We may gain fame in different ways, no matter in what sphere of life we live. Look at the life of Frances E. With ard. how beautiful, how unexampled. Al ways helping the poor and downtredden, giving all she had for their comfort. It has been said that often in times of hunger she preferred to do the work she believed God had called her to do than supply her own needs. She did not want fame, what she did was for the good of mankind, and the world is better for her having lived in it. There is a story told of a prima donna. She left father, mother and lover and went to Europe; there she studied music with the greatest artists, but oh! the hard work, the trials and the troubles she endured. Her advice to all young people wishing fame was, "Be sure you care more for fame than anything else in the world and then devote your whole life to it and you will succeed." Fame cannot be gained in a day; it takes months, even years of hard work to achieve the fame of an orator and so with everything else. Once in a great while a man performs some heroic deed which writes his name for all time and eternity with those of cherished reputations, but this occurs very seldom. We cannot all be nobly known but all have our parts to take in this drama of the world, no difference how insignificant they be.

Extraordinary Tour to California via Pennsylvania Railroad.

America is a great country. In variety and grandour of natural scenery it is unrivaled. To traverse it, to behold its diversities and its wonders is a liberal education, a revelation to the immured metropolitan citizen. The Personally-Conducted Tour to California under the direction of the Pennsylvania Railroad Company, which leaves on February 9, affords a most excellent opportunity to view the vast variety and boundless beauty of this marvelous land. The party will travel over the entire route in the model Pullman train of smoking, dining, sleeping and observation cars exhibited at the World's Fair, Chicago, and subsequently at Atlanta, Nashville and Omaha. This train will be placed in service for the first time on this occasion, and will be in charge of a Tourist Agent and Chaperon who will look after all details of the trip as well as the individual welfare of members of the party. Stops will be made at Mammoth Cave, New Orleans during the Mardi Gras Carnival, El Paso, Los Angeles, San Deigo, Redlands, Riverside, Pasadena, Santa Barbara, Montery, Del Monte, Santa Cruz, Mount Hamilton, Menlo Park, San Francisco, Salt Lake City, Glenwood Springs, Cologado Springs, Manitou and Garden of the Gods, Denver and Chicago. Saved His life and Kicked Him.

Perk and Quirk were walking along the crowded street, f-cling very kindly toward themselves and the rest of humanity. Just as they reached the middle of a crossing one of those aggravating individuals who walk one way and look another stepped directly in front of a cable car which was rounding the corner. Of course the car had no fender on Nearly everybody in the vicinity velled, and naturally the bewildered man looked in the wrong direction.

Quirk didn't yell, though. He jumped to the side of the track, grabbed the man by the collar and yanked him clear of the tracks and almost out of his shoes. Then he gave him another ferocious jork to get him out of the way of an express wagon, and, getting him at proper range at the same time, he gave the poor man a kick that most have driven his spine up into his bat. And with the kick Quirk roared:

"Confound you, keep your eyes open when you are on the street.

Quirk looked unutterably savage, but Perk tottered to the curb, sat down and laughed until the tears came. Then he

Glass Cutting.

Boston Transcript.

The layman who is introduced to the mysteries of cutting glass for the first time is amazed at the amount of work that the workman does entirely by his eye. The first stage of the bowl which is to be out finds it in a perfectly plain condition, not a scratch upon it and only a half dozen or more marks in red chalk, which mean absolutely nothing to the unpracticed eye. But to the workman they mean the whole pattern. Perhaps the dish is a salad bowl. The marks in chalk will run from the edge, five intervals apart, down to the center of the bowl at the bottom. In one of the divisions of the bowl thus marked there may be a little further marking in the shape perhaps of a diamond. This indicates the pattern into which the bowl is to be cut, and it will be repented in each of the five divisions. All the intricacies of the design the workman has in his head, and they develop on the glass in a way which seems to the looker on absolutely marvelous .-New York Times.

The Stage In Shake-peare's Time.

John Churton Collins, the distin-guished essayist and Quarterly Reviewer, has been lecturing on the theater of Shakespeare's time. The typical theater then was of wood, circular or hexagonal in form, being modeled externally on the general structure of the old amphitheaters for bull and bear baiting. The interior was fashioned after the manner of an inn yard. The pit was scorched by the sun, while the actors were protected by a thatched penthonse. The scenery was supplied by the imagination of the audience, but what was lacking in scenery was made up in noise and bustle, things being kept very lively in that direction. The most numerons class among the audience were roist-

On the stage and in other parts were fashionable dandies, swashbucklers, writers and actors. These, it is interesting to know, always had a free pass. The play lasted two hours on an average, and, considering the noise and the smells which accompanied the performance, one was, Mr. Collins presumed, not sorry when "the actors dropped on their knees to pray for the queen.

The Cheetul.

The axis, or cheetul, deer of the Indian jungle can claim to be the most ornamental of all the 36 races of deer to be seen gathered together at Woburn. In the early summer, when all the other deer except the wapiti are either shedding their horns or "in the velvet," the axis are in perfection, both of color and antiers. The large herd of this species looks as if carved out of ivory and red gold in the sunshine and verdure of English scenery. Their horns are almost white, their eyes and muzzles of jet black, their throats white and their backs and sides a brilliant golden tan, spotted with round dots of purest white. It is worth a pilgrimage to Woburn to see these deer alone. They breed constantly, sometimes producing two fawns in the twelvemonth.—Spectator.

Welcoming Fresh Cares. 'As far as fresh cares are concerned."

said a man of mature years, "as I grow older I rather welcome them. They blot out the old cares completely and so show how unsubstantial they were, and I know that in due course these new cares will be supplanted by others and will as completely give way to them. Thus I am constantly reminded that our cares really don't amount to much. except as we imagine them great, and I expect to see the day when I shall give but scanty room to them and not be disturbed by them at all."-New York Sun

Blind Reading.

By a system of nameral type invented by Rev. W. H.
