BREATHE PURE AIR.

The Necessity For Filling the Lungs at Each Inhalation.

Breathe pure air always. In the lungs most important physiological proce occurs. It is from here that the blo laden with oxygen is sent to all parts the body, giving off along its co. rse i oxygen and taking up carbonic acid ga which it brings at last to the lung when it is cast out in expiration. More sygen is taken in by inspiration ar same process is repeated. So let your breathing be full and deer

ing to the very bottom of the lung order that all of the blood in the re again starting upon its tour stribution through the body. Can or a any more forcible argument in favo loose clothing than this? It is abse utely impossible to seenre plenty oxygen if the clothing is worn at a ight, and oxygen is a food which th dy must have always in abundance to

The air leaving the lungs is laden with that deadly poison carbonic acid gas, which if given off in a close room when no provision is made for its escape and the entrance of pure air soon renders the air utterly unfit to breathe. Perhaps some night you will find yourself unable to sleep and tumble restlessly about able to sleep and tumble restlessly about in bed. When this occurs, go to an open window and inhale the fresh air, breathing slot ly and deeply. A few minutes of this hd you can return to bed and probably will soon be sleeping quietly. What has happened? By its restlessness the bedy was asserting its need of more the body was asserting its need of more xygen. Now you have given it what so emphatically asked for, and it is nict. We get as much uneasiness and isturbance from the want of this food when we do not eat enough, only the nptoms are not so well understood recognized so quickly. Always keep ar mouth closed and breathe through ar nose. Then the air is warmed, dightly moistened and largely freed from particles of dust, so that when it aters the lungs it does not irritate

A condition often met with by phy-icians is aniemia. In this trouble the atient is pale, lifeless looking, tired ad generally used up, often without sing able to tell distinctly how she oes feel. Sometimes these patients say at they have not enough blood. It is cally only an element of the blood thich is wanting, but that is a very content one—namely, the red blood

when you know that it is only those corpuseles which have the power to take up and carry oxygen, you see at once how important it is that the blood should not be lacking in them. Good, wholesome food, plenty of it and well gested will give you the corpuscles. body will have an important element toward health.—What to Eat.

THE SOUTHERN CROSS.

iging Position In the Heavens of This Celebrated Constellation

If Job were to rise from the dead and look toon the heavens, says Professor T. J. I. See in The Atlantic, he would constellations related to one anof old, but he would find that pole had shifted its position among stars, and if an immortal could witss the grand phenomenon which the cession of the equinoxes produces in out 12,900 years he would find the ens so altered that the former asect could be recognized only by an un-erstanding of the changes which had

As Humboldt justly remarks, the autiful and celebrated constellation the Southern Cross, never seen by present inhabitants of Europe and n the United States only on our sera coast, formerly shone on the se of the Baltic and can again be in that latitude in about 18,000 a. The cross will then be visible on thores of Hudson bay, but at present the coast of the coast of

shores of Hudson bay, but at pres-it is going rapidly southward, and a few thousand years will be invisi-even at the extreme point of Florida in like manner the brilliant star Ca-ms in the constellation Argo, situat-some 87 degrees south of Sirius, is r visible in the southern portion of Calted States. In about 12,000 years will cease to rise even in Central arica. From the same cause, if Ptolere to again look upon the heav-Alexandria, he would be unable guize Alpha and Beta Centauri, ognize Alpha and Beta Centauri,
i he easily saw and catalogued in
me of Hadrian. At present these
ificent stars are just visible at the
aids, near Cairo, and in a few
thousand years they can be seen
sellers on the Nile only in upper
