

# Feed Your Nerves

Upon rich, purgative blood by taking Hood's Sarsaparilla, and you will be free from those spells of despair, those sleepless nights and anxious days, those gloomy, deathlike feelings, those sudden starts at mere nothings, those dyspeptic symptoms and blinding headaches. Hood's Sarsaparilla has done this for many others—it will cure you.

## Hood's Sarsaparilla

'America's Greatest Medicine. Six for \$5.  
Hood's Pills cure sick headache. 25c.

**Beware of Counterfeits for Catarrh That Contain Mercury.**  
as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is tenfold to the good you can possibly derive from them.

Hall's Catarrh Cure manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and driving all impurities from the system. In buying Hall's Catarrh Cure be sure to get the genuine. It is taken internally and is made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by druggists; price 75c. per bottle. Hall's Family Pills are the best.

Fits permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. \$2 trial bottle and treatise free. Dr. R. H. Kline, Ltd., 301 Arch St., Phila., Pa.

A single lump of coal weighing exactly 4,860 pounds was recently shipped from the United States to Manchester. A special device had to be rigged to get it from the railroad car into the steamer's hold.

**Beauty Is Blood Deep.**  
Clean blood means a clean skin. No beauty without it. Cascarets, Candy Cathartic, clean your blood and keep it clean, by stirring up the lazy liver and driving all impurities from the body. Begin to-day to banish pimples, boils, blotches, blackheads, and that sickly bilious complexion by taking Cascarets—beauty for ten cents. All druggists, satisfaction guaranteed, 10c, 25c, 50c.

"Lady Cook also lady parlormaid wanted; two persons and one child; small compact residence; good home; two friends preferred; highly recommended; lady nurse and man kept." is a recent London advertisement.

**To Cure A Cold in One Day.**  
Take Laxative Bromo Quinine Tablets. All Druggists refund money if it fails to cure. 50c.

Early morning exercise is denounced nowadays by the majority of hygienic teachers. At that time, they say, vitality is at its lowest ebb, and needs the stimulation of food.

**Educate Your Bowels With Cascarets.**  
Candy Cathartic, cure constipation forever. 50c, 25c. If C. C. C. fail, druggists refund money.

An Old Bailey Juror was recently excused from serving because he weighed 317 pounds and could not get into the jury box.

**According to the Color.**  
On the state railways in Germany the carriages are painted according to the colors of the tickets of their respective classes. First-class carriages are painted yellow, second-class green and third-class white.

The primary cause of the horrible disaster to the steamship La Bourgogne was the fact that it was moving at a high rate of speed in a heavy fog. Very likely this had been the usual custom of La Bourgogne on previous voyages. On every such occasion, however, a risk was taken which no steamship owner has a right to take with the lives of passengers. Times without number the risk has been taken without being attended with the disaster that always threatens the steamer moving rapidly in a fog. It was inevitable, however, that the continual coquetting with danger must finally prove disastrous. La Bourgogne disregarded the precaution once too often, and the vessel went to the bottom, carrying most of its passengers with it. The making of rapid speed in foggy weather is a crime not peculiar to La Bourgogne. Nearly all the ocean liners are guilty of the dangerous practice, which they should be forced to discontinue. The saving of time is not of so great importance that lives must be sacrificed in order to effect that end. Safety must be the first condition of ocean travel.

## CONSULTING A WOMAN.

Mrs. Pinkham's Advice Inspires Confidence and Hope.

Examination by a male physician is a hard trial to a delicately organized woman.

She puts it off as long as she dare, and is only driven to it by fear of cancer, polypus, or some dreadful ail.

Most frequently such a woman leaves a physician's office where she has undergone a critical examination with an impression, more or less, of discouragement.

This condition of the mind distresses the effect of advice; and she grows worse rather than better.

In consulting Mrs. Pinkham no hesitation need be felt, the story is told to a woman and is wholly confidential. Mrs. Pinkham's address is Lynn, Mass., she offers sick women her advice without charge.

Her intimate knowledge of women's troubles makes her letter of advice a wellspring of hope, and her wide experience and skill point the way to health.

"I suffered with ovarian trouble for seven years, and no doctor knew what was the matter with me. I had spells which would last for two days or more. I thought I would try Lydia E. Pinkham's Vegetable Compound. I have taken seven bottles of it, and am entirely cured."—Mrs. JOHNS FOREMAN, 26 W. Woodbury Ave., Baltimore, Md.

The above letter from Mrs. Foreman is only one of thousands.

Be careful—One of the best health pills in the world. Beware of cheap imitations. Send for a free copy of the book "The Female System" to Mrs. J. C. Pinkham, Lowell, Mass.

# FOR FARM AND GARDEN.

**Topdressing Meadows.**  
In topdressing meadows with fresh yard manure, directly after mowing, there is naturally some loss by evaporation, but this is not nearly as great as is generally supposed, and this is also more than counterbalanced by the protection it provides against sun and drought. In winter and early spring the loss from evaporation is but infinitesimal. If the manure is properly composted it may be applied as a topdressing at any time without danger of loss.

**Care of House Weeds.**  
There should be an enclosed building over every well from which water is to be taken for family use. Multitudes of insects and even small animals fall into the well if it is exposed to the air and has no curb around it. So, too, there is always much dust blown into it, and the rays of the sun shining down make the water too warm to use during hot weather. Every time a bucket is lowered into the water it carries some of the warmth it has absorbed from contact with the summer air.

**Season for Deep Plowing.**  
If there is ever a time when deep plowing is advisable it is in summer, especially if some green manure can be turned under the furrow. This will heat rapidly in hot weather, and the gases from its fermentation rising through the soil will mellow it more than can be done by the most thorough cultivation when such land is deep plowed in spring. In fact most spring plowing ought to be very shallow, as the air is not warm enough to warm through a deep furrow, and therefore, if vegetation is then deeply plowed in it rots very slowly.

**Trellis for Tomatoes.**  
While the tomato can be and often is grown with its vines lying on the ground, the fruit ripens more evenly and perfectly, besides producing a larger crop, if the vines are supported by a trellis of some kind. It may be nothing more than a stick forked like a "y" and with a long enough stem to set firmly in the ground. But if the soil is rich and the tomato vines are heavy, a row of strong stakes with a wire wound around each at the height of eighteen inches will give better satisfaction. When the vines run to grow downwards the part below will blossom and fruit more abundantly than before.

**Insecticide for Plants.**  
Cosmos, a French scientific review says that a South American farmer has recently made an accidental discovery of great value to gardeners and florists.

It was to the effect that leaves of the tomato plant will drive insects away from other plants. He covered tomato leaves over some young shrubs and he wished to protect from the sun and from small insects, and was delighted to find that the latter cleared out as soon as they got the odor of the tomato leaves.

**Raising Seedlings.**  
The process of raising plants of various kinds from seeds extends over the greater portion of the year, and no time is more important than the present in this respect. There are many plants of which seeds can be sown now with better prospects of success than at any other, and amongst them may be noted caecolarias, primulas, cyclamens and cinerarias, all of them being great favorites with amateur growers.

Of course, where possible, the boxes, pots or pans of seeds must be placed in the greenhouse, but a fair proportion will germinate in a warm window if they are carefully looked after. Use light soil, and water it well prior to sowing the seeds, which need not be covered with soil. Place on the receptacle a piece of glass over and that brown paper or damp moss, and, until the seeds vegetate, no further attention will be required beyond wiping the glass quite dry each morning. As soon as the tiny plants can be seen the paper must be removed, and the glass slightly tilted. As they attain size, pricking off and eventually potting will be necessary, and every effort should be made to keep the plants constantly growing.—Household Words.

**Skim Milk for Chickens.**  
With the purpose of studying the effect of skim milk diet on young growing chickens an experiment was conducted at the Indiana agricultural experiment station in which two lots of chickens were under observation. There were ten chickens of two breeds in each lot, ranging from four to six weeks of age at the beginning of the experiment. Each lot received the same food, care and treatment, excepting one was fed all the skim milk wanted, while the other was given none. The grain feed consisted of two parts crushed corn, one part bran and one part ground oats. They were also fed cracked bone, cabbage and lettuce. When the experiment began the total weight of one lot of chickens was only one-half an ounce more than the other. The experiment lasted from July 11 to September 5. The results of the feeding show

that the chickens fed milk and grain ate some considerable more grain than did those receiving no milk. The results also show that the chickens of lot one, receiving no milk, made an average weekly gain of 2.62 ounces, while those fed milk made a gain per week of 4.46 ounces, or over one-fourth pound. The chickens fed milk made a more rapid and uniform gain than those fed grain only. The general results of the feeding in every way seemed to show the superior influence of the skim milk on the growth of the birds.—American Agriculturist.

**Injurious Weeds.**  
From time to time this country is started by publications issued from high schools and colleges as to the appearance of this or that weed in some localities and warning cultivators against them.

Learned and long descriptions are given of these particular weeds and general alarm is excited by a supposed new trouble. Very few of these new weeds are worthy, however, of a thought, so far as particular cultivation of the soil is concerned. The cultivator expects to hoe and cultivate among his crop, and one weed is no more to him than another. This is especially true of annual weeds, which do not flower until after the cultivator has been through. The prickly lettuce is an illustration of this; its botanical name is lactuca scariola. Continuous warning against its appearance is heard everywhere, but it does not come into flower until July, and long before that the cultivator has destroyed it. No cultivator need fear any annual weed. Serious trouble comes from those which have running root stocks. In that case every little piece of root will make a new plant.

In this list we might name the Canadian thistle, the English bindweed (Convolvulus arvensis), the so-called sachaline (Polygonum sachalinense, Solanum carolinianum) and the couch grass (Triticum repens). And even these can be destroyed by two or three successive hoeings or cultivations. It is an exceptional case when a plant lives without leaves during one season. The old question of dealing with destructive weeds is a very simple one—we have either to hoe them out before they have a chance of making seeds or prevent them from having perfect leaves during one season's growth. The intelligent cultivator knows this so well that he is not alarmed by the appearance of a new weed, but rather enjoys it as it adds somewhat to his botanical knowledge.—Meehan's Monthly.

**Dairy Precautions.**  
Shade in pastures, either from trees and sheds, is essential in midsummer to keep the cows from becoming feverishly overheated to the detriment of the quality of the milk. During my dairy experience I have encountered a great deal of tainted milk directly attributable to the overheating of cows. Keep them as cool as possible and remove all exciting factors, such as driving them to and from the pasture with dogs, etc.

When it comes to the care of milk, hot weather has no terrors for a dairyman fully prepared and willing to intelligently combat its deleterious effects. The hotter the weather the more prolonged should be your application of hot water in sterilizing milk utensils. Placing the tin milk pans, pails and cans in the sun after washing was formerly thought to have no more influence than simply to dry them. Now it is known that following rigorous scalding a thorough snub of all dairy utensils destroys any lurking bacteria that might quickly propagate and ruin milk quality. It smells with a cow stable multiply with amazing rapidity during the heated term. With cows milked there twice a day it means a dangerous menace to milk. If you cannot keep the atmosphere of your stable as sweet smelling as that of your pasture, milk the cows in the pasture every time.

Attend to the care of milk as soon as it has been drawn from the cow. To let it stand about in pails to wait convenience is dangerous; to dump a hundred pounds or more of it freshly milked into a narrow can is pernicious. Milk should always be aerated and cooled sufficiently to keep it fresh twelve hours before it is ever stored in bulk. No better way can be devised for tainting fresh milk quickly and effectually than by plunging a vessel of it into cold water. The resulting taint is commonly spoken of as smothered milk. If you do not possess ice you should wet down the floor and walls of your dairy room several times a day with cold water. This will materially aid in keeping the atmosphere of the apartment cool and sweet even during the hottest days.

Good, firm butter can be produced in July as well as in the less heated months if you keep the thermometer in your dairy room as close to sixty degrees as possible. In this apartment secure free ventilation with a low temperature, especially at night. If there is cold running water on your premises utilize it for the dairy's good in hot weather. Pipe it to your milk house. Churning should always be done early in the day before the warmth of the sun has made its influence felt. By following this plan you ought not to be troubled with butter coming soft, even if you possess no ice.—George E. Newell in Orange Judd Farmer.

**Wife's Bath Money in Turkey.**  
Among the Turks bath money forms an item in every marriage contract, the husband engaging to allow his wife a certain sum for bathing purposes. If it be withheld, she has only to go before the cadi and turn her slipper upside down. If the complaint be not then redressed it is a sufficient ground for divorce.

**Told by the Sergeant.**  
From The Democrat, Grand Rapids, Mich.  
At the Michigan Soldiers' Home, in Grand Rapids, lives Sergeant Richard Dunn, hale and hearty, although he carries the scars of several wounds sustained in some of the battles of the Civil War. In recounting his experience to a reporter, Mr. Dunn said: "About a year and a half ago I began to have trouble with my stomach. My suffering was so intense that I tried different medicines and doctored with several physicians, but without permanent relief."

"I read an account of Dr. Williams' Pink Pills for Pale People having cured a case much like mine, and I decided to give them a trial, which I did. "After taking five boxes I was cured. I never felt better than I do now, even in my young days. I am naturally a robust man, but that stomach trouble, together with rheumatism, which afterward set in, were making fast inroads upon my health and I am satisfied that it would have been but a short time before my comrades would have been conducting the regulation funeral ceremonies over my remains, had I not chanced to read of and taken Dr. Williams' Pink Pills for Pale People."

"There are several others in the home who are taking these pills and are receiving great benefit." RICHARD DUNN. Subscribed and sworn to before me, this 1st day of Nov., 1907. HENRY GIBSON, Notary Public.

Sergeant Dunn is perfectly willing that anyone should write him in reference to his case, provided stamp is enclosed for the reply.

The elements necessary to give new life and richness to the blood and restore shattered nerves are contained in a condensed form in Dr. Williams' Pink Pills for Pale People. They are also a specific for troubles peculiar to females, such as suppurations, irregularities and all forms of weakness. In men they cure cases arising from mental worry, overwork or excesses of whatever nature.

**Rise of the English Language.**  
We all know, says the St. Louis Globe-Democrat, that the English language has been growing at a remarkable rate during this century, and that it has been spreading over the whole globe. But few, however, really comprehend how rapid this growth has been. At the opening of the century French was spoken by 81,000,000 people, German by 30,000,000, Russian by 30,000,000, Spanish by 27,000,000, English by 21,000,000, and Italian by 16,000,000. To-day English is the language of 130,000,000, French of 45,000,000, German of 70,000,000, Russian of 75,000,000, Spanish of 35,000,000, and Italian of 35,000,000. In other words, during the present century English has not only risen from the fifth place to the first, but has gained enormously on the rest in relative magnitude, expanding from about 13 per cent. of the total to over 30 per cent. With this increase of the English speaking people the language itself has kept pace. Concurrent with this growth of the language there has been an equal, if not greater, increase in knowledge. Three hundred years ago one man could know all there was to be known. To-day one man can know thoroughly only one small branch of one science. This increase of knowledge has been most rapid during the last part of the present century. More than any other cause, the progress of modern invention and science has brought about an enormous extension of the language. Thousands of technical words and expressions now in common use would never have been coined but for the innumerable parts of the never ending list of new inventions in mechanics and discoveries in science. In no better way can this rapid increase in knowledge, and thereby in the number of words used, be realized than by a comparison of the first reference works with those of the present day.

**Women Criminals Outnumber Men.**  
Russia's penal statistics show that in the dominion of the Czar the women criminals outnumber the men by nearly 50 per cent., just the contrary being the case in other countries. Most of the women criminals are unmarried, and the majority come from the laboring classes in the cities.

**Don't Tobacco Spit and Smoke Your Life Away.**  
To quit tobacco easily and forever, be magnetic, full of life, nerve and vigor, take No-To-Bac, the wonder-worker, that makes weak men strong. All druggists, 50c or \$1. Cure guaranteed. Booklet and sample free. Address: Sterling Remedy Co., Chicago or New York.

London's Zoo in Regent's Park contains an intelligent female Arabian baboon that can say "Mama." She was brought from Tunis by Sir H. H. Johnston, the African traveler, who is superintending her education.

**To Cure Constipation Forever.**  
Take Cascarets Candy Cathartic. 10c or 50c. If C. C. C. fail to cure, druggists refund money.

No previous Prince of Wales has been a grandfather.

I have found Pisco's Cure for Consumption an unfailing medicine.—F. R. LORTZ, 1363 Scott St., Covington, Ky., Oct. 1, 1891.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

**The Mother Was Not Deceived.**  
He was a tired looking young man as he leaned up against a shade tree on Miami avenue, and the patrolman who came along and halted to look him over finally queried: "Well, what are you doing here?" "More or less t-t-tight," was the answer.

"What's that paper you have in your hand?" "You can have it." "Bank check, eh?" said the officer as he scanned it under the light. "Have you been trying to work a confidence game?" "Oh, no," replied the young man as he yawned sleepily. "That was a little racket on my own account." "How do you mean?" "Why, I'm going with a girl who loves me for myself alone, but her mother looks at the cash side of the question."

"And you filled out this check to deceive her?" "That's what I did. I showed her that I had \$3,000 in the bank, but what did she do but post right down there and find out that I didn't have a hair pin on deposit."

"And what?" "Why, that's how I came to get tight. She showed me the door and I knew from the way she closed it behind me that the syndicate was busted, and so I went to ruin at the nearest saloon!"—Detroit Free Press.

**He Was There.**  
Some visitors in Virginia hired an old negro on a plantation to drive them to see the Natural Bridge. So says the Toronto Saturday Night.

On nearing the bridge they asked the colored man his height and width, and if he really thought it such a wonder, after all. His replies were so vague that one of them said: "Now, Sam, confess; you have never been so near the bridge before?" "Lerd, suh!" he replied. "I member coming here to help de day dey day de corner-ston; but I ain't teck notice 'bout how high de bridge was built, nor how far 'cross 'twix. Of coase, I ain' come heah much sence; but dis nigger never goes in' to forgit dat day."

**No-To-Bac for Fifty Cents.**  
Guaranteed tobacco habit cure, makes weak men strong, blood pure. 50c. \$1. All druggists.

A tax of sixpence per head is levied on all passengers landed in the Isle of Man. It is collected from the steamship companies carrying the passengers.

**Ever Have a Dog Bother You**  
When riding a wheel, making you wonder for a few minutes whether or not you are to get a fall and a broken neck? Wouldn't you have given a small farm just then, for some means of driving off the beast? A few drops of ammonia shot from a Liquid Pistol would do it effectually and still not permanently injure the animal. Such pistols sent postpaid for fifty cents in stamps by New York Union Supply Co., 125 Leonard St., New York City. Every bicyclist at times wishes he had one.

**THE EXCELLENCE OF SYRUP OF FIGS**  
is due not only to the originality and simplicity of the combination, but also to the care and skill with which it is manufactured by scientific processes known to the CALIFORNIA FIG SYRUP Co. only, and we wish to impress upon all the importance of purchasing the true and original remedy. As the genuine Syrup of Figs is manufactured by the CALIFORNIA FIG SYRUP Co. only, a knowledge of that fact will assist one in avoiding the worthless imitations manufactured by other parties. The high standing of the CALIFORNIA FIG SYRUP Co. with the medical profession, and the satisfaction which the genuine Syrup of Figs has given to millions of families, makes the name of the Company a guaranty of the excellence of its remedy. It is far in advance of all other laxatives, as it acts on the kidneys, liver and bowels without irritating or weakening them, and it does not gripe nor nauseate. In order to get its beneficial effects, please remember the name of the Company—
