STRIKERS DO NOT RESIST

RIOTOUS MINERS VANISH

At the Coming of Troops, Coal Companies Will Now Start up and Pay Less Than They Intended.

* The State troops took possession of the Be-Lewis & Yates coul property at Walston Adrian and Anita, near Punx-sutawney, Pa. on Friday morning, without a protest from the foreigners who have been terrorizing that end of Jefferson county for the past few days. The troops came in six special trains While coming from different directions, the entire command arrived at exactly the same time, and in five minutes after their arriva the soldiers were drawn up in battailons in the west end of town. Each was served with a tin of black coffee and a piece of dry

with a tin of black coffee and a piece of dry bread. Brig Gen, John A. Wiley assumed com-mand, and at 9 o'clock the, men were march-ed to Walston and Adrian. The Italians and Hungarians who had been doing pieket duty about the idle works, and who had been com-pelling American strikers to assist them, field at the approach of the militia. In their flight they tosk with them their munitions of war, composed of old style guns and pistols and a few weapons of their own manufacture, which they colled cannon. One of the alleged cannon was captured by a detachment of the Fifth flegiment. It was made of a black oak but, into which a three thanged with heavy ironthoops and was boal-ed with nails and small pieces of iron. A powder fuse was attached to it from the top. The officers regard it as a dangerous imple-ment.

The other regard it as a undercose topose-ment. Eight years ago the 2,000 men employed by the hell, Lewis & Yales Company struck for 50 cents per ton. At that time they were being paid 40 cents per ton. The company offered to compromise and pay 45 cents per ton. The offer was refused. Finkertons were employed, and after a prolonged strug-gie the men went back to work for 35 cents. If the old men do not take their old places at once, Supt, Robinson said to-night that be will import men at once.

MINERS ARE NOT POSTED.

Misunderstandings Preventing Many Mines From Resuming. John McBride, national president of the

United Mine Workers, says that except at a few points the strike settlement is accepted The monest of the strike settlement is accepted as satisfactory, and work has been generally resumed. The miners of Ohio are all work-ing, except at Massillon and Wheeling Creek. At Massillon the dispute is over the cust n-ary differential, and at Wheeling Creek on the mining rate as agreed upon at Columbus. He expressed the fear that a southern of would be very difficult to secure at Altoona. Regarding the attitude of some of the miners of the Fittburg district in refusing to resume until their employers sign an in-dividual contract. President McBride said the men were right in refusing to start the miners of operators who were not represented at Columbus and who have not since signed a scale. A written consent to the terms is necessary for the protection of the operators who have agreed to pay the district offlecer approaches. The opposition of a number of operators, especially along the Monongaleia and Youghiogheny rivers, added to the gen-rat misunderstanding as to the connection of the dead-work scale with the Columbus-settlement, are the causes. President Me-Bride stated that the whole difficulty since the settlement has been because very few of the miners understand what the terms really are. as satisfactory, and work has been general

PLANS OF A SYNDICATE.

French Telephone Service to be Introduc

ed in the United States. The telephone system now in vogue in France is to be introduced in this country at an early date by a syndicate of Philadelphia capitalists who have purchased the American patent rights from the French inventor. It will be operated by a corporation to be known as the Ciamond Telephone Co., ap-plicatice for a charter for which will be made on July 7. If the expectations of the pur-chasers are realized the introduction of the system will revolutionize one branch of the telephone business in the United States. The sompany is not intended to be a rival to the telephone company, the prime object of the incorporators being to secure the introduc-tion of the French system in hotels, apart-ment houses, country residences, etc. and in railroad service. In fact it is hoped that the use of the new telephones will enable many of the large railroad companies to do away altogether with their private telegraphic ser-vice. patent rights from the French inventor. Demolished by Floods

Demoilance by Floods. A dispatch from Carcow, Austriah Galicia, states that floods in the commune of Wolo-wice caused a dam to give way. Before the water could be checked 150 houses below the dam were swept away. Pioneers at great risk of their lives eventually succeeded in re-pairing the breach. The damage done to cross was immense. crops was immense.
