THE GREATEST MEDICAL DISCOVERY OF THE AGE.

KENNEDY'S Medical Discovery.

DONALD KENNEDY, OF ROXBURY, MASS., Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both chronic humors).

He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.

When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels.

If the stomach is full or bilious it will cause squeamish feelings at meals.

No change of diet necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

THE AEROMOTOR CO. does half the world's windmill business, because it has reduced the cost of wind power to 1/10 what it has been.

It has many branch houses, and supplies its goods and repairs at your door.

It makes Pumping and Hoisting Machinery, including Windmills, and also Steel Towers, Steel Ladders, Frames, Steel Feed Cutters and Feed Grinders.

It has a full line of all kinds of machinery, and a full stock of all kinds of material.

It has a full stock of all kinds of material, and a full line of all kinds of machinery.

It has a full stock of all kinds of material, and a full line of all kinds of machinery.

A UNIQUE POST.

Wonderful Skill of a Woman in Reading Illegible Addresses.

Employment in the Postoffice Department at Washington.

Letters addressed illegibly or incorrectly, come to the postoffice department at Washington by the million.

To the "live letter division" of the department come all letters of this character. This division is in charge of a woman. She has a large force of clerks. Under her the division has grown from a mere adjunct to an important and interesting field of labor.

About 5,000,000 such letters are yearly turned into this division, and nearly every one gets to its destination, if there is the faintest clue on which to work. A letter to be sent to the detective division must be so illegible or so curiously directed that none of the clerks at the Post Office from which it was sent can read it.

Once a letter came addressed to Bent Arroy, Neb., but as there was no office of that name in the State, she sent it to Broken Bow, which is the name of a small settlement. Another missive was addressed to Goose Bay, N. C., and returned as there was no such place.

Some of the most interesting letters are preserved in a drawer, which is full of envelopes that have been deciphered, received and sent back at the request of the office. There is not one among them that the average person could read. For instance, here is one in a cramped hand for Tigerfols, N. Y., but no one would dream that Niagara Falls was the place meant.

One of the most puzzling addresses was one in the State of Furgoino. It went the rounds of the office, and at last some bright body tried pronouncing it rapidly, and it was then discovered that Virginia was the place meant.

Some witty person wrote his address in short hand, but it was read and delivered. One letter came from New York that no one in this city could make head or tail of. But this woman puzzle reader decided that what seemed but a series of meaningless scratches was meant for District Attorney Nicoll.—New York World.

Deft at Opening Clams.

Trudging down the street of a Long Island fishing village one can't help noticing the piles of clam shells near some of the houses. One in particular attracts attention. It is an embankment higher than the house it incloses on three sides. The oldest inhabitant discoursed about them thus: "The people who live in those houses open clams and string them for market. Women open all the clams, and become so expert they will open and string 3,000 or 4,000 a day.

I have seen them on a wager toss three clams into the air and catch and open them as they fell, keeping two in air all the time. That big mound you speak of is where a woman lives who works for several fishermen. She gets four cents a hundred, and will make \$1.50 and \$2 a day. That mound has been some time accumulating. She says it keeps the house warm in winter. Most of the mounds, however, have not been there a year, for since the towns are improving the roads the shells are in great demand. They mix with the sand and make a splendid road. The fishermen sell them.

"But there are some shell heaps around here that are older than the white man. The Indians made them. This stringing clams is the old Indian way, and we learned it from them. They used to have a regular trade with tribes back in the country. They used to dry clams, too. Then again, in some places you will find the shells shipped and worn. That is where

they made wampum, for Long Island was a famous place for it, and turned out some of the finest known. Find things in them? Oh, yes; but nothing very curious. I have seen some arrow heads taken out, and some stone knives, which they evidently worked with, and have heard of bones being found; that's all. An Indian is a natural clam hunter, though."—New York Press.

Making Bogus Coin in Prison.

The federal officials at Indianapolis have succeeded in getting at the principal facts of the counterfeiting conspiracy of the Indiana State prison at Jeffersonville. The case is certainly the most peculiar, and in some respects the most astounding in the known records of false coining in this country. That convicts employed in the prison shops, and supposed to be under strict surveillance, could succeed for three years in turning out large amounts of counterfeit money without detection, seems little short of miraculous. The convicts were not alone in the business. The shops were worked by a private manufacturing company, and one of the foremen is under arrest, charged with circulating the spurious coin made by the prisoners. But where were the prison officials all this time? A convict serving his fifth term was the principal "manufacturer," but no doubt others were associated with him. The money included dollars, halves, quarters, and nickels, large numbers of which were seized. The counterfeiters are said to be excellent imitations, the dollars representing the issue of 1889, and the nickels of 1893. No wonder the amazing discoveries in the prison, as the local papers put it, "caused a tremendous sensation."—Boston Commercial.

A Raft of Rats Drawn by Fire.

"It is an indisputable fact that fire will draw rats," says Louis Simmonds of St. Louis. "During a recent big fire near the river bank in St. Louis a fire brigade acted the part of Pied Piper of Hamelin, and, with the assistance of the flames, drove out of their hiding places into the Mississippi as many rats as did the mythological musician. While the water was lighted by the reflection of the conflagration, a black mass was seen floating toward the east shore of the river. This proved to be some thousands of rats.

"They were healed by their chieftain, an extraordinarily large, black fellow, and, finding their quarters attacked by the flames, had taken to the river for self-preservation. The current carried them considerable distance out of their course, and during their passage some hundreds of them were drowned. Spectators on the bridge made bets on the race, but they were all declared off, because on the Illinois side there was no landing place handy for the fatigued rats, and as far as could be seen, with the exception of the fellows, the whole bunch perished in the river."—Kansas City Times.

A Short Way With Patients.

To diagnose patients at the rate of two and a half a minute seems pretty quick work. According to a German contemporary, this is about the average performance of Pastor Kneipp, of cold-water fame, at Woerrishofen. When receiving patients on a busy day the pastor sits at a long table in a large, plainly furnished room, smoking a huge cigar. He dictates his "prescriptions" to an assistant in a solemn tone, as if he were presiding at a religious ceremonial. Men, women, and children of every station in life file past him. In an hour and a quarter he gets through 180 without difficulty. There is no examination, and few questions are asked. Indeed, there is little necessity, for cold water baths and bandages and walks on wet grass with bare feet exhausts the worthy pastor's pharmacopoeia. There is one exception—an ointment composed of honey and medicinal herbs for those who suffer from diseases of the eye. But then the ointment is a sovereign one for everything, and so Pastor Kneipp manages to break the record as an oculist as well.—Westminster Gazette.

Risk of Lightning Stroke.

According to Professor McAdie, the risk of lightning stroke is five times greater in the country than in the city, because ordinary dwelling houses in city blocks receive a very considerable protection from the tin roofing, cornices, gutters, and so on. The Royal Prussian Bureau of Statistics says that the geological formation of the ground has some influence upon the frequency of lightning strokes. Thus, if one represents its frequency in a chalk formation, two will represent it in marl, seven in clay, nine in sand, and 22 in loam.

BEAR AND LION.

England and Russia Arranging a Little Private Turkey Dinner.

The Odessa correspondent of the London "Daily News" says that it is reported in official circles that in view of the possible disruption of Turkey, Russia and England are negotiating an agreement which will give the czar a free hand for the occupation or annexation of Anatolia, while England will have the right to establish a permanent protectorate in Egypt.

The "Chronicle" prints a dispatch from Vienna, which asserts that the news that Russia has backed the seat of concerted European arrangements for the settlement of the Turkish question, produced a heavy fall in the bourse there. The correspondent explains that Russia has agreed to the assembling of the fleets in the Levant, and that the czar is willing to negotiate measures in the future. The Telegraph publishes a dispatch from Constantinople which asserts that no news of fresh disturbances in Asia Minor has been received since Saturday, and that confidence is apparently being restored. At Aleppo it is hoped that the worst is over, and it is believed that quiet has been re-established in European Turkey.

The correspondent also announces that the Armenian women of Constantinople have addressed a memorial and an appeal to Lady Henry Somerset, well known for her work in the W. C. T. U. in particular, and for her efforts as a humanitarian in general.

WORK OF COUNTERFEITERS.

Arrests Show a Great Increase in Making Bogus Coin.

Chief Hazen, of the secret service of the treasury department, in his annual report shows that during the year 908 arrests were made, with few exceptions for violations of the statutes against counterfeiting. Of these 381 were convicted and 119 pleaded guilty, 74 are awaiting trial and 84 were acquitted. Altered and counterfeit notes, counterfeit gold, silver, and copper coins, counterfeit stamps, world's fair diplomas, etc., also for counterfeiting coins and 217 molds for coins, seals, and quantities of crucibles, photographic outfits, machinery, etc. The number of arrests made of persons engaged in manufacturing and handling counterfeit coins shows a great increase in this branch of counterfeiting.

Millers Appeal to Congress.

The executive committee of the Winter Wheat Millers' association of the central states decided to present a vigorous fight before congress in behalf of reciprocity measures with nations that may be induced to buy American flour. The committee decided to formulate a statement which shall be presented to congress and a sub-committee will go to Washington and lobby.

While He Slept.

Archibald Clarke, a farmer living near Grump, Ky., is without doubt the most remarkable somnambulist in Kentucky. He actually during the past summer cultivated four acres of land while asleep.

For a long time Mr. Clarke suspected his neighbors of stealing into his truck patches after night and doing the work, but finally one night, while nailing some boards on his backyard fence, he struck his thumb with a hatchet and awoke, thus realizing for the first time that he had been working in his sleep.

Among other things that he has done while in the somnambulist state was to lay a worm fence for a distance of 200 yards. One night he fell asleep, thinking that he would rise early on the following day and cut a small ditch to drain a pond. But great was his surprise when the next morning he found that the pond had been ditched during the night.

On one occasion he got up shortly after he had fallen asleep and putting several pounds of butter in a basket took it to a near-by grocery and traded it for coffee and sugar. For a long time he was at a loss to account for the missing butter. Neither did he know whence came the coffee and sugar. However, since realizing that he is a confirmed somnambulist, he has questioned the grocer, who recollected the occurrence. Deposits of Mr. Clarke's strange behavior at the time.

Mr. Clarke lived alone, but since he has discovered his condition has engaged the services of a young negro, who takes care that his employer does not get out of the house during his sleep.—Cincinnati Enquirer.

A Conductor's Sarcasm.

She seated herself in the rear end of the car, among the tobacco consumers, although there was plenty of room forward.

Every time the man next to her puffed his cigar she looked unhappy.

At last she turned sharply to the conductor and said: "Smoking is very disagreeable to me."

"Is it?" he rejoined, sympathetically. "Certainly is."

After a brief silence she resumed: "Well, aren't you going to do something or say something about it?"

"Why—certainly."

"I wish you wouldn't lose any time."

"If I were in your place, and smoking were disagreeable to me, why—er—"

"Well, sir?"

"Why, I wouldn't smoke."

He meant it kindly, but she got off the car and reported him to the company just the same.—Washington Post.

The Purse.

For several centuries the purse was always worn fastened to the girdle. A cut-purse got its name from the fact that rather than take the time to loose the purse from the belt, where it was secured by buckles, he cut the straps.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder

ABSOLUTELY PURE

ASTHMA

POPHAM'S ASTHMA SPECIFIC. Cures where all else fails. Best Cough Syrup, Tastes Good. Use in time. Sold by druggists.

Timely Warning.

The great success of the chocolate preparations of the house of Walter Baker & Co. (established in 1780) has led to the placing on the market many misleading and unscrupulous imitations of their name, labels, and wrappers.

WALTER BAKER & CO., Limited, DORCHESTER, MASS.

You Will Realize that "They Live Well Who Live Cleanly," If You Use

SAPOLIO

nothing lost

Scott's Emulsion makes cod-liver oil taking next thing to a pleasure. You hardly taste it. The stomach knows nothing about it—it does not trouble you there.

It is cod-liver oil digested for you, slipping as easily into the blood and losing itself there as rain-drops lose themselves in the ocean.

What a satisfactory thing this is—to hide the odious taste of cod-liver oil, evade the tax on the stomach, take health by surprise.

There is no secret of what it is made of—the fish-fat taste is lost, but nothing is lost but the taste.

Perhaps your druggist has a substitute for Scott's Emulsion. Isn't the standard all others try to equal the best for you to buy?

SCOTT & BOWNE Chemists New York

A MARVEL.

REMARKABLE AND ASTONISHING CURE OF AN EXTREME CASE OF ST. VITUS' DANCE.

How a Young Lady Regained the Use of Her Arms, Limbs and Speech in Three Weeks.

From the Standard-Union, Brooklyn, N. Y. Too much hard study at school brought on St. Vitus' dance. Such was the common experience of Miss Glendora Rivers, daughter of Mrs. Amelia Rivers, of 69 Ryerson street, Brooklyn. The disease grew worse every month, until the young lady's entire right side became paralyzed; but, now that a marvelous and permanent cure has been wrought, it will be interesting to read her own version of the efficacy of Dr. Williams' Pink Pills.

"For more than a year," said Miss Rivers, "doctors attended me without effecting the slightest change in my condition. If anything, I grew worse under their treatment, until February of this year, when my condition became critical.

"I had lost the complete use of my arms and limbs and speech. I could only swallow liquids, and these only as they fed me with a spoon, when they could get my mouth open. I wanted to sleep all the time. The stupor I laid in was something like a trance, and no doubt I would have died if they had not waked me up at intervals.

"The first week in March my mother, who is a sick nurse, was advised by a neighbor to try Dr. Williams' Pink Pills in my case. She got some of the pills—a box from Nelson's drug store, at the corner of Myrtle avenue and Hall street. Before I had taken one-half the contents of the box a remarkable change was noticed in my condition.

"Gradually I regained the use of my arms and limbs and speech, and by the time the pills were gone I was up and about the house almost well. But my mother thought it wise to get another box of the pills, and this she did, and here you see me stand before you with more strength and more ambition than I ever had.

"Some of our near neighbors attribute my regained body and health to some miraculous or supernatural agency; but my mother and most intimate friends know that the cure was effected by Dr. Williams' Pink Pills.

"Three weeks from the day I swallowed the first dose of the pills I was as well as you see me to-day."

Dr. Williams' Pink Pills for Pale People are a specific for troubles peculiar to females, such as dyspepsia, irregularities and all forms of weakness. They build up the blood and restore the glow of health to pale and sallow cheeks. In men they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature.

They are manufactured by the Dr. Williams' Medicine Company, Schenectady, N. Y., and are sold by all druggists at 50 cents a box or six boxes for \$2.50.

Fife's Cure is a wonderful Cough medicine.—Mrs. W. DICKERT, Van Siclen and Blake Aves., Brooklyn, N. Y., Oct. 20, 1894.

Inflicted with sore eyes use Dr. Isaac Thompson's Eye-water. Druggists sell at 25c per bottle.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle. Use in time. Sold by druggists.
