

Faith Cures.
These very confident people are strangely self-satisfied until danger to life looms up, as when the chronic pains of many years endurance attack the heart, like rheumatism very often does, then they turn to a better faith. This better faith—held by many thousands—is simple and certain. It is faith founded on experience that St. Jacobs Oil will cure, because it has cured all these painful ailments permanently. It is a faith founded on reason. We know what can be done by what has been done a thousand times. Every physician knows that those who have believed in treatment are the more easily cured; those who have not set up a resistance to the progress of cure.

A LOW WATER LEVEL
In Rivers, Ponds, Wells, and other sources of drinking water, there is danger from malarial germs. This danger is usually found in the Fall, and it points to Hood's Sarsaparilla as a safeguard against attacks of disease. Hood's Sarsaparilla makes pure food, and thus guards the system from all malarial germs. It creates an appetite and gives sound and robust health. It has been used for five years, and has cured many kinds of medicine, but found no relief till I commenced to take Hood's Sarsaparilla. I have all confidences in it, and believe it to be far superior to any other tonic. P. I. FITZGERALD, 121 Ninth St., St. Boston, Mass. Get Hood's and only Hood's.

Don't Laugh.
The young electrical wizard, Tesla, says that he can supply the world with artificial sunshine as soon as he can safely care for the 8,000,000 volts necessary for that purpose. Do not laugh at him, nor compare him to the ancient philosopher who said that he could move the world if he could secure a fulcrum for his lever. Nothing seems impossible to electricity, and some day even grim Chicago and dull London may be provided with best three-ply, yard-wide (Italian sunshine, guaranteed to mellow the temper and consolidate the wealth, by electrical contractors who have found out the secret of imitating the sun.—New York Journal.

Nickel has greater strength than iron when subjected to a breaking strain.

Hypochondriacal, despondent, nervous, "tired out" men—those who suffer from backache, weariness, loss of energy, impaired memory, dizziness, melancholy and discouragement, the result of exhausting diseases, or drains upon the system, excesses, or abuses, bad habits, or early vices, are treated through correspondence at their homes, with uniform success, by the Specialists of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y. A book of 136 large pages, devoted to the consideration of the maladies above hinted at, may be had, mailed securely sealed from observation, in a plain envelope, by sending 10 cents in one-cent stamps (for postage on Book), to the World's Dispensary Medical Association, at the above mentioned Hotel. For more than a quarter of a century, physicians connected with this widely celebrated Institution, have made the treatment of the delicate diseases above referred to, their sole study and practice. Thousands, have consulted them. This vast experience has naturally resulted in improved methods and means of cure.

FINANCE AND COMMERCE.

FOREIGN COMPETITION.

Stock of Grain Large—No Large Business Failures.
The failures during the week past have been 261 in the United States, against 358 last year, and 42 in Canada, against 37 last year. There have been a few failures of consequence during the week, but none of extensive influence.
Bradstreet's says: Interest in the elections this week naturally tended to restrict the volume of trade, particularly South, where it interfered with mercantile collections, but, within a few days, the influence of more seasonable weather West and Northwest, together with the emphasis with which political questions have apparently been settled, has increased the confidence of many merchants and manufacturers in a prospect for an improvement in the general trade in the near future. Chicago and St. Louis manufacturers and business men already report evidences of a tendency on the part of interior buyers to purchase for future delivery, and from such iron centers as Philadelphia, Pittsburg, Chicago, relatively greater steadiness is reported in quotations for staple brands of iron and steel than for months past.
Foreign competition with domestic plain woven goods is noticeable. Free orders have been placed for delivery after January 1, and American fence woods feel the effects of competition with Australian, and quotations continue easier.

RAILROAD TRAFFIC.
Returns of gross earnings of 107 railroads for October show an average decrease of 3.1 per cent., compared with those of October, 1904. The averages for Central Western and trunk line roads show comparatively large decreases, in comparison with the World's Fair traffic a year ago. Southern railroads, with a gain of 7.9 per cent., again make the best showing, and the South-western and Pacific groups also show favorable comparison with last year.
While prices for iron and steel shapes, for Bessemer pig and steel billets are practically steady, there is another net advance this week in prices for wheat and corn, and cotton and sugar have advanced fractionally also. There has been a further recession in quotations for corn and oats, and general commercial conditions at the South continue to struggle with a decline of 5.0 on cotton.
Exports of wheat, including flour as wheat, both coasts of the United States and Canada, as reported exclusively to Bradstreet's, aggregated 2,689,000 bushels this week, against 2,394,000 bushels last week, 2,813,000 in the week one year ago, 3,383,000 bushels two years ago, 4,426,000 bushels three years ago, and as contrasted with 2,320,000 bushels in the first week of November, 1900.

FATAL WRECK.

Three Trainmen and Two Postal Clerks Were Killed.
A bad wreck, whereby five persons lost their lives, occurred at Rosentel siding, on the Pittsburg division of the Baltimore & Ohio, 103 miles east of Pittsburg at 5:40 p.m. Wednesday evening. Train No. 5, the fast through weathered express, which arrives at Pittsburg at 8:45 p. m., met the first section of No. 64 a freight train, just at the siding and a fearful head-end collision followed.
The express train was running nearly 30 miles an hour when the freight was making a schedule of perhaps 20 miles. They met on the main track with a fearful crash, and 5 persons were killed. They are:
Henry Bush, of Glenwood, this city engineer on train No. 5, and the oldest passenger engineer in point of service on the B. & O. Pittsburg division.
Fireman McCarthy, of No. 5, who also resides at Glenwood.
J. L. Pierce and D. G. DeGrange, of Baltimore, mailmen on No. 5.
Edward Browning, of Ohio Tyle, engineer of No. 64, the freight train.
COLONEL NORTH, the nitrate king, started life as a boy in a small machine shop in Lehigh, Pa., was advanced to the post of filter, and was sent out by his employer to set up machinery in America.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and restoring nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & Co., Toledo, O. Gentle Reproof.
Among the many anecdotes which illustrate the rare character of William Augustus Muhlenberg is one which is told of him at the time he taught in Flushing Institute.
He was most unsparing of his own faults, even before his scholars, where they were concerned in the circumstance. One of them, a young man very dear to him, one told in after years how, after administering a severe rebuke to him one day, Mr. Muhlenberg at night put into his hand a little box which contained money, and a brief note in which he deplored that he had "lost his temper in the morning, and spoiled his admonition by impatient tones and ugly looks."
The note went on to say, "These accounts are not to be settled between ourselves, but as a peace-offering, let me give you this Charity Box, to which I will add something every time I offend in a similar way, and about the use of which I promise not to inquire. By this penance of love, my infirmities may at least be the occasion of your benevolence."
This arrangement, while it was undoubtedly a genuine expression of his grief and humility, may have also been one of his loving and ingenious ways of impressing upon the mind of his scholar the ground of the morning's reproof—the fault he wished to guard against and overcome.
