Mrs. Winslow's Scothing Syrup for children teething, softens the gums, reducing in-flammation, allays pain, cures wind colic. Ec. a bottle.

Government's Old Gold Business. Hard times can be pretty well esti-mated by the amount of gold jeweiry, old plate and trinkets, says Director of the Mint Preston, presented to the government mints. During the period of extreme depression the amount of metals purchased by the government reached high figures, but in the past year H has dwindled considerably. At the approach of the holiday season the jewelry sent to the mints to be sold increases in large proportion compared to the quantity sold in the dull season. Soon after New Year there is usually a heavy installment at the assay offices

Within the past week a pair of gold bracelets, which cost \$50, were sent to the mint bureau here to be sold for the gold in them. Their owner said he could not keep them, as he required the money, and asked Director Preston to dispose of them at whatever value they might bring. The bracelets, on being melted down, were shown to contain \$17 worth of pure metal.

From 1878 down to last year the amount of money paid out by the gov-ernment for old gold, plate and jewelry has steadily increased. The high-water mark was reached in 1801, when the government paid out for plate and jewelry \$4.035,710. The Philadelphia mint melts nine-tenths of the plate and jewelry presented to the government. Payment is generally made in gold when the jewelry is of that metal.— Ohleago Inter Ocean.

Boarding House Keeper-now sorry I feel for those poor Klondike miners this cold weather! Boarder-Madam, there is no need of going so far to place your sympathy. You seem to forget that I occupy one of your hall rooms,—

"I DO MY OWN WORK."

So Says Mrs. Mary Rochiette of Linden, New Jersey, in this Letter to Mrs. Pinkham.

"I was bothered with a flow which would be quite annoying at times, and at others would almost stop.

"I used prescriptions given me by my physician, but the same state

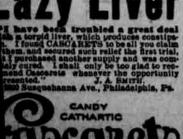

continued. time I was taken with a flooding, that I was to obliged keep my bed. Finally, in despair, I gave up my doc-tor, and began taking your medi-cine, and have certainly been greatly

neffted by its use

CONGRESS.

SENATE.

A bill providing for the taking of the twelfth census was passed by the Senate Wednesday. Under it a director of the census, an assistant director and five expert statisticians will be appointed immediately to make the preliminary arrangements for the taking of the census of 1900. A determined effort to provide that the employes of the census bureau should be examined, failed.

fort to provide that the employes of the census bureau should be examined. falled.

At Thursday's session of the Senate. Mr. Carter. (Mont.), in connection with the rejection by the Government of the steamship Centennial as a transport, said ship owners on the Pacific coast had been endeavoring to compel the Government to pay inordinate and extortionate charges for ships to be used to transport troops to the Philippines. Mr. Perkins. (Cal.) declared that the vessel owners of San Francisco had named a rate fully 80 per cent less than they usually received for them. Mr. Lodge. (Mass.) precipitated a lively discussion by offering a resolution directing the committee on claims to investigate as to whom the money was paid under the claim of the Methodist book concern south. Mr. Lodge explained that a contract had been discovered for the payment of 35 per cent of the proceeds of the claim to lobbytsts and that one man has received the immense sum of \$100,800.

Last Friday the conference report on the war revenue bill was agreed to by the Senate after a discussion lasting four hours.

The debate indicated generally that

four hours.

The debate indicated generally that The debate indicated generally that the bill, as agreed upon by the conferees, was reasonably satisfactory to everybody, except as to the bond provision. The votes cast against the adoption of the report reflected the opinions of those Senators who are opposed to any increase in the interest-bearing debt of the country.

The report was agreed to by the decisive vote of 43 to 22. Every Republican voted for the measure and their votes were supplemented by those of eight Democrats, one Silver Republican and one Independent.

After disposing of the urgent war deficiency bill, as passed with amendments by the Senate, the House Tuesday adopted the conference report upon the sundry civil bill, so far as it embodied agreements. The House then began voting severally upon the 45 Senate amendments, upon which no agreement had been reached in conference, acting favorably upon three and rejecting the five.

The House passed a bill directing the secretary of war to return to Ohio the flags carried in the civil war by the Twenty-first, Fifty-eighth and Sixtieth regiments of Ohio infantry, and to New York the flag of the One Hundred and Third infantry and the Seventh heavy artillery.

Mr. Gaines (Dem., Tenn.) presented a newspaper criticism upon the agents of the Government who had purchased the Merrimae at an alleged coat of \$150,000 in excess of the boat's cost of construction.

The bill providing for the participation of volunteer soldiers in congressional elections during the war was taken up. Mr. Balley (Dem., Tex.) and Mr. Williams (Dem., Miss.) raised the question of the Constitutionality of the provision declaring "the requirements of the State laws as to registration shall not apply to the electors."

registration shall not apply to the electors."

The session of the House Wednesday, began and ended with Hawalian incidents, Mr. Grosvenor (Rep., O.), a leader of the annexationists, figuring. They grew out of the anxiety of those who want early consideration leat the opposition win a victory and effect undue delay, if not the defeat of the resolutions, at this session. Mr. Grosvenor asked unanimous consent to read and have referred to the committee on rules a resolution providing for giving the Hawalian resolutions precedence over all other business, except conference reports, until disposed of. Many objections squelched him.

The House Thursday agreed to the conference reports, until disposed of. Many objections squelched him.

The House Thursday agreed to the conference reports on the war revenue bill. The vote was 154 to 167. The report was presented by Mr. Dingley, it includes the acceptance by the House of many Senate amendments, including those putting taxes on beer, special laxes on proprietary medicines, corporations producing petroleum and sugar, and on tea. The Senate recedes, among other things, from its coinage of the silver seignorage, a substitute providing for the coinage of not less than \$1,500,000 a month.

Mr. Dingley said the great ends which the House had set out to accom-

Mr. Dingley said the great ends which the House had set out to accomplish were the raising of approximate-ly \$175.00.000 from taxation, and from \$400,000,000 to \$600,000,000 from other sources. He said the House conferees \$400,000,000 to \$600,000,000 from other sources. He said the House conferees made no effort to eliminate the tax on tea, owing to the decisive vote by which the Senate had incorporated it, and because the new crop was just about to arrive, stocks on hand werevery low, and the consumption in the country amounted to 100,000,000 pounds annually. Relative to the coinage of silver bullion. Mr. Dingley explained that the provision would result ultimately in an increase of circulation outstanding by the amount of the present seignlorage, or about \$42,000,000. The provision was not materially different from the law of 1890.

The feature of Friday's session of the House was the securing of an agreement to consider and vote upon the Newlands resolution to annex Hawaii. The debate will continue until next Wednesday afternon, when a vote will be taken.

TRADE REVIEW.

Helpleseness of the Spanish Navy Restores Canfidence

Belpissenses of the Spanish Navy Restores Confidence in the Business World.

R. G. Dun & Co.'s Weekly Review of Trade reports as follows for last week: The certainty that the Spanish Atlantic fleet is imprisoned and powerless to do harm has helped to make the tone of markets more confident. Every step of progress during the week, which has looked toward an early termination of the struggle, has been reflected in the market and in lower rates for money. All industries have felt the uplifting influences. In finances the growing anxiety to lend on even long exchange at low rates in place of shipments of gold to this country, begins to accumulate a standing credit shipments of gold to this country, begins to accumulate a standing credit
in favor of the United States. A
stronger situation it would be difficult
to describe. Men have been buying and
selling stocks with some blindness,
though the course of events has all the
time warranted a higher market.
Other countries have yet to pay in
some way an enormous balance to the
United States on gnerchandise transactions, and it will save speculators
much trouble and loss to keep the fact
in mind.

in mind.

Men talk as if wheat had gone down out of sight, but the collapse of May speculation has only made it more evident that the outside world more evident that the outside world requires nearly, if not quite, all the wheat this country can spare. Last week Atlantic exports, flour included, were 4,206,293 bushels, against 1,634,603 bushels last year, and Pacific exports were 253,213 bushels, against 125,212 bushels last year, and it is close to the end of the season. Over 210,000,000 bushels of wheat have already been exported, and almost 200,000,000 bushels corn. 4.134,800 bushels during the past week, against 1,787,035 bushels last year, and the market is justified in feeling that those who have gone so far beyond all precedent in defying current reports are entitled to pay for current reports are entitled to pay for

Iron and steel production has declin-

current reports are entitled to pay for it.

Iron and steel production has declined because several establishments have stopped for repairs. Yet the weekly output June 1, 225,397 tons, against 234,163 May 1, with the unsold stocks which decreased 18,142 tons during the month, indicate a consumption weekly of 233,876 tons, against 228,258 in April, so that the ablest iron journals are in error in saying that the apparent consumption does not keep pace with the production of 1,000,000 tons monthly. Eastern markets are much more embarrassed, as before, while the western are crowded beyond all precedent. But prices are not changing in either section, and the prospect for the manufacture is unsatisfactory, as it would be expected, with the prospects. The woolen manufacturers are buying no wool, and the sales at the three chief markets during the past week were only 2,549,300 pounds, against 4,578,750 in 1892. But the demands for goods proves somewhat better in many directions than was expected, and the government requirements have compelled some manufacturers to buy somewhat largely grades of wool which they have not expected to require. The auction sale of carpets, resulting in prices said to average 50 per cent below the list quotations, does not encourage buying, and in carpet wools the market is decidedly tame. In cotton goods there is a stronger tone throughout, with print cloths sustained at the recent advance, but the comming crop is watched with anxiety. It is still somewhat doubtful whether the demand for goods during the past two months has been materially checked by the expectation that the price of goods would decline, and if so, a marked advance in prices and increase in demand may be expected.

Failures for the week have been 203 in the United States, against 30 last year.

Development of the Transvast.

In 1802 the main trunk line from lape Town was pushed forward from a then northern terminus to Johannesburg. The distance from Cape Town to Johannesburg by rail is 1,013 miles. In 1804 the road was completed from Delagoa Bay, a port in Portuguese teritory on the southeast coast of Africa, to Johannesburg—a distance of 377 miles. The third road reached Johannesburg a year later, from Durban, a nesburg a year later, from Durban, a port in the British colony of Natal, dis-

tant 483 miles. From 23,000 ounces of gold in 1887, the annual output has risen to 3,000,000 ounces in 1897, giving the Transvant the second place in the world's gold production. There is no doubt that the present output of the country will rapidly increase; and probably within a few years, notwithstanding the increasoutput of other countries, the Transvaal will rank first as a gold pro ducer.

The town of Johannesburg may be taken as a good index of the wonderful expansion of the gold-mining indus try of the district. From a few buts in 1886, it has developed into a town unexcelled, if indeed equaled, in the imposing character of its buildings by any of the enterprising mining towns in Western America. Indeed, Johannes burg has but little of the aspect of an American mining camp. In its general appearance it reminds an American more of Spokane or Salt Lake City .-John Hays Hammond, in the Engineer

Tea at \$148 per Pound.

One hundred and forty-three dollars pound is what Ceylon ten of a certain kind brought at auction in London some time ago. This is stated, says the Buffalo Courier, on the authority of J. H. Grairo, of the Ceylon Importing Company, who says planters of Ceylon were as much surprised as you or I or the next person at such fabulous price. Owing to certain peculiarities a pound of that tea probably repre sents, approximately, one hundred and forty-three dollars' worth of labor; but the figure it fetched is so extraordinary as to give the tea or the sale absolutely no commercial value whatever. This is particularly so because this ten has no appreciably finer flavor. It is named "the golden tips." The leaves, when only twenty-four hours old, are picked from the top only of tea bushes. They are very small, not half as big as your finger nail, and extra expert pickers are required to gather them. It can be imagined that three hundred or four hundred people on the plantation must pick over several acres of bushes to get enough green one-day-old tea leaves to make a pound of tea when dried. Ordinary tea is from leaves which are ten days old, and consequently very much larger.

Women in Business

From the Free Press, Detroit, Mich. A prominent business man recently ex-pressed the opinion that there is one thing that will prevent women from completely filling man's place in the business worldthey can't be depended upon because they are sick too often. This is refuted by Mrs. C. W. Mansfield, a business woman of 58

C. W. Mansfield, a business woman of 5s Farrar St., Detroit, Mich., who says:

"A complication of female aliments kept me awake nights and wore meout. I could get no relief from medicine and hope was slipping away from me. A young lady in my employ gave me a box of Dr. Williams' Pink Pilis for Pale People. I took them and was able to rest at night for the first time in months. I bought more and took them and they cured me as they also cured several other people to my knowledge. I think that if you should ask any of the druggists of Detroit, who are the best buyers of Dr. Williams' Pink Pilis they would say the young woman. These pilis certainly build up the nervous system and many a young woman owes her life to them.

"Asa business woman I am pleased to recommend

=0 methan any physician and I can give Dr.-Williams'

P e o p l e credit for my general good health to-day."

No discovery of modern times has done so much to enable women to take their proper place in life by safe-guarding their health as Dr. Williams Pink Pilis for Pale People. Acting directly on the blood and nerves, invigorating the body, regulating the functions, they restore the strength and health to the exhausted woman when every effort of the physician proves unavailing.

vailing.
For the growing girl they are of the greatest benefit, for the mother indispensable, for every woman invaluable.
For paralysis, locomotor ataxia, and other diseases long supposed incurable, these pills have proved their efficacy in thousands of cases.

American buyers of Mexican woods go to London to make their purchases instead of Mexico. The woods are shipped to London and then back to the United States, for the reason that London is the exchange market of the world.
