## Bed Clothing Belonging to the Patients Burned in the Streets.

Sunday was the quietest of the week in New Orleans, and the fever situa-tion, in spite of the appearance of a rather large number of new cases may be said to have much improved. Fif-teen cases were recorded on the books of the board of health, but there was no death. The authorities received re-ports from nearly every patient that is now under treatment, and these were all to the effect that the cases are doing well and that no patient is in any im-mediate danger.

## Landslide on the Chilcoot Pass Wipes Out a Camp of Gold Hunters.

The Pioneer, which arrived at Port Townsend, Wash., the other day, brings a report of a landslide which occurred near Sheep Camp, on the Chilcoot pass, last Sunday morning, in which 18 men are said to have lost their lives. Only one body is said to have been recovered —that of a man named Choynski, a cousin of Joseph Choynski, the prize fighter. The men supposed to have been lost were packers on the Dyea trail. The officers of the Pioneer say that the story was brought to Skaguay Sunday evening by three men who told it in such a way as to leave no doubt as to its truthfulness. They described the avalanche as consisting of rocks, ice and dirt which had been loosened by the recent unprecedented hard rain which has been failing almost continu-ously for the past month. near Sheep Camp, on the Chilcoot pass, usly for the past month. The men who bring the story say that at 5.30 in the morning a peculiar sound was heard, and before the residents of the camp could fully dress they found themselves rapidly borne down the canyon on a mass of moving debris from the mountain side. A majority of the residents of Sheep Camp escaped although nearly the entire village was destroyed. The slide struck the town on the northern part, where nearly all the packers were quartered in tents and asleep. The main part of the slide from the mountains missed Sheep Camp proper, although from the report very little of the town remains. The packers' camp was wholly carried away and it is impossible to learn the names of the unfortunates, as they were all known by their surnames. All the bridges on the Skaguay river have been washed out and the river is a raging forrent. Here they were compelled to remain until after the high water subsided. They then continued their course up the river; found that they had blown out a natur-al dam, which had backed up a great quantity of water into a lower portion of the cave. Beyond that even was an immense lake that they had explored. They then made their way out of the cave by means of a passage through which they saw daylight.

The Evans breaker of A. S. Van Wickle & Co., operated by Kennedy & Warner, at Beaver Meadow, four miles Warner, at Beaver Meadow, four miles from Hazieton, Pa., was burned to the sround Tuesday night. The operators are convinced that it was incendiary. The loss will be about \$50,000. The breaker has been idle since noon last Tuesday, not in consequence of the strike, but on account of lack of water. About 50 men were employed in the mines connected with it. All these men have been working continuously since the Lattimer shooting. They were driven out on two occasions about two weeks ago by bands of strikers from Coleraine, but returned atterwards. Mr. Warner declares that they had no grievances. There is a well-founded theory that women had a hand in the fire, as one was heard to say to-day: "If we can't get the men out, we'll fix it so that they can't get in." By direction of the operators the ef-forts of the men were directed toward preventing the fire from reaching the mine shops. As an extra precaution, the planes leading to the slope were blown up with eight or ten charges of dynamite. Another part of the fire brigade was concentrated in keeping the fitames from the boiler house, a couple of hundred feet from the break-er. A short distance in the other di-rection were the powder houses, but all the powder was removed to a safe dis-tance. Governor Hastings will have a confrom Hazleton, Pa., was burned to the
