The falling of a leaf is brought about by the formation of a thin layer of vegetable tisue at the point where the leaf stem joins the branch of the tree. After the leaf ceases to make starch and sugar for the tree, the tissue begins to grow, and actually cuts the leaf. The falling of ripe fruit is dependent upon the same process.

Coughs of an Engine

The cough, or puff, of a railway engine is due to the abrupt emission of waste steam up the chimney. When moving slowly the cough can of course be heard following each other quite distinctly, but when speed is put on the puffs come out one after the other much more rapidly, and when eighteen coughs a second are produced they can not be separately distinguished by the ear. A locomotive running at the rate of nearly seventy miles an hour gives out twenty puffs of steam every second that is, ten for each of its two cylin-

TRADE REVIEW.

Large Sales Marked by Small Profits Activity in the Wheat Market.

Large Sales Marked by Small Prefits—Activity in the Wheat Market.

R. G. Dun & Co.'s weekly review of trade reports as follows for last week: With actual payments through clearing houses 19.2 per cent. larger than in the same week of 1892, it cannot be said that business is in any sense falling off, and yet many are complaining because the amount realized as profit is smaller than was formerly realized in good times. In almost every branch of business trade is now transacted on a narrower margin of profit than in any other time of fair prosperity.

There is a great change, and perhaps a permanent one, in the percentage of profits derivable from trade and manufacture, as well as in the profits obtainable by transporters. Progressive civilization calls for a lower range of profits and of prices as the volume of business transacted increases in order to make possible improvements in the condition of the working millions.

Wheat business is more active, with prices about 2c higher for spot and rearly 3c for the December option. Very heavy purchases have been made within the past few days, not as yet reflected in the official record of shipments, but the exports from both coasts, flour included, have been 4,191,-779 bushels, against 4,886,015 bushels for the same week last year. It is

ments, but the exports from both coasts, flour included, have been 4,191,-770 bushels, against 4,886,015 bushels for the same week last year. It is especially interesting that in spite of the general disposition of farmers to hold back their wheat, the western receipts have been for the week much larger than last year, and for two weeks 29,790,495 bushels, against 16,-696,554 bushels last year.

While some woolen mills have started operation during the week, quite as many have stopped. Although wool is about 10 per cent, lower than it was February 1, the manufacturers are not buying and the market is remarkably dull, with sales during the past two weeks of only 6,179,700 pounds at the typee chief markets, against 24,331,600 lnst year, and 14,536,300 in 1896, and 13,-703,800 in 1892. The general feeling is that the price of material must decline before the manufacture can much increase its sales. Orders for goods have been a little better and a few mills have resumed operation, but there is as yet no such demand as is necessary to sustain current prices of wool.

The iron manufacture again reports a small increase in weekly output, 215,-125 tons, against 213,043 tons a month ago, and with the decrease in quantity of unsold stocks on hand outside the great steel companies, the apparent consumption for the month of September was 983,304 tons, against 980,503 tons in August. There are quite heavy eastern orders for foundry iron, fully supporting prices, and Atchison prices of local iron are strong, with less disposition to sell southern pig at reduced quotations.

position to sell southern pig at reduced quotations.

The orders for finished products include a very heavy demand for plates, especially for shipyards, several of considerable magnitude for structural works covering about 15,000 tons, and an unusually heavy demand for bars, especially on account of orders for car works, although there has been an expectation of a big break in prices of cotton ties. In pipes Pittsburg has been able to place orders for thirty miles of ten-inch pipe, and other orders for 100 miles are practically closed.

Failures for the week were 205 in the United States, against 223 last year, and twenty-five in Canada, against thirty-six last year.

Spaniards Want an American Flag. Spanisris Want an American Fing.

The Spanish club of Santingo has applied to the palace for an American fing to hoist over the club building. The last one they had was given to Col. Ray to take to Manzanillo. Blust Love Men. Every relation to mankind, of hate or scorn or neglect, is full of vexation and torment. There is nothing to do with men but to love them; to contemplate their virtues with admiration, their faults with pity and forgiveness Task all the ingenuity of your mind to devise some other thing, but you can never find it. To hate your adversary will not help you; to kill him will not help you; nothing within the compass of the universe can help you but to love him. But let that love flow out upon all around you, and what could harm you? How many a knot of mystery and misunderstanding would be united by one word spoken in simple and confiding truth of heart! How many a solitary place would be made glad if love were there, and how, many a dark dwelling would be filled with light!
