Fall Medicine

is Fully as Important and Benefi-cial as Spring Medicine.

Hood's Sarsaparilla is just the medicine to keep the blood rich and pure, create an appetite, give good digestion and tone and strengthen the great vital organs. It wards off majaria, fevers and other forms of illness which so readily overcome a sak and debilitated system.

Hood's Sarsaparilla

Is America's Greatest Medicine. Hood's Pills cure indigestion. 25 cents.

The year 47 B. C. was the longest year on record. By order of Julius Caesar it contained 445 days. The additional days were put in to make the asons conform as near as possible with the solar year.

How He Fought.

Dukane-Before war was declared Spiffin was very anxious to fight, Gaswell-Well, he fought all through the war, "Did he?" "Yes; he fought shy of the recruiting officers."-New York

Forty-seven muscles are called into play in the production of the human voice.

To Care Constitution Forever.
Take Cascarets Candy Cuthartic. 10c or 25a.
If C. C. C. fail to cure, druggists refund money.

The cost of keeping up the drinking fountains and cattle troughs in London is \$5,500 per annum. A single trough in a busy thoroughfare costs \$250.

Beauty In Blood Deep. Clean blood means a clean skin. No beauty without it. Cascareta, Candy Cathartic clean your blood and keep it clean, by stirring up the lazy liver and driving all impurities from the body. Begin to-day to banish pimples, boils, blotches, blackheads, and that sickly bilious complexion by taking Cascarets,—beauty for ten cents. All druggists, satisfaction guaranteed, 10c, 25c, 50c.

Dry-Plate Photography. The first amateur pictures on dry plates were made something after the method employed by Charles Lamb's celebrated Chinaman in obtaining roast pig. The Chinaman burned his house to roast his pig; the amateur tore his camera to pieces to get his picture. The first hand camera was s pateboard box containing one plate. A pinbole served as a lens, and after the exposure of the plate the box was taken to the dark room, cut open, and the plate extracted. This was rather expensive picture-making, and it was not long before a magazine camera was invented; and suddenly all the world began taking pictures. The date of the invention of the dry-plate dates back scarcely eighteen years; but in that short time the growth and application of photography have been so remarkable that it can be compared to nothing more aptly than to the amazing development of the genie which the unlucky fisherman released from the jar. In 1880 the outlay for photographic material was, in round numbers, \$25,000. Ten years later it amounted to \$2,500,000. During the first-named year perhaps one hundred and fifty persons were employed in its manufacture. Today one single firm has fifteen hundred employes. This firm alone manufactures in a week so much sensitive film that, if made into one long strip seven inches wide, if would measure over one hundred miles

verite Subject for Photography Perhaps no celestial body has been photographed so many times as the moon. At Lick Observatory the "man in the moon" sits for his picture many times during the year. Jupiter and Saturn are also frequent subjects, and no day passes in which some sun-spot es not leave its celestial autograph on the sensitive plate. Many astromical discoveries have been made through photography, the greatest of them being the discovery, by Profes Draper, of oxygen in the sun. The apolications of photography are so many and so varied that a whole volome of the St. Nicholas would be re quired to describe them; for there no department of knowledge in which it has been so extensively used, and none to which it has been so universally belyful.

YOUNG AT SIXTY.

Serene comfort and happiness in advanced years are realized by comparatively few women.

Their hard lives, their liability to serious troubles on account of their peru-liar organism and their profound ignorance concerning themselves, all com-bine to shorten the period of usefulness

and fill their later years with suffering.

Mrs. Pinkham has done much to make women strong. She has given advice to many that has shown them how to guard against disease and retain vigor-ous health in old age. From every cor-ner of the earth there is constantly coming the most convincing statements from women, showing the efficacy of Lydia E. Pinkham's Vegetable Com-pound in overcoming female ills. Here is a letter from Mrs. J. C. Orms, of 220

Horner St., Johnstown, Ps., which is carnest and straight to the point: "Dram Mns. Pinkham:—I feel it my duty to tell all suffering women that I think your remedies are wonderful. I had trouble with my head, dizzy spella and hot flashes. Feet and hands were old, was very nervous, could not alcep well, had kidney trouble, pain in waries and congestion of the womb, lines taking your remedies I am better wery way My head trouble is all gone, have no pain in ovaries, and am sured of womb trouble. I can eat and deep well and am gaining in flesh. I consider your medicine the best to be used for female troubles."

tor remain troubles."

se present Mrs. Pinkham's experiin treating female ills is unparald, for years she worked side by
with Mrs. Lydia E. Pinkham, and
constime past has had sole charge
the correspondence department of

FOR WOMAN'S BENEFIT.

A Woman's Good Work. Mme. Pescova of Prague has been decorated by the Emperor of Austria as an acknowledgment of the work she has done for women. Some time ago she erected a fine building where about 2000 Bohemian women are annually prepared for the Prague university. She is well known as a writor on educational matters and as a

Engagements in Denmark.

"In Denmark a girl never knows the pure, unadulterated joy of receiving a diamond engagement ring," re-marked a returned traveler. "She gets a plain gold band known as a wed ding ring in that country, and it is worn on her left third finger. On the day of her marriage the bridegroom changes it to her right third finger, which is the marriage finger in that country of queer customs. When the husband dies his widow changes her ring again to her left third finger, and everybody knows that she is a widow, Being engaged can't mean a great deal of happiness in Denmark any way you take it, for a girl is never, under any circumstances, permitted to see her betrothed one minute alone."—New York Sun.

A New Dress Preparation

A new thing in dress material preparation is said to be one of the most pronounced successes of the season. The material is sponged so that it will neither shrink nor spot. Two pieces of material exactly alike can be taken, of which one will be treated with the preparation and the other left untouched or sponged in the usual way. Both will then be sprinkled with water. The prepared material will dry flat and smooth as when new, while the other spots and crinkles up. Serges often shrink when wet; face cloths and even covert coating will spot, and alpaca is an almost imposwet weather fabric. When treated to the new finish they are said to be not only rain proof, but softer and silkier than ever. For cycling and seaside wear the new process is earning golden opinions, and women are said to be blessing the inventor of it.

Short Sermon on Shoes Many reasons have been given for the preference shown by women gen-orally for high heels. One is that the practice adds height to the body; another that it adds gracefulness to the carriage. To the latter one might take exception, for it may do so as long as the wearers stand still, but when they move about it imparts what can best be described as a wobbling motion which is the reverse of graceful. Tight shoes, again, are worn with the object of making the feet look smaller, but, as a matter of fact, the better shape a foot is the smaller it will look, but in the disproportionately small foot there is always involved an awkward gait. The foot of a tall woman should be larger than the foot of a small woman. The foot in length should be the length of the ulua, a bone in the forearm, which extends from a protuberance in the outer portion of the wrist to the elbow. Of course the ulna is longer in tall people, and to be graceful the foot should be also. Many people may be surprised that the foot should be as long as the forearm, and might be inclined to dispute the fact unless proved by demonstration. - Philadelphia Times.

Shoulder Wraps and Capea.

Something in the way of a light wrap is considered an indispensable accessory to every well arranged toilet. It may not constantly be worn, but it is exceedingly convenient and useful to have in case one boards an open car or has occasion to remain any length of time out of doors or in a current of air. The prettiest wraps are masses of lace and findiness. They must have a tolerably firm foundation, but diaphanous fabrics make up the larger part of them.

One model has a shawl shaped middle portion and rufles in the greatest profusion. These ruffles are made of lace edging four inches deep. This edging is put on extravagantly full, so much so, indeed, that it makes ruchings that might almost suggest a burdensome quantity. There are nine of these ruffle ruchings and they overlap so as to make a length of about 22 inches at the extremest point. The shawl shaped middle is more popular than the circle, which seems to indi-cate what has long been predicted— the gradual return to favor of the oldfashioned shawl, which has been out of use so many years that very few people possess one that is at all available. Exception of course, is made to the owners of India shawls, who seem to cling to them with the utmost pertinacity. Other capes are made in shawl shape and trimme! with bands of flat garniture or very rich embroid-ery. One model is large enough to cover the figure and extends some distance below the waist line; indeed, the point at the back falls at least a third of the distance over the skirt. The collar is high and flaring and elaborately trimmed with feather ruchings. The border has five rows of rich galloon set on at regular intervals and attached to the fabric by embroidery stitches. - New

Uses and Abuses of Vells.

Little by little the veils are climbing upward, and Paris says that they may now be worn no further over the face than just beneath the nose. This fashion has certainly its convenience to recommend it.

cream sods or take a cup of tes without all that bother of raising the veil and the worse bother of getting it down again."

There are all sorts and kinds of veil-There are all sorts and kinds of velings, but, before buying, a little study of effect is necessary. A face that looks well behind a thin gauze, with occasional dots, will look wan and haggard under a Russian net, heavy with chenille balls. Women who persist in wearing a dotted veil under one of chiffon are simply ruining their eyesight. Doctors say that the wearing of veils, dotted ones in particular, is ruinous to the eyesight, and also that oculists owe a large part of their incomes to this feminine habit.

If veils must be worn, the bow at the back must be avoided, and the ends drawn into the smallest kind of a knot and tucked out of sight. The smartest dressed women do not wear veils, though this may be only a hot weather fancy.—New York Tribune.

Caring for Hats.

To the dainty woman who wishes to keep her hats up to the standard without a great outlay of money or constant recourse to Madame Mil-liner, the practical hints given her classes by a first class teacher of millinery may prove worthy of considera-tion. The best velveteen, says this woman who knows, is better than silk velvet, so far as durability and keepin order are concerned, for making or trimming hats. Rain will not soil a good quality of velvetoen, as a little steaming will make it as good as new, while a few drops of water on silk velvet makes little indentations bard to remove. For black hats, chip or straw, beginning to grow rusty, liquid shoe polish may be used to good advantage. Hats should be brushed every day before laying aside to keep the dust from grinding in. Artificial flowers, drooping and cruehed, may be brightened and freshened by shaking for ten minutes through the steam from the boiling teakettle. Ostrich feathers respond to the same treat-A good quality of ribbon makes the most durable, and conse-quently the cheapest, of all hat trim-mings, standing the moisture of the sea or flying dust of business streets or country driving better than flowers,

feathers or lace.
Steel ornaments may be made as good as new by scrubbing in hot soapsuds, using a nail brush to reach interstices, then polishing it with a chamois or drying in sawdust. To renovate old black thread or French laces dip into a solution of weak green tea, then spread out upon several thicknesses of newspaper laid upon the ironing board or other flat surface. With a pin pick out each little point or scallop, cover the lace with sheets of newspapers, and put a weight on the paper, allowing it to remain 24 hours. Fine white laces, delicate ribbons and silks, may be freshened and cleaned with powdered magnesia, or, if not too badly soiled, with hot flour-taking care that it is not browned in the heating. Sprinkle the magnesia or flour upon a smooth sheet of wrapping paper, lay the silk or lace upon the paper and sprinkle more magnesia over it. Cover with another sheet of paper, place a book or some light weight on the paper, letting it rest there several days. Take the fabric up, shake well, and brush with a soft brush. For laces that require stiffening rinse in a pint of water in which gum arabic the size of a pea is dissolved, roll about a bottle and pull or pat with a soft towel until dry.—Philadelphia Times.

Fashion Hints.

Steel and malachite form a combination noted in the newest buckles.

Nearly all of the dressy gowns this season have a sash tied in the back or

Skirts are much gored and have flounces at the foot. These usually widen toward the back.

Neck ruches made of very fine wh: Brussels net, finely dotted with blace chenille, are stylish and becom-They are finished with long,

Entire gowns of heavy black knotted silk, with deep fringed edges, are in vogue for evening wear. They look best made over a foundation of black satin.

Ribbon trimmings will be much used in autumn millinery on both hats and toques. This is a sensible fashion, since ribbon is not easily hurt by uncertain autumn weather. The wide directoire to ue still remains popular.

A new silk muslin which has some of the stiffness of horse hair and silk moreen is being made up into petticoats. It rustles almost as industrionsly as real silk, and when trimmed with face and plenty of ruffles it is a good substitute.

A somewhat striking effect is produced by the use of white linen duck skirts and black satin or brocaded jackets. There is a blouse front, pre-ferably of white India silk, with a bit of lace and a collar that is much less voluminous than any of those hereto-

New dresses show flounces placed lengthwise of the skirt in the seams. They are much narrower at the top than the foot, and are so arranged that they fall in jabot fashion. They are cut off at the hem of the skirt even with the braid, and simply hemmed.

Double faced cashmere and drap d'ete will share French honors with Venetian cloth in the making of ele-Venetian cloth in the making of ele-gant tailor costumes for dress occa-sions. Silk gimps, velvet ribbon in various widths, white satin and gold braid are the chosen decorations for these gowns; otherwise cream or white satin, overlaid with guipure lace, will be used.

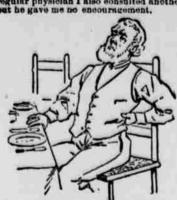

A Domestic Incident.

From the Observer, Flushing, Mich.

"Early in November, 1834," says Frank
cong, who lives near Leanon, Mich., "on starting to get up from the dinner table, I was taken with a pain in my back. The pain increased and I was obliged to take to my bed. The physician who was summoned pronounced my once muscular rheamatism

procumed my once muscular rheumatism accompanied by lumbago. He gave me remedies and injected morphine into my arm to ease the pain.

"My diseased gradually became worse until I thought that death would be welcome release from my aufferings. Besides my regular physician I also consulted another, but he gave me no encouragement.

On Getting Up From the Table.

on Getting Up From the Table.

"I was finally induced through reading some accounts in the newspapers regarding the wonderful cures wrought by Dr. Williams' Pink Pills for Pale People, to try them. I took the pills according to directions and soon began to notice an improvement in my condition. Before the first box was used I could got about the hones, and after using five boxes was entirely cured.

"Since that time I have felt no return of the rhounatic pales. I am confident that Dr. Williams' Pink Pills saved my life and I try to induce my friends who are sick to try the same remedy. I will girally answer inquiries concerning my sickness and wonderful ours, provided stamp is enclosed for ready.

Sworn to before me at Venice, Mich., this loth day of April, 1893.

G. B. Goldestith, Justice of the Peace.

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. D artness is caused by an unfamed condition of the muocus lining of the Eastachian Tube. When this table gets infismed you have a runbling sound or imperfect heaving, and when it is entirely closed Deafness is the result, and unless the infiammation can be taken out and this tube restored to the normal condition, hearing will be destroyed for-ver. Nine cases out of ten are caused by catarrh, which is nothing but an infiamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh (ure. Send for circulars, free.

LADY AGENTS WANTED—GOOD PAY, Address: DR. J. H. DYE MEDIOAL INSTITUTE, Dent. A. BUFFALO, K. I.

Slang from the Days of Old Re Passing through a vacant lot the other day where some boys were having a game of ball. I heard one of them who had got a rap on the knuckles from a "foul," exclaim, "Jiminy, that hurts!" and then, after rubbi fingers a moment, he went back to his place on the field, little dreaming that he had just uttered a solemn invocation to the old Roman demigods Castor and Pollux. For our vulgar "jiminy" is but a corruption of the Latin "gomint," twins, a name applied to Castor and Pollux, the twin sons of Jupiter and Leda. These hero gods were the patrons of games and festivals of all kinds, and the especial friends of travelers; hence, when an old Roman ex-claimed, "O Gemini!" it was a devout appeal to the gods for help or protection, very much the same as when a buight of old called on his patron saint -Miss E. F. Andrews.

CHOOSE FOR YOURSELF.

CHOOSE FOR YOURSELF.

We usually advertises specimen bargain from one of our casalogues, but we don't do so in this solvertisement because we're perpleased. Our furniture catalogue consists of 160 pages, every page filled with bargains. Now, how are we to select one? We say to you, if there's anything on earth in the furniture or carped line that you want, you'll find it in our catalogues at least 40 per cent. cheaper than you can buy it anywhere else.

Would we spend our money advertising our furniture and carpet catalogues (they're absolutely free, not even a stamp necessary) if they weren't worth having? Not much. If you get these catalogues you'll see for yourself what an encomonis amount you can save by huying from mill owners and furniture manufacturers like we are.

That carpet catalogue that we are so anxious you should have, is the finest thing an artist ever designed, and you can select carpet from it just as though you were in the sample room of one of our mills, because it's lithographed in ten colors from hand painted plates.

We couldn't exaggerate the value of our furniture cataloge if we tried. Just shink of 150 large pages devoted to furniture, and every page filled with bargains. Will you be a friend in yourself? Will you write for those catalogues at once? Address (exactly as below).
