**Gettysburg-Washington.**  
The Pennsylvania Railroad Company has arranged for two five-day personally conducted tours from Buffalo, Erie, Pittsburgh, and principal intermediate points, to Gettysburg and Washington, on October 17, and November 7.

Round trip tickets, including transportation, Pullman berth in each direction, hotel accommodations and carriage drive over the battlefield at Gettysburg, and hotel accommodations at Washington—in short, all necessary expenses—will be sold at rate of \$25.00 from Suspension Bridge, Buffalo, Rochester, Syracuse and intermediate stations on the New York Central and Hudson River Railroad; \$24.00 from Elmira; \$25.00 from Erie and Corry; \$21.50 from Williamsport; \$23.00 from Pittsburg and Altoona and proportionate rates from other points.

Tickets will also be good to return on regular trains until October 27 and November 17, but without Pullman accommodations.

Descriptive itineraries and full information can be obtained of ticket agents; B. P. Fraser, Passenger Agent Buffalo District, Buffalo, N. Y.; E. S. Harrar, Division Ticket Agent, Williamsport; Thos. E. Watt, Passenger Agent Western District, Pittsburg; or Geo. W. Boyd, Assistant General Passenger Agent, Philadelphia.

**Remarkable Rescue.**  
Mrs. Michael Curtain, of Plainfield, Ill., makes the statement, that she caught cold, which settled on her lungs; she was treated for a month by her family physician, but grew worse. He told her she was a hopeless victim of consumption and that no medicine could cure her. Her druggist suggested Dr. King's New Discovery for Consumption; she bought a bottle and to her delight found herself benefited from first dose. She continued its use and after taking six bottles found herself sound and well; now does her own housework, and is as well as she ever was. Free trial bottles of this Great Discovery at H. A. Stoke's Drug Store. Large bottles 50 cents and \$1.00.

#### INSECT HEAVY DRINKERS.

**Batterflies Sit For Hours Sucking More Moisture Than Needed.**

By means of a large number of observations Mr. J. W. Tutt is able to confirm what has been stated by other observers that certain butterflies and moths are very much addicted to drink. In a paper published in the "Proceedings" of the South London Entomological and Natural History Society Mr. Tutt says there can be no doubt that butterflies drink more than is required by their tissues under any possible conditions. He has known *Polyommatus damon* sit for more than an hour motionless except for the slight movement of sucking up and discharging the moisture almost continuously.

What this internal bath may really mean cannot be surmised. Another important factor as to this drinking habit is a strange one, the "thirsty souls," as far as his observation goes, being almost entirely males. Possibly if exact observations could be made it might be found that females in small numbers also visit puddles, pools and streams for drinking purposes, but as far as Mr. Tutt has been able to discover it is the males alone who indulge in these copious libations, while the females are away laying eggs. Moths and butterflies of both sexes visit sugar, overripe fruit and similar dainties, but they do so for food. The males alone seem to be attracted by pure water, and Mr. Tutt suggests that their extra activity having originally given them greater need in this direction, a habit which was at first a necessity has become so pleasurable that excessive drinking has literally become a vice.

#### MUSIC FROM HEAVEN.

**Charming German Method of Summoning Church Worshipers.**

While religious music will doubtless live as long as religion itself there is one branch of it—if music it can be called—which is luckily becoming obsolete. I refer to bells and chimes. I shall never forget the look of distress with which a famous organist once said to me that whenever he heard a set of chimes he wished he could put his ears in his pocket.

In these days of \$1 nickel watches bells are no longer needed to inform people when the service begins. They are, moreover, a decided nuisance, and often a dangerous one, for they have killed many invalids whose life depended upon a few hours' sleep, which the bells murdered. In New York bell ringing has been frequently stopped on account of complaints to the board of health.

If it seems desirable to have a means of summoning worshippers to church, why not adopt the delightful old custom that is still observed in some south German villages and in the city of Stuttgart? There four trombone players escaud a church tower three times a day and play a solemn chorale.

In all my musical experience I have never heard anything more thrilling than those majestic harmonies in the air, which seemed to come straight from heaven. If our churches would adopt this custom and these celestial sounds became associated with religious experiences, they might arouse the dormant devotion of many a one who otherwise would pass the church door by.—Forum.
