Modern Longevity.

In the seventeenth century the average duration of life was only thirteen years; in the eighteenth, twenty; in the present century it is thirty-six. This great increase in the average length of human life is not, however, an indication of an increase in the vigot and vitality of the race, but it is rather due to the fact that cholera, the black plague and other devastating scourges which formerly overspread whole countries at frequent intervals. sometimes several times during a contury, have been brought more and more under control by improved public sanitation and quarantine. The real test of the vitality of the race is

the average length of human life. but the proportion of centenarians. The proportion of persons who have attained great age is without doubt at the present time much less than ever before in the history of the world.

A Novel Hero's Story.

From the Pimes-Henald, Chicago, IR. Late in 1961, when President Lincoln ismed a call for volunteers, L. J. Clark, of Warren, Trumbull Co., Ohlo, was among the first to respond. He joined the mortar fleet of Admiral Porter just before the memorable operations on the Mississippi River began. It was at the terrific bombardment of the Vicksburg forts. that the hero of this story fell with a shattered arm from a charge of schrapnel.

A Fortune From a Scare.

An inventive genius who suffered from attacks by stray dogs when riding his wheel, set his wits to work to devise something which would be an efficacions, and yet comparatively harmless, means of defense. As a result he has brought out and patented a pocket pistol which will shoct ammonia, water or other liquid. The most vieions dog cannot withstand a few drops of ammonia in his mouth or eyes, and yet there is no danger of actually injuring a valuable animal which might playfully annoy a rider. The weapon has proved so much of a success as a means of defense as well as fun-making, that the lucky inventor is realizing much money from his device.

Mr. White (Cal.) ridiculed the idea that the Hawailan group was needed by this country as a halfway sta-tion to Manila. He pointed out that from San Francisco it was 418 miles nearer to Manila by way of Unalaska than it was by Honolulu. He said, too, it had been urged that the Hawailan islands were needed as a defense of the Nicaraguan canal. Honolulu was 4.210 miles from the western terminus the Nicaraguan canal. Honolulu was 4.210 miles from the western terminus of the Nicaragua canal. He thought it much more desirable to defend the canal from San Francisco, which was only 2.700 miles from the terminus, or from San Diego, only 2.200 miles away. If the Fachle coast is not well defended now, he asked, how can it be made casier to defend by acquiring other ter-ritory that also must be defended? Mr. White maintained that there would be no impropriety in this Government en-

Why he Was Defasted. A correspondent of the China Mail has interviewed Admiral Montejo who was defeated by Dewey at Mania. The admiral who was wounded in the guring the fight said: "The respon-sibility of my defeat lies with the gov-ernment at Madrid. There were no proper vessels here. Ever since I as sumed command of the navy station here I have been asking the govern-ment for ships and torpedoes, but nothing came. I constructed some tor-peroper material and they were very bad. There are very few interruptions on account of labor, and wage scales for the coming year have nearly all been amicably settled. The iron industry is very duil at the East, with complaints that prices do not rise, but at Fittsburg and the West the works are getting more business constantly, and are even competing so sharply that prices more business constantly, and are even competing so sharply that prices are slightly lower for bars, cut nails, steel rails and gray forge, while south-ern iron is also offered lower there than at the East.
