COMBINE OF MILLERS.

They are Arranging to Control the Marketing of Flour.

The efforts being made by the leading millers of the country, and the chief members of the National Millers' Association, to bring about an arrangement which will provide about an arrangement which will provide rules for the output of flour on the market, and fixing a minimum price for flour, appear to be on the point of reaching a successful issue. The details of the plan have been worked out, and made known to the princi-pal millers of the country, and the agreement of the large millers of winter and spring wheat to abide by the regulations, or, in other words, to enter the combination, is all that is now lacking.

wheat to abide by the regulations, or, in other words, to enter the combination, is all that is now lacking.

Two months ago, at a meeting of the National Miller's Association in Minneapoils, it was suggested that a plan be formulated whereby the brokers and other cutsiders could not turn the flour market as they saw fit, but by which the millers themselves could control the market to an extent sufficient to protect themselves, if nothing more. The plan [proposed is to form a combination of millers and fix the minimum price at which the output of the milis will be sold. No militer may go under this price. All may sell above it. To solve the overproduction problem it was decided to have all mills reduce their production 15 per cent, which would make a difference of almost 4,000,009 in a year. All mills failing to reduce their production will be notified, and shall, according to the agreement, pay to the combine ien cents for every barrel of flour in excess of the agreed weight. The agreement is to hold for a year, and to be renewed thereafter yearly if held satisfactory.

A Great Ore Record.

During the past month the ore-carrying roads have made a phenomenal record in the amount of tonnage carried. Some idea of the immensity of this traffic may be obtained by the following, which show the amount of ore delivered to the different docks during the months of July, August and September: Ashtabuia, 18,987,597 tons, Cleveland. 11,189,666 tons; Fairport, 490,212 tons; Conneaut, 113,-606 tons; Fairport, 490,212 tons; making a grand total of 25,927,669 tons. This great tennage was more than equaled in the amount of conline turned to the lake ports from the Pittsburg district. Ninety per cent, of this traffic was hauled by the Pittsburg lines to the furnaces in the Pittsburg district, and in the Shenango and Mahoning valleys. A Great Ore Record.

About 2,000 Men at Massillon Make
Their Threat Good.
True to their threat, the Massillon miners, 2,000 in number, went on strike Tuesday owing to a conflict of authority between the independent association, to which they belong, and the United mine workers, from which they recently withdrew. On July 1 the miners of the United mine workers and operators agreed to the appointment of a joint committee to sit after October 1 and determine what advance had been granted in the Pittrburg field. This committee had power to order a like advance throughout Ohio. The Massillon miners, prior to October 1 seceded from the national organization and made a peremptory demand for 60 cents a ton, to date from October 1, ignoring the already existing agreement to submit to the committee and its finding. The operators hold that the miners have violated a trust, and there the case rests. Owing to strikes of various kinds there has been less than 10 months work here in the past two years.

The Ohio and Cleveland Coal Company of Cleveland has granted the demand of their men in the Messenger mines at Massillon operators say their mines will remain closed until they become satisfied that the advance had been granted in Pennsylvania.

All the miners, about 200 in number, employed in six coal mines along the line of the Pooria & Pekin Union ratiway quit work Tuesday morning, because they were refused an advance from 40 to 51 cents per ton on run of the mine.

A Lake Steamer Founders and Eight of Her Crew Drown.

The steamer Schuck, which arrived at Sault Ste Marie September 30, reports that while lying to for shelter in Copper Harbor, the

lying to for shelter in Copper Harbor, the City of Paris came in there and went ashore on Flat Rock. The steamboat Birckhead, towing the schoolers Chester B. Jones and Eima, lumber laden, lost her consorts off White Fish yesterday morning. The Jones is at anchor three miles west of White Fish Point.

The Elma is reported as foundering, with all hands lost, in Munising Bay. She carried a crow of eight, She is owned by Warre, of Towanda. The only names of the crew obtainable are Captain John Thurston, wife and child. The Birckhead is safe under Grand Island. The other consort, the Commodore, is waiting at the Soo for her. The tug Boyton has gone to White Fish to try and rescue the Jones. Her crew have probably been taken off by the Vermillion Point life saving crew, which went to her assistance.

PEARY'S FAILURE.

University, arrived at New York from the Artic regions on the steamship Sylvia.

Prof Dyche, while reticent as to the details of the expedition, admitted that it had been a failure. He declared that Lieut. Peary had not been able to forge much further north than on his previous expedition. He would not give any reason for the failure other than lack of food in Lieut. Feary's camp.

When driven back on his first attempt to reach the North pole Lieut, Peary decided to press forward again in 1894.
