DENNSYLVANIA RAILROAD.

# REYNOLDSVILLE, PENN'A., WEDNESDAY, AUGUST 31, 1898.

#### Rathmel.

Mr. Nichols, manager of the Eleanora Jefferson Supply Co. Store, had business here last work.

Miss Jennie McPherson, who has been visiting at Crenshaw, for some time, returned home Saturday last. A few of our citizens met near Henry

mine Saturday and enjoyed a quiet picnic. Rev. O. H. Sibley, pastor of the M.

E. church, preached Saturday evening and held communion on Sunday evening last.

There will be an lee cream suppor in the P. O. S. of A. hall Monday, September 5th. Ice cream and cake will be served afternoon and evening on the third floor.

The Clearfield Coal and Iron Co, have just finished three houses at this place, which are already occupied. There is a great demand for houses here at present

Miss Jennie Conningham, of Crenshaw, is visiting friends here.

Rev. G. W. Headley, of Harveys Lake, is visiting his daughter, Mrs. A. L. Kengle, and family here. He preached Sabbath morning and evening in the Church of God.

C. V. Clock, of DuBois, and the Misses Clock and Dilbun, of Covington, were visitors here last week.

#### Paradise.

You can sit and hear the humming of the separator at most every barn. P. M. Wells and wife spent Sunday in

 Williamsport.
 TRAIN 15 leaves Philadelphia 8:30 A. m.: Washington, 7.50 A. M.; Baltimore, 8:40 A. M.; Washington, 7.50 A. M.; Baltimore, 8:40 A. M.; Wilkesbarre, 10:15 A. M.; Weekdays, arriving at Driftwood at 5:47 P. M. with Paliman Parlor car from Philadelphia to Williamsport and passenger coach to Kane.
 TRAIN 3 leaves New York at 7:40 p. m.; Phila-delphia, 11:20 p. m.; Washington, 10:40 p. m.; Baltimore, 11:50 p. m.; Mashington, 10:40 p. m.; Baltimore, 11:50 p. m.; Multima sleeping passenger coaches from Philadelphia to Sundays only Fullman sleeper Philadelphia to Erit. Big Run. Quite a number of the folks attended

the ox roast at Emerickville. Lewis Ludwick is erecting a cider

mill to run by water power where eider will be made to order. J. M. Sheesley, while working in the

barn slipped and fell through a knot hole in the floor. He did not get hurt, only sprained his left knee above the ankle

E.S. Syphrit is learning Alfred Sheesley to dig coal. Alf. says when his light goes out he can't see a little bit.

For a neat shave and hair cut you should call on Thomas Cathers. Every thing done up to perfection.

G. E. Heller made an oats stack about 80 feet high. He says he will get a flag and use it for a flag pole.

Mr. and Mrs. Martin Strouse visited friends in Big Run last Wednesday. About sixty of the young folks of Reynoldsville spent a very good time in Paradise last Thursday.

#### A Narrow Escape.

Thankful words written by Miss Ada E. Hart, of Groton, S. D. "Was taken with a bad cold which settled on my lungs; cough set in and finally terminated in Consumption. Four Doctors gave me up, saying I could live but a short time. I gave myself up to my Savior, determined if I could not stay with my friends on earth, I would meet my ab-sent ones above. My husband was advised to get Dr. King's New Discovery for Consumption, Coughs and Colds. I gave it a trial, took in all eight bottles. It has cured me, and thank Ged I am now a well and healthy woman." Trial. bottles free at H. A. Stoke's Drug Store. Regular size 50c. and \$1.90. Guaranteed or price refunded.

# STERN DISCIPLINE.

#### I Is Necessary In War and the Soldier Must Learn to Submit.

One of Detroit's retired officers, who tought in two wars and beloed for years to restrain the savage outbreaks of our Indians, thus delivered himself to the writer:

"The very hardest lessen a young American has to learn when he guters the army is that of obedience. For the first time, his individual antb wity is dethrough. He is as fractions as a thersughbred colt that long rebeis against the whip and spur. It is hard for him to understand that his freedom of action must be subordinated to military neces-He chafes, if he does not openly sity. rebel, but when once whipped into line he makes the best soldier on earth.

"My first drillmaster had been my friend and the friend of my family from my boyhoed up. We had hunted and fished and courted together and ex-changed secrets with a freedom that does not obtain among brothers. One day, early in my experience as a soldier. and while overything was being harried with a view to getting us into Mexico, we had been drilling till I felt rady to drop. The repeated orders struck pain to my cars and I would have conscientionsly sworn that my musket weighed a ton. At length, when within easy carshot of him, I shouted, 'For heaven's sake, Bob, stop this tomfoolery and let's

go over to the tavern.' "He never looked at me but roared. 'Corporal, take that man and drill him like the devil.'

"The corporal did, and I thought I'd die of exhaustion. I fully meant to challenge the drillmaster and whip bim if he declined, but he succeeded in making me understand the imperative necessity of unquestioning obedience in the soldier. It's tough with the raw recrnit, but the quicker he learns his part the better it is for all concerned."-Detroit Free Press.

WAYS OF THE BLUE CRAB.

Some of Its Peculiarities as Observed at New York's Aquarium.

While the blue crab is not commonly thought of as a swimmer and does in fact spend the greater part of its time on the bottom, yet it can very easily sustain itself in the water and swim at a very fair rate of speed. It swims endwise, and when swimming it carries one big claw thrown forward and bent back at the middle joint, making a point projecting at that end of the body, while the other big claw trails straight out astern. If it changes direction, it crooks the claw it had been car-rying straight and lets the other go If it sustains itself in the water free. without progressing, it carries its big claws in front of itself as it would naturally do under ordinary circumstances on the bottom, but it has to keep its little claws in motion to sustain itself, and in swimming the little claws are kept actively at work. Besides making a good degree of progress through the water in swimming the blue crab can change its course or swim to a higher or lower level with facility. When frightened, the blue crab moves off sideways, but when moving about at home

When Charles Dickens was to make Lis first appearance in Boston before nn American audience as a reader, an immense crowd awaited him. The enthusingm of the people for the most popular novelist then living had risen to fever heat. One of the wost ardent of his admirers afterward told t is litthe incident of the evening:

Dickens in Evening Dress.

"With a few gentlemen who wished to welcome and show him attention I was in the little room at the back of the platform when Diekens entered it. He was a rather stout man with a some-what red face, and I saw to my surprise, that he was dressed in an exaggerated servicity to the extreme fashion. "More than this, he were a benton-niere in each buttenhole, and two

watches, the chains of which were strong aggressively across his chest. There was a gaudy bad taste in his appearance which his friends regretted, knowing how distasteful it would be to most of his admirers who appreciated his genius and enjoyed his writings.

'No one, of course, could broach the subject to him, and he appeared that night and every other night of his engagement in the same attire. The universal comment was, 'Why, this is a petit maitre.' How can a man with such tastes be the creator of Tiny Tim and Sam Weller !''-Youth's Companion.

#### High Praise.

A story told by John Ross Dix in his "Pulpit Portraits" shows how strong a current of life ran in the veins of Dr. Lyn:an Beecher when he had passed the allotted threescore years and ten. When about 75 years of age, he spent

a fortnight in the eastern part of Maine. A party of gentlemen at Calais went with him some 30 miles up a series of lakes to Indian territories. When about to embark upon a chain

of lakes in the birch cances, the Indian guide, Etionne, rather objected to so old a man attempting the adventure, fearing that he would give out.

The doctor paddled with the best of the youngsters; caught more trout than all the party together and returned each day from the various tramps in the lead; ate his fish on a rock, with a sea biscuit for a trencher and fingers for knives and forks; slept on the ground upon hemlock branches under the tent, and at length the Indian guide went from the extreme of depreciation to the highest expression of admiration in his power, saying:

"Ah, old man, all Indian !"

### It Was a Pretty Hat.

A young lady of the east end had just received several proofs of different styles of photographs of herself and had kept them until the usual semiweekly visit of her best gentleman friend. He was punctual in arriving that night, but he never imagined that it was to be his last call for an indefinite period.

He had no sooner seated himself in the parlor than the young lady brought in the photographs for his inspection. He looked them over very carefully and finally selected the only one of the several pictures showing a hat on the subject. It was a pretty big hat and beau-tifully trimmed. The piece of millinery caught his eye at first glance, and he A Historia Wrenk.

Star.

"In the harbor of flautinge de Cuba," says Maturin M. Ballou in Due South, a surken wreck is point i out, partially visible at low tide, hat far from the shore. Only the ribe and simehions are still held together it and out keel timbers and lower cheat This wreck has lain here unbieded for years, yet what a story these old timbers might tell had they only a tanguta with which to give volce to their experience

-literally the experience of ages." Reference is made to the remains of the old St. Paul, one of the ships of the great Spanish armada that Philip II sent to England in 1588, being one of the very few of that famous flotilla that escaped destruction at the time. What a hi torical memento is the old wreck! After a checkered career, in which this ancient craft had breasted the waves of innumerable seas and withstood the storms of nearly three centuries, she was burned to the water's edge here in the harbor of Santiago a few years since and sank, where her romains now lie, covered with slime and barnacles-a striking emblem of the nation whose flag she once proudly bore.-New York Tribune.

#### The "Wicked" Lonsdale,

At a meeting of the Poor Clergy Relief society in London a story was told of Bishop Waldegrave of 'Carlisle and "wicked" Lord Lonsdale. The bishop rode well, and on his going up to Lowther castle Lord Lonsdale admired his horse and his management of it. The bishop pleaded the cause of a clergyman passing rich on £40 a year, whose well educated wife took in tourists' washing

to add to their scanty income. Lord Lonsdale said: "Everybody looks on me as a very sinful man, beyoud all possible hope of salvation. You have spoken to me as a gentleman; you have spoken to me like a good servant of the great head of the church; you have spoken to me encouragingly about the salvation of even my poor soul; you have pleaded the cause very nobly for that young clergyman. Here is my checkbook. Put down what you like, and I will sign it."

The bishop said, "No; that is a matter between God and you."

Lord Lonsdale gave the bishop a check for £10,000 and afterward two further checks for £20,000 for poor clergy of the diocese of Carlisle.

#### The Power of Modern Shells.

A 12 inch rifle is 38 feet long, with 4 feet external diameter at the breech, and weighs 48 tons. Its 850 pound shot, driven by a 430 pound charge of brown prismatic powder, leaves the muzzle with a velocity exceeding 1,400 miles per hour and would reach a target at its effective range of 516 miles in 24 sec-onds, while it would take the report of its discharge 27 seconds to traverse the same distance. At a range of 11/2 miles this shot would perforate 19 inches of solid steel.

The 250 pound projectile of the 8 inch rifle will penetrate a foot of armor at the range of a mile. The six 4 inch rapid fire guns within the superstructure each deliver eight 40 pound projectiles in a minute, while the twenty 6 pounders distributed over the vessel can be re-

NUMBER 15.

As Emperor's Attle.

The winter palace of the czar surpasses any other palace in Europe. It is on the banks of the Neva and owes its existence to the Empress Catherine II. that most extraordinary woman, extraordinary in ability and in vice, the surprise of all her contemporaries and the wonder of all who have studied her character. The building is four atories high, of a light brown color and highly ornamental in architecture. It is a wilderness of balls, stairways and apartments. The Nicholas hall and the St. George's hall will never be forgutten by those who have seen them.

'One of the most interesting rooms is that where Nicholas I died. It is in the upper story of the northeast corner of the building and is approached by four doors and finally by a narrow passage. It is a small room, only about 18 feet long and 12 feet wide, with two small windows, and is the place where the emperor spent most of his time when not officially employed. It is the room in which he died, some say by poison administered by himself in a fit of melancholy induced by the outcome of the Crimean way. The room remains just as he left it. Near the center is a plain iron bedstead. Some chairs and a few cheap pictures adorn the room, and a dilapidated, down at the heel pair of slippers complete the furnishings of the attic room in the palace.

#### The Ashantees See Sights.

The natives of these Jaman villages had never seen a white man before, and I noticed at first with some surprise that those of our actions which interested them most were the simple and commonplace ones. To such matters as enting and dressing they gave the closest attention. Every morning when I emerged from my tent I found a large audience writing patiently for the performance to begin, and when I took my place at the washstand a crowd closed round, forming a large circle. They followed the whole process with the great-est enjoyment, discussing and explaining to one another the various details and now and again raising shouts of applause as some peculiarly amusing feature of the performance (such as the use of the nailbrush) occurred. When I produced my toothbrush and proceeded to put it to its natural use, there was much anxious discussion, and when I brushed my bair up and made it stand on end they yelled with delight.

As for the opening of a bottle of champagne, which occurred on one occasion after an unusually long march) it simply brought down the house, although the spectators somewhat abruptly dispersed and viewed the remainder and Life In Ashanti."

#### The Black Hole of Calcutta.

A scientist, writing of the black hole of Calcutta and its atmosphere, says:

"On the 20th of June, 1756, about 8 o'clock in the evening, 146 men were forced at the point of the bayonet into a dungeon 18 feet souare. They had been but a few minutes confined in this infernal prison before every one fell into a perspiration so profuse that no idea can be formed of it. This brought on a raging thirst, the most difficult respiration and an outrageous delirium." Such was the horror of their situation that every insult that could be devised against the guard without and all the opprobrious names the viceroy and his officers could be loaded with were repeated to provoke the guard to fire upon them and terminate their sufferings. Before 11 o'clock the same evening one third of the men were dead, and before 5 next morning only 23 came out alive, but most of them in a high putrid fever. All these dreadful effects were occasioned by the want of atmospheric air and by their breathing a super-abundant quantity of nitrogen emitted from their lance." from their lungs."

J. B. HUTCHINSON, Gen. Manager. J. R. WOOD, Gen. Pass. Ag't.

Thousand mile tokets at two cents per nile, good for passage between all stations. J. H. MCINYYRE, Agent, Falls Creek, Pa. E. C. LAFEY, Gen. Pas. Agent, Kochester N. Y.

Fire Proof Vault.

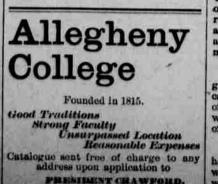

A Young Girl's Experience.

My daughter's nerves were terribly out of order. She was thin and weak; the least noise startled her, and she was wakeful at night. Ecfore she had taken one package of Celery King the change in her was so great that she could hardly be taken for the same girl. She is rapidly growing well and strong, her complexion is perfect, and she sleeps well every night .-- Mrs. Lucy McNutt, Brush Valley, Pa. Celery King for the Nerves, Stomach, Liver and Kidneys is sold in 25c. and 50c. packages by H. Alex. Stoke.

The motio of the proprietors of Dr. Henry Baxter's Mandrake Bitters is, "the greatest good to the greatest number," and so sell a large bottle of a valuable remedy for the small price of 25 cents, and warrant every bottle to give satisfaction or money refunded. Far sale by H. A. Stoke.

Arnica & Oil Liniment is very healing and soothing, and does wonders when applied to old sores. For sale by H. A. Stoke.

A common cold should not be neglected. Downs' Elixir will cure it. For sale by H. A. Stoke.

PRESIDENT CHAWFORD, Mondville, Pa Wall Term Opens Sept. 20.

rbed it may move straight forward. Its body may be inclined at any angle to the line of progress, but its motion still be forward, the big claws carried crooked around in front. It may be seen moving thus in one of the larger tanks at the aquarium, in which there are blue crabs, lobsters and other things. The temperature of the water now just suits the crustaceans, and they are very lively. Blue crabs may be seen swimming here, and also walking about, stepping down from stones that are as high as they them-

selves are wide with perfect dignity, if not grace of manner, and walking or carrying their claws before them.-New York Sun.

#### The First Teacups.

Even after tea was introduced into Europe and had come into general use teacups were scarce. At the same time coffee was introduced; but, apart from Constantinople, the first coffee caps in Europe date back only as far as 1645 in Venice, 1659 in Paris, 1652 in London and 1694 in Leipsic. From the first, however, the conventional oriental coffee cup, without stem or handle, was little used, and in Germany not at all. The Chinese teacup was used for tea, coffee and chocolate as well. Specimens of porcelain were undoubtedly introduced into Europe in the middle ages. yet not till the sixteenth century were cups imported from China in any grout quantities, and even then it was as are cles of vertn. Most of those found the way back into China again, as colle ing porcelain is a lasting fad there. high prices are paid for good species of The collection of Chinese porcels only the genuine specimens are d requires immense study and know as the Chinese are skillful ini. and put numerous falsifications c. market.

A new invention is one to make tele graph wire out of paper. The interior cable is lead covered, and thin spirals of paper are wound around each interior wire. The cost is said to be one-fifteenth of rubber insulated cable.

Beware of the man who smiles when he's angry; he's dangerous. And be-ware also of the man who looks glum when he's glad; he's probably a humor-ist.—Exchange.

most innocently remarked: "I think this is the best photograph.

The hat is so pretty. It is a very fine picture of the hat." The young man did not notice his

fatal error until too late. His visit was short and uninteresting that evening, and now he wishes that the art of photography had never been discovered .--Pittsburg Dispatch.

## The English Army.

In the 40 years that elapsed between the battle of Waterloo and the fighting in the Crimea the British army attained a maximum of inefficiency. It is only now, when the chief actors great drama of the struggle with Russia are dead, that the public is beginning to learn the extent of the incapacity and inefficiency of the men responsible for the equipment and training of the British army. But for the courage of the British private the Crimean campaign would have been a disastrous failure. Indeed but for the accident of a fog on the morning of the battle of Inkerman, which enabled a handful of British troops to impress 40,000 Russian sol-diers with the idea that they were more numerous and better supported than they really were, the English army would have been driven into the Black sea and the subsequent history of Eu-rope altered beyond recognition.-London Standard.

#### A Deadly Grudge.

"You and Briggins don't seem to be very good friends any more." "No, he is a wolf in sheep's clothing."

"Why, what did he ever do to make you conceive such an opinion of him?" "Made me believe I ought to take my bicycle apart for the purpose of clean-ing it."-Chicago News.

#### The Foolish Advice Given.

"I hate to see a man who has sense enough to give good advice," said Mr. Bifferly, "but not sense or strength enough to follow and profit by it him-Bifferly, self, but it is a fact that many a man has got rich on a hint from somebody slee who has staid poor."-New York

The Sheffield club is the oldest foot-ball organization in the United King-dom. It was started in 1855, and its minute book for 1857 is still in exist-

lied upon to clear an enemy's decks or to disable torpedo boats by maintaining a terrific hail of explosive shell, capable of destroying any unarmored position. The final offensive resources of the citadel ara the four torpedo tubes, each pre-pared to launch automatic and dirigible destroyers containing 150 pounds of gun cotton.-Chautauquan.

#### Not Infallible.

Harriet Martineau, the English author, was shrewd and practical and had what men are pleased to call a "mas-culine intellect." But she was not always correct in her deductions, a fact illustrated by the following anecdote, told in her "Memoirs," by Sir Charles Murray, who was then the English consul general in Egypt:

One afternoon we met at the villa of my old friend, S. W. Larking, on the banks of the Mahamoudieh canal. In the course of our stroll through the garden we came to a small gate, the pat-tern of which was new to Miss Martineau, who was walking in front.

She stopped, and looking at the gate in an attitude of intense admiration exclaimed:

"How truly oriental! What wonder ful taste these easterns have in design!" She went on, and as Larking and I followed through the gate he whispered to me, "I got it out last week from Birmingham."

#### Where Hearing Ceases.

Lord Rayleigh, in a lecture, said that experiments had shown that a vibration of sound having an amplitude of less than one-twelve-millionth of a centimeter could still affect the sense of hearing.

Such a vibration would be so short that it would have to be enlarged 100 times before the most powerful micro-scope could render it visible, supposing that it were susceptible of being seen at all.

Old people, he said, do not hear high notes which are audible to young per-sons, and there is reason to believe that babies hear notes which are inaudible to their elders.-London Mail.

We hand folks over to God's mercy and show none ourselves.—George Ellot

Kansas City has 9,000 employees in a packing houses and stockyards.

#### Eyeglasses and Spectacles.

"You say you never wore spectacles?" said the near sighted man. "Well, if you ever put on a pair you'll never wear anything else. I wore eyeglasses for years. I thought they looked better on me, and then I imagined that they were more convenient; that I could take them off and put them on more readily and all that. But after wearing a pair of spectacles once for a few days -I had put them on, as I thought at frst, temporarily-I discovered that

spectacles were the glasses for comfort. "There are, to be sure, people who do not wear glasses all the time, but only for reading or writing, and so on, to whom eyeglasses may be more con-venient, and then I believe that eyeglasses are made nowadays that have more scientifically adjusted grips, and all that sort of thing, but I tell you that the thing for real comfort is spectacles."-New York Sun.

#### Individual Odors.

Every human being has a specific odor of his own, according to A. Betho In the Archiv der Gesammten Physiolagie, by which he can be recognized not merely by dogs but by persons with sen-sitive organs of smell. The case is men-tioned of a main who blindfolded could pick out each individual in a company of 20 by his odor.

The smell is not bern with us, but develops gradually till the age of puber-ty, after which it remains unchanged. Members of a family have a kind of common odor, which persists even when they have lived apart for a long time.
