One of the sorkmen quickly grabbed up the bomb and are the fuse away. The bomb was turned iver to the poice.

iver to the poice.

An examination disclosed the fact that it was filled with dynamite. Search of the source revealed nothing sus iclous, and it is oresumed some anarchist threw the bomb is the balcony and made off. Had it ex-sloded many people in the crowded street below would undoubtedly have been killed.

EUSINESS GAINING SLOWLY.

The Improvement in Trade Progressing Steedily, But at a Snail's Pace. R. G. Dun & Co.'s Weekly Review of Irade, New York, says:

"Business is garning, but it is a constant complaint that the improvement is slow This is because very few realize how heavy a load business has to drag after it in climbing up again. Legislative uncertainties weight heavily, but other loads many overlook. The past depression with trading and manufacturing failures, involving more than \$25,000 000 in nime months, besides banking failures of enormous liabilities, failures of railway and other concerns involve continual embarrassments which men are prone to torget. There has been great encouragement during the past week in the fact that November payments are far more satisfactory than was especied and yet the extensions of the month would have seemed alarming in other years. The Treasury receipts for that month thus far are about \$5,000 000 less than expenses and the imports in October decreased about \$2,000,000, partly because of inflated valuation of goods imported list year. Weekly imports at New York decreased in part from the same cause.

But while the imports in October were only \$51,641,782 and expents of products \$84,085 813, yet the enormous balance on merchandise assemint brought nei imports of only \$1,641,782 and expents of products \$84,085 813, yet the enormous balance on merchandise assemint brought in imports of only \$1,641,782 and expents of products \$84,085 813, yet the enormous balance on merchandise assemint brought nei imports of only \$1,641,782 and expents of products that large increase in the quantity of products sold but at lower prices, while in place of merchandise imported it is evident that there have been large imports of securities from atroad. It has not been much of a week of for speculation and that perhaps is encouraging. Stocks have slightly declined in produce markets weekness was the rule and yet the yielding was small.

The condition of industries im, roves but they wisely wait the revival of purchases by consumers. Twenties im proves but they wisely wait the revival of purchases by consumers. Twenties imports of securities from working power is active and out of \$9 woolen works at the East only 10 are working power is active and out of \$9 woolen works at the East only 10 are working fowe climbing up again. Legistative uncertainties weight heavily, but other loads many

K. OF L. IN CONVENTION.

Secretary-Treasurer Hays Makes Start-

ling Accusations.
The sensation of the annual convention of the Knights of Labor now in session at Philadelphia is the charges brought by secretary and tressurer Hayer against a number of the leaders that organization.

number of the leaders that organization.

The first charge in Mr. Hayes' supplementary report was that the controlling members of the Executive Board, Mesars. Fowderly A. W. Wright and John Devlin. established and printed and circulated and solicited advertisements for a publication known as the "Labor Day Armas!" printed for the personal enrichment of these three members and upon the presses of the Times Printing Company.

Mr. Hayes' report asserted that the "Annual" which was not authorized by the Knights, was intended to produce a yearly and perpetual dividend to the three schemers in control of the Executive Committee. Every other mage of this publication contains an advertisement, and not one, according to Mr. Hayes' report had been accred ted on the cash accounts of the Knights Moreover, the supplementary report showed that these pages had been paid for from 15) to \$400 a page. The sum of the "Lishor Day Annual" steal according to this report was \$16 G30.

There is great measures among the delectors.

Day Annual steal according to this report wa-\$16 G30.

There is great uneasiness among the delegates. The future of the order depends in a great measure on this convention. A leading delegate said that this convention would either make or break it. The annual report of the General Executive Board was made public. It recalls the Homestead strike by a declaration of the Innocence of High Dempsey, master workman of District Assembly No. 3, of Pittsbug, "who was convicted of poisoning on the evidence of professed minormers." P. J. Maguire and General Master Workman Powderly, long time enemies in the order buried the hatchet and will work together.

LAST OF THE HENNESSEYS.

Her Husband, Son and Nephaw Were

Mrs. Bridget Hennessey, mother of the murdered chief of police of New Orleans, is lying. It will be remembered that the assaisin tion of Hennessey by Italians resuited in the lynching of 13 Italians resulted in the lynching of 13 Italians in that city and shuost caused war between Italy and the United Stater. Mike Hennessey, a nephew of the dying woman, with the murdered chief killed Chief of Detectives Devereaux here in 1882 Mike was subsequently as-assinated in Houston Mrs. Hennessey's husband was killed in a deperate street duel many years ago. Mrs. tiennessey is the last of the family.

Uncle Sam Hard Up.

At the treasury when the doors were closed Saturday the margin of currency left for business was very smail. There were only \$13,000,000, including that distributed by the aub-treasuries. Treasurer Morgan sent telegraphic instructions to the principal sub-treasuries to pay out gold, if necessary, to meet all checks. The treasury gold balance is about \$45,000,000.

THE GEM OF THE OCEAN.

SHE BEATS THE WORLD.

The Latest Addition to the United States Navy Freaks all Records' On An Unofficial Trial Trip Under Forced Draught.

The new commerce destroyer Columbis was sent on a preliminary trial spin over the government course from Cape Ann, Mass., to Cape Porpoise, Me., Wednesday with gratifying results. Under forced draught she developed a speed of 22.87 knots per hour, and under natural draught 20.2 knots This means that the official trial, which occurs next week when the vessel will be pushed for every

which occurs next week when the vessel will be pushed for every ounce af energy and every particle of speed that there is in her, she will easily make 22 knots and earn a premium for her builders. William tram: & Sons of Philadelphia, of close upon \$400,000. Her rontract specifications call for 21 knots, and the builders are entitled to a tremium of \$50,000 for every quarter knot in et cess.

The length of the course is 43.97 knots and it was covered in 4 hours and 18 minutes, which includes 21 minutes expended in making the turn at the eastern end of the road. This is the fastest time ever made by an American ship of war and when the exhaustiveness of the test and length of the course is considered it is unsurpassed in the history of the navies of the world.

Seven-eights of the trip was made under natural draught. The time of the trip up the course was a little over two hours. 202 knots an hour being the average. A very wide turn was made and at 1,45 p. m. the line was crossed on the record breaking journey. In the meantime Cramp's chief engineer, John Patterson, had completed all preparations for forced draught, the condition which develops every atom of exertion that can be got out of the boilers and machinery. The picked force of machinists, engineers firemen and coal passers, who had carefully prepared themselves for the four hours ordeal they were to undergo, were shut out from all communication from the upper portion of the ship. Every opening through which air might pass, except the blowers, were carefully closed and under no circumstances, niless it be the illness of a man, would Engineer Patterson consent to the opening of even the smallest hatchway.

The three immense engines, which turned the shafts connected with the three screen.

atchway. The three immense engines, which turned The three immense engines, which turned the shafts connected with the three screws, were working at a speed of 134 revolutions a minute. Soon after the starting line was crossed this speed was increased to 135 revolutions and later on the maximum velocity of 136 was reached. Steadby the Commbin ploughed her way through the water, her speed being almost equal to that of the a erage railroad train.

There came a display of excitement when the seventh buoy was passed and the cruiser

There came a display of excitement when the seventh thuoy was passed and the cruiser was making her last desperate effort. Everybody on deck stood timepiece in hand aggerly awaiting the whistic which was to announce that the goal line had been crossed. The moment the sound was heard there was a general scene of rejoicing among the men who had participated in the greatest streed effort ever shown by a warshing.

men who had participated in the greatest speed effort ever shown by a warship. The feature of this remarkable run was the steadiness of the ship. Old naval men on board say they never saw a vessel behave better. The sea was not more than ordinarily disturbed by the swift passage of the huge cruiser and there was an entire absence of either rolling or pitching. This, according to the experts, is due to the fineness of the lines on which the ship was constructed.

structed.

The three engines developed about 21,000 horse power, which is 1,000 less than their estimated capacity. The engineers claim that the engines are capable of 188 re-olutions a minute, which velocity would produce a speed of not less than 23 knots an hour, making the Columbia absolutely factor than anything alloat. faster than anything affoat.

EGERIBLE QUADRUPLE MURDER talian Shoots His Wife and Her Cousins

One o' he mos to rbt tragedies ever known in the B ack Hills occurred on Saw Pit gulch, two miles west of Deadwood S D Joseph T a an talian, was marries ab ut vest a to to a cousin of Josco Tamet.a... month after his wife left him and ha made her home at her cousin's. Tha, after her repeated refusals to return and his failure to have refunded to him the money he sent her to come from Italy, made several efforts to blow up Tametta's house.

At moon he went to Tametta's house con-siderably under the influence of liquor, and shortly afterward shots were heard by neighbors. Nothing was thought of it, how ever until several hours later, when a ped-dier rapped on the door and getting no re-ity entered. ply entered. Lying around the room amid a horrible confus-ton of broken and scatter ed furniture lay Mrs. Tha. shot through the mouth: Tametta, with a bullet in his breast and Mrs. Tametta with a frightfur gash in her forehead, inflicted with an ax all still in death. In the wood shed Tha lay gassing for breath with a bull et through helical. In the midst of all this bloody horror Mrs. Tamettas I wo lithle children, 11 and 3 years old, were playing. entered. Lying around the room amid years old, were playing.

EMIN'S MURDER AVENGED. The Belgians Capture and Put to Death

the Pasha's Slaver. Dispatches from the Congo Free S ate have brought the details of Capt Dhannish's victories over the Arabs at Nyangwes Kanson some months ago. The Arabs had entrenched themselves along the Congo and outnumbered the Belgians 20 to 1. Nevertheless, af er a bloody fight the Belgians carried the Arab possessions. Many Arabs

were killed and wounded and 8,000 were

taken prisoners.

Among the rrisoners were 26 Arab chiefs one of them Bibenhon, who killed Emin Pasha in October, 1892. The murderer was constimatiated and shot. The story of Emin Pasha's murder, as reported last September, is confirmed again. The only sur-twors of the massacre were the Zanatharite, Asima, Emin's mistress and their child, Monsonna. The Arabs spared the boy in the expectation that if endowed with his father's brains and energy, he might be trained to be a great chief. All of Emin's latest papers were received and were delivered to King Leopold. taken prisoners.

Selecting A Bishop.
The bishops of the Archaiocese of Cin-

cinnati, O., ten in amber, with Bishop Elder presiding, have been in conference upon the needs of the Catholic church in the territory under their charge. A special feature of their wor; was the nomi ation of three candidates from whom Rome will select a bishop to fill the vacancy at Nashville. These names are not made public, but there are reasons to believe that Father Brassart of Covington will be one of the

A Shocking Suicide. Senor Dan Carlos Diaz, Spanish connan at Baltimere, Md., committed suicide i jumping from the third-story window . his home. His body was perfectly much and passers y saw him citinging to the casment before the fatal leap, but were power-less to prevent it. He died at the Marylan-General bospital within haif an hour afe

Color Photography.

The art of photographing colors seems to be progressing in a very encouraging manner. The color photographs of M. Lippmann, which excited so much interest a year or so ago, have recently been surpassed by the achievements of M. Louis Lumiere. M. Lumiere, whose name in English means "light," has succeeded in preparing gelatinobromide plates which give, with an exposure of half an hour, a photographic reproduc-tion of the natural colors of objects

An exhibition of his work was made before the committe of the Photo Club of Paris at their June meeting. M. Lippmann being present as the presiding officer. Photographs were shown exhibiting in their natural hues boxes, colored cloths, fans, Japanese screens, flowers and land

The landscape photographs aroused the greatest interest. The delicacy of tint: which they exhibited was quite astonishing. All the shades and gradations of color in the grass and trees, the sky, the fields, and the houses were reproduced with extraor-dinary faithfulness and clearness.

The gain in time of exposure achieved by M. Lumiere is in itself n great advance. Former toethods of photographing colo s have required exposures of not less than an hour and a half or two hours; but it is hoped that the thirty minutes required by M. Lumfere's process will soon be greatly shortened.

The French are particularly intere-ted in the progress which color photography is making in their coun-They call it the completion of the invention of Daguerre, and are eager to see it brought to perfection by their compatriots. It does not matter, however, whether it is a Frenchman, a German, an English-man of an American who shall first make color photography the common property of mankind; in any event he will win the gratitude of all nations.

Health of Workmen at High Sum-

Some noteable facts are furnished by the experience of the workmen engaged in constructing the new Central Railway over the mountains in Peru. The line starts at Lima, in altitude twelve degrees, and the summit tunnel of this line at Galeria is at the height of 15,645 feet. It appears that the workmen, up to the height of 800 to 10,000 feet, do about the same relative quantity of work as at the sea level, provided they have been inured to the height or brought up in the country; at 12,000 feet the amount of work deteriorates. and at 14,000 to 16,000 feet a full third had to be deducted from the amount that the same men could perform at sea level. Owing to the abfficient labor at the greatest elevation fias been a very high one. Men coming from the coast were not found capable of doing efficient work for about two weeks on an average when taken to high elevations, the capacity gradually increasing and reachng its maximum in a few weeks or months, according to the constitution of the individual. The majority of the laborers being Cholos, or Indians born in the Sierra, were found in-capable of doing effe tive work on the coasts or in the warmer altitudes w.thout a long course of acclimatization. Sudden changes, too, from the Sierra to altitudes of from 2,000 to 5,000 feet have resulted in sickness and fever

Reason for R. Jacing.

When Wesley and Nelson were traveling through Cornwall, from common to common, preaching to a people who heard willingly, but sel dom or never profered them the slightest act of hospitality, they were frequently hungry

They were detained some time at St. Ives because of the illness of one of their companions and their lodging was little better than their fare

"All that time," says Mr. Nelson, "Mr. Wesley and I lay on the floor: he had my great-coat for his pillow, and I had Burkitt's Notes on the New Testament for mine.

"After being here near three weeks. one morning, about three o'clock. Mr. Wesley turned over, and finding me awake, clapped me on the side, ing, Brother Nelson, let us be of good cheer! We have much to reoice in. I have one whole side yet, for the skin is only off on one side."

Where He Made His Money.

Mr. Coleman of Norwich, before he was made a knight, was one day in a Paris hotel, when an inquisitive-damsel asked: "Are you the Mr. Coleman who has made so much money out of the mustard we take off the sides of our plat s?" "No." was the answer; "I am the Mr. Coleman who makes money out of the mustard you leave on the sides of your plates."
