Thin Children Grow Fat
on Scott's Emulsion, because fat foods make fat children. They are thin, and remain thin just in proportion to their inability to assimilate food rich in fat.

Scott's Emulsion
of Cod Liver Oil is especially adaptable to those of weak digestion—it is partly digested already. Astonishing how quickly a thin person gains solid flesh by its use!

Almost as palatable as milk.

A WEST VIRGINIA BATTLE.

A Savage Tale of Blood From the Mountain Fastnesses.

Thomas and Frank Mullins, who were implicated in the murder for which "Doc" Taylor paid the death penalty in Virginia six months ago, have been hiding near Bluefield, W. Va., county several weeks. A reward of \$2,000 was offered for their capture and Sheriff Johnson and Deputy Timothy Hall went on Wednesday to capture them.

Both sides opened fire with Winchester. Sheriff Johnson was shot through the head at the first volley and Hall was knocked senseless. Neither of the Mullins was hurt. They left Hall for dead and sat down in front of their cabin. Hall regained consciousness and without moving put a ball through Frank Mullin's heart.

The same instant Thomas Mullins shot away nearly all of Hall's lower jaw, but not before Hall's second aim had been taken, which sent a bullet through Thomas's head. Hall cannot recover and was barely able to relate the story of the fight.

Coughed Up a Lizard.

A nine year old girl residing in the town of St. Johnsville, N. Y., died in a peculiar manner. She had been ill for some time, the exact cause being unknown. The other day she began coughing and coughed up an animal about five inches long, resembling a lizard, and with a thick membrane running in the child's throat and it required a great effort to pull out the animal. The child died from exhaustion. The animal had a clearly formed head, eyes, tongue and body. It is believed to have been all a until it was killed in removing it from the child's throat.

A Well Trained Cat.

"I once had some cats which really could be taught to do anything. They were white Iceland maltese, and their eyes were as blue as the skies in June. Unlike others of their species, they dearly loved to play in water, and they would spend hours fishing chips out of a pan of water. One of them, Jabez, was a regular John Sullivan of a cat. He would fight anything and everything. The only safe way to take him out was in a bag. I had one made with perforations which I carried on my arm and in which I saw something which I fancied he might possibly think he could fight, when, as a measure of safety, I would bob his head down and tighten the drawing string. He knew his bag as well as I did, and when he wanted to go out he would go and take it down, bring it to me and sit down and look wistfully first at the bag and then at me.

Another trick of this intelligent creature was, when we were in the park, where he dearly loved to go, to run to a flower bed, bit of a blossom and bring it to me. As these Iceland cats are the most desirable of household pets, it is a pity that it is almost impossible to keep them any length of time in this climate. Like trout, they require a low temperature. Anything above sixty-five degrees is unfavorable to them.—Pittsburgh Dispatch.

Cooking and Throat Diseases.

Specialists on throat diseases are beginning to take unusual interest in culinary methods. They advise a kitchen quarantine on wash days and boiled dinner days, giving as a reason that the steam from boiling clothes and pickled meats that require much heat produces many illnesses of the respiratory organs and aggravates slight or chronic diseases of the nose, throat and lungs. Patients are advised to vacate apartments having dark or ill-ventilated kitchens and to keep all babies and ailing children out of the kitchen when cooking is going on.—Pittsburgh Dispatch.

Colorado's Contribution.

Colorado has 3,000,000 acres under artificial irrigation. The farm products exceed \$12,000,000 a year; there are 1,500,000 cattle, 2,000,000 sheep; the coal field cover 40,000 square miles; the supplies of marble, granite and other building stone are inexhaustible.

Is It Poison?

Paris has an insurance company that refuses to insure the life of any one who uses hair dye.

Electric.

There ought to be an electric machine to jog the memory; we forget too much and learn too little. We know what's best but forget it at the wrong time. Brain action should be like a flash. There are thousands now suffering intensely with neuritis. Let them remember the cure, St. Jacobs Oil. Its effects are electrical.

Rich in Remains.

There have been more remains of mastodons and other extinct mammoths found in Ichteeknee River, Florida, than in any other stream in the world.

"Sweet Sixteen."

Hood's calendar, always a welcome guest, has made its appearance for 1894, and is more beautiful than ever. The best is made a lovely girl just "sweet sixteen," in delicate and natural colors. Besides being a thing of beauty, it is especially valuable for the general information presented.

The figures are plainly printed in pleasing and harmonious colors, and the effect is most satisfactory. The calendars can be obtained of any druggist, or by sending six cents in stamps for one and ten cents for two to C. I. Hood & Co., Lowell, Mass. Over eight millions of them were printed to supply the immense demand.

These calendars are issued by the proprietors of Hood's Sarsaparilla, the well-known medicine which has gained such renown by its wonderful cures in cases where the blood was poisoned or impure. The great laboratory in which it is made has a capacity for fifty thousand bottles a day, and is the largest building in the world devoted to the manufacture of a medicine. The sales of Hood's Sarsaparilla in all sections of the country are enormous. The proprietors have never claimed that it would cure every ailment, but they show by thousands of testimonials that Hood's Sarsaparilla purifies and vitalizes the blood, builds up the system and cures those diseases caused by impure blood and debility, such as scrofula, salt rheum, catarrh, rheumatism, etc. It is a great preventive of the grip, and it restores the wasted vital forces after a siege of that dreaded malady, fortifying the system against future attacks.

The fact that great care is exercised in the preparation of this medicine, and that nothing has ever been claimed for it except as warranted by previous cures, has much to do with the confidence felt by the public in its curative powers. The motto of the proprietors is, "It is not what we say, but what Hood's Sarsaparilla does, and that nothing has done, as shown by the published statements of persons whom it has cured, that has placed it at the head in the field of medicine in the present day.

CURES OTHERS

A TERRIBLE CASE OF DROPSY CURED.

J. M. MALLON, Esq., No. 211 E. Main St., St. Adams, Cincinnati, O., writes: "I took sick with dropsy, lost my appetite, could not sleep, became feverish; always thirsty, lost all strength, stomach became painful, breath short and had to give up work. Several physicians in Cincinnati failed to help me. My limbs and body were swollen to enormous size, and I was suffering terrible agony. The doctors all said I could not get well again, that I was liable to drop dead at any moment. My wife sent for your 'Golden Medical Discovery,' and thought I would try it as a last hope. When I had taken three bottles, I was almost well. The swelling entirely disappeared, and I was soon able to resume work. I think it better now than it has been twenty-five years."

The Origin of Earrings.

It is a strange tradition among the Arabians that earrings came into use in the following way: When Pharaoh summoned Abraham and reproached him for his untruth (in saying that Sarah was his sister), Abraham prayed for the King, and Allah healed the King, who now gave Abraham many rich presents, and among others an Egyptian slave named Hagar. She bore him a son, whom he called Ishmael. But Sarah was barren, and the more jealous since the light of Mohammed shone on Ishmael's forehead, she demanded Abraham to put away Hagar and her son. He was undecided until commanded by Allah to obey Sarah in all things. Yet he entreated her not to cast off her bondmaid and her son. But this so exasperated her that she declared she would not rest until her hands had been imbrued in Hagar's blood. Then Abraham pierced Hagar's ear quickly and drew a ring through it, so that Sarah was able to dip her hands in the blood of Hagar without bringing the latter into danger. From that time it became the custom among women to wear earrings.

Millions of Dollars

Are annually lost because poor seed is planted. Now, when you sow you want to reap. For instance, A. M. Lamb, Penn., made \$2000 on ten acres of vegetables; R. Rey, Cal., 47,000 lbs. bushels Salzer's onions per acre; Frank J. Rose, Minn., 100 bushels of spring wheat from two acres; A. Hahn, Wis., 140 bushels of oats per acre; Frank Winter, Montana, 210 bushels of pounds out from one bushel planted. This is what Salzer calls reaping.

If you will get this out and send it with the John A. Salzer Seed Co., La. Crosse, Wis., you will receive their mammoth catalogue and ten sample packages of farm seeds. Catalogue alone, 10c postage.

Cataract Cannot Be Cured

With local applications, as they cannot reach the seat of the disease. Cataract is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Cataract Cure is taken internally, and acts directly on the blood and mucous surface. Hall's Cataract Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surface. The perfect combination of the two ingredients is what produces such wonderful results in curing cataract. Send for testimonials free.
