

GOLD BY THE HANDFUL.

But Clouds of Giant Mosquitoes Keep Treasure Seekers at Bay.

Gold in plenty may be found in the sands of the Volador River, a stream of moderate volume that comes tumbling from the snow line of the Sierra de St. Martha, in South America, but, though the lowland region and the river bed where the precious metal abounds in fabulous quantities are easily accessible, the mosquitoes are so thick and terrible there that all attempts to rifle the sands of the gold have so far failed.

Elisee Reclus, the celebrated French geographer, was the discoverer of this wonderful stream, whose waters sweep over sands that are literally golden. He told the news to the French Vice Consul at Rio Hacha, and this official obtained the concession of this Eldorado.

He took with him when he set out an ingeniously constructed gauze tent of large dimensions. For two days he tried to live under its shelter and watch the operations of his workmen, who toiled in the stifling heat, clothed in thick garments and protected by heavy boots, gloves and veils. At the end of the second day, however, both employer and employe with one accord gave up the struggle and retreated.

The next to try to bring fortune from these auriferous sands was an Italian who obtained permission from the Vice Consul referred to above. The Italian started out with a party of six, who shared with him his belief, and so they took along no special protection against the insects. They endured for less than half an hour the awful torture and then fled.

Yet there are human beings who can venture with impunity into this hell whose guardian demons are mosquitoes, and these are some of the savage natives of the mountains from whose rocky steep the river comes tumbling down. These savages, who are mosquito-proof, are rendered so by their bodies being covered with the scales of that awful disease, leprosy. The mosquitoes will not touch them.

But neither gold nor the gauds of civilization will tempt them to labor, and there is no human power, apparently, which will drag them out from their rude caves on the mountain side and make them labor for the white man.—New York World.

Undesirable Horse.

"Patrick, why didn't you tell me Farmer Laurie had a pony to sell, when you knew I wished to buy one for Ethel?" asked Mrs. James, with considerable severity.

"Och, mum," replied her man-of-all-work, with a beaming smile, "O'fl not be sayin' that the craychmire didn't schlip me moind, jist for the toime baste, mum; but anyway, he was no baste for Miss Ethel, mum."

"And why not?" demanded Mrs. James.

"Why, mum, said Patrick, shifting his weight carelessly from one foot to the other, "Farmer Laurie made a great p'int of the craychmire's balm 'well broke'—it was meself heard him shpoken av it. An' as for you, mum, yew would me more than want that nothin' but a sound animal would yew take, mum, an' that's the livin' truth!"

Reversing the Axiom.

The mother of the nineteenth century has brought up her daughters to match some other mother's sons. The mother of the twentieth century will have to bring up her sons to match some other woman's daughters. This is contrary to George Eliot's oft-quoted theory that "God Almighty made the women to matc. the men."

Sounds Better.

REVIEW OF TRADE.

Wheat and Corn Coming Forward Rapidly—Iron Still Booming.

R. G. Dunn & Co's, Weekly Review of Trade says: A slight setback, which may mean much or nothing, according to the final outcome of the crops, is not unexpected at this season. If the government crop reports were correct, the situation would be encouraging. But not much confidence is placed in the reduced estimate of corn, none at all in the estimate of wheat, and none at all in the estimate of iron. It is worth while to quote the government report on cotton. The fact is that we are beginning to market not far from 2,200,000,000 bushels of corn, though only about 500,000,000 bushels will be moved from the countries where it is grown, about 450,000,000 bushels of wheat, of which the farmers are unlikely holding back a large proportion, and about 7,500,000 bales of cotton, if the latter indications are not erroneous, as they very easily may be, to add to the stock carried over.

If we are to have a large crop of grain and a small crop of cotton it is natural to infer that manufacturers may find large transactions at the west, but not at the south. There is in fact a very large demand for goods at the west, and west-bound shipments are unusually large, although the east-bound shipments from Chicago for four weeks of August amounted only to 212,318 tons against 222,144 for the same week in 1894.

The largest output of pig iron ever known, 104,029 tons, is apparently supported by a reduction of 64,000 tons in stocks of pig iron anodes. The fact that the great steel companies have taken large quantities, which are not included in the official statement, renders the account of stock less valuable. The market for unfinished products is a little weaker, with indications of festination on the part of buyers at a slight advance in selling, and prices are on the whole fairly maintained.

The commercial stocks of cotton September 1, here and abroad, amounted to 2,100,538 bales and domestic mills stocks were 309,618 bales, against 2,172,872 bushels, flour included, against 5,310,126 bushels last year. The price declined sharply, about 2 cents per bushel, with little indication of recovery. The price of corn has also yielded with a strong prospect of the largest crop ever grown, and at 10 cents at New York, a large proportion of the crop will be little profit to farmers.

There is a great pressure for delivery of structural products and plates, but bar iron is still quoted at Pittsburgh at 1.45c, and at New York at 1.35c. The rapid shipments of Marquette ore during the past week, have some influence upon prices of Bessemer products. Nothing of importance has occurred in the iron markets, although tin has been stronger at times, with London buying, and copper has been helped by the report of a big sale of 12,500.

Failures for the week were 187 in the United States, against 219 last year, and 34 in Canada, against 44 last year.

SLAVES IN CALIFORNIA.

Big Conspiracy to Land Chinese as Actors for the Atlanta Exposition.

Collector Wise, of San Francisco, has discovered an ingenious fraud by which Chinese San Francisco speculators in the Chinese traffic are seeking to evade the Geary law and introduce about 300 Chinese into the United States under the pretext that they are actors and that they are coming to America to give the visitors at the Atlanta exposition an opportunity to see some of the renowned male and female histrionists of Hong Kong. A band of more than 200 men and 54 women have already been landed at Victoria, and they are headed by Liang Pete and the notorious Leong Nam, have ingeniously dodged San Francisco and applied for their admission into the United States at Ogdenburg, N. Y. If the applicants should get a temporary entrance on the ground that they are legitimate actors, inspectors will be sent to Atlanta to see how they deport themselves and to watch their movements.

The collector has evidence, however, that the men are seeking a permanent home as laborers, and that they know nothing about acting. There is also evidence in the hands of the collector that the women were purchased in Hong Kong at \$600 each, and that the projectors of the scheme have contracts by which they are to be sold at Atlanta for \$1,800 each. If they can be safely landed the one here will earn about \$40,000. The women would, of course, remain the slaves of their purchasers for a long period of years, if not for their entire lives, the design being to quietly ship them to the lower quarters of Chinatown at the conclusion of the exposition.

The projectors of the plan got their clew from the federal law relating to the World's fair at Chicago. Under a special act Chinese and other foreigners were allowed to land for the purpose of giving exhibitions and acting. A similar provision exists in the case of the Atlanta exposition.

VALLEY RAILROAD SOLD.

Baltimore and Ohio Buys the Line at a Good Price.

The Valley railroad was sold at Cleveland at public auction under an order issued by United States Judge Hicks. There was only one bidder, the Baltimore & Ohio railroad company, and the price realized was \$3,070,000, being \$570,000 more than the minimum figures set by the court.

It is stated the road will be immediately incorporated under the laws of Ohio with a capital stock of about \$5,000,000. The only company interested in the sale, aside from the Baltimore & Ohio, is the Wheeling and Lake Erie, which has an agreement under the reorganization plan whereby it gets traffic facilities which will enable it to bring a large part of its lake business to Cleveland.

Train Blown To Pieces.

Passengers arriving by the steamer Mascotte at Key West, Fla., report that a big battle has been fought near Camaguey between the insurgents under Maximo Gomez and the Spaniards under Gen. Melo. The battle is said to have lasted 48 hours and the Spaniards were repulsed with heavy loss, leaving over 50 killed and wounded on the field.

Boof's band has been active during the last week, having blown up a troop train by dynamite near Santiago de Cuba at a bridge near Segua. The Spaniards admit that the train was blown up, but claim that only five men were killed. Advice received here states that nearly 100 soldiers were mangled by the explosion.

Mrs. Flagler's Case Held Over.

The case of Miss Elizabeth M. Flagler of Washington, D. C., the young society woman who created a sensation a month ago by shooting and killing a negro boy named Green for despoiling a fruit tree, will not be resumed before next month. The grand jury will consider only jail cases, and the next grand jury will be organized October 1, so which United States District Attorney Shway stated he would present the case for its action.

AN AXLE BROKE,

And a Passenger Train Was Precipitated Into the Creek.

The smoking car and coach attached to the west bound passenger train on the Parsons track Saturday evening, ditching the two cars and injuring 20 people, several of whom are reported to be seriously injured, was precipitated into the creek. The wreck occurred at Lightning Creek, about a mile west of Monmouth, and was caused by the breaking of an axle on the rear coach. The break-down occurred at a point 400 feet from the bridge. The car broke loose from the train after being dragged 200 feet and rolled over into the ditch, which was filled with backwater from the creek.

The accident caused the other cars to pitch and rock so badly that when the bridge was reached the baggage car struck the side timbers of the bridge and caused the whole structure to give way, thus precipitating all the other cars into the stream below, which is swollen from recent rains. The front coach followed the baggage car into the stream and rested partly upon the baggage car, which kept it from sinking into the water. The smoking car turned completely over and is now lying bottom up in the creek. The passengers who had been but slightly hurt broke in the windows and fled, the women and wounded men out. The wounded were taken to Fort Scott on a special train sent to the scene of the wreck. Those who were able to be moved have been sent to their homes.

FIRED BY CLOCKWORK

Great Arson Conspiracy Uncovered at Montreal.

The greatest arson conspiracy that has ever been concocted in America has been unearthed at Montreal. Warrants are out for ten of the most prominent merchants in the city, and three of them have already been arrested. The thing started with the arrest of three men, Jenkins, Moore and Flores.

About five weeks ago, these men were arrested for setting fire to the wholesale stationery store of Boyd, Gillies & Co. Boyd, the senior member, suddenly disappeared, and when Flores, after his arrest, turned queen's evidence, it was found that Boyd was connected with the matter, approved of it and procured part of the receipts which the insurance adjusters awarded as damages.

The evidence showed that there was a widespread conspiracy, which has ramifications in the states all through Canada. It was found that the conspirators were in the habit of setting fire to the places by means of a clock work arrangement. This was made of an alarm clock with the bell taken off, on top was a thin glass bowl of sulphuric acid and below it a bowl containing methylated spirits. When the hour came for the clock to strike the alarm the hammer broke the glass bowl and as the sulphuric acid was precipitated in the methylated spirits the combination burst out in flames.

Mr. J. E. Quinn, crown prosecutor, went to New York to inquire into the United States end of the conspiracy. Ten warrants were sworn out. These were for William Thomas John, Richard, Castle, Sweeney, Richards, Dagenias, Savis, all furriers, and Bellaus and Lowenthal, wholesale clothiers. A small army of detectives were sent out, but up to this time only three were arrested.

The total amount of the men's pecuniaries is said to be about \$100,000.

MRS. PIETZEL TESTIFIES.

She Came Before an Indiana Grand Jury.

Mrs. Carrie A. Pietzel, the wife and mother of H. H. Holmes' victims, was before Coroner Castor, of Indianapolis, and the county grand jury Tuesday, with her daughter, Bessie.

She told the story of Holmes' movements, particularly in leading her over the country while he was making way with her children. She identified her son Howard's coat and when Flores, after his arrest, turned queen's evidence, it was found that Boyd was connected with the matter, approved of it and procured part of the receipts which the insurance adjusters awarded as damages.

DRIVEN OUT BY WHITES.

Two Negroes Killed and Twelve Wounded.

Two negroes were shot to death and several wounded by a band of masked men in the northern portion of Holmes county, Florida. The tragedy occurred near a large saw mill owned by Graves & Beatty. The firm employs many negroes, and operates a small railroad from the saw mill to the Choctawhatchee river. A freight car had been fitted up with bunk, and within this about thirty negroes slept. The car, in which the negroes were sleeping was surrounded by masked men who immediately opened fire with Winchester. The shots and the screams of the negroes brought Graves, Beatty and a number of white employes who live near the scene and then the masked men fled.

Examination showed that Henry Johnson and Sam Evans, negroes, had been killed, and that a dozen had been wounded, some of whom will die. The attack has so terrorized the negroes that they have refused to work for Graves & Beatty longer. It is thought that the attack was instigated by whites who had been discharged by the owners of the plant.

RAILROADERS KILLED.

Five Trainmen Met Death in a Collision in Minnesota.

Five persons were killed and 12 were injured by a head-on collision between passenger train on the Great Northern railroad near Melby, Minn. The dead are: Engineer J. K. Emerson, Fireman Jas. S. Thiebodo, Express Messenger, H. E. Gersaw and Mail Clerk E. T. Johnson. Of the 12 injured, 11 are Engineer Ira S. Haines, of the westbound train, all residents of St. Paul. The westbound train had passed its meeting point at Melby. Several of the wounded may die.

Wool and Cotton.

The tone of the Boston wool market is steady this week, the only notable exception being domestic wools. The sales show a more decided decrease than for several weeks past. The following are quotations of the leading descriptions: Ohio and Pennsylvania, 16c; and above, 17c; 15c; XX and above, 16c; No. 1 combing, 25c; No. 2 combing, 23c; Michigan, Wisconsin, etc., X Michigan, 16c; Illinois, 16c; No. 1 Michigan combing, 22c.

The cotton report of the Department of Agriculture shows a decline from the August condition of the crop which was 77.9 to 70.8 per cent, a decline of 7.1 points. This makes the lowest September condition of the plant since 1881, when it was reported at 70 per cent. The next lowest since 1881 was the condition of 1893, when it stood for the same month at 72.4.

Gave a \$1,000,000 Mortgage.

A million dollar mortgage was filed with the auditor at Tacoma, Washington, being given by the Tacoma Land Company on its Tacoma property, which is valued at over \$5,000,000, the Provident Life and Trust Company of Philadelphia, to secure a loan of \$1,000,000. The proceeds are being used in the construction of a 2,000-ton wheat warehouse, the purchase and filling in of a portion of the Tacoma tide flats and dredging of waterways.

UNIQUE TRIP ON STILTS.

Two Young Men to Go Around the World in that Manner.

Some of these days somebody will probably try to walk on his head around the world in an effort to eclipse previous attempts of "globe trotters." In these days of steam circumnavigating the globe is a thing of everyday occurrence.

THEOPHILE CUNY.

The recent feat of the two men who walked from Buenos Ayres to Chicago has inspired two young men of Chicago with a desire to eclipse that undertaking. They propose to walk around the world on stilts. For several weeks past one of them has been conspicuous on State street, as he

ROBERT B. THOMPSON.

strode along on stilts, dressed as "Uncle Sam." His right name is Robert B. Thompson, and he comes from New York State. His companion's name is Theophile Cuny. The young men expect to complete their tour and return to Chicago in about three years.

THE CHAMPION FAT BABY.

Tipped the Scales at 63 Pounds on the Day She Was Born.

A baby girl recently arrived in the little town of Southwest City, Mo., who will be the biggest woman on earth if

THE LITTLE WONDER.

she lives. The very day she made her appearance in the world the mammoth youngster tipped the scales at 63 pounds. She is now more than 68 pounds in weight, and measures 30 inches around the waist. Her arms are 10 inches in circumference and her hands and feet are as large as a man's.

This champion fat baby is the daughter of T. J. Matthews, a farmer, who lives in the Cherokee Nation. He is a small man; so is the little girl's mother. If the fat girl keeps on growing as rapidly as she has since her birth she will soon weigh more than the combined weight of her papa and mamma. Just the same, she is as happy as she is big. Several managers of museums have made great offers to the parents of the "elephant child," as she has been called, but they refuse to consider any proposition to exhibit their generously endowed little girl.

An Expensive Kiss.

Lillian Nordica was singing a few nights ago at the opera house in the character of La Traviata. On retiring behind the scenes at the conclusion of the third act, she found herself clasped in the arms of an old gentleman with tears of emotion streaming down his cheeks, who exclaimed:

"Let me kiss you! You are unique! unattainable! imitable!"

Mme. Nordica was quite overpowered with the enthusiasm of the old gentleman. But she was still more overpowered when it was pointed out to her that the diara of brilliants that had sparkled in her hair had disappeared since that touching episode.—Le Pat riot.

Umbrellas for Dogs.

"Yes," said a dog's outfitter, "fashions in canine clothing change pretty frequently. There is not, as yet, any journal devoted to the dress of dogs that I am aware of, but in the Palais Royal fashion plates, published in Paris, the latest modes of 'dogs of luxury' may be seen.

"And this reminds me of an incident. A month or so ago I saw in the publication above mentioned the picture of a dog's umbrella! The article is small, and made of silk. When open the frame is attached by ribbons to the dog's collar, and according to the advertisements, the animal is trained to hold the handle in its mouth.

"In addition to providing clothing for dogs, I retain the services of a dentist to fit dog teeth with false teeth; and the extent to which this branch of my business is patronized is surprising. The cost of a set of teeth varies from \$5 to \$15.

He Knew His Mother.

Mrs. Williams is a widow with three boys, whom she has brought up with great firmness. It is one of her rules that obedience to her commands must come immediately, and explanation, if at all, at her leisure.

"Freddy," she said, a short time ago, to her youngest boy, aged 7, "I am going to do something in a few days about which I want to talk to you a little."

"Yes'm," responded Freddy, meekly.

"I am intending to marry Doctor Morse next week on Monday," said his mother, and then she paused for a moment.

"Yes'm," said Freddy again, and then he added, with a look of awe on his small face: "I s'pose Doctor Morse won't know anything about it till the time comes, will he, mother?"

Deafness Cannot be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When the tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, hearing will be destroyed forever. Nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of deafness caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & Co., Toledo, O. Sold by Druggists, 75c.

The True Laxative Principle

Of the plants used in manufacturing the pleasant remedy, Syrup of Figs, has a permanently beneficial effect on the human system, while the cheap vegetable extracts and mineral solutions, usually sold as medicines, are permanently injurious. Being well informed, you will use the true remedy only. Manufactured by the California Fig Syrup Co.

Nearly 100 per cent of the recipients of the Victoria Cross are military doctors.

Dr. KILMER'S SWAMP-ROOT cures all Kidney and Bladder troubles. Pamphlet and consultation free. Laboratory Binghamton, N.Y.

To clothe the British soldiers and sailors costs the country between a million and a million and a quarter of money annually.

"Good Spirits."

The words have different meanings to a spiritulist, a Kentuckian, and an average man. For the average man good spirits depend on good digestion. How to insure good digestion? A Ripans Tabule after each meal, that's all.

In 1880 Sir Humphrey Davy produced the first electric light with carbon.

Inflicted with sore eyes use Dr. Isaac Thompson's Eye-water. Druggists sell at 25c per bottle.

Mr. Koir-Hardie's expenses at the recent election in Southwest Fla. are returned as amounting to \$245 58, 44.

Piso's Cure is the medicine to break up children's Coughs and Colics.—Mrs. M. BERRY, Sprague, Wash., March 8, 1896.

Laura Annie Cole (29) a single lady, late of Kensington, England, has died from fright caused by lightning.

WOMEN'S FACES

—like flowers, fade and wither with time; the bloom of the rose is only known to the healthy woman's cheeks. The nervous strain caused by the ailments and pains peculiar to the sex, and the labor and worry of rearing a family, can often be traced by the lines in the woman's face. Dull eyes, the sallow or wrinkled face and those "feelings of weakness" have their rise in the derangements and irregularities peculiar to women. The functional derangements, painful disorders, and chronic weaknesses of women, can be cured with Dr. Pierce's Favorite Prescription. For the young girl just entering womanhood, for the mother and those about to become mothers, and later in "the change of life," the "Prescription" is just what they need; it aids nature in preparing the system for these events. It's a medicine prescribed for thirty years, by Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y.

Dyspepsia, Insomnia.

From The Herald, Baltimore, Md.

Mr. Isaac Hamburger is a well-known cigar manufacturer and tobacco dealer at 1435 E. Baltimore street, Baltimore, Md. He is a hale, robust man now, but a few months ago he thought he was about to become a living skeleton if not a dead man. He now weighs about 200 pounds and steps about his factory as actively as do his "big boys." His present condition is due to the use of Dr. Williams' Pink Pills, which he considers the best medicine in the world for dyspepsia, loss of appetite, indigestion and insomnia. When a Herald reporter was called on Mr. Hamburger he said: "I secured five boxes from his factory and in speaking of the pills, said: 'Yes, I have used Dr. Williams' Pink Pills and can cheerfully recommend them. Some months since, I was confined, owing to confinement to business, I had an attack of dyspepsia accompanied by terrible and almost incessant heart burn and torpid liver. I tried doctors and many remedies that friends advised me to take, but found no relief until I heard of and used Dr. Williams' Pink Pills. They are also a specific for troubles peculiar to females, such as suppurations, irregularities and all forms of weakness. They build up the blood and restore the glow of health to pale and sallow cheeks. In men they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature. Pink Pills are sold in boxes (never in loose bulk) at 50 cents a box or six boxes for \$2.50, and may be had of all druggists, or direct by mail from Dr. Williams' Medicine Company, Schenectady, N. Y.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder

ABSOLUTELY PURE

The Greatest Medical Discovery of the Age.

KENNEDY'S Medical Discovery.

DONALD KENNEDY, OF ROXBURY, MASS.,

Has discovered in one of our common pastures a remedy that cures every kind of Humors, from the worst Scrofula down to a common pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humors). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston. Send postal card for book.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.

When the lungs are affected it causes "bleeding" pains, like needles passing through them, the same with the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it. Read the label.

If the stomach is full or bilious it will cause stomachic feelings at first.

No change of diet ever necessary. Eat the best you can get and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.
