Hood's Pills are always reliable. 25 cents.

Harold is Annoyed.

Harold Frederic is much annoyed by the betrayal of his identity with "George Forth," under which name he published his clever book, "March Hares." The book has already established itself as a favorite in London. Mr. Frederic resorted to anonymity in this case because he did not want to interfere with the sale of his more ambitious book, the novel "Illumination."

Society Women Who Collect Fans.

One of the fans which Mrs. Almerice Paget inherited from her mother, Mrs. Whitney, has gold and ivory sticks, a lace mount, and is valued at the trifling sum of \$1,000. Among enthusiastic collectors of fans are Mrs. Sloane, Mrs. Whitelaw Reid, Mrs. Cornelius Vanderbilt and Mrs. Seward Webb, whose own fortunes in these fluttering bangles.

WOMEN WANT TO KNOW.

TO WHOM CAN THEY TELL THEIR TROUBLES?

A Woman Answers "To Me"—Anxious Inquirers Intelligently Answered—Thousands of Grateful Letters.

Women regard it as a blessing that they can talk to a woman who fully understands their every ailment, and thus avoid the examinations, experiments, theories of incompetent physicians, whose sex deprives them of knowledge by experience.

Horace G. Bishop, wife and family, have been camped in a wagon near Cool Springs, Fayette county, for several weeks. They had to drive through to Iowa from Bradford county but stranded. Monday Bishop and the neighbors sent the family back home.

County Superintendent Moore, of Beaver Falls, has completed his examination of teachers for certificates. About 330 have qualified, and there are only 230 positions in the county to fill outside of Beaver Falls and New Brighton.

Harry Koch, aged 16 years, of Hollidaysburg, had both legs ground off and his body cut up while attempting to board a freight train at Altoona. Koch and a companion were going to Pittsburgh to hunt work.

The boiler of the elder press and grist mill of J. C. Holmes, near Williamsport blew up, wrecking the building and throwing Walter Holmes the feet into a corn field. He was severely scalded and injured.

William Repline, who was employed with a gang of men in putting up the long-distance telephone line, between Washington and Waynesburg, was drowned at Swart's dam, near Unity.

William Repline, employed in the construction of a telephone line between Washington and Waynesburg, was drowned in the Swart's dam, near Unity, Sunday afternoon.

The work of searching for the bodies of the victims of the Pittston disaster may be continued by volunteers, the mine owners having given their consent.

Henry Shoaf, one of the oldest and most widely known citizens of Sewickley township, died suddenly of gangrene, aged 83 years.

Mary, a 14-year-old daughter of John Kunkle, of near Belmont, died suddenly. The cause of her death is unknown.

The Pennsylvania State Millers' association opened its annual session at Williamsport Wednesday.

John Baneher fell under a freight car at New Castle and was killed.

Frank Leder was killed by a freight train at Johnstown.

Female diseases yield to Lydia E. Pinkham's Vegetable Compound at once. Inflammation, ulceration, falling and displacement of the womb, ovarian troubles, spinal weakness and kidney complaints, all have their symptoms, and should be "nipped in the bud." Bearing-down pains, backache, headache, nervousness, pains in groins, lassitude, whites, irregularities, dread of impending evil, blues, sleeplessness, faintness, etc.

Here is testimony right to the point: "The doctors told me that unless I went to the hospital and had an operation performed, I could not live. I had falling, enlargement and ulceration of the womb."

"I was in constant misery all the time; my back ached; I was always tired. It was impossible for me to walk far or stand long at a time. I was surely a wreck. I decided that I would give your Compound and Sanative Wash a trial."

"I took three bottles of Lydia E. Pinkham's Vegetable Compound, and used two packages of Sanative Wash, and I am now almost well. I am stouter and healthier than I have ever been in my life. My friends and neighbors and the doctors are surprised at my rapid improvement. I have told them all what I have been taking."

—Mrs. ANNETTA BICKMEIER, Bellaire, Belmont Co., O.

KEYSTONE STATE NEWS CONDENSED.

FOR THE STATE FAIR.

Extensive Preparations Being Made at Johnstown.

Johnstown is making extensive preparations for the State fair, to be held September 7-12, inclusive. The city will be in holiday attire the entire week, and the management says the number of exhibitors is more than usually large, with every indication of an immense attendance of visitors. In addition to President Cleveland, and the presidential candidates, Senator Sherman and John Wanamaker, have been invited, while Gov. Hastings has positively assured the management that he would spend two days, and possibly three, in attendance during the week.

Andrew Orbin and his young bride came to grief at Dunbar, being arrested for having a wedding celebration on Sunday. Orbin is the Slav who held high carnival Sunday week ago at Hilliam, in which 40 kegs of beer and 20 gallons of liquor were in evidence. A riot took place over the young bride and a number of the rioters escaped arrest.

Frank Daniels, an insane man, became violent on Penn street, heading, and with uplifted knife, plunged right and left through the crowd. He first stabbed Charles H. Swarovski, then attacked Assistant City Treasurer Wink and Robert L. Cressman, a prominent merchant tailor. Mr. Swarovski's condition is critical. Daniels was taken into custody.

It was reported that an explosion had occurred in the Ellsworth mine, across the river from Sutersville, killing two men and seriously injuring several others. On investigation it is learned the manhole blew out in the air receiver, doing no damage except to the machinery, the men all being at a safe distance from the receiver.

A had wreck occurred at Grove City on the Pittsburgh, Shenango and Lake Erie railroad. A work train on a siding was struck by a coal train, which ran in on an open switch. A number of cars were badly smashed and Samuel Covert, work train boss, and Charles Hopkins, a laborer, were injured by being thrown from the work car.

Henry Floersheim, the coal operator of Washington, has been sued by J. C. McVey and John F. Russell for \$3,000 and \$2,400 respectively. They allege the coal mines have damaged them to that extent in mining operations under their land in Union township.

Horace G. Bishop, wife and family, have been camped in a wagon near Cool Springs, Fayette county, for several weeks. They had to drive through to Iowa from Bradford county but stranded. Monday Bishop and the neighbors sent the family back home.

County Superintendent Moore, of Beaver Falls, has completed his examination of teachers for certificates. About 330 have qualified, and there are only 230 positions in the county to fill outside of Beaver Falls and New Brighton.

THE NATIONAL GAME.

Jones leads the Brooklyn in batting. Brooklyn has not won a series this season. Payne is now Brooklyn's winning pitcher. Six players of the Pittsburgh Club have a batting average of over .300.

Hard times have seriously effected baseball in the South and far West.

So far 241 players have taken part in the big League struggle this season.

Fred Pfeffer is putting up one of the fastest second base plays in the country.

Amos, of Chicago, has set his heart on beating Cleveland out of third place.

The New York Club has signed Pitcher Gettinger, of the Hagerstown (Md.) Club.

Burkett, of Cleveland, has dropped the glove in his batting, but still leads the League.

No third baseman has played prettier or more steady ball this year than Shindle, of the Brooklyn.

Dwyer, of Cincinnati, pitched three scoreless games in which not a run was scored off his team.

Nichols, of Boston, has pitched in thirty-four games this season, and still has a clean fielding record.

One or two more deals like the Beckley-Joyce deal will make the New York a sure first division team.

The Louisville have lost twenty-five games by one run this season. Some justification for a hard luck story there.

President Robinson, of Cleveland, says the League would be money in a pocket if coaching were stopped altogether.

A hard liner from Beckley's bat injured Lachance, Brooklyn's first baseman, so that it is possible he will be unable to play again this season.

Cuppy's tactics in taking a chance on a batsman when the bases are clear is the secret of his success as a pitcher. The Cleveland pitcher sends the ball over the base, and if perchance a hit is made by the first man who faces him, he studies to fool the next batsman.

There are pitchers on whom the "rattling" process has no effect, but while the yelling is going on each player is compelled to act for himself. It being impossible to hear instructions from his captain or the men beside him. And many a play and game has been lost on this account.

One noticeable fact about the present championship race is the teams that now occupy the first six positions have done less "shaking up" of their line-ups than those that are in the second division. Another fact is that very few of the new men secured at the first of the season have proved fast enough for the League.

Hamilton, of Boston, plays ball with a glove of his own make. It is a beauty. It is about the size of a pitcher's mitt, and is made of rubber, and is nicely padded. The thumb is not separate from the body of the glove, but is tacked on with some stitches. Deleahanty, Lange and two or three other fielders have gloves like it.

The New York Club intends to build upon the victory they won last year. They have twenty young players which they began to train during the last two years they got only three worth keeping, and those three were not up to the average National League requirement. Zentoff, a catcher, is the only one that the club has in its year, and with Warner and Wilson there is little need for him.

Newspapers Gleanings.

Maine has two hundred newspapers.

There is talk of a "Greater Lowell," Mass.

It is rumored that no more convicts are to be sent to Siberia.

The Baltimore and Ohio is laying new steel rail on its main division.

Fourth of July fire losses throughout the country were unusually light this year.

All attempts to reach the summit of Mount Blanc have failed this season, either through heavy snow storms or fogs.

The Swiss Government has proposed an obligatory insurance, but there are doubts as to whether the measure will pass the House.

The New Orleans City Council refused to accept the new charter for that city which the Louisiana Legislature framed at its recent session.

The evidence to be submitted to the Venezuelan Boundary Commission is practically all in, and the commissioners are engaged in classifying it.

Pittsburg, Penn., has been paying \$8,000,000 a year in life insurance premiums, and has never had a company of its own. One is being formed.

Nineteen persons, two of whom are women, have been sentenced to death in Acram, Hungary, on the charges of brigandage and murder.

The Metropolitan Job Printing Company, of New York City, has been awarded the contract for printing the Postal Guide for the Postoffice Department. The contract is for four years at \$12,000 per year.

On account of the bad outlook for the native corn crop owing to the lateness of the "rainy season," it is estimated that if the American railroads reduce freights, Mexico will take 10,000 carloads of our corn.

Only one of the thirteen trees planted on Washington Heights, New York City, by Alexander Hamilton more than a century ago to commemorate the thirteen original States of the Union is in a flourishing condition. All the others are either dead or dying.

A. J. Miller, a wealthy merchant of Frankfort, Ind., has offered to give \$50,000 to any one who will restore his sight, lost three years ago by a stroke of paralysis.

For one year and a half there will be no Bourbon whisky distilled in the United States. By agreement, all the distilleries in Kentucky closed on July 31, and they will not resume operations until 1898. They were losing money, many of them being on the verge of bankruptcy, due to an over-production.

CYCLING NOTES.

The best tonic for insomnia is a short spin on a bicycle in the evening.

Make a note in your pocket book of the number of your bicycle. It may be useful in case of theft.

In attempting to tighten up a worn nut, put a little resin on the jaws of the wrench; this will enable it to get better hold.

His now a misdeamnor in New York State to throw upon a public road tacks, glass or any sharp substance likely to injure the tires of bicycles.

Something just beginning to attract attention is the use of paper rims for bicycles. They are said to be better than wood and can be made cheaper.

The soldiers of the United States Army can thank General Miles for the arrangements he has made by which they can obtain wheels at low prices on easy terms of payment.

A prolific cause of accidents is rats that have been covered over with loose earth, or sand, or dust. They are to be found on almost every road, and are not easily noticed unless a sharp lookout for them is kept.

The French bicycle manufacturers propose to test each wheel and mark upon it the weight of the rider which it will bear without injury. This is an excellent suggestion, and could be adopted with profit in the United States.

The demand for tandems, which was the great feature of this year's trade, apart from the initial break-down in general, was remarkably well sustained, the manufacturers report; only recently were some of the more fortunate makers fairly up with their orders. They think the double machine will be more popular than ever next year.

Mr. Bradley, laundier of Asbury Park, is opposed to promiscuous surf bathing. He would have the sexes separate when they don their bathing suits.

AN HISTORIC STEAMER.

It Has Had a Remarkable Career on the Hudson River.

The steamer Drew left Albany on her last trip Saturday night, amid the shrieking of tugs and steamers. If the noisy demonstration was not so great as that which heralded its first arrival it is because not so many masters ply the waters of the Hudson as there were there did thirty years ago. Then the river front of Albany was lively and bustling. Now but for the tugs of the Roman line, the New York and Newburgh boats, and the few steamers that carry freight and passengers to nearby points, the waters of the river would be unpeopled by passing craft.

It is the day of the railroad, but, while wind and water hold, the pleasure and profit of marine adventure will never lose their charm. And so, though we speed the departing Drew, the coming Adirondack is cordially welcomed. If at the end of the first quarter of the twentieth century the boat which comes so gay in hunting and gleaming paint, so endowed with all that makes marine architecture of this time wonderful and complete—if, we say, this boat, then grown old and out of date, is retired with a record as honorable as that which the Drew takes with it in retirement, its owners will have reason to congratulate themselves. For the Drew's history is one of great distinction and honor.

This notable steamer has been commanded by Stephen J. Roe, now transferred to the Adirondack, from the day it went into commission. If its saloons and cabins could talk what a history they would tell; for, in its time, the Drew carried as passengers nearly every person of prominence on this side of the Atlantic, and travelers from the old world were bound to have one trip on the Hudson River night boats, the fame of which had penetrated wherever travelers go.

There was nothing like them in the world—certainly nothing in Europe—which anywhere approached them for space of accommodation, for appointments, and for general comfort. The boats on the Rhine were small when compared with them, while the channel packets produced hideous nightmares when contrasted with the luxury of travel on the Hudson. Not even the boats on the Mississippi, when travel on that river was at its height, were to be mentioned in the same breath. The Hudson River steamers confessedly led all lines of inland travel until Colonel James Fisk, Jr., took charge of the Fall River line of steamers. That marked the beginning of another era in American steamboating, and now the Sound boats in many respects are unapproachable. But the officers of the People's line are resolved that the glory of steamboating on the Hudson shall not be permitted to decline.—Albany Journal.

Ornamental Swallows.

A flight of swallows made of the most glittering brilliants is one of the newest ornaments with which the summer matron delights to adorn herself. Each of the five jeweled birds can be separated and worn either as a brooch or as an ornament for the hair. To those who find the swallow too modest a device the robin redbreast is a fashionable substitute. The robin is mounted on a branch of leaves and berries, and has gay, jeweled wings and a breast of enameled iridescent red. A conceit that is more odd than beautiful takes the form of a white rabbit, his body all pearly, his pink eyes of the balas ruby, and his long ears are pearls with suggestions of pink about their tips. Often, by way of further elaboration, the little rabbit is mounted upon his hind legs upon a gold bar, and is gazing upon a butterfly glistening with golden beryls and purple amethysts.

Britain's Railway Clearing-House.

The railway clearing-house is one of the largest offices in Britain. It has a staff of 1,000 clerks and 450 out-of-door officers.

"Fenny wise and pound foolish" are those who think it necessary to use cheap soda and rosin soaps, instead of the good old Toilet Soap for sale by all grocers since 1860. Try it once. Be sure, buy genuine.

The Microscopical Association at a meeting in Pittsburg upheld and indorsed the practice of vivisection.

STATE OF OHIO, CITY OF TOLEDO, ss.

OPIMUM and WHISKY habit cures. Book sent FREE. Dr. H. M. WOOLLEY, ATHLETIC, OHIO.

Gladness Comes

With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual disease, but simply to a constipated condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact, that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which it acts. Its therefore all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all reputable druggists.

If in the enjoyment of good health, and the system is regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.

BATTLE AX

BIG AND GOOD.

Battle Ax

PLUG

Sometimes quality is sacrificed in the effort to give big quantity for little money. No doubt about that. But once in a while it isn't. For instance, there's "BATTLE AX." The piece is bigger than you ever saw before for 5 cents. And the quality is, as many a man has said, "mighty good." There's no guess work in this statement. It is just a plain fact. You can prove it by investing 5 cents in "BATTLE AX."

IF SILVER WINS

and if farm produce, labor and labor products double in price, then must also double in price, as they are 95% labor. If labor doubles in cost and the product of the mine doubles in cost, Astrometers, Pumps, Spiral Pipes, Fittings, Cylinders, Tanks and Substructures, being the product of the mine and labor, must also double in cost and price; therefore, your \$1 now will buy as much as 2 of the same dollars if silver wins, or if people think it will win, it is 2 to 1 in favor of buying now. The advance may come in a month or an advance in labor and material prices on Brass Cylinders are 40% below anything ever quoted, and our other goods are as low as they can be produced. We have our splendid facilities. A general run to cover future needs, while \$1 buys so much, may quickly exhaust our immense stock and compel the advance. Graciously we have secured and compel the advance. Graciously we have secured and compel the advance. Graciously we have secured and compel the advance.

IT IS 2 TO 1

compared by an advance in labor and material prices on Brass Cylinders are 40% below anything ever quoted, and our other goods are as low as they can be produced. We have our splendid facilities.
