

THE AMENDED TARIFF BILL

REPORTED TO THE SENATE.

Some of the Changes Which Have Been Made Since the Last Publication.

The tariff bill as further amended by the Democratic members of the finance committee was laid before the full committee Tuesday morning and given to the press. Later in the day the bill was reported to the senate. A number of important changes have been made, and all figures here given are compared with the bill recently made public by the finance committee and sent out in full by the United Press. Some of the changes are as follows:

Cast polished plate glass finished or unfinished, and unsilvered, not exceeding 24 by 36 inches square, increased from 18 to 20 cents per square foot; all above that increased from 30 to 25 cents per square foot.

All sheets of iron or steel common or black, excepting as hereinafter provided for, thinner than No. 24, wire gauge and all iron or steel commercially known as common or black tappers iron or steel or which have been pickled or cleaned by acid or by any other material or process or which is cold rolled, smoothed only, not polished, shall pay a duty of three fourths of one cent per pound—instead of nine cents as reported by the house bill and left by the senate committee. The provision of the house bill also stricken out by the previous senate bill that the reduction provided for on sheets of iron or steel thinner than No. 25 wire gauge shall take effect on and after October 1, 1894, has been re-incorporated.

Sheets or plates of iron or steel, or tappers iron or steel, coated with tin or lead or with a mixture of which these metals or either of them, is a component part by any process of any other process and commercially known as tin plates, terna plates and tappers tin, has been reduced from one and one fifth cents per pound to one cent per pound and the provision of the house bill that this reduction shall take effect October 1, 1894, which was stricken out, has been restored.

Cast iron pipe of every description, increased from 20 per cent to 24 per cent.

Cut nails and cut nails every additional steel, reduced from 25 per cent to 23 per cent.

Rivets of iron and steel, reduced from 53 per cent to 25 per cent.

Cross cut saws, mill pit and drag saws reduced from 25 to 15 per cent; circular saws, hand, back and all other saws remain at 25 per cent.

Aluminum in crude form, alloys of all kind in which aluminum is the component material of chief value, reduced from 25 per cent to 15 per cent.

The schedule for wool and manufactures of wool, silk and silk goods remains unchanged.

The sugar schedule in full is as follows:

All sugars, tank bottoms, syrups of cane juice or of beet juice, melada, concentrated melada, concrete and concentrated molasses, testing by the polariscope not above 80 degrees, shall pay a duty of one cent per pound and for every additional degree or fraction of a degree above 80, and not above 90 degrees, shown by the polariscope test, shall pay one hundredth of a cent per pound additional, and above 90 and not above 98 degrees, for every additional degree or fraction of a degree shown by the polariscope test, shall pay a duty of two one hundredths of a cent per pound additional and upon all sugar testing above 98 degrees by polariscope test, or above number 10 by the Dutch standard, in case of sugar levied and collected a duty of one eighth of one cent per pound in addition to the duty imposed upon sugars testing above the degree; molasses testing not above 56 degrees by the polariscope shall pay a duty of 2 cents per gallon; molasses testing above 56 degrees shall pay a duty of four cents per gallon.

The duty on collars and cuffs is increased from 45 per cent to 55 per cent ad valorem. The only addition to the free list are horn strips and tips and cocoanuts.

Section 103, which provides that the President shall notify the Hawaiian government of the intention of this government to abrogate the treaty of 1875 has been stricken out.

Whisky, iron ore, coal lead ore and opium are unchanged.

The most important change in the administrative feature of the bill is the action of the committee in striking out the words "highest duty" as found in the house bill, and regulating the duty on all goods coming in under similitude clause and substituting therefor the words "lowest duty."

This was the subject of a long argument in the committee in which Secretary Carlisle endorsed the provisions of the house bill.

The committee therefore has made the change and all goods unenumerated or coming in under the similitude clause will pay the highest instead of the lowest rate of duty.

Mr. Voorhees, chairman of the finance committee, reported the tariff bill to the senate soon after the reading of the journal and gave notice that he would call up the bill for consideration April 2.

A Bank Cashier Murdered.
Frederick Bonnemant entered the branch bank of the San Francisco, Cal., Savings Union and presented to William Herrick, the cashier, a note written in red ink, demanding money and threatening to blow up the building with nitro glycerine in the event of a refusal.

Mr. Herrick returned the note to Bonnemant without a word, when the latter drew a revolver and fired, killing him instantly. C. S. Melvin, a bookkeeper, then shot and slightly wounded the assassin, who fled slightly by a crowd loudly threatening to lynch him. After an exciting chase Bonnemant was captured and jailed.

EXECUTION WITHOUT TRIAL.
Decree That Gives Peixoto Power to Kill Whom he Pleases.
A dispatch from Rio de Janeiro says:—President Peixoto has revived the imperial decrees of 1838 and 1851, which authorize the execution without formal trial of all persons who have taken up arms against the government, or aided the cause of an insurrection. Foreigners are included. In view of the great number of State prisoners the possibility of wholesale executions are tremendous.

Of Interest to Publishers.
The postoffice department at Washington has issued an order that will create much comment and opposition among publishers. The order is that advertising sheets consisting entirely of advertisements or of a combination of literary or pictorial matter and advertisements, issued by business houses and furnished to publishers for the purpose of being circulated with second class publications, are not regarded by the department as permissible supplements or covers to such publications when mailed at the second class rate of postage.

Prendergast Resisted.
At Chicago Judge Chainan postponed the execution of Prendergast until Friday, April 6. It was on a new point issued by his attorneys that he has become insane since his trial. It was 10:30 p. m. Thursday when the judge decided he could take up the matter. The regular court venire was summoned and the judge's decision was in accordance with the finding of the jury.

When the judge announced his decision a demoniac grin took possession of Prendergast's countenance.

MILITARY POSITION OF CANADA

An English Authority Says American Occupation Would Be An Easy Matter.

Sir George Chesney, the well known military expert, read an interesting paper on the defense of the British Empire before the Junior Constitutional Club, in London, the other day. He is quoted by the New York Post as saying that the British colonies, as a rule, were safe against successful attack, with the exception of Canada, in case of war with the United States. He said that in Canada there is an enormous line of frontier faced by another great independent empire, and the serious question has to be considered now a defense could be maintained along the great line in the event of Great Britain being engaged in hostilities with the United States. He said that the Canadians would be able, as they were then, to give a very good account of themselves. It was impossible, however, to doubt if some great question or quarrel arose involving the interest of the people of the United States, and if the feelings of that people were so aroused that they should determine to carry out and quarrel to the bitter end, that the position could be anything but an extremely serious one.

The people of the United States were capable in times of great emergency of great things, and if there were a great number of people against 5,000,000 of Canadians—even supposing the Canadians were united as one man—it was a question whether the defense of Canada would be possible. Would it be possible for Great Britain to give such effective aid as would prevent the occupation of Canada by the people of the United States. He believed it would be an impossibility. Happily the attitude and the feelings of the people of the United States were essentially peaceful; they did not so far as he knew, desire to increase their military responsibilities or extend their empire. The present was not the time when it would be useful or in any way practicable for the British Government to take any actual measures for the defense of Canada. Unless England were at war with the United States, Canada was absolutely impregnable. If England should be at war with the United States, he believed it would be impossible to defend Canada, therefore, the colonial defense, he believed that, with the exception of Canada the empire was invulnerable.

LOUIS KOSSUTH DEAD.

His Last Hours Were of Horrifying Agony. Something About His Remarkable Career.

Louis Kossuth, the Hungarian patriot, died at Turin, his son, sister and other relatives were present when he died. He passed away holding the hand of the Hungarian Deputy Karoly. The agony of his last hours were extremely harrowing.

The body of Kossuth will be interred in Genoa near that of his daughter, Elmond. In the will which the actual author will deliver a funeral oration in the name of Italy. The obsequies will be attended by a great gathering of Hungarians.

Louis Kossuth was born at Monok, county of Temple, Hungary, April 21, 1802. His family were of Slavic descent, were Lutherans and noble. His father was a lawyer and gave his children a liberal education. Shortly after leaving college Louis Kossuth became noted for his popular ideas. In the Hungarian diet of 1832-36 he was the proxy of a magistrate or member of the Upper House. In 1837 he published a written Liberal newspaper, printed one and condemned to four years' imprisonment. A general outburst of indignation followed and the Liberals carried the elections of 1839-40.

In 1841, Landner, a publisher of Pesth, Hungary, gave him a license to publish a newspaper, placed Kossuth in charge of it, and the circulation advanced greatly. In 1844 he was removed from the editorship, having meanwhile vigorously advocated freedom for Hungary as a right. He formed a union, the members of which were pledged to use only domestic manufactures. In 1847 he was elected for Pesth to the Diet and on March 3 made a speech urging the restoration of Hungary's independence. The diet, however, was dissolved and Austria, backed by England and France, refused it, and on September 1, 1848, at the instance of the United States he was liberated and embarked on board the war steamer Mississippi for this country.

His reception here was a grand ovation. He returned to Europe in July, 1852. On several occasions he organized movements for Hungarian independence, all of which proved abortive. He was offered an election to the Hungarian diet and free pardon for all his past crimes, and lived most of the time in England and Italy, saying he would never return to Hungary till it was entirely free of all connection with Austria. He was a voluminous writer and published several books.

A DAY OF TRAGEDIES.

Three Brutal Murders and an Attempted Suicide at St. Louis.

At St. Louis, Minnie Schilling was shot and fatally wounded by Edward Courtenay, at the home of A. J. Boewig, with whom Miss Schilling has been living. Courtenay then turned the revolver upon himself and inflicted fatal injuries.

Two other murders were also committed the same day. Mat. Graham, an 18 year old boy was killed by William Holman. Holman picked a quarrel with Graham and threw a poker at him with all his might. The deadly missile crashed through the wall and struck there like a spear. Graham sank to the floor without uttering a word.

At the Alexian Hospital John Schrempf, foreman of Earle's livery stable, died from a blow from a baseball bat, inflicted by Pat Condon, to whom Schrempf refused to take a team. Condon and John Thomas Brady, accessory, are under arrest.

SNOW, FLOOD AND WIND.

The Elements Causing Havoc in Various Sections.

At Chadron, Neb., the heaviest snow storm since March, 1878, has occurred. A foot of snow fell and drifted badly. Cattle and sheep on the ranges suffered terribly.

At Little Rock the greatest flood in the history of South Central Arkansas is now on, and that part of the state is rapidly approaching the condition of an inland ocean. It has rained almost incessantly over the state and in the Indian Territory for four days.

At St. Johns, N. F., a terrible northeast gale visited the coast Monday night and caused immense damage in St. Johns, many new houses being blown down. Many villages were devastated.

Iowa No Longer Prohibitionist;
The Iowa senate passed the house liquor bill which has long been under consideration, thus destroying the Iowa policy of state wide prohibition. The law provides for taxation of saloon property and many conditions are required before the sale of liquor may be commenced. The House by a vote of 51 to 44 passed the bill granting municipal suffrage to women.

—EVANGELIST MOODY'S work in Washington so far has resulted in 4,000 conversions and the expenses have been \$200. The converts are assigned to such churches as they express a desire to join. More men than women were converted.

PERFUMES.

There is no perfume more generally agreeable than the clean, sweet odor oforris root. Violet sachet powder, if of a very fine quality, and so faint as to be the mere suggestion of a perfume, is generally pleasant. Rose, musk and other stronger scents give many an unpleasant sensation of faintness or even nausea, and are always open to the disagreeable suspicion of being used for counteracting purposes. After all, as Henry Ward Beecher said: "There is no smell so universally pleasing as no smell," and absolute daintiness of persons attract far more than any perfume can do.—St. Louis Post-Dispatch.

Three of Them.

A little Brooklyn girl astonished her mother the other day by her proficiency in philological pursuits. "Mamma," said she, "there are three kinds of 'by's,' aren't there?" "What do you mean, my dear?" responded the mother in surprise. "Well," sweetly lisped the little one, "there's one 'by' when you go by some one on the sidewalk, and there's another when you go to the store to buy something, and then there's 'by gosh!'" The mother was not long in reaching the conclusion that her daughter needed a little careful instruction in the minor morals.—New York Tribune.

The Word "Vagabond."

"Vagabond" was once only a traveler going from place to place on pleasure or business.

Dr. Kilmer's SWAMP-ROOT cure all Kidney and Bladder troubles. Pamphlet and Consultation free. LACROIX, Binghamton, N. Y.

England's first daily paper was "The Courant," March 11, 1702.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHESEY & Co., Toledo, O. We, the undersigned, have known F. J. Chesey for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligation made by the firm.

WEEK & TRUMAN, Wholesale Druggists, Toledo, Ohio.

WALLING, KINVAS & MARVIN, Wholesale Druggists, Toledo, Ohio.

Hall's Catarrh Cure is taken internally, acts directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c per bottle, sold by all Druggists.

Gas pipes are made of manilla paper, coated with asphalt.

112 Eas. N. E. Ave. Gate From One Bus. Seed. Tall, round, almost unbroken, yield was reported by J. A. A. Salar, Seed Co., La Crosse, Wis., by Frank Winter, of Montana, who planted a bushel of Great Northern Oats, carefully tilled and irrigated same, and believe that in 1893 he has grown from one bushel of Great Northern Oats three hundred bushels. It's a wonderful one. If you will, cut this out and send it with the postage to the above firm you will receive sample package of above oats and their mammoth farm seed catalogue.

FOR THROAT DISEASES, COUGHS, COLDS, etc., effectual relief is found in the use of "Brown's Bronchial Troches." Price 25 cents. Sold only in boxes.

Dutch country houses are decorated with eagles.

Shiloh's Cure is sold on a guarantee. It cures Incipient Consumption; it is the Best Cough Cure; see No. 21.

Japanese Tooth Powder, Genuine. A large box mailed for 50 cents. Lapp Drug Co., Philadelphia, Pa.

Your wife can buy several articles for \$1; you need \$2 worth of valuable articles in the first line; you mail the order to E. A. Hall, Binghamton, N. Y., and save \$1. Your wife is happy, your eye, and so will I. Free catalogue.

Every trade in China has its patron saint. Hatch's Universal Cough Syrup is a Positive cure for Croup, 25 cents a bottle.

A wonderful stomach corrector—Becher's Pills. Becher's—no others. 25 cents a box.

An Imported Farm.

"I once saw," said Bertram Reynolds, of Boston, "an imported farm, the soil as well as the products being absolutely foreign to the surroundings. This was in one of the coldest parts of Manitoba, where I was entertained by a family which had retained its love for milder regions and crops. The soil of the farm was necessarily meager, but some of the vegetables were so bright and green that I could not help asking how they were preserved so well. To my surprise I learned that they were cultivated in a garden patch or a miniature farm, the soil of which had been brought from milder regions so as to insure a fertility not found in the region of ice. The vegetables themselves had been grown from imported seed, and owing to the care and protection they had had they were a perfect luxury. The expense of conveying the soil in barrels such a long distance would prevent any but comparatively wealthy people from trying the experiment, but my friends had made it a hobby. The only other case of earth-importing that I have met with is that done by the Shah of Persia. The traditions of his country prevent his treading on foreign soil, and when he makes a trip in foreign nations his attendants carry a supply of Persian soil, some of which is placed in his shoes, a practice which accounts for the great inconceivable walking always appears to his Majesty when abroad."—St. Louis Globe-Democrat.

Exhaustion of the British Fisheries.

Scientific investigation shows that the seas around the British coast are being exhausted of fish. The subject is receiving very grave consideration, and in all probability there will have to be very elaborate means established of restocking the English waters.

One Alternative.

When a boy is interested in what he is saying, it is hard for him to think how he says it.

"Now, Tommy," said the school-mistress, "you shouldn't say 'Why' done it; that isn't right."

"Well, then, Willy lied about it," said Tommy.—Chicago News.

A Suggestion to Agriculturists.

Bulgarian peasants have given up grain growing to a great extent and are raising roses. Attar of roses is now worth from \$10 to \$15 for eight teaspooftul. It seems that Bulgarian farmers could give points about changing their products to some agriculturists of the eastern part of the United States, who continue to produce small quantities of wheat in competition with the west, instead of paying more attention to dairying and to the production of articles for which all the cities furnish a profitable market.—Rochester Herald.
