

Great Hood's Sarsaparilla

Sales naturally result from the great merit which makes thousands of wonderful cures by Hood's Pills care all Liver Ills. 25 cents.

PLAYING SOCIETY.

The Little Girl's Interpretation of What the Smart Set Do.

The small girl learned for things beyond her environment and, with true feminine adaptability, was making the most of the resources at command. "Reginald," she said to the youngster who was trying to give a tight-rope exhibition on the tongue of the grocery wagon, "o-merc."

"Who ye talkin' to?" was the indignant inquiry.

"Youse."

"My name ain't Reginald. My name's Tommy."

"Ye're name's Reginald."

"Why is it?"

"Because I say it is. Do you see my right hand?"

"Yes."

"No ye don't, nothing of the kind, cos I've got it behind my back, an' there's a brick in it, an' wot I say goes, an' yer name's 'Reginald.'"

"All right, wot're ye goin' ter do?"

"Play society."

"I don't know how."

"It's easy. Ye come up ter me an' ye say, 'Ah, howdudoo, howdudoo. Ye're looking chawmin' this evenin', don't 'cheknow.'"

"An' wot do you do?"

"I say, 'Do you reccilly think so?'"

"An' den I s'pose I gits back at yer agin'."

"Sure, you jes' kinder duck yer head over yer shoulder an' squint down at me an' say, 'Pon honor.' An' den I sorter gurgles, 'So good of you ter say so.' After we gits 'rouh wit dat, we makes believe we're two other people at de same party."

"An' say some'ing different?"

"Naw, we says de same 't'ing. An' we keeps it up till we gits tired, an' den we says 'Good night. I've had a pufkilly luvvily evenin', and den we goes home."

"An' you've got de brick in yer han' all de time?"

"I ain't lettin' go of it, not fur a minute."

"All right, I'll play. But it jest goes to show all over agin how big a fool a woman kin make of a man of she onest makes up her mind to it."

Our Turn Next.

The Chinese Government has aroused itself after centuries of slovenly house-keeping. It proposes to refurbish and redecorate. It has sent out its wily old major-domo, Li Hung Chang, to study styles and hunt bargains. The Germans and then the French flattered and enjoyed him and showed him their wares. They urged him to decide at once. "Now is the time to buy," said Germans and French. But Li is too good a shopper for that. "These are fine goods," said he, "and I shall probably take them. But I must look at all before I decide." And now England is taking down her goods, trying on her best gowns and bonnets, and parading all before him. And soon it will be America's turn. Li has some big orders to place. We shall do well to show him everything and give him a good time.—New York World.

Rival Artists.

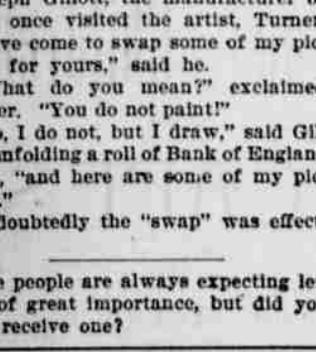

Joseph Gillott, the manufacturer of pens, once visited the artist, Turner. "I have come to swap some of my pictures for yours," said he.

"What do you mean?" exclaimed Turner. "You do not paint?"

"No, I do not, but I draw," said Gillott, unfolding a roll of Bank of England notes, "and here are some of my pictures."

Undoubtedly the "swap" was effected.

The people are always expecting letters of great importance, but did you ever receive one?

Lydia E. Pinkham's Vegetable Compound Will cure the worst forms of female complaints, all ovarian troubles, inflammation and ulceration, falling and displacements of the womb, and consequent spinal weakness, and is peculiarly adapted to the change of life.

Every time it will cure Backache. It has cured more cases of leucorrhoea by removing the cause, than any remedy the world has ever known; it is almost infallible in such cases. It dissolves and expels tumors from the uterus in an early stage of development, and checks any tendency to cancerous humors. Lydia E. Pinkham's Liver Pills work in unison with the Compound, and are a sure cure for constipation and sick headache. Mrs. Pinkham's Sanative Wash is of great value for local application.

AN AMERICAN'S CUTE SCHEME.

Thomas Montgomery Joy, said to be an American, and hailing from New York, was charged in a local police court in Liverpool, Eng., with obtaining postage stamps by false pretenses. He advertised a bicycle to be given away to each of ten persons sending in the most words from the letters in the word "overland." But each competitor had to enclose a postage stamp. The police found 6,000 letters at the office, where Joy's letters were addressed, and they also found 6,000 other letters addressed to him, but undelivered, in the postoffice. The police, however, have been unable to find any bicycle named the "Overland." Joy was eventually committed for trial.

REPUBLICAN CAMPAIGN OPENING.

A GREAT DAY AT CANTON.

The Largest Political Gathering Ever Seen in Ohio.

The formal opening of the campaign in Canton Friday, gives to Ohio a new mark in political demonstrations. Future comparisons will be made with September 18, 1896, in Canton.

The little city from early morning was literally jammed with visitors from distant cities and nearby towns. The parade in the afternoon was an hour and three minutes in passing a given point. And it was a well-organized affair, the men marching eight and sixteen abreast. But the marchers were only a fraction of the crowd, and when, in response to bugle calls, they assembled at points assigned, there was scarcely any appreciable disturbance. The crowd which filled the streets along the proposed order of march. Railroad men claimed at noon they had handled 30,000 people in Canton. Seventy-five train loads came. State Republican Chairman Charles Kurtz estimated the crowd, present on the streets, in the afternoon parade, at the biggest meeting and about the McKinley home at 100,000, and far ahead of anything in Ohio's history. Congressman Stephen A. Northway, of Garfield's old district, said the crowd was three times as large as the memorable Western Reserve Garfield meeting.

At noon the hustle and hurry of parade organization began. The parade moved in four divisions of footmen and with a large contingent of wheelmen and horsemen. Pennsylvania, West Virginia and other states formed the first division; Ohio, outside of Stark county, the second; Stark county outside of Canton, the third; and Canton the fourth. Each of the delegations was assigned to a position of honor. Major McKinley, the visiting speaker, the officers of the day and guests of honor rode in open carriages at the head of the parade. A short line of march brought the parade to a monster tent, with accommodations for 30,000 people. Here the first meeting was held. Governor Bushnell presided and made a short introductory address.

SHOT HIM FOR A QUARTER.

Probable Fatal Ending of a Game of Craps Between Negroes.

Moses Strother, a colored man, whose home is in Hammondstown, Va., was fatally shot by Richard Jones, also colored, whose home is in the same town. The deed was committed because Strother refused to pay Jones 25 cents, which the latter had won from him in a game of craps. After two shots had been fired into Strother, he raised himself on his elbow and fired three shots at Jones, one of which took effect in his right leg.

Both men were laborers employed on the new Butler and Pittsburg railroad, in course of construction. They occupied shanties in what is known as McDonald's camp, three miles back of Chewah, on the West Penn road. The men did not work Friday, and in the afternoon received a keg of beer from Allegheny, which some 20 of them drank. A game of craps was started and Strother risked 25 cents on a play. Jones, who was acting as "banker" of the game, demanded the money, and Strother refused to give it to him. Jones drew a 38-caliber revolver, and fired two shots at Strother. The first took effect in the left side just below the heart, while the other entered the abdomen. After he fell to the ground, drew his revolver from his pocket, and opened fire on his opponent. The wildest confusion reigned among those present. Constable J. H. Swoop, of Springdale, was one of the first to have the affair. He hurried to the camp, where he arrested Jones and secured medical attention for Strother. Both men were taken to the West Penn hospital, Pittsburg.

BYNUM APPOINTS HIS AIDS.

Managers and Financiers of the National Democracy Selected.

W. D. Bynum, chairman of the National and Executive committee of the National Democratic party, announced these appointments as members of the Executive committee: W. D. Haldeman, Louisville, Ky.; L. C. Krauthoff, Kansas City, Mo.; F. W. McCutcheon, St. Paul, Minn.; George Foster Peabody, New York; John C. Bullitt, Philadelphia; C. Vey Holman, Rockland, Md.; J. M. Faulkner, Montgomery, Ala.; M. E. Franklin, New Orleans, La.; John B. French, of Indianapolis, secretary and treasurer.

Mr. Bynum also appointed the following members of the Finance committee: Charles J. Ganda, chairman; Abram S. Hewitt, William C. Whitney, John B. Crummings, Samuel B. Hook, George Foster Peabody, James Speyer, Walter Stanton, J. Hampden Robb, Roswell P. Flower, George F. Vail, Charles S. Fairchild, John C. Bullitt, John A. McCall, W. B. Grace, Theodore W. Myers, Charles Trevelyan, August Belmont, John L. Mott, George Elbert, John P. Frenel, treasurer.

PUBLIC PROSECUTOR THREATENED.

He Receives a Letter Saying He Will Be Dynamited Unless Tynan is Released.

M. Bossu, the Deputy Public Prosecutor in charge of the case against F. J. P. Tynan, the alleged Irish dynamiter, received a violent letter informing him, in the name of a committee of Lywebilles and the Anarchist Brotherhood, that unless Tynan is released within 24 hours he (M. Bossu) will be blown up with dynamite.

The letter was written with a red fluid, believed to be blood, is dated Thursday, September 17, and was posted at Leon, capital of the Department of Aisne, about 80 miles from Paris.

The Chinese Emperor's Letter.

The personal letter from the Emperor of China to President Cleveland, which formed the credentials of Li Hung Chang, has been placed on exhibition in the library of the department of state at Washington. The letter is written on a scroll of lemon colored parchment paper about five feet in length by a foot and a half in width, a portion being in ancient Chinese and a part in modern Chinese characters, with the royal seal and the emperor's autograph in the center. The envelope is unique, being a great sheet of yellow satin, embroidered in gold and silver and with exquisite workmanship, with five large Chinese double dragons, conventionally arranged.

Thomas Montgomery Joy, said to be an American, and hailing from New York, was charged in a local police court in Liverpool, Eng., with obtaining postage stamps by false pretenses. He advertised a bicycle to be given away to each of ten persons sending in the most words from the letters in the word "overland." But each competitor had to enclose a postage stamp. The police found 6,000 letters at the office, where Joy's letters were addressed, and they also found 6,000 other letters addressed to him, but undelivered, in the postoffice. The police, however, have been unable to find any bicycle named the "Overland." Joy was eventually committed for trial.

NO SIGN OF A BOOM.

But Moderate Improvement in General Business Continues.

R. G. Dun & Co.'s Review of Trade says there is still no distinct improvement in business, although conditions favor it. Confidence slowly rises, speculative buying of materials for future use continues, imports of gold do not cease, and the Bank of England has not tried to check them by further advance in rates, as the weight of the demand now falls upon France.

But an enormous business in held back and the future is more clear. Maine's great majority had no such influence as may be anticipated from a verdict less emphatic. To many minds nothing an Eastern State can do in a contest represented as sectional gives sufficient assurance how the Western and Southern States may decide.

In cotton, hides, wool and pig iron, buying openly speculative in character marks the current business. Wheat has risen 1/2c, although Western receipts for the three weeks have been 17,855,968 bushels against 16,791,680 last year. Corn has scarcely advanced as Western receipts are still as large as a year ago with exports smaller.

The only industry showing increase of working force is the cotton manufacture, restriction of output having secured more healthily demand for some goods. Most of the mills have started or are about to start, though the uncertainty of the cotton market embarrasses. Prices of staple goods have advanced so generally that the average of representative quotations is 6.7 per cent. higher than in the first week of August. No such improvement is seen in wools, but the speculative buying of wool, nearly all at one price, has led to the home demand. For the past three weeks against 17,133,470 last year and 24,572,480 in 1892.

The maturity of large wool notes is said to be the cause of falling and prices do not rise, though quotations are more sensibly maintained. There has been a fair work in dress goods and better demand for cloakings, but the heavy failure of a Philadelphia firm tends to restrict operations.

The iron and steel manufacture is still waiting for business which nearly half its producing capacity idle, but hopefulness and the speculative buying of pig iron sustain prices. Sales said to amount to 25,000 tons have been made of Alabama iron for shipment to England, and a large amount of pig iron does not remain at all, and the various associations still hold combination prices, though the demand is remarkably slender. The coke output is less than 50,000 tons weekly.

MINING RATE CUT.

The Price of Digging Coal Reduced to 54 cents a Ton.

The union members of the Pittsburgh district adopted resolutions which will bring about a peculiar condition in the mining situation. It is a voluntary reduction of the rate of wages in order to meet the competition of non-union miners and operators. By this method it is hoped to bring all those outside the fold of the union to terms and compel them to sue for peace in order that a better condition may be brought about.

P. H. Penna, president of the United mine workers, took part in the proceedings, and advocated the action subsequently taken by the convention. Addresses were also made by Secretary Warner and Cameron Miller, national vice-president. Many of the delegates expressed their intentions, and never in the history of miners' conventions did the question at issue receive more consideration. The plan was proposed several years ago, and since that time been more or less discussed.

Most of the time was consumed in fixing the amount of the voluntary reduction. A number of the delegates were in favor of making the district price 50 cents a ton, but it was argued that the principal competitor was the New York and Cleveland coal company, whose recognized rate is 54 cents. It was finally agreed that 54 cents should be the district rate.

After the resolution had been passed Michael D. Harford, president of the United mine workers of Ohio, addressed the convention. He said he deplored the condition of affairs in the Pittsburgh district, as a reduction meant a further reduction in Ohio. He urged that the miners' present action was justified, and in the end would bring about a condition which would ultimately be of lasting benefit to the coal mining craft in the Buckeye state.

NEW PACING STAR.

Star Pointer Steps the Three Fastest Heats Ever Made in a Race.

Star Pointer, at Mystic Park, Medford, Mass., not only beat two accredited faster horses, Robert Jay, 2:01 1/2, and Frank Agan, 2:03 1/2, but paced the three fastest heats ever made in competition, the times being 2:03 1/2, 2:03 1/2, and 2:03 1/2.

He also lowered the world's record for the fastest heat ever paced, 2:03 1/2, as well as the records for the fastest quarter and half, 0:29 1/2, and 0:59 1/2, respectively.

The race between the three great pacers was phenomenal, for while in the first heat Robert J. was beaten by 10 lengths, in the next two he was close on the leaders, coming in second in the third heat. Frank Agan, in the whole race was never a length behind, and at one time was a nose to the good.

Star Pointer, however, managed to get under the wire first in every heat, and must have had something in reserve, for McCleary never raised his whip in the three heats.

Church Attacked.

A mob attacked the Armenian Presbyterian church, in Aguas Calientes, Mexico, on the night of September 15. The pastor is the Rev. D. Sharo. The mob threw stones at the doors and windows. A crowd attacked the Morelos protestant college in the same city, on September 16, breaking every window in it. Several arrests have been made and the authorities are anxious to identify the leaders. U. S. Minister Ransom has been appealed to use his best offices with the government to secure the punishment of the offenders.

No Fusion in Indiana.

Fusion between the Indiana Democrats and Populists was defeated. The populists demanded seven of the 15 electors, and the withdrawal of Sewall, while the Democrats refused to concede that four of the electors and demanded the withdrawal of the Populist ticket. As soon as this was reported the committee of Populists decided to negotiate no longer, and adopted a resolution that a full ticket of electors be put in the field. The Populists cast very nearly 30,000 votes in Indiana last election.

Nominated for Congress.

Second Michigan district—Thomas E. Backworth, Democrat.

Second Wisconsin district—A. C. Larsen, Democrat and Populist.

Second Iowa district—Alfred Durst, Democrat.

Third Illinois district—Clarence S. Darrow, Democrat.

Sixteenth New York district—B. L. Fairchild, Republican.

Long Distance Race.

The British ships Ditton and Cedarbank, sailed out of San Francisco, September 14, for a race in distance more than half way around the world. Each is laden with wheat, the Ditton, Captain Moody, being bound for Queenstown, and the Cedarbank for Hull. Their captains, it is said, have put up quite a large sum on the sailing qualities of their ships and a good deal of interest has been aroused over the race so that news of either vessel will be watched with eagerness.

WAS NOT A SUCCESS.

An Idea in Rapid Transit that Once Made a Hit.

Several years ago a stranger with ideas worthy of Colonel Sellers located at Mount Holly, N. J. He talked of many inventions which he had under way, but the greatest was the bicycle railway. The rails could be laid on brackets extending over the street, on awning posts and from telegraph poles and trees in the country, and having nothing in its way, great speed could be made over it for long distances. The machines were very much like an ordinary bicycle turned "upside down," split up the middle and placed upon the track like clothepeeps. In front and back of the rider were grooved wheels about nine inches in diameter, both resting upon a steel rail, wedge shaped like a knife blade, and almost as sharp. This was fastened to a 3x3 inch plank, securely fastened to posts at frequent intervals. There being but little friction or weight, propulsion was easy, requiring but slight expenditure of energy, and this latter and very important element was generated from a ratchet gear and clutch levers instead of pedals.

THE FINEST BICYCLE OF ALL.

The scheme made a hit. A company was formed and the road put in operation. It passes over wood and farm land. The scenery is exquisite. For a quarter of a mile from Mount Holly the road is double-track. During the remainder of the distance the Rancocas creek gets in the way eleven times and is crossed on pillars driven "single file." But when the farmers want to get into their fields and let down a strip of fence, the next luckless rider that comes along is dumped. There has been endless wrangling over right of way. The employees of the big machine shops at Smithville go on the "bike" railroad to and from their homes in Mount Holly. But the scheme has never paid even the cost of operation. The track is getting rickety and sadly out of plumb. The inventor, disgruntled, has sold out his interest and gone to Florida.

Effect of High Altitudes.

Some German savants have shown recently that there is a notable increase in the proportion of the number of corpuscles in the blood in persons who go from a low to a high altitude. This increase takes place in from twenty-four to thirty-six hours. It is possible that this fact may be one of the reasons for the beneficial effects of high altitude in cases of pulmonary tuberculosis.

A Lawyer's Testimony.

From the Herald, Potsdam, N. Y.

George Boardman Stacey, of Nicholasville, St. Lawrence County, New York, has for many years ranked as one of the brightest lawyers in Northern New York and for the past twenty years has been the acknowledged leader of politics in the east end of this great county. Mr. Stacey was admitted to the bar in 1865, and up to October, 1895, continued to practice his profession. All this time, however, he had been active in politics and had been undermining his one iron constitution, and during this month of October he suffered a stroke of paralysis which left him practically helpless. For weeks he was in a terrible condition, the efforts of the doctors proving of no avail. All at once he began to recover, however, and was soon seen about town again, frequenting his former haunts and shaking hands with his old friends and acquaintances. His rapid recovery was the talk of the town, and a reporter hearing of the wonderful cure decided to visit Mr. Stacey and ascertain if possible its cause.

Mr. Stacey was inclined to be communicative, and the following is his story of his illness and cure:

"I was presiding over a political meeting and had just arisen to give a friend who was to address the meeting a rousing sendoff, when to my astonishment I discovered I could not talk. My tongue seemed paralyzed. I managed to say a few words, however, and took my seat, where by sheer will power I managed to sit until the meeting was finished. On arising to go home, however, I found I could not walk and seemed to have lost control of my limbs. I was assisted to my room, but on feeling better in the morning I went down to my office. Here I suffered another shock which left me flat on my back. I finally recovered sufficiently to get up, but was left a complete physical wreck. I could not half talk or guide myself at all. I could not write or even hold a pen, and was unable to transact any business. I was like a drunken man and went staggering about.

"The doctors did all they could for me but still failed to improve. I had always been greatly opposed to patent medicines in any form, but on the recommendation of my friend, Ira H. Smith, I finally decided to give Dr. Williams' Pink Pills for Pale People a trial and see if they would do me any good. To my great surprise I began to notice an improvement before I had taken half a box, and by the time I had taken three boxes I felt like a new man. As nothing else seemed to help me I lay my recovery to the Pink Pills for Pale People. On going to take the pills, and have not since returned to using them, although I am confident they are a splendid thing, and I will probably use them again.

Mr. Stacey's remarkable case is but one of a thousand others which have been cured by these magic pills, where all else had failed. Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an infallible specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, scintilla, neuralgia, rheumatism, nervous headache, the after effect of a grippa, palpitation of the heart, pale and sallow complexion, all forms of weakness, either in male or female. Pink Pills are sold by all dealers, or will be sent postpaid on receipt of price, 50 cents a box, or six boxes for \$2.50 (they are never sold in bulk or by the 100), by addressing Dr. Williams' Medicine Company, Rochester, N. Y.

France produces yearly about 25,000,000 bottles of champagne.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & CO., TOLEDO, O. Sold by Druggists, etc. Hall's Family Pills are the best.

The "White City Special." The "Big Four" have named their new train leaving Cincinnati at 1:00 p. m., and arriving Chicago 9:00 p. m., the "White City Special," in perpetuation of the memory of the World's Fair. This train is first to introduce an eight-hour schedule between Cincinnati and Chicago. It is magnificently equipped with Buffet Parlor Cars and Dining Cars.

Fifty-nine fish hooks have been found inside a codfish caught off Flamborough Head. If Dobbin's Electric Soap is what so many insist that it is, you can use and expect to get out of it, your greaser has it, or can get it, and you can scrub for yourself very soon. Don't let another Monday pass without trying it.

The modern nickname of masher comes from the Romany word "masha"—fascination. FITS stopped free and permanently cured. No fits after first day's use of DR. KLINE'S GREAT NEURALGIC, FREE-SPECIAL TREATMENT. Send to Dr. Kline, 931 Arch St., Phila., Pa.

Mrs. Winslow's Soothing Syrup for Children teething, soothes the gums, reduces inflammation, allays pain; cures wind, colic, 25c a bottle. After physicians had given me up, I was saved by Winslow's Cure. H. ALPH EDWARDS, Williamsport, Pa., Nov. 22, 1893.

Rosin's Many Uses. It is perhaps not commonly known that the finer grades of rosin are used in the manufacture of paper. Cheap printers' ink contains rosin. Rosin also enters into the composition of scented toilet soaps, of sealing wax, of putty, of sizing and of varnishes. It likewise furnishes by distillation a lubricating oil for machinery which compares even with petroleum in cheapness.

FINE CLOTHING SAVED BY Sunlight Soap

Nothing is so harassing to the feelings as to have beautiful clothes torn and eaten by the use of poor soaps, full of injurious acids. Not only does Sunlight Soap prevent wear and tear, it actually saves clothes. It's a labor-saver, too, because it does about all the work itself—little rubbing and no bother. Besides, it prevents woollens from shrinking.

"A Good Foundation."

Battle Ax PLUG

Lay your foundation with "Battle Ax." It is the corner stone of economy. It is the one tobacco that is both BIG and GOOD. There is no better. There is no other 5-cent plug as large.

Try it and see for yourself.

"Where Dirt Gathers, Waste Rules." Great Saving Results from the Use of

SAPOLIO

So far, no species of vulture has been recorded from Australia.

Gladness Comes

With a better understanding of the transient nature of the many physical ills which vanish before proper efforts—gentle efforts—pleasant efforts—rightly directed. There is comfort in the knowledge that so many forms of sickness are not due to any actual condition of the system, which the pleasant family laxative, Syrup of Figs, promptly removes. That is why it is the only remedy with millions of families, and is everywhere esteemed so highly by all who value good health. Its beneficial effects are due to the fact that it is the one remedy which promotes internal cleanliness, without debilitating the organs on which it acts. It is, therefore, all important, in order to get its beneficial effects, to note when you purchase, that you have the genuine article, which is manufactured by the California Fig Syrup Co. only, and sold by all reputable druggists.

If in the enjoyment of good health, and the system in regular, then laxatives or other remedies are not needed. If afflicted with any actual disease, one may be commended to the most skillful physicians, but if in need of a laxative, then one should have the best, and with the well-informed everywhere, Syrup of Figs stands highest and is most largely used and gives most general satisfaction.
